Given the diverse roles our military performs—from safeguarding nuclear weapons to fighting terrorists in the jungles of the Philippines—rigorous training is essential to ensure our troops are ready for action and come home safely when the job is done. To achieve this objective, H.R. 3326 provides \$154 billion for operations and maintenance accounts. During the 1990s, our nation had a “hollow military”—filled with people and equipment, but lacking the necessary training and readiness to be successful. We must never allow this to occur again.

Ensuring that our military has the finest equipment available is essential, and H.R. 3326 makes some necessary investments. With funding for the Next Generation Aerial Refueling Aircraft replacement, the Navy's Multi-mission Maritime Aircraft, and additional C-17 aircraft, among many other programs, our troops will have the most advanced equipment to effectively carry out the will of this nation and return home safely. These programs also create high-paying Kansas jobs that we so desperately need.

While this legislation makes the right investments in our fighting men and women and their families, it also includes a dangerous provision for our nation: allowing terrorists detainees currently held at Guantanamo Bay to be brought to the United States.

Terrorists do not belong in the streets or prisons of America. Following the dangerous decision to house unrepentant terrorists in the Midwest, this legislation does nothing to restrict the president's obsession with closing the detention facility at Guantanamo Bay and bringing terrorists to the United States. We have the most secure, state-of-the-art detention and interrogation facility in the world at Guantanamo Bay. That is where the terrorists should remain. They should never be brought to the United States.

Although Democrats continue to play politics with this spending bill, I cannot do the same. Our men and women in uniform deserve the resources to carry out the will of this nation, and this bill provides those. Therefore, I intend to vote for H.R. 3326 and I encourage my colleagues to do the same.

Mr. STARK. Madam Speaker, I rise to oppose yet another increase in war and defense

spending. I have never voted for a Defense Appropriations bill. I will not start today. Throwing more money toward a war in Iraq that should never have been started and a war in Afghanistan that should be over diminishes our ability to address the real issues impacting families.

War spending already swallows over 50 percent of our discretionary budget. This bill will add \$11 billion to an already bloated Defense budget, as President Obama eyes billions more for a troop increase in Afghanistan.

There are good things in this bill. I helped write provisions that will extend COBRA subsidies and prevent pay-cuts to Medicare physicians. The bill also extends unemployment benefits at a time when Americans are struggling to find jobs. While I support these provisions, I cannot support a bill where the good provisions are dwarfed by the \$636.3 billion outlay for defense.

The right priorities for Congress are addressed in another bill we will consider today, the Jobs for Main Street Act (H.R. 2847). This legislation would put people to work rebuilding our country. It would invest in building schools, improving our transit systems, and upgrading our water infrastructure. It would prevent the lay-offs of teachers, police, and firefighters.

The Jobs for Main Street Act also would provide better protections for laid-off workers than the provisions in the Defense bill. It would extend emergency unemployment insurance benefits for an additional six months, and allow millions to maintain health care by expanding the COBRA subsidy to 15 months and extending the eligibility period to June 30th. This is the type of escalation our country needs.

Congress should not be giving more money to the Pentagon to wage war. We should be focused on creating jobs, providing health care for all Americans, and improving our education system. That is why I am voting for the Jobs for Main Street Act and against the wasteful Defense Appropriations bill.

Ms. JACKSON-LEE of Texas. Madam Speaker, I rise as a Member of the Foreign Affairs Committee to support House passage H.R. 3326, making appropriations for the Department of Defense for the fiscal year ending September 30, 2010. I urge the Congress to support the President's initiatives to terminate or reduce programs that fund narrowly focused activities, duplicate existing programs, or that have outlived their usefulness, specifically including the Kinetic Energy Interceptor program. The Congress is encouraged to adopt proposals made by the administration that would better target scarce resources and redirect funds to programs with greater potential for results.

I believe in a strong procurement approach that takes advantage of the efficiencies associated with an award to a single contractor.

I look forward to working with the Congress to address concerns regarding statutory direction to re-organize certain offices within the Office of the Director of National Intelligence (ODNI), reductions to cyber security programs, and cuts to classified activities in ODNI.

The measure provides more funding for equipment depleted by the wars in Iraq and Afghanistan, special pay raises, and quality of life improvements for the troops and their fam-

ilies. It partially offsets these increases by cutting funding from current levels for missile defense and futuristic programs like the Future Combat System of new vehicles. I support the President in adding more money into the budget for our military families. I am disappointed that this bill appropriates no funds for the closure of the prison at Guantanamo, and blocks the transfer of prisoners. The bill references a detailed plan for the disposition of the detainees to be submitted and I look forward to seeing this plan. It also provides a 3.4% pay increase for military personnel, and a 2% pay raise for civilian federal employees which is vital in maintaining the morale of the troops and the federal law enforcement personnel that help secure America.

Finally, this bill prohibits the use of funds in the bill to establish permanent military bases in Iraq or U.S. control of Iraqi oil resources.

The bill also continues the prohibition on the use of funds provided for the Iraq Security Forces for the construction of facilities for the Iraqi government.

I support all provisions that require the Defense secretary to report to Congress on troop drawdown status and goals relating to the withdrawal of U.S. forces from Iraq by the end of 2011. The report, which is due 90 days after enactment and every 90 days thereafter, must include the following:

A detailed, month-by-month description of the transition of U.S. military forces and equipment out of Iraq;

A detailed, month-by-month description of the transition of U.S. contractors out of Iraq; and

How the Iraqi government is assuming the responsibility for reconciliation initiatives as the U.S. role transitions.

It is absolutely imperative that the U.S. Congress and the President agree on an eventual drawdown and removal of our forces from Iraq.

I am proud of the support to the military and their children that the FY 2010 Defense Appropriations bill provides. Congress approved a 3.4 percent increase in military pay, 0.5 percent above the Department of Defense request. This bill includes \$29.2 billion for medical care for the Defense Health Program, which provides medical care for members of the armed services and their families. Included in the health care funding are \$372 million for military medical research and \$120 million for Traumatic Brain Injury and Psychological Health Research.

The FY10 Defense Appropriations bill included \$472.4 million for Family Advocacy programs including Family Support and Yellow Ribbon. These programs include quality child care, job training for spouses, and an expansion of counseling services. For the families that experience the daily heartache of having a loved one far away, these programs reach out and provide support. I want to thank Chairman MURTHA for his untiring support of our troops and their families.

I want to stress that none of these funds will go toward the administration's plan to send 30,000 additional troops to Afghanistan, and I will continue to scrutinize the economic, military and social impacts of the administration's request. I am concerned about the cost of sending additional troops, as well as the effect

that a larger presence in Afghanistan will have on troop morale. The White House estimates that it will cost \$1 million per year for each additional soldier deployed, and I believe that \$30 billion would be better spent on developing new jobs, and fixing our broken healthcare system, as well as in using "smart power" to peacefully work on the Afghan cease-fire.

The cost and the long-term commitment were given renewed significance on Tuesday, December 9, 2009 when Afghan President Hamid Karzai said, as reported in the New York Times, that "Afghanistan would not be able to pay for its own security until at least 2024." Secretary Robert Gates echoed that sentiment when he said that "For another 15 to 20 years, Afghanistan will not be able to sustain a force of that nature and capacity with its own resources." If our strategy is to use \$50 billion to build up Afghanistan's police and military forces as well as a decades-long commitment, I am not sure that the American people will support such an effort.

Yet, no matter your opinion on their role in conflict, it is important that our troops are prepared for the current combat environment. As such, the Defense appropriations bill includes \$154 billion to increase the readiness of our armed forces, helping to refocus our military away from the Cold-War era type of conflict.

A bill of this magnitude must include safeguards against waste, abuse, and fraud. Not only does this bill increase the resources at the disposal of the Department of Defense (DOD) Inspector General, it also enhances the focus on taking inherently governmental functions out of the hands of contractors.

Finally, it will be a great celebration in Houston with the establishment of the Riverside General Hospital Post Traumatic Stress Disorder Center with a \$1 million grant. Additionally, I have received over \$4 million in green job, technology, and medical research funding. These dollars will work for the 18th Congressional District and the American people.

Ms. WOOLSEY. Madam Speaker, I rise in opposition to H.R. 3326, the Department of Defense Appropriations Act.

The bill extends unemployment and COBRA benefits, which I have fought for and continue to support.

It also funds a number of employment, medical, and transportation programs that I also support.

Nevertheless, I urge my colleagues to oppose this bill because it continues funding for our futile efforts in Iraq and Afghanistan, which have already cost our country too much in blood and treasure.

Instead of pursuing military action where there is no military solution, we need a new strategy that relies on the effective tools of what I call smart security.

These tools include diplomacy, humanitarian aid, economic development, education, civil affairs, and better intelligence and police work to search out and capture extremists.

In the case of Afghanistan, for example, a great majority of all further funding should be devoted to these smart security efforts.

Madam Speaker, let's change our strategy before it's too late. We can begin by voting against this bill.

Ms. MCCOLLUM. Madam Speaker, I rise to express my support for H.R. 3326, the Department of Defense Appropriations Act for Fiscal

Year 2010. This legislation provides the needed support, resources, and equipment for America's brave men and women in uniform.

With the passage of H.R. 3326, Congress will affirm its commitment to America's Armed Forces, both overseas in a theater of war and here at home when they return from duty. I am pleased that this bill recognizes the incredible sacrifice made by our troops and their families. It provides an increase in military pay, first-class medical care, and expanded support and counseling for military families enduring the burdens of war.

But the sacrifices made for national security should not be for our troops and their families to bear alone. When the country commits to fighting a war, it must also commit to paying for it. All additional funding necessary for stability in Afghanistan and Pakistan must be paid for today, rather than added to America's mounting debt. That is why I joined my colleagues in cosponsoring H.R. 4130, a bill that would establish a temporary surtax to pay for the war in Afghanistan.

Madam Speaker, I am also pleased that H.R. 3326 increases oversight of the Department of Defense to reign in waste, fraud, and abuse. It ensures that defense personnel—not outside contractors—perform the department's most critical functions, and calls for additional investigators to oversee those contracts that are outsourced.

Finally, in addition to critical spending for our national defense, this package contains key items to help Americans during our economic downturn. H.R. 3326 will extend expanded unemployment benefits, health insurance for unemployed workers, and enhancements for small business loans. It will delay cuts to Medicare physician payment extensions, and help meet the growing demand for nutrition assistance for low- and middle-income Americans.

Ms. LEE of California. Madam Speaker, I rise today in opposition to H.R. 3326, the Department of Defense Appropriations Act for FY 2010.

Critical provisions have been added to this bill in order to help those facing incredible hardships during this difficult economic time.

The extension of expanded unemployment benefits until the end of February is a vital stopgap measure for those in dire need, and I would like to stress that this is only a piece of our urgent responsibility to restore the economic livelihood, and promise of opportunity to so many individuals and communities across the country.

I am also pleased to see that H.R. 3326 includes language prohibiting the establishment of permanent military bases in Iraq or Afghanistan.

Unfortunately, I cannot support the \$125 billion included in this bill for ongoing military operations in Iraq and Afghanistan, nor can I support a continuation of runaway defense spending especially at a time when individuals and families across this nation are facing enormous challenges in simply trying to make ends meet.

Madam Speaker, I have been clear in my respectful disagreement with the President's decision to escalate the United States military presence in Afghanistan, as well as my belief that the situation in Afghanistan will not be solved with a military solution.

This bill does not include additional funding for the proposed troop deployments, and I am hopeful Congress will hold an honest debate and up-or-down vote on the issue of a military escalation prior to obligating federal resources.

The direct costs of two wars in Iraq and Afghanistan have reached nearly \$1 trillion, and the indirect costs to our national security, our economy, and to our brave men and women in uniform are immeasurable.

We further cannot afford to squander our resources on costly cold-war era weapons that in many cases are outdated and truthfully inappropriate for reducing the real threats facing our nation.

The fact is, as we work to reform our nation's healthcare and education systems, invest in housing and infrastructure, and put American's back to work, sending more than 50 percent of the federal discretionary budget to the Pentagon represents a clear and unacceptable tradeoff.

For those reasons I cannot support this bill.

Mr. YOUNG of Florida. Madam Speaker, I yield back the balance of my time.

Mr. MURTHA. I yield back the balance of my time, Madam Speaker.

The SPEAKER pro tempore. Pursuant to House Resolution 976, the previous question is ordered.

The question is on the motion offered by the gentleman from Pennsylvania (Mr. MURTHA).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. YOUNG of Florida. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, this 15-minute vote on adoption of the motion will be followed by a 5-minute vote on the motion to suspend the rules with regard to H.R. 1110, if ordered.

The vote was taken by electronic device, and there were—yeas 395, nays 34, not voting 5, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining in this vote.

□ 1400

Messrs. COSTELLO, SHIMKUS, CHAFFETZ, LEWIS of Georgia, KAGEN, Ms. VELÁZQUEZ, Messrs. PAYNE, TOWNS, and Ms. CLARKE changed their vote from “yea” to “nay.”

Messrs. TURNER and RYAN of Wisconsin changed their vote from “nay” to “yea.”

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Ms. ESHOO. Madam Speaker. I was not present during rollcall vote No. 985 on December 16, 2009 because I was in a secure room for a restricted briefing.

On rollcall vote No. 985, I would have voted “yea.”

Stated against:

Mr. CONYERS. Madam Speaker, today, I inadvertently cast a “yea” vote during rollcall vote 985. My intention was to cast a “nay” vote on H.R. 3326, a bill making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes.

PHONE ACT OF 2009

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 1110, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. CONYERS) that the House suspend the rules and pass the bill, H.R. 1110, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

RECORDED VOTE

Mr. TIM MURPHY of Pennsylvania. Madam Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 418, noes 1, not voting 15, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members have 2 minutes remaining in this vote.

□ 1407

So (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. RADANOVICH. Madam Speaker, I was unable to make today's votes on the House

floor due to a family illness. Had I been present I would have voted as follows:

"Yea" on rollcall vote No. 985, on the motion to concur in the Senate Amendment with a House Amendment to H.R. 3326, the Department of Defense Appropriations Act of 2010.

"Aye" on rollcall vote No. 986, to suspend the rules and adopt H.R. 1110, the PHONE Act of 2009.

PERSONAL EXPLANATION

Ms. HIRONO. Madam Speaker, on rollcall No. 985 and 986, had I been present, I would have voted "yes" on both.

FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 2010

Mr. OBEY. Madam Speaker, pursuant to House Resolution 976, I call up the joint resolution (H.J. Res. 64) making further continuing appropriations for fiscal year 2010, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Pursuant to House Resolution 976, the joint resolution is considered read.

The text of the joint resolution is as follows:

H.J. RES. 64

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Continuing Appropriations Resolution, 2010 (division B of Public Law 111-68) is further amended by striking the date specified in section 106(3) and inserting "December 23, 2009".

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. OBEY) and the gentleman from California (Mr. LEWIS) each will control 30 minutes.

The Chair recognizes the gentleman from Wisconsin.

Mr. OBEY. Madam Speaker, before I start, I don't see either one of them on the House floor now, but I just want to take this time to note that today is the birthday of the distinguished gentleman from Florida (Mr. YOUNG), the ranking member of the Defense appropriations subcommittee, and also of the gentleman from Washington (Mr. DICKS), who is the second ranking Democrat on the same subcommittee. So in their absence, I think we wanted to wish them well.

With that, Madam Speaker, I would simply say this is a simple joint resolution, a continuing resolution, which takes the Congress to December 23, next Wednesday. It is made necessary by the fact that it is just possible that the Senate might not finish its work before the 18th. They have been known for their speed, but this may be an exception. It is also useful in order to give the President additional time to review the Defense bill before he signs it.

With that, I would urge support, and I am prepared to yield back after the gentleman has made his remarks.

Mr. LEWIS of California. Madam Speaker, this is a simple 5-day CR, and I happily yield back the balance of my time.

Mr. OBEY. Madam Speaker, I would again urge support for the resolution, and I would yield back the balance of my time.

The SPEAKER pro tempore. All time for debate has expired.

Pursuant to House Resolution 976, the previous question is ordered.

The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PERMITTING CONTINUED FINANCING OF GOVERNMENT OPERATIONS

Mr. STARK. Madam Speaker, pursuant to House Resolution 976, I call up the bill (H.R. 4314) to permit continued financing of Government operations, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to House Resolution 976, the bill is considered read.

The text of the bill is as follows:

H.R. 4314

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONTINUED FINANCING OF GOVERNMENT OPERATIONS.

Subsection (b) of section 3101 of title 31, United States Code, is amended by striking the dollar amount contained therein and inserting "\$12,394,000,000,000".

The SPEAKER pro tempore. The gentleman from California (Mr. STARK) and the gentleman from Nevada (Mr. HELLER) each will control 30 minutes.

The Chair recognizes the gentleman from California.

□ 1415

Mr. STARK. I yield myself such time as I may consume.

This bill is necessary to allow the government to keep operating past the new year so that we can adjourn for the year. The Treasury Department has told us we will reach our current limit on the national debt on December 31—Happy New Year. Unlike past years, the Treasury Department has informed us they don't have the ability to maneuver and buy more time, so the United States would begin to default on its debt if we do not act.

The bill would raise the debt limit by \$290 billion, enough to last through February 11. Unfortunately, we will have to revisit this issue early next year. I wish we could have avoided that, but to do so, we would have had to resolve differences with the Senate

over a budget commission and a statutory PAYGO. With the Senate preoccupied on other matters, that would be impossible before the holidays. Even if the Senate were to pass the larger debt limit increase we sent over to them, we would still have to act again next year.

It's important that we do this, as I said, to keep the government running. I don't like to raise the debt limit, but I do like being in the majority, and I do like seeing us pay our bills because we have an international obligation to many of our creditors.

I reserve the balance of my time.

Mr. HELLER. Madam Speaker, I yield myself 2 minutes.

Madam Speaker, here we go again. Christmas is a week away and Congress is scrambling at the last minute just so we can go home. While Americans are doing last-minute holiday shopping, the majority party is doing its last-minute spending. This year, many families are cutting back on their holiday shopping. The average holiday spending by Americans this year has dropped to \$343 per person from \$372 a year ago. You would think that during these tough times when most Americans are forced to tighten their belts, Congress would do the same. No chance under this majority.

This majority stumbled into 2009 with a budget that raised the deficit by \$1.8 trillion. Then Congress decided to pass an \$800 billion stimulus bill, \$3 billion on Cash for Clunkers, \$1.3 trillion on the Democratic health care bill, a trillion dollars on cap-and-trade and, recently, another \$447 billion was spent on Washington, D.C., bureaucrats. After all this spending, the national debt is now \$12 trillion. Every American citizen will now owe more than \$39,000 to pay for Washington's spending.

Now Democrats want to raise the debt limit to allow even more spending in 2010. The real fat cat is the Federal Government which spends, spends, spends while the American public gets stuck with the bill.

I urge my colleagues to reject raising the debt limit. Give the gift that America deserves: a responsible Federal budget.

Merry Christmas to everyone.

I reserve the balance of my time.

Mr. STARK. Madam Speaker, I ask unanimous consent that the distinguished committee member of Ways and Means, Mr. NEAL of Massachusetts, be allowed to control the time for our side.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. NEAL of Massachusetts. Madam Speaker, I yield myself such time as I might consume.

Madam Speaker, I rise in support of the debt limit legislation we are considering today, and I want to thank Mr.

RANGEL for his hard work on the bill in the waning days of the Congress this first session.

Let me talk about what the bill does. This bill is simply about continuing operations for the Federal Government. That is the title of the legislation. "Continuing operations" means getting the Social Security checks out on time, an almost sacred duty that we have. This means providing support for our troops and keeping our museums and our parks open. That is what an increase in the debt limit will allow. Simply stated, this is about bills that have already been incurred.

Now, I will, during my time here, resist the temptation to become overly partisan and speak specifically to the issue that is in front of us until there is a misstatement of the facts in opposition.

What this bill does not do is increase or decrease spending. That is a key consideration. Those decisions have already been made through the regular order. Let me emphasize the following: This bill does not raise nor does it cut taxes. That is different legislation. I respect the opinion of all Members here—who, by the way, my hunch is have been on all sides of this issue during their time here in the Congress. But we all desire the same, and that is to bring our budget into balance with the future. Beyond that, there is broad agreement. But this bill is simply paying the check after the items have already been ordered. This bill would raise the limit by \$290 billion, which is estimated to allow the government to operate through February 11 and allow us to adjourn for the year.

Despite what some might say, the Treasury Department will reach the current limit on the national debt by December 31, and they have told us that there is no ability to do extraordinary measures that will, indeed, stretch that out.

Now, I hope that the offering that I make to resist demagoguery on this issue will be met. If not, we certainly will have an opportunity during the course of the next hour to slug it out based upon the facts, and I hope that we will regard Social Security and veterans bills that have already been incurred to be paid. We certainly can have moments of instructions here—we're all indeed prepared for that on all sides—but I hope that the opportunity to resist the temptation to dismiss the reality of what we're doing here will be before all of us.

I reserve my time.

Mr. HELLER. Madam Speaker, I yield 1 minute to the gentleman from California (Mr. HERGER).

Mr. HERGER. Madam Speaker, President Obama and congressional Democrats have maxed out the national credit card with reckless spending, and they're back for more.

The American people are tired of overspending and tired of policies that

have done nothing to lift us out of this economic downturn. Democrats rammed through a so-called stimulus that left us asking: Where are the jobs? Now congressional Democrats are asking for more money that they will turn around later this afternoon and spend on another stimulus bill that spends even more on failed policies.

Madam Speaker, it's time for Congress to say "no" to endless debt that is an albatross around the neck of our Nation's economy and future generations. Vote "no" on this increased debt limit.

Mr. NEAL of Massachusetts. Madam Speaker, I would like to yield to a voice of fiscal responsibility here in the House, to Mr. BOYD, the gentleman from Florida, for 2 minutes.

Mr. BOYD. I thank my friend, Mr. NEAL, for yielding.

I think all of us here today—certainly in this game of inside baseball—understand that we have to raise the debt limit. We don't have a choice to let our Nation go into default on its bonds.

But I do come today to ask you to support it. I come reluctantly. And I am glad to hear that my friends on both sides of the aisle now are for fiscal responsibility.

I think many of us over here have been saying for years—particularly for the last 8, 9 years—that policies that we were pursuing starting in 2001 of spending more than we were taking in on an annual basis had to stop. We found ourselves in pretty good shape in 2001, and then we changed the policies, and you know the rest of the story, the history of that.

Many of us have been working all during that 8-year period to try to re-install the tools that we could use to return fiscal discipline to our government: the tools such as pay-as-you-go rules, something that we had in place in the 1990s that was allowed to expire by the Congress and the administration in 2002; discretionary spending limit.

There are lots of tools that can be used, but in the last 9 years, this Congress and the administrations have rejected those tools, and it's time for us to put those back into place.

We don't have the will here at the United States Congress to discipline ourselves. I think both parties have proven that over the years. So we have to come back with those tools such as pay-as-you-go, discretionary spending caps, sequestration, whatever it takes. There's a good idea floating around on both sides of the Capitol here. It's called the SAFE Commission.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. NEAL of Massachusetts. I yield the gentleman an additional 1 minute.

Mr. BOYD. So what we're trying to do here is hit the pause button for less than 60 days, and we will move forward, break for the Christmas holiday,

and then come back, and we have to focus on this issue of fiscal responsibility.

I have said to my party leaders, as I have said to the other party leaders over the last 8 years, we have to look beyond the ends of our nose and we have to focus on fiscal responsibility. And the first step we have to do is keep our country from going into default on its bonds. And then we have to move forward to reinstall such tools as PAYGO, commissions, whatever it takes to get us focused on getting our government back to the point of acting in a responsible way for fiscal matters.

Mr. HERGER. Madam Speaker, I yield 3 minutes to the Republican Conference Chair, the gentleman from Indiana (Mr. PENCE).

Mr. PENCE. I thank the gentleman for yielding.

I rise today in opposition to H.R. 4314. It is a bill that will increase the statutory limit on the national debt by \$290 billion.

Now, my distinguished colleague and friend just called that "hitting the pause button," and that was evidence of his characteristic candor, because as everybody in this body knows, this \$290 billion increase in the statutory limit on the national debt is simply a down payment on the nearly \$2 trillion increase in the national debt that this Democratic majority intends to move in this Congress after the first of the year.

Increasing the national debt. You know, it's moments like this that I have really got to say that the American people have had it. I mean, at a time of economic difficulty for working families, small businesses, and family farmers all across this country, a time when families are sitting down at kitchen tables, huddled around aluminum desks in small businesses, in basements with fluorescent lights hanging, they're figuring out where to cut back. They're figuring out what expenses to put off. They're just figuring out how to make it from one month to the next.

And those families and those small businesses don't have the ability to walk down to the bank and just increase their debt limit with the wave of the hand. I mean, they have got to make hard choices. And to their undying credit, the American people are making those hard choices. And the reason they're so frustrated looking at Washington, D.C., today is because they see a national government that is completely out of step with the character and the values and the sacrifice that the American people are practicing every day—not that it's anything new.

As the distinguished chairman just said a few moments ago, when Republicans were in control, we did our share of spending and overspending. Republicans doubled the national debt in the

8 years of the last administration. But this Democratic majority just passed a budget that will double the national debt in the next 5 years and triple it in 10.

□ 1430

After 3 years of Democratic control in the House, the national debt has increased by 39 percent. The national deficit hit a record of \$1.4 trillion. In this fiscal year, it's expected to reach a new record of \$1.8 trillion. Millions of Americans are asking, Madam Speaker, when will it stop? When will Washington get the message that we can't borrow, spend and bail our way back to a growing America, that we've got to begin, Republicans and Democrats, to practice what we so love to preach when we are home: fiscal discipline, fiscal responsibility? And then we come here right before the Christmas break on the day we are probably headed out of this building, and we're going to pass a \$290 billion increase in the statutory limit on the national debt.

The American people don't want more debt for Christmas. This Congress ought to be sticking around, making the hard choices, reducing the size and scope of government and reforming these entitlements. Do the work the way the American people are doing the work, so help us, God.

Mr. NEAL of Massachusetts. Madam Speaker, before I come to my friend's comments, I want to yield myself such time as I might consume.

Madam Speaker, I spoke with Chairman RANGEL earlier, and it is our intention, as we did this month in passing the Tax Extenders Act of 2009, to make sure that those provisions hold. That bill contains a 1-year extension of dozens of important expiring provisions, including the popular R&D credit, the sales tax deduction and the college tuition deduction, among many others.

We are now hearing the Senate may not take up this provision, or provisions, and pass the bill before they expire on December 31. It is our intention to insist upon the House position and to work to ensure that our bill providing a seamless extension of these tax benefits will be enacted as soon as possible in the new year.

These provisions are crucial for both American business and individual taxpayers, and I am pleased that we were able to get the House to pass this bill before the year concluded, but it is disappointing that the other body will not be able to take it up this year. It is our goal, however, to ensure that this bill will provide a seamless extension when enacted based upon the House measure.

Madam Speaker, I want to thank Mr. PENCE because I thought that the tone of what he offered was entirely reasonable because he didn't pass out partisan blame in the instance that brings us here at this time. But a gentle re-

minder, I don't know how you could have voted for the war in Iraq and not vote now to pay the bill, because that's part of what we are being asked to do today. I understand how difficult this is, why it causes heartburn. But having said that, how can you say that you were willing to commit 160,000 soldiers to Iraq, and when the bill comes due, not pay it? That essentially is the argument that is in front of us today.

And I understand the arguments about those American families who are having a difficult time as we proceed to this holiday season, and we want to be as helpful to them as we can. And as they gather around the kitchen table to talk about the problems they have, we understand that we want to provide as much support for them as we can. But let's not forget the Social Security recipients who are currently sitting around the table as they watch this debate, wondering if their checks are going to be mailed to them on time at the first of the year.

With that, I reserve the balance of my time.

Mr. HELLER. Madam Speaker, I yield such time as he may consume to the ranking member of Ways and Means, the gentleman from Michigan (Mr. CAMP).

Mr. CAMP. I thank the gentleman from Nevada for yielding, and also I want to thank him for his leadership on the Ways and Means Committee this year.

The bill before us is a candid admission by the majority that their tax, borrow, and spend ways have driven America deeper and deeper into debt. In fact, because of the failed trillion-dollar stimulus spending bill, America's unemployment is higher than predicted and revenues are lower. But that hasn't stopped the majority from continuing to spend, spend, spend.

Just last week, the majority rolled six major spending bills into one omnibus bill that increased, on average, Federal spending by 11 percent. Now, the bill before us asks us to increase the debt limit another \$290 billion. The American people are asking: where are the jobs? But all they have been shown is more deficits and more debt.

Let's be honest with the American people. It really isn't \$290 billion the majority wants to increase the debt limit by. It's more like \$1.8 trillion. In a few short months, we'll be right back here voting on another bill to increase the debt limit, probably by another \$1.5 trillion.

At the end of 2007, the public debt equaled 65 percent of our gross domestic product, or GDP. By the end of 2009, the figure will exceed 83 percent, and according to President Obama's own budget projections, it will exceed 100 percent of gross domestic product by 2011. Think about it: at the rate the majority is spending, the Federal debt in 2011 will exceed the value of all

goods and services produced by the economy that year.

This isn't just a Democrat or a Republican problem. It's a huge problem for every single American. It threatens our economic recovery and our future prosperity. So let's remember the words of then-Senator Obama in 2006 who warned of the dangers of raising the debt limit without addressing the underlying cause. Here is what he said: "The fact that we are here today to debate raising America's debt limit is a sign of leadership failure. It is a sign that the U.S. Government can't pay its own bills. It is a sign that we now depend on ongoing financial assistance from foreign countries to finance our government's reckless fiscal policies."

"Increasing America's debt weakens us domestically and internationally. Leadership means 'that the buck stops here.' Instead, Washington is shifting the burden of bad choices today onto the backs of our children and grandchildren. America has a debt problem and a failure of leadership. Americans deserve better."

Americans do indeed deserve better than what they have received this year. But rather than heed that warning, Appropriations Committee Chairman OBEY recently said: "We don't really have a choice. The bill's already been run up; the credit card has already been used. When you get the bill in the mail, you need to pay it."

The gentleman from Wisconsin was correct: the credit card has been used. But this legislation doesn't pay the bill. It doesn't even make the minimum monthly payment. It simply asks for more credit.

After going on a \$1.4 trillion deficit spending binge and maxing out the taxpayers' credit cards, Democrats are now asking to increase the credit limit. We should not be asking for more credit. We should be developing a plan to control Federal spending so that future generations are not trapped under this mountain of debt.

Until we see a plan to actually address this underlying problem, as then-Senator Obama warned we must, I cannot, in good conscience, vote for this legislation.

I urge my colleagues to vote "no."

Mr. NEAL of Massachusetts. Madam Speaker, at this time, I would like to yield 4 minutes to my friend, the gentleman from Tennessee (Mr. TANNER) who was my classmate here 21 years ago and is, in my judgment, as thoughtful as any Member of this House on the issues of the national debt.

Mr. TANNER. Thank you, Mr. NEAL.

Madam Speaker, what we are seeing today is the culmination of a decade-long mismanagement of our Nation's finances. In the year 2000, the revenue and expenditure stream coming to Washington were both around 19 percent of gross domestic product. In

other words, we were breaking even. The second worse thing that happened in 2001 after, of course, 9/11 happened, in February when the Congressional Budget Office said that their forecast would be a \$5 trillion surplus over the next 10 years. People around here became euphoric. We are filthy rich. We can cut taxes. We can do everything, and we are going to be fine. In fact, the first Bush Secretary of the Treasury came before the Ways and Means Committee and said he was concerned that we would pay off the national debt so quickly that we would have to pay a premium to get our paper back.

Well, in June of 2001, we embarked on a new economic game plan for this country. Two and a half months later, 9/11, every assumption that went into the conclusion there would be a \$5 trillion surplus over the next 10 years was no longer valid. But what did Congress do? Kept right on going. By 2003, if you look at the Treasury records, by 2003, income coming into Washington was down to 16.3 percent of gross domestic product, and expenditures were over 20 percent because we had gone to war in Afghanistan and Iraq, among other reasons.

What did we do? We borrowed the gap. We started borrowing in 2002, -3, -4, -5, a decade-long mismanagement by both parties. And for the people who just last week stripped out to pay for and added another \$70 billion on a motion to recommit and to talk about debt and deficits now, when they ought to be trying to help us, what we're doing, as ALLEN BOYD said earlier, we're putting the pause button on this.

We must have statutory PAYGO that was allowed to lapse in 2002 so that you didn't have to pay for anything. You could just blithely pass tax cuts, increase spending and borrow the difference, because do you know something? The people we're borrowing it from aren't here. They don't have a vote.

I remember one time he said, will you vote for a supermajority to raise taxes? I said, no. There's plenty of pressure in the system not to raise taxes. I will vote not to borrow money because there's nobody here protesting what we're doing to the children of this country and the children yet to be born here.

And so, Madam Speaker, it's the responsible thing to do today. But I tell you, this is very short term, like 60 days. When we come back, we've got to insist on a commission or on a statutory PAYGO, on something to break this business-as-usual gridlock that has been going on here this entire decade.

And I defy anybody to argue honestly that it is not a decade-old problem. The last time we broke even, basically, was the fiscal year 2001. And so we have to do this; but when we get back here, when the final chapter is written of

this book, I hope we have the ability to come together, and we need the help, we need the help of the Republicans to help us put in statutory PAYGO and the commission, some of these things that will do it.

The problem is not what we're doing. We have a structural deficit. Income right now is about 17½ percent of gross domestic product. Expenditures are over 20.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. NEAL of Massachusetts. I yield the gentleman 2 additional minutes.

Mr. TANNER. It's a structural deficit. When one considers that Social Security, Medicare, Medicaid, interest on the debt and the national defense account for 85 cents out of every dollar, you can't cut enough out of the 15 percent to take care of this problem. It's not what we're doing. It's not what we're spending. It's what we're not doing, and that is we are not addressing the structural deficit.

And the only way we are going to get at that is through either statutory PAYGO or an entitlement commission, and hopefully both. It's not what we're doing, it's what we're not doing, and it is a decade-old problem that is getting worse every year. And until this Congress can come together, Democrats and Republicans, what we have around here is too many Republican Americans or too many Democratic Americans instead of American Democrats and American Republicans.

I'm telling you, the time is now for American Democrats and American Republicans to get together over the next 60 days and figure out what we're going to do, because we are on an unsustainable financial course.

Mr. HELLER. Madam Speaker, I yield 1½ minutes to the gentleman from Texas, a colleague of mine on Ways and Means, Mr. BRADY.

Mr. BRADY of Texas. Madam Speaker, it is interesting to hear our Democrat friend's newfound interest in paying for the war. That hasn't always been the case. Here is what the current majority leader said on this House floor in 2004 when the debt limit was proposed to be raised and we were at war. What now-majority leader Mr. HOYER said: raising the debt limit is immoral. Its disastrous consequence has threatened to cripple our future prosperity and haunt future generations. He said this policy of borrow and spend is not only irresponsible, it is immoral, and it must stop. We are literally mortgaging our future.

These are their words, not ours.

The truth of the matter is, what we are voting on today is a down payment, a two-step, \$2 trillion increase in our debt, two-step, \$2 trillion increase in our debt. And what it means for American families is that the day NANCY PELOSI took the gavel to become Speaker of this House, every man,

woman and child in America owed \$29,000 in debt. Today, as a result of this vote and next year's debt limit, every person in America will owe \$45,000 in public debt.

□ 1445

Three years, we've increased to \$45,000 in public debt. It is responsible to pay our bills; it's irresponsible to keep going into debt and asking for more credit while we do it. It's time to stop spending.

Mr. NEAL of Massachusetts. Madam Speaker, I yield 3 minutes to my friend, the gentleman from New Jersey (Mr. ANDREWS).

Mr. ANDREWS. I thank my friend for yielding.

A tired old tradition is being carried out on the House floor today. When it comes time to extend the national debt ceiling, the Members in the minority get up and express outrage, and enough Members in the majority get up and show responsibility and vote to do what needs to be done to pay the Nation's bills.

Madam Speaker, I know a lot of people watching this are scratching their heads and saying, how did we get to such a terrible predicament? Whose fault is it? And I think they're tired of hearing whose fault it is because, frankly, when the other side is in the majority, we say it's their fault; when they're in the minority, they say it's our fault.

I think a history lesson is in order. In 2001, as Mr. TANNER said, we were looking at a projected \$5 trillion surplus over the decade that we're now closing out. We're going to take in \$5 trillion more than we spent. There were three things that happened in that decade that injured that prospect. The first was horrific, unavoidable, and the fault of no one in this room; it was the terrorist attack on the country on September 11, 2001, which had and still has negative economic consequences as well as security consequences for the country.

The second thing that happened, in my view, is that two disastrous choices were made. The first was to launch two wars by borrowing the money to pay for those wars in Iraq and in Afghanistan. We certainly can disagree—and we have around here a lot—as to whether or not those wars were or were not in the national interest, but I think we should have understood that it was absolutely not in the national interest to defy historic tradition and finance those wars by borrowing money, unlike more responsible predecessors of ours had done in other times.

The second disastrous decision was a tax cut, a huge majority of which benefited the wealthiest 5 or 10 percent of people in this country. That created a mountain of debt that shifted us from a projected \$5 trillion surplus to a projected deficit instead.

Then followed the financial meltdown of the fall of 2008. The Treasury Secretary told us in no uncertain terms that he felt that we were perhaps a few days away from the collapse of the global economy. So to this floor came a \$700 billion bailout bill for the banking industry, and a lot of Members on both sides voted for it. I think it was the right vote because I do think it staved off that calamity from happening, and that added to the national debt. And yes, there were decisions made since the new administration came in to do the stimulus bill in a way that was not paid for.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. NEAL of Massachusetts. Madam Speaker, I yield the gentleman from New Jersey 1 additional minute.

Mr. ANDREWS. And I know there is disagreement over whether that was the right thing to do. I think it was absolutely the right thing to do because it stimulated between 600,000 and 1.6 million jobs thus far being saved or created.

Let me say this to you: irrespective of how you recount the history as to how we got here, here we are. And to deal with this problem it seems to me there are three inescapable things we have to do. The first is to get entitlement spending under control. Frankly, our side believes the health care reform bill does exactly that, and the Congressional Budget Office would concur—nearly \$500 billion in entitlement reductions over a 10-year period. Second, you have to get revenue back on track. Our budget calls for a repeal of the tax reductions for those that are in the top 5 percent or so of the country. I think that is the responsible thing to do. No one on the other side voted for that. And finally, we have to stop spending \$300 or \$400 billion a year to buy oil from other parts of the world. We had legislation here that would put us on that path and build American jobs. Almost no one—single digits—on the other side voted for that.

So this is the day when the minority expresses outrage. There ought to be some other days when the minority expresses some ideas, some plans on how to fix the problem.

Vote “yes.”

Mr. HELLER. Madam Speaker, I yield 2 minutes to the gentleman from Maryland (Mr. BARTLETT).

Mr. BARTLETT. Madam Speaker, during the Clinton administration, Washington was telling America that we had a budget surplus and we were paying down the debt. Now, while we were telling America that, we had the embarrassing necessity of raising the debt limit ceiling. Why would you have to raise the debt limit ceiling if you're paying down the debt? Surprise, surprise; Washington was not being truthful.

What we were doing was taking money from lockboxes, surplus trust

fund moneys, Social Security and Medicare, and paying down the public debt—one more dollar of debt in the trust funds, one less dollar of debt in the public debt. That did nothing to reduce the national debt. And we had other trust fund surpluses for which there was no lockbox. We happily took and spent that money. If we kept our books on the accrual method, there never was a moment in time when we, in fact, reduced the national debt.

Now, talking about accounting methods, our government keeps Enron kind of books. If we kept our books the way we force all but the smallest businesses to keep their books, using the accrual method, we would be showing about \$60 trillion in debt. That's \$200,000 in debt for every man, woman, and child. Clearly, clearly unmanageable.

We should be ashamed that we're here today talking about raising the debt limit ceiling once again. We should be here debating how we're going to balance the budget and then pay down the debt, because I have 10 kids, 17 grandkids, and two great-grandkids, and we have already mortgaged their future. We don't need to do anymore.

Mr. NEAL of Massachusetts. Madam Speaker, I yield 2 minutes to the distinguished chairman of the Ways and Means Committee, the gentleman from New York (Mr. RANGEL).

Mr. RANGEL. Let me first thank Chairman NEAL for the great job that he has done over the years in terms of presenting legislation that is so sorely needed in this House. And let me speculate in terms of how far is it going to go that we are going to have this partisanship in the House of Representatives.

You know, we have a saying that once we're overseas, we leave the Democratic label and the Republican label behind us. But believe me, the flag and the credibility of the United States' credit is on the line. And whether it's the Chinese, the Japanese, or the European Union, it seems to me that the pride that we once had in terms of being the leader of the world, not only in fiscal policy, but in foreign policy, is on the line.

No one out there in our communities is going to look at this as a Republican issue or a Democratic issue. They're going to look at it as an American issue. And they're going to look at the Congress. Why? Because we have the full faith and credit of the United States of America in our hand. People have political problems with raising the debt limit, but our country has fiscal problems. And Treasury has assured us, as he has the minority, that they don't have these fiscal gimmicks in order to play around with it.

I know a lot of people know it's going to pass, and so, therefore, they're not going to vote for it. But somebody—maybe our kids and grandkids—is

going to ask, Did the United States of America ever forfeit and didn't pay its debts? And some historian teacher will say, yes, they did. And they will want to know what Congress did it, and who did it; they're not going to ask whether you're a Democrat or Republican.

So we've got plenty of time to fight—we have at least a year. But, please, when the credibility of the United States of America is on the line, don't ask which side you're on; be with your country.

Mr. HELLER. Madam Speaker, I yield 2 minutes to the gentlewoman from Florida (Ms. GINNY BROWN-WAITE).

Ms. GINNY BROWN-WAITE of Florida. I thank the gentleman.

Madam Speaker, I rise today in opposition to H.R. 4314, which, according to the majority, “permits continued funding for government operations.” That sure sounds a lot better than H.R. 4314, a bill to borrow another \$300 billion from China. Or we could also entitle it, H.R. 4314, a license to keep spending like a teenager with a credit card.

Madam Speaker, the United States is already paying \$250 billion per year in interest payments alone on the debt. We are paying more for that interest by borrowing more. That just doesn't make sense.

The argument that we have already spent the money, and when the bill comes in the mail we have to pay it, is misleading. Every American with a maxed out credit card would love to be able to pay his bills by simply raising his limit. That is what we're doing here today, ladies and gentlemen. That includes the 15 million unemployed Americans who are still wondering when the so-called stimulus is going to create or save their jobs.

I urge my colleagues to vote against more borrowing and to certainly vote against this bill. America does not want more debt.

Mr. NEAL of Massachusetts. Madam Speaker, might I inquire as to how much time remains on both sides?

The SPEAKER pro tempore. The gentleman from Massachusetts controls 9 minutes; the gentleman from Nevada controls 16 minutes.

Mr. NEAL of Massachusetts. I reserve the balance of my time.

Mr. HELLER. Madam Speaker, I yield 1 minute to the gentleman from Texas (Mr. HENSARLING).

Mr. HENSARLING. Madam Speaker, never in history have so few acted so fast to indebt so many. Since the Democrats have taken control of Congress, this is the fifth time that they have come here to raise the debt ceiling—today, \$290 billion more.

Under their watch, the national debt has increased \$3.4 trillion, or almost \$30,000 for every household in America. Under their fiscal policies, we now have a \$1.4 trillion deficit, our Nation's first. They passed a budget that will triple

the national debt in just 10 years, and they are causing us to borrow 40 cents on the dollar from the Chinese and send the bill to our children and grandchildren.

Now, when Republicans controlled this body and the deficit was \$300 billion and falling, the now-majority leader said, "That's fiscal child abuse," and the now-Speaker called it "immoral." And now under their watch it's five times greater, and all we hear is a chorus of "que sera, sera."

It's Christmastime, and the Democrats give us \$290 billion more of debt. Merry Christmas.

Mr. NEAL of Massachusetts. Madam Speaker, I yield 2 minutes to my friend, the gentleman from New York, a voice of good sense on the issues of debt, Mr. CROWLEY.

Mr. CROWLEY. I thank my good friend from Massachusetts for yielding me the time.

The Republicans keep claiming that Federal spending and deficits are growing under the Democrats, but let's look at the facts.

Republican Conference Chairman MIKE PENCE said just a few minutes ago that they, the Republicans, doubled the national debt in 8 years to almost \$12 trillion. And you know what? MIKE is right. About an hour or so ago Republican JEFF FLAKE said spending was out of control when Republicans were in charge of Congress and the White House. And you know what? He was right as well. And the funny thing, when President George Bush was voted into office he inherited a multi-trillion dollar surplus of funds from President Clinton and the Democrats. So the party who borrowed and spent and squandered surpluses is now standing in the way of moving forward in the right path.

The very Republicans who refused to run the country like our constituents have to run their households—buying only what they can afford—are opposed to legislation that will ensure all new spending and tax cuts are paid for. This would prevent us from adding to the deficit, yet Republicans are opposed, arguing they should be allowed to tax and borrow from the Chinese at will, but only for their priorities.

So the hangover from President Bush and Republican control of Congress still lingers. It was Republicans who pushed a \$700 billion bailout package for the banks, a package that Democrats and President Obama are demanding be paid back—and with interest—from those very same banks. Then we had tax cuts for the wealthiest in America, with no assistance to the middle class, and then a refusal to fund the wars in Afghanistan and Iraq. Democrats are correcting these disastrous decisions by our Republican colleagues.

The only thing more galling than the inaccuracy and denial of the Repub-

licans of their own records and votes is their hypocrisy on this issue of their own out-of-control spending and legacy of deficits.

□ 1500

Mr. HELLER. I yield 1 minute to the gentleman from Louisiana (Mr. SCALISE).

Mr. SCALISE. I want to thank the gentleman from Nevada for yielding.

Madam Speaker, this is my congressional voting card. Unfortunately, some of the liberals running this Congress think that this is a credit card that has an unlimited balance. Today, they stand before us, trying to add another \$290 billion of limit onto their credit cards because they have maxed out the previous at \$12 trillion. The American people are saying enough is enough. They want us to cap the debt, and we need to.

We filed legislation that has over 70 cosponsors that would do just that—that would cap the debt and say now let's start paying it down. The first rule of hole says, when you find yourself in a hole, the first thing you do is stop digging. The American people are saying stop the massive spending. Stop adding to our debt. Stop throwing more and more spending and debt onto the backs of our children and our grandchildren. Let's rein in fiscal irresponsibility.

That's why we are opposing this legislation. We proposed responsible alternatives like the CAP the DEBT Act. Of course, they don't want to bring it up because all they want to do is walk around here, thinking that they're Santa Claus at Christmastime, borrowing more money and spending more money that we don't have.

Mr. NEAL of Massachusetts. Madam Speaker, I will remind the gentleman it wasn't a liberal sitting in the White House who decided to invade Iraq for which the costs have now come due.

I reserve the balance of my time.

Mr. HELLER. Madam Speaker, I yield 2 minutes to a friend of mine, a colleague on the Ways and Means Committee, the gentleman from Illinois (Mr. ROSKAM).

Mr. ROSKAM. I thank the gentleman for yielding.

Madam Speaker, it is the holiday season, and the majority is saying, Cheers.

Here we are, and it's really been an unbelievable party, hasn't it? I mean here we are, and you have all of these folks who have come together, doubling the national debt, as was described, over a 5-year period. The majority will now triple the national debt, and it is as if all they can do is keep serving. No discipline. Hey, cheers. Here you go. Enjoy. Well, here is what happens at the end of that binge. Here is what happens at the end of that kegger:

Ultimately, the old man drives up into the driveway and looks around,

and the party is going to be over. Who is going to be there to clean it up? Our children and our grandchildren, Madam Speaker. They are the ones who will be there, taking care of this mess over a long period of time.

So we ought not be continuing serving a government that has been overserved time and time and time again. Instead, what we ought to do is avoid the generational theft, do what is right by our children and grandchildren and not increase this debt.

Mr. NEAL of Massachusetts. I yield myself 1 minute.

Madam Speaker, this is not a cheery time for the American people. This is a very difficult time. A reminder: The legislation in front of us now is to pay for the war in Iraq, to pay for the war in Afghanistan, to pay for our veterans' hospitals, and to pay for next month's Social Security recipients to receive their checks on time.

I reserve the balance of my time.

Mr. HELLER. Madam Speaker, I yield 1½ minutes to the gentleman from Texas (Mr. GOHMERT).

Mr. GOHMERT. Madam Speaker, we were asked: How can we vote to have troops go to Iraq and not be willing to pay for them?

Well, the problem is we keep having things added to the bills that will pay for these things. We keep adding things like Gitmo language, like we're going to move the people from Gitmo and spend tens or hundreds of millions of dollars unnecessarily just to make some political point.

We hear people across the aisle say, Gee. You know, we can't afford to lose respect around the world if we forfeit on the debt. Don't forfeit on the debt. You don't gain respect when you keep calling the credit card company and saying, I know I'm not making any payments, but if you'll just keep increasing my debt limit, I know you'll have more respect for me. No, that's not how it works.

We are told across the aisle we have no solutions. Go look at the bills that are waiting to come to the floor. I've got a zero baseline budget that doesn't allow the automatic increases. That would make a huge contribution, and we could bring down the debt. Yet there are no indications, nothing to indicate that the spending is going to be controlled. It is outrageous what we are doing to future generations. Any parent who would go in and tell the bank, Keep loaning to me, and I promise my kids will repay it, would be considered an unfit parent.

Yes, the people in America were promised change. What they have gotten is exponentially more spending than Republicans had done before. It's time for a change. Stop spending. Vote this down.

Mr. NEAL of Massachusetts. I yield myself 30 seconds.

Madam Speaker, the war in Iraq is going to cost more than \$1 trillion. The

VA hospital commitment that we are going to make for the next 30 years to our well-deserving veterans is going to cost an additional \$1 trillion. That is the issue that is before us this afternoon.

I reserve the balance of my time.

Mr. HELLER. Madam Speaker, I yield 1 minute to the gentleman from Indiana (Mr. BURTON).

Mr. BURTON of Indiana. I thank the gentleman for yielding.

Madam Speaker, I was just thinking about the people back home who may be watching this. They hear the Democrats blaming the Republicans for all of these things that are costing so much money, and that's the reason we have to raise the national debt. You know, I looked at a \$1.4 trillion deficit last year, and we're already ahead of that this year. We are not in charge. You folks are.

The health care bill that you're trying to ram through is going to cost \$1 trillion to \$3 trillion, and the stimulus bill is going to cost over \$1 trillion when you add interest.

The bottom line is we have got to stop spending. We are spending too much money. Whether you are a Democrat or a Republican, the American people back home are saying, Get your house in order. Quit spending so much money. Live within your means like we have to.

We have 10 percent unemployment right now, and the people back home don't want us wasting money that will end up resulting in our having to raise taxes, which we don't want to do and which I won't vote for, and end up resulting in inflation, which is going to be hung on our kids in the future. So we have to quit spending instead of just raising the debt.

Mr. NEAL of Massachusetts. Madam Speaker, I reserve the balance of my time.

Mr. HELLER. Madam Speaker, I yield 2 minutes to the gentleman from Florida (Mr. STEARNS).

Mr. STEARNS. Madam Speaker, let me say to my colleague from Massachusetts that he and I came in together. Back in 1988, we were both elected, and he and I served in the same class together. As I recollect, he was mayor of Springfield.

You balanced your budget as mayor. You had to balance your budget. Now, we've been up here trying to balance the budget, you and I, for almost 21 years. It has not been successful. I supported a balanced budget—both a constitutional amendment as well as a legislative balanced budget. I don't believe you or your colleagues did. I say this because, frankly, we have been talking about deficit as long as you and I have been in Congress. We can blame Republicans. We can blame Democrats, but let's just look at the record for a second.

When you and I came in under Bush I, do you remember those deficits?

They talked about \$250 billion, and we just lamented about it and lamented about it, and we complained about it. Well, you know, that's what happened. It has exploded. So now we're looking at deficits that are a lot larger, as my colleague mentioned, \$1.4 trillion.

When you look at Bush II, George W. Bush, he had deficits of \$600 billion. I remember the folks on that side were complaining about how terrible that was at \$600 billion.

Well, the problem is now we're talking almost two, three times that amount of money. Actually, when you go back and look at when Ronald Reagan was President, critics called great criticism to him. They said the deficit was out of control in this country. The deficits were about \$250 billion. So the point I am trying to make is that the deficit under Republican Presidents and even under Republican control of the House and the Senate and the White House was small, very small, to what we have today.

You can say that there is good reason for this vote today because you support our troops and our wars, and you also support veterans. I think that's true. Yet there has been no effort by your side to hold the appropriations bill.

I have been on the House floor, and I say to my colleague, your appropriations bills are 13 percent larger than last year's. Almost every one of them was 13, 18—One was almost 20 percent. How in the world can you justify appropriations bills that are so large?

So in the end, Democrats are not trying to reduce costs nor balance the budget. In fact, they are recklessly encouraging more government spending. That is why they need to increase the debt ceiling.

Mr. NEAL of Massachusetts. Mr. STEARNS is, indeed, my friend, and we are classmates.

Madam Speaker, he conveniently left out those 4 years when Bill Clinton left a balanced budget to America, when the deficits were eliminated and when the debt was coming down. That's the key consideration here as we begin this debate. Indeed, this is about paying for our veterans' hospitals, paying for the war in Iraq, paying for the war in Afghanistan, and making sure that those Social Security checks get out on January 1.

Mr. HELLER. Madam Speaker, may I inquire as to the time remaining on both sides?

The SPEAKER pro tempore. The gentleman from Nevada controls 8½ minutes, and the gentleman from Massachusetts controls 5¾ minutes.

Mr. HELLER. Madam Speaker, I yield 2 minutes to the Republican policy Chair, the gentleman from Michigan (Mr. McCOTTER).

Mr. McCOTTER. I thank the gentleman.

Madam Speaker, a quick point that was raised by our esteemed colleague

from Massachusetts about how President Clinton left 4 years of balanced budgets: It was with the assistance of a Republican majority in the Congress, which is an exceptional precedent, you'll remember, as we head to the polls in 2010.

As we address this issue of raising the debt ceiling, let us be charitable in this, the giving season. Let us recall that, as the Democratic Party's argument today is "the same but more," let us look at what they have tried to give the American people over the course of the past year for stocking stuffers.

First, Americans got higher unemployment, higher spending, higher deficits, and higher taxes.

Secondly, senior citizens got a \$500 billion cut in Medicare. Terrorists got new rights, new trials, and new cells on American soil, and Federal Government bureaucrats got raises.

I think that we should question our priorities and the direction in which we are taking ourselves before we decide to spend more money on this. It strikes me that it is very justifiable for the American people to watch this debate, to watch the debt ceiling be raised, and to come to the distinct conclusion that the Democratic majority in Congress has proven itself too costly and too crazy too quickly.

Mr. NEAL of Massachusetts. Madam Speaker, I reserve the balance of my time.

Mr. HELLER. Madam Speaker, I yield 1 minute to the gentleman from Utah (Mr. CHAFFETZ).

Mr. CHAFFETZ. I thank the gentleman.

Madam Speaker, I am a freshman in this body. I didn't help create this mess, but I am here to help clean it up. The fact of the matter is we have to spend less than we are spending now. We have to be responsible stewards of the American people's money.

We are \$12 trillion in debt. Remember, if you spend \$1 million a day every day, it would take you nearly 3,000 years just to get to \$1 trillion, and we are \$12 trillion in debt. When is this body going to say no?

This body is not making difficult decisions. I am sorry, but the Democrats in control have refused to find a solution to things that don't cost literally hundreds of billions of dollars every time we turn around. We can't be all things to all people. We have to learn to say "no." At what point will there actually be a cap? At what point will there actually be a ceiling? We see no hope on the horizon for that.

We have got to be responsible stewards of the American people's money. We cannot be all things to all people. We are spending nearly \$600 million a day just in interest on our debt.

GENERAL LEAVE

Mr. NEAL of Massachusetts. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative

days in which to revise and extend their remarks and to include extraneous material on H.R. 4314.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CALL OF THE HOUSE

Mr. NEAL of Massachusetts. Madam Speaker, pursuant to clause 7 of rule XX, I move a call of the House.

The SPEAKER pro tempore. The previous question being ordered, the Chair notes the absence of a quorum in accord with clause 7(c) of rule XX and chooses to entertain a motion for a call of the House pursuant to clause 7(b) of rule XX.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

PERMITTING CONTINUED FINANCING OF GOVERNMENT OPERATIONS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts.

Mr. NEAL of Massachusetts. Madam Speaker, I would like to reserve the balance of my time.

Mr. HELLER. Madam Speaker, I yield 1 minute to the Republican leader, the gentleman from Ohio (Mr. BOEHNER).

Mr. BOEHNER. My colleagues, there's been a lot of lecturing on the House floor today from my Democrat colleagues about fiscal responsibility. And I heard a lot of about fiscal responsibility in 2005 and 2006 when the then-minority wanted to take the majority.

I think it's time for everyone in this room to take their fair share of blame for the spending that's gone on in this town for far too long. For 36 of the last 40 years, we've spent more than what we've taken in. There's not a household in America that could get by with this. There's not a company in America that could get by with it. And certainly, this government can't get by with it.

For the last 3 years, the Democrat majority, though, after having run on this mantra of fiscal responsibility, has done nothing more than spend, spend, spend and spend. Now, we did our best in 2007 and 2008 to put the brakes on all that spending, and succeeded somewhat. But after this year, for you to criticize us about fiscal responsibility and to lecture us about fiscal responsibility after spending \$1 trillion on a stimulus bill that was supposed to be about creating jobs, and what have we done? We've created more unemployment. We've not put anyone back to work. And we're asking our kids and grandkids to pay \$1 trillion in principal and interest for a bill that's not doing anything other than increasing spending.

But what makes this bill that's on the floor here today to increase the debt limit by \$290 billion a real joke is that as soon as this vote is over, we're going to take up Stimulus II or, as we like to call it, Son of Stimulus. We're going to take up Son of Stimulus, which is going to spend \$150 billion on the same kind of failed spending programs that we passed earlier this year.

And what are we going to do? We're going to use that TARP money that those banks and those financial institutions have paid back. Well, where'd that money come from? We had to go borrow it. Everybody knows, everybody that voted for or against TARP in this Chamber, knows that money was intended to go to pay down the deficit. And to take that \$150 billion and spend it on more wasteful Washington spending is putting it right on the backs of our kids and grandkids. That's going to happen right after this vote.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the call). There are 2 minutes remaining.

□ 1548

The SPEAKER pro tempore. 415 Members have recorded their presence. A quorum is present.

Who are we kidding? We're not kidding anybody. I just think it's time to put the brakes on all of it. Let's get really serious about cutting spending. And the way we start is by saying no to increasing the debt limit.

Mr. NEAL of Massachusetts. Madam Speaker, let me recognize for 1 minute the Majority Leader, the gentleman from Maryland (Mr. HOYER), a voice for fiscal reason in this institution.

Mr. HOYER. I thank the gentleman for yielding.

A little over a year ago, Mr. BOEHNER and I spoke on a bill that I said would be noted as a day of consequence in the House of Representatives. That bill was to, at the request of President Bush and Secretary Paulson and Ben Bernanke, give some \$700 billion to the Treasury to try to stabilize the financial sector of our economy. Mr. BOEHNER voted for that. My friend, Mr. BLUNT, voted for that. I believe Mr. CANTOR voted for that. Others of you voted for that. And many on our side voted for that bill. It failed.

And we came back here a few days later, on Friday, and that bill was called up again. It was called up again because we knew that there really wasn't an option. Mr. Bernanke, President Bush's appointee as Chairman of the Federal Reserve, said that we were at risk of going into a depression if we did not vote for that bill. Nobody wanted to vote for that bill on either side of the aisle. That was a bill that we ultimately concluded on that Friday, approximately half of the Republican side of the aisle, a little more than half on my side of the aisle, was a bill that we needed to pass to avoid the risk of depression.

Since that time, over the next 4 months, we saw an erosion in the economy, not a depression, but the worst recession we had seen in 8 years. Now I have a speech here that we've prepared. I'm not going to give it because it, to some degree, points the finger at one another. And I agree with Mr. BOEHNER. There's blame to go around. We have been concerned about cutting revenues and increasing spending during the first part of this decade. You have been concerned about the spending that we believed was necessary to make to try to create jobs and bring our economy back.

Mr. BOEHNER and I disagree on the impact of the Recovery and Reinvestment Act. Since its passage, the stock market has gone from 6,500 to 10,500. Anybody who opens up their 401(k) or Keogh or Thrift Savings Plan believes that we've made progress on that because their value has gone up about 60 percent. That's progress, but not success. We want to get back to where it was in terms of the value of those plans.

In addition, in the last month of the Bush administration, we lost 741,000 jobs, after adopting a policy that many

believed, on your side of the aisle, would lift our economy. And, in fact, it did for a while. But it did not create the kind of jobs you wanted. And, in fact, on average, over the 8 years of the Bush administration, it produced approximately 4,200 jobs per month, on average, in comparison with the 216,000 jobs, on average, per month that the Clinton administration saw during its term.

So we could point fingers, but that would not be particularly useful. I have listened to this debate, and I am chagrined. And I want to plead guilty, because I've demagogued this issue as well. We had a quote presented about the morality of incurring debt. It was taken a little out of context, but we all say things that we look back on. And I voted against increasing the debt. It was a demagoguing vote. I voted four times against raising the debt. It was a demagoguing vote. I want to admit that and tell people. Why? Because I didn't believe then, nor do I believe now, that not paying America's bills is an option that Americans expect of us. Americans expect us to pay our bills. Some Americans would like us not to incur some bills for war, but if we do incur bills for war, they would like us to pay for it. Some Americans would not like us to incur bills for nutritional programs or education or whatever else may be, too much, too little, but if we do incur those bills, Americans expect us to pay the bill.

I have a list here of everybody who spoke who was here who voted to increase the debt limit four times during the time that you were in charge of the House and of the Presidency. And we didn't support it. My suspicion is that we will find ourselves in the same place today. You all are not responsible for the running of the government or the passing of policy. We are. I understand that. And so my presumption is, perhaps, to a person, as we did on this side of the aisle, you will vote against this bill.

And so I say to my friends on this side of the aisle, the American people have given us a responsibility. The American people have reposed in us a trust. And this year, in meeting that confidence and trust, we have taken some very tough votes. One of the things I said that was quoted that was immoral, that's the quote you used, and if you take out the whole quote, which a lot of times none of us do, we take the part of the quote that we like, I said that not to pay for what we buy, and to jettison PAYGO, was not right.

□ 1600

One of the reasons that we find ourselves in this position is because we haven't adopted a statutory PAYGO, and we should adopt statutory PAYGO. I understand my friends on this side of the aisle are not clapping. And the reason you're not clapping is because you

believe, correctly, that that will constrain you in effecting tax cuts, because you believe that cutting taxes does not create debt.

The tragedy is, during the 8 years President Bush was President and you were in charge—because we couldn't pass any economic policy past President Bush's budget veto—you incurred \$2 trillion of debt as you cut revenues and increased spending at a greater rate than was increased under the Clinton administration, and you were in charge of everything. But Mr. BOEHNER is correct, my grandchildren and his don't care whether you did it, we did it, or we did it together.

But my colleagues on this side of the aisle, if we take seriously that oath to protect and preserve this Nation, there is no one on either side of the aisle, Republican or Democrat, conservative or liberal, who will rationalize that America's not paying its debt is a good policy, because all of us know it is a disastrous policy and that the consequences of not passing this bill, in the stock market, globally with our creditors, and, yes, with Mom and Pop running that store in my town and your town, will be very substantial and unacceptable.

So we come, as I said on the TARP vote, to a day of consequences. Not every day is a day of consequence in this House, the people's House. We vote on suspension bills and post offices and this, that, and the other. And even the bills that we'll consider next, we'll send it to the Senate or we won't send it to the Senate, and the world will little note nor long remember, as Abraham Lincoln said. But if America and its duly elected Representatives say to the rest of the world, We will not pay our bills, that will be of consequence.

It is not about pointing fingers. It is about taking responsibility. It is about showing courage to do what all of us know. Whatever the rhetoric on this floor has been today, what all of us know is the only option for a responsible country, for a country that is perceived around the world as the wealthiest country on the face of the Earth, and for us to say this day, We will not pay our bills, that the consequences in January to the person who receives Social Security, the consequences to the Defense Department—not that they won't pay their bills. They're going to have to under the emergency clause. But the fact of the matter is, my friends, this is absolutely essential to do.

Therefore, on my side of the aisle, I ask us to do it. And don't point fingers at their side if they don't do it, because we didn't do it. And very frankly, my friends, we have to stop that. We have to stop it for whoever is in charge, because Americans expect better of us.

I ask you, therefore, as we consider this, we ought to vote on it not because we agreed with policy A or policy B or

tax cut Y or tax increase Z, but because we know—and I tell my young friend who spoke on the floor about fiscal responsibility who is here for the first time—as we debate these issues on spending and cutting, that they are legitimate to debate, discuss, and vote however one believes is necessary.

But in the final analysis, when the roll is called as to whether America will be a responsible debtor, whether we incurred that debt as a result of decreasing taxes, which we did, or increased spending, which we have, it matters not. What matters is that America pays its bills. Vote for this bill.

Mr. BLUMENAUER. Madam Speaker, I voted for legislation increasing the debt ceiling that will get us two months into the next year. We are dealing with the sad consequence of Americans living beyond their means for the last eight years. Even though I have argued and voted against these expansions, such as an unfunded and ill-advised war, an unfunded expansion of Medicare, and tax cuts that were not sustainable, I nonetheless feel an obligation to increase the debt ceiling so that the federal government can continue to operate.

This vote allows the government to continue to pay Social Security benefits, Medicaid and Medicare support, and the salaries of those serving in our uniformed services.

At a time of continued challenge for the economy, we have higher demands for countercyclical programs like food stamps, unemployment benefits and support for state and local infrastructure projects. Unemployment and the economy would be much worse had we not made the recovery investment early this year, but even that has not been sufficient for the economy to fully rebound. It would be the height of irresponsibility for Congress to shut down the government, especially while we face these incredible challenges.

In the long run, Congress will have to address comprehensively the level of government service, the nature of our revenue system, and how we extract more value from federal investments. It is in this context that we can constructively address our economic challenges, including our investments in job creation and reducing the federal deficit. This has been my top priority in this Congress as in previous sessions and should be at the top of the congressional agenda as we move forward. In the meantime, raising the debt ceiling is a critical factor to keep the economy recovering and the government functioning.

Mr. HOLT. Madam Speaker, I rise today to vote against allowing the United States to default on its debt, although not otherwise in favor of increasing the debt ceiling. As my colleagues know, this is the fourth time we've done that since enactment of the Housing and Economic Recovery Act in July 2008, just as the economic crisis was exploding upon us. Although a comprehensive and expeditious response was necessary, each such increase has represented hundreds of billions of dollars in additional debt.

In July 2008 Congress increased the debt ceiling by \$800 billion. A mere three months later, in October 2008, the Emergency Economic Stabilization Act increased the debt ceil-

ing by another \$700 billion all because of President Bush's decision to pursue two wars on borrowed money. Four months after that, in February 2009, the American Recovery and Reinvestment Act increased the debt ceiling yet again by \$789 billion because of the continued decline of the economy and efforts to deal with it. And today, we increase it by \$290 billion more, to bring the ceiling to a staggering \$12,394,000,000,000. The fact that the current increase is much smaller than the previous increases is no consolation, since the Treasury Department has indicated that it will only cover obligations due until February 11, 2010—a mere two months from now. Not to mention the fact that the entire debt ceiling was only about that much—\$300 billion—during World War II.

These increases don't come for free—we're mortgaging our future on them. We have voted to accelerate inflation and increase our long-term fiscal challenges. Before next February arrives, we must all give intensive thought to how to return this country to the surplus conditions in enjoyed in the late 1990s. Between fiscal years 1998 and 2001, the federal government ran at a surplus and the debt ceiling only increased by \$450 billion. The surplus vanished after fiscal year 2001, and the debt ceiling has increased by more than ten times that amount (\$44.66 trillion) since then.

This deficit spending has provided much-needed economic stimulus in a time of crippling economic recession, and there is no dispute that we urgently needed to implement such stimulus measures over the course of the past year. But we are now in recovery, and it is time to get this economic train back on the right track. I support this increase with no pleasure, and I look forward to working with all my colleagues to bring down the debt ceiling as soon as possible.

Mr. LANGEVIN. Madam Speaker, it is with great reservation that I vote for H.R. 4314, a bill to increase the statutory debt limit by \$290 billion. While I am keenly aware of the need for such action to ensure that the Federal Government doesn't default on its obligations, this represents a greater problem of borrowing and spending that we must begin to address now.

There is no doubt in my mind that the actions taken by this Congress over the past year prevented a serious recession from turning into a calamitous economic depression. I also know that there are many families in my State that will require continued support and assistance as we cope with a 12.9 percent unemployment rate. However, as we attempt to enact policies that further stimulate the economy and get people back to work, we cannot lose sight of our fiscal challenges. We must refocus on deficit reduction and chart a course to a sustainable budgetary path.

That is why I was pleased to vote for the Statutory Pay-As-You-Go Act, PAYGO, Act, which passed the House on July 22nd. This bill reestablishes the same rules enacted in the 1990's which led to record surpluses, by requiring that new mandatory spending increases or tax reductions be fully offset. Unfortunately, the Senate has not yet acted on this measure, but I look forward to working with them and my colleagues in the House to

ensure that we reduce our deficit and debt obligations as we achieve continued economic stability.

Mr. VAN HOLLEN. Madam Speaker, I rise in support of H.R. 4314, which will increase the statutory debt limit by an amount sufficient to cover obligations through February 11, 2010.

As we take concrete steps to bolster our economic recovery while getting the nation's fiscal house in order, this measure will ensure the uninterrupted operation of government into the first part of next year. Insodoing, it affirms the full faith and credit of the United States, supports job creation and economic growth, and gives the House and Senate additional time to reach agreement on appropriate budget targets for the out years. Importantly, this temporary legislation is also offered alongside the House's twice-expressed commitment to statutory PAYGO legislation, whose use has been demonstrated to bring our budgets back into balance over time.

Accordingly, I urge a "yes" vote.

Mr. HELLER. Madam Speaker, I yield back the balance of my time.

Mr. NEAL of Massachusetts. Madam Speaker, I urge adoption of the resolution and yield back the balance of my time.

The SPEAKER pro tempore. All time for debate has expired.

Pursuant to House Resolution 976, the previous question is ordered on the bill.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. HELLER. Madam Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, this 15-minute vote on passage of H.R. 4314 will be followed by a 5-minute vote on the motion to suspend the rules and pass H.R. 3714, if ordered.

The vote was taken by electronic device, and there were—ayes 218, noes 214, not voting 3, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members have 2 minutes remaining in this vote.

□ 1625

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

DANIEL PEARL FREEDOM OF THE PRESS ACT OF 2009

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 3714, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. BERMAN) that the House suspend the rules and pass the bill, H.R. 3714, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

RECORDED VOTE

Ms. DEGETTE. Madam Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This is a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 403, noes 12, not voting 19, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members have 2 minutes remaining in this vote.

□ 1636

So (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: "A bill to amend the Foreign Assistance Act of 1961 to include in the Annual Country Reports on Human Rights Practices information about freedom of the press in foreign countries, and for other purposes."

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. RADANOVICH. Madam Speaker, I was unable to make today's votes on the House floor due to a family illness. Had I been present I would have voted as follows:

"Present" on rollcall vote No. 987, on the Quorum call.

"No" on rollcall vote No. 988, the motion to adopt H.R. 4314, to permit continued financing of government operations which is done by increasing the national debt limit.

"Yes" on rollcall vote No. 989, to suspend the rules and adopt H.R. 3714, the Daniel Pearl Freedom of the Press Act of 2009.

COMMERCE, JUSTICE, SCIENCE, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010

Mr. OBEY. Madam Speaker, pursuant to House Resolution 976, I call up the bill (H.R. 2847) making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes, with a Senate amendment thereto, and offer the motion at the desk.

The SPEAKER pro tempore. The Clerk will report the title of the bill, designate the Senate amendment, and designate the motion.

The Clerk read the title of the bill.

The text of the Senate amendment is as follows:

Senate amendment:

Strike out all after the enacting clause and insert:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 2010, and for other purposes, namely:

TITLE I

DEPARTMENT OF COMMERCE

INTERNATIONAL TRADE ADMINISTRATION

OPERATIONS AND ADMINISTRATION

For necessary expenses for international trade activities of the Department of Commerce provided for by law, and for engaging in trade promotional activities abroad, including expenses of grants and cooperative agreements for the purpose of promoting exports of United States firms, without regard to 44 U.S.C. 3702 and 3703; full medical coverage for dependent members of immediate families of employees stationed overseas and employees temporarily posted overseas; travel and transportation of employees of the International Trade Administration between two points abroad, without regard to 49 U.S.C. 40118; employment of Americans and aliens by contract for services; rental of space abroad for periods not exceeding 10 years, and expenses of alteration, repair, or improvement; purchase or construction of temporary demountable exhibition structures for use abroad; payment of tort claims, in the manner authorized in the first paragraph of 28 U.S.C. 2672 when such claims arise in foreign countries; not to exceed \$327,000 for official representation expenses abroad; purchase of passenger motor vehicles for official use abroad, not to exceed \$45,000 per vehicle; obtaining insurance on official motor vehicles; and rental of tie lines, \$455,704,000, to remain available until September 30, 2011, of which \$9,439,000 is to be derived from fees to be retained and used by the International Trade Administration, notwithstanding 31 U.S.C. 3302: Provided, That not less than \$49,530,000 shall be for Manufacturing and Services; not less than \$43,212,000 shall be for Market Access and Compliance; not less than \$68,290,000 shall be for the Import Administration; not less than \$257,938,000 shall be for the Trade Promotion and United States and Foreign Commercial Service; and not less than \$27,295,000 shall be for Executive Direction and Administration: Provided further, That the pro-

visions of the first sentence of section 105(f) and all of section 108(c) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2455(f) and 2458(c)) shall apply in carrying out these activities without regard to section 5412 of the Omnibus Trade and Competitiveness Act of 1988 (15 U.S.C. 4912); and that for the purpose of this Act, contributions under the provisions of the Mutual Educational and Cultural Exchange Act of 1961 shall include payment for assessments for services provided as part of these activities: Provided further, That negotiations shall be conducted within the World Trade Organization to recognize the right of members to distribute monies collected from antidumping and countervailing duties: Provided further, That negotiations shall be conducted within the World Trade Organization consistent with the negotiating objectives contained in the Trade Act of 2002, Public Law 107-210, to maintain strong U.S. remedies laws, correct the problem of overreaching by World Trade Organization Panels and Appellate Body, and prevent the creation of obligation never negotiated or expressly agreed to by the United States: Provided further, That within the amounts appropriated, \$1,500,000 shall be used for the projects, and in the amounts, specified in the table entitled "Congressionally designated projects" in the report of the Committee on Appropriations of the Senate to accompany this Act.

BUREAU OF INDUSTRY AND SECURITY

OPERATIONS AND ADMINISTRATION

For necessary expenses for export administration and national security activities of the Department of Commerce, including costs associated with the performance of export administration field activities both domestically and abroad; full medical coverage for dependent members of immediate families of employees stationed overseas; employment of Americans and aliens by contract for services abroad; payment of tort claims, in the manner authorized in the first paragraph of 28 U.S.C. 2672 when such claims arise in foreign countries; not to exceed \$15,000 for official representation expenses abroad; awards of compensation to informers under the Export Administration Act of 1979, and as authorized by 22 U.S.C. 401(b); and purchase of passenger motor vehicles for official use and motor vehicles for law enforcement use with special requirement vehicles eligible for purchase without regard to any price limitation otherwise established by law, \$100,342,000, to remain available until expended, of which \$14,767,000 shall be for inspections and other activities related to national security: Provided, That the provisions of the first sentence of section 105(f) and all of section 108(c) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2455(f) and 2458(c)) shall apply in carrying out these activities: Provided further, That payments and contributions collected and accepted for materials or services provided as part of such activities may be retained for use in covering the cost of such activities, and for providing information to the public with respect to the export administration and national security activities of the Department of Commerce and other export control programs of the United States and other governments.

ECONOMIC DEVELOPMENT ADMINISTRATION

ECONOMIC DEVELOPMENT ASSISTANCE PROGRAMS

For grants for economic development assistance as provided by the Public Works and Economic Development Act of 1965, and for trade adjustment assistance, \$200,000,000, to remain available until expended: Provided, That of the amounts provided, no more than \$4,000,000 may be transferred to "Economic Development Administration, Salaries and Expenses" to conduct management oversight and administration of public works grants.

SALARIES AND EXPENSES

For necessary expenses of administering the economic development assistance programs as provided for by law, \$38,000,000: Provided, That these funds may be used to monitor projects approved pursuant to title I of the Public Works Employment Act of 1976, title II of the Trade Act of 1974, and the Community Emergency Drought Relief Act of 1977.

MINORITY BUSINESS DEVELOPMENT AGENCY
MINORITY BUSINESS DEVELOPMENT

For necessary expenses of the Department of Commerce in fostering, promoting, and developing minority business enterprise, including expenses of grants, contracts, and other agreements with public or private organizations, \$31,200,000: Provided, That within the amounts appropriated, \$200,000 shall be used for the projects, and in the amounts, specified in the table entitled, "Congressionally designated projects" in the report of the Committee on Appropriations of the Senate to accompany this Act.

ECONOMIC AND STATISTICAL ANALYSIS

SALARIES AND EXPENSES

For necessary expenses, as authorized by law, of economic and statistical analysis programs of the Department of Commerce, \$100,600,000, to remain available until September 30, 2011.

BUREAU OF THE CENSUS

SALARIES AND EXPENSES

For expenses necessary for collecting, compiling, analyzing, preparing, and publishing statistics, provided for by law, \$259,024,000.

PERIODIC CENSUSES AND PROGRAMS

For necessary expenses to collect and publish statistics for periodic censuses and programs provided for by law, \$7,065,707,000, to remain available until September 30, 2011: Provided, That none of the funds provided in this or any other Act for any fiscal year may be used for the collection of census data on race identification that does not include "some other race" as a category: Provided further, That from amounts provided herein, funds may be used for additional promotion, outreach, and marketing activities.

NATIONAL TELECOMMUNICATIONS AND
INFORMATION ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses, as provided for by law, of the National Telecommunications and Information Administration (NTIA), \$19,999,000, to remain available until September 30, 2011: Provided, That, notwithstanding 31 U.S.C. 1535(d), the Secretary of Commerce shall charge Federal agencies for costs incurred in spectrum management, analysis, operations, and related services, and such fees shall be retained and used as offsetting collections for costs of such spectrum services, to remain available until expended: Provided further, That the Secretary of Commerce is authorized to retain and use as offsetting collections all funds transferred, or previously transferred, from other Government agencies for all costs incurred in telecommunications research, engineering, and related activities by the Institute for Telecommunication Sciences of NTIA, in furtherance of its assigned functions under this paragraph, and such funds received from other government agencies shall remain available until expended.

PUBLIC TELECOMMUNICATIONS FACILITIES,
PLANNING AND CONSTRUCTION

For the administration of grants, authorized by section 392 of the Communications Act of 1934, \$20,000,000, to remain available until expended as authorized by section 391 of the Act: Provided, That not to exceed \$2,000,000 shall be available for program administration as author-

ized by section 391 of the Act: Provided further, That, notwithstanding the provisions of section 391 of the Act, the prior year unobligated balances may be made available for grants for projects for which applications have been submitted and approved during any fiscal year.

UNITED STATES PATENT AND TRADEMARK OFFICE
SALARIES AND EXPENSES

For necessary expenses of the United States Patent and Trademark Office (USPTO) provided for by law, including defense of suits instituted against the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office, \$1,930,361,000, to remain available until expended: Provided, That the sum herein appropriated from the general fund shall be reduced as offsetting collections assessed and collected pursuant to 15 U.S.C. 1113 and 35 U.S.C. 41 and 376 are received during fiscal year 2010, so as to result in a fiscal year 2010 appropriation from the general fund estimated at \$0: Provided further, That during fiscal year 2010, should the total amount of offsetting fee collections be less than \$1,930,361,000, this amount shall be reduced accordingly: Provided further, That of the amount received in excess of \$1,930,361,000 in fiscal year 2010, in an amount up to \$100,000,000 shall remain until expended: Provided further, That from amounts provided herein, not to exceed \$1,000 shall be made available in fiscal year 2010 for official reception and representation expenses: Provided further, That of the amounts provided to the USPTO within this account, \$25,000,000 shall not become available for obligation until the Director of the USPTO has completed a comprehensive review of the assumptions behind the patent examiner expectancy goals and adopted a revised set of expectancy goals for patent examination: Provided further, That in fiscal year 2010 from the amounts made available for "Salaries and Expenses" for the USPTO, the amounts necessary to pay: (1) the difference between the percentage of basic pay contributed by the USPTO and employees under section 8334(a) of title 5, United States Code, and the normal cost percentage (as defined by section 8331(17) of that title) of basic pay, of employees subject to subchapter III of chapter 83 of that title; and (2) the present value of the otherwise unfunded accruing costs, as determined by the Office of Personnel Management, of post-retirement life insurance and post-retirement health benefits coverage for all USPTO employees, shall be transferred to the Civil Service Retirement and Disability Fund, the Employees Life Insurance Fund, and the Employees Health Benefits Fund, as appropriate, and shall be available for the authorized purposes of those accounts: Provided further, That sections 801, 802, and 803 of division B, Public Law 108-447 shall remain in effect during fiscal year 2010: Provided further, That the Director may, this year, reduce by regulation fees payable for documents in patent and trademark matters, in connection with the filing of documents filed electronically in a form prescribed by the Director: Provided further, That \$2,000,000 shall be transferred to "Office of Inspector General" for activities associated with carrying out investigations and audits related to the USPTO.

NATIONAL INSTITUTE OF STANDARDS AND
TECHNOLOGYSCIENTIFIC AND TECHNICAL RESEARCH AND
SERVICES

For necessary expenses of the National Institute of Standards and Technology, \$520,300,000, to remain available until expended, of which not to exceed \$9,000,000 may be transferred to the "Working Capital Fund": Provided, That not to exceed \$5,000 shall be for official reception and representation expenses: Provided further, That within the amounts appropriated,

\$10,500,000 shall be used for the projects, and in the amounts, specified in the table entitled "Congressionally designated projects" in the report of the Committee on Appropriations of the Senate to accompany this Act.

INDUSTRIAL TECHNOLOGY SERVICES

For necessary expenses of the Hollings Manufacturing Extension Partnership of the National Institute of Standards and Technology, \$124,700,000, to remain available until expended. In addition, for necessary expenses of the Technology Innovation Program of the National Institute of Standards and Technology, \$69,900,000, to remain available until expended.

CONSTRUCTION OF RESEARCH FACILITIES

For construction of new research facilities, including architectural and engineering design, and for renovation and maintenance of existing facilities, not otherwise provided for the National Institute of Standards and Technology, as authorized by 15 U.S.C. 278c-278e, \$163,900,000, to remain available until expended: Provided, That within the amounts appropriated, \$47,000,000 shall be used for the projects, and in the amounts, specified in the table entitled "Congressionally designated projects" in the report of the Committee on Appropriations of the Senate to accompany this Act: Provided further, That the Secretary of Commerce shall include in the budget justification materials that the Secretary submits to Congress in support of the Department of Commerce budget (as submitted with the budget of the President under section 1105(a) of title 31, United States Code) an estimate for each National Institute of Standards and Technology construction project having a total multi-year program cost of more than \$5,000,000 and simultaneously the budget justification materials shall include an estimate of the budgetary requirements for each such project for each of the five subsequent fiscal years.

NATIONAL OCEANIC AND ATMOSPHERIC
ADMINISTRATIONOPERATIONS, RESEARCH, AND FACILITIES
(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of activities authorized by law for the National Oceanic and Atmospheric Administration, including maintenance, operation, and hire of aircraft and vessels; grants, contracts, or other payments to nonprofit organizations for the purposes of conducting activities pursuant to cooperative agreements; and relocation of facilities, \$3,301,131,000, to remain available until September 30, 2011, except for funds provided for cooperative enforcement, which shall remain available until September 30, 2012: Provided, That fees and donations received by the National Ocean Service for the management of national marine sanctuaries may be retained and used for the salaries and expenses associated with those activities, notwithstanding 31 U.S.C. 3302: Provided further, That in addition, \$3,000,000 shall be derived by transfer from the fund entitled "Coastal Zone Management" and in addition \$104,600,000 shall be derived by transfer from the fund entitled "Promote and Develop Fishery Products and Research Pertaining to American Fisheries": Provided further, That of the \$3,304,131,000 provided for in direct obligations under this heading \$3,301,131,000 is appropriated from the general fund, \$3,000,000 is provided by transfer: Provided further, That the total amount available for the National Oceanic and Atmospheric Administration corporate services administrative support costs shall not exceed \$226,809,000: Provided further, That payments of funds made available under this heading to the Department of Commerce Working Capital Fund including Department of Commerce General Counsel legal services shall not exceed \$36,583,000: Provided

further, That within the amounts appropriated, \$57,725,000 shall be used for the projects, and in the amounts, specified in the table entitled "Congressionally designated projects" in the report of the Committee on Appropriations of the Senate to accompany this Act: Provided further, That any deviation from the amounts designated for specific activities in the report accompanying this Act, or any use of deobligated balances of funds provided under this heading in previous years, shall be subject to the procedures set forth in section 505 of this Act: Provided further, That in allocating grants under sections 306 and 306A of the Coastal Zone Management Act of 1972, as amended, no coastal State shall receive more than 5 percent or less than 1 percent of increased funds appropriated over the previous fiscal year.

In addition, for necessary retired pay expenses under the Retired Serviceman's Family Protection and Survivor Benefits Plan, and for payments for the medical care of retired personnel and their dependents under the Dependents Medical Care Act (10 U.S.C. 55), such sums as may be necessary.

PROCUREMENT, ACQUISITION AND CONSTRUCTION

For procurement, acquisition and construction of capital assets, including alteration and modification costs, of the National Oceanic and Atmospheric Administration, \$1,397,685,000, to remain available until September 30, 2012, except funds provided for construction of facilities which shall remain available until expended: Provided, That of the amounts provided for the National Polar-orbiting Operational Environmental Satellite System, funds shall only be made available on a dollar-for-dollar matching basis with funds provided for the same purpose by the Department of Defense: Provided further, That except to the extent expressly prohibited by any other law, the Department of Defense may delegate procurement functions related to the National Polar-orbiting Operational Environmental Satellite System to officials of the Department of Commerce pursuant to section 2311 of title 10, United States Code: Provided further, That any deviation from the amounts designated for specific activities in the report accompanying this Act, or any use of deobligated balances of funds provided under this heading in previous years, shall be subject to the procedures set forth in section 505 of this Act: Provided further, That the Secretary of Commerce is authorized to enter into a lease, at no cost to the United States Government, with the Regents of the University of Alabama for a term of not less than 55 years, with two successive options each of 5 years, for land situated on the campus of University of Alabama in Tuscaloosa to house the Cooperative Institute and Research Center for Southeast Weather and Hydrology: Provided further, That within the amounts appropriated, \$19,000,000 shall be used for the projects, and in the amounts, specified in the table entitled "Congressionally designated projects" in the report of the Committee on Appropriations of the Senate to accompany this Act.

PACIFIC COASTAL SALMON RECOVERY

For necessary expenses associated with the restoration of Pacific salmon populations, \$80,000,000, to remain available until September 30, 2011: Provided, That of the funds provided herein the Secretary of Commerce may issue grants to the States of Washington, Oregon, Idaho, Nevada, California, and Alaska, and federally recognized tribes of the Columbia River and Pacific Coast for projects necessary for conservation of salmon and steelhead populations that are listed as threatened or endangered, or identified by a State as at-risk to be so-listed, for maintaining populations necessary for exercise of tribal treaty fishing rights or native subsistence fishing, or for conservation of Pacific

coastal salmon and steelhead habitat, based on guidelines to be developed by the Secretary of Commerce: Provided further, That funds disbursed to States shall be subject to a matching requirement of funds or documented in-kind contributions of at least 33 percent of the Federal funds.

COASTAL ZONE MANAGEMENT FUND

(INCLUDING TRANSFER OF FUNDS)

Of amounts collected pursuant to section 308 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456a), not to exceed \$3,000,000 shall be transferred to the "Operations, Research, and Facilities" account to offset the costs of implementing such Act.

FISHERIES FINANCE PROGRAM ACCOUNT

Subject to section 502 of the Congressional Budget Act of 1974, during fiscal year 2010, obligations of direct loans may not exceed \$16,000,000 for Individual Fishing Quota loans and not to exceed \$59,000,000 for traditional direct loans as authorized by the Merchant Marine Act of 1936: Provided, That none of the funds made available under this heading may be used for direct loans for any new fishing vessel that will increase the harvesting capacity in any United States fishery.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

For expenses necessary for the departmental management of the Department of Commerce provided for by law, including not to exceed \$5,000 for official reception and representation, \$61,000,000: Provided, That the Secretary, within 120 days of enactment of this Act, shall provide a report to the Committee on Appropriations of the Senate that audits and evaluates all decision documents and expenditures by the Bureau of the Census as they relate to the 2010 Census: Provided further, That of the amounts provided to the Secretary within this account, \$5,000,000 shall not become available for obligation until the Secretary certifies to the Committee on Appropriations of the Senate that the Bureau of the Census has followed and met all standards and best practices, and all Office of Management and Budget guidelines related to information technology projects and contract management.

HERBERT C. HOOVER BUILDING RENOVATION AND MODERNIZATION

For expenses necessary, including blast windows, for the renovation and modernization of the Herbert C. Hoover Building, \$22,500,000, to remain available until expended.

OFFICE OF INSPECTOR GENERAL

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978 (5 U.S.C. App.), \$27,000,000.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

(INCLUDING TRANSFER OF FUNDS)

SEC. 101. During the current fiscal year, applicable appropriations and funds made available to the Department of Commerce by this Act shall be available for the activities specified in the Act of October 26, 1949 (15 U.S.C. 1514), to the extent and in the manner prescribed by the Act, and, notwithstanding 31 U.S.C. 3324, may be used for advanced payments not otherwise authorized only upon the certification of officials designated by the Secretary of Commerce that such payments are in the public interest.

SEC. 102. During the current fiscal year, appropriations made available to the Department of Commerce by this Act for salaries and expenses shall be available for hire of passenger motor vehicles as authorized by 31 U.S.C. 1343 and 1344; services as authorized by 5 U.S.C. 3109; and uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901–5902).

SEC. 103. Not to exceed 5 percent of any appropriation made available for the current fiscal year for the Department of Commerce in this Act may be transferred between such appropriations, but no such appropriation shall be increased by more than 10 percent by any such transfers: Provided, That any transfer pursuant to this section shall be treated as a reprogramming of funds under section 505 of this Act and shall not be available for obligation or expenditure except in compliance with the procedures set forth in that section: Provided further, That the Secretary of Commerce shall notify the Committees on Appropriations at least 15 days in advance of the acquisition or disposal of any capital asset (including land, structures, and equipment) not specifically provided for in this Act or any other law appropriating funds for the Department of Commerce: Provided further, That for the National Oceanic and Atmospheric Administration this section shall provide for transfers among appropriations made only to the National Oceanic and Atmospheric Administration and such appropriations may not be transferred and reprogrammed to other Department of Commerce bureaus and appropriation accounts.

SEC. 104. Any costs incurred by a department or agency funded under this title resulting from personnel actions taken in response to funding reductions included in this title or from actions taken for the care and protection of loan collateral or grant property shall be absorbed within the total budgetary resources available to such department or agency: Provided, That the authority to transfer funds between appropriations accounts as may be necessary to carry out this section is provided in addition to authorities included elsewhere in this Act: Provided further, That use of funds to carry out this section shall be treated as a reprogramming of funds under section 505 of this Act and shall not be available for obligation or expenditure except in compliance with the procedures set forth in that section.

SEC. 105. The requirements set forth by section 112 of division B of Public Law 110–161 are hereby adopted by reference.

SEC. 106. Notwithstanding any other law, the Secretary may furnish services (including but not limited to utilities, telecommunications, and security services) necessary to support the operation, maintenance, and improvement of space that persons, firms or organizations are authorized pursuant to the Public Buildings Cooperative Use Act of 1976 or other authority to use or occupy in the Herbert C. Hoover Building, Washington, DC, or other buildings, the maintenance, operation, and protection of which has been delegated to the Secretary from the Administrator of General Services pursuant to the Federal Property and Administrative Services Act of 1949, as amended, on a reimbursable or non-reimbursable basis. Amounts received as reimbursement for services provided under this section or the authority under which the use or occupancy of the space is authorized, up to \$200,000, shall be credited to the appropriation or fund which initially bears the costs of such services.

SEC. 107. With the consent of the President, the Secretary of Commerce shall represent the United States Government in negotiating and monitoring international agreements regarding fisheries, marine mammals, or sea turtles: Provided, That the Secretary of Commerce shall be responsible for the development and interdepartmental coordination of the policies of the United States with respect to the international negotiations and agreements referred to in this section.

SEC. 108. Section 101(k) of the Emergency Steel Loan Guarantee Act of 1999 (15 U.S.C. 1841 note) is amended by striking "2009" and inserting "2011".

SEC. 109. Nothing in this title shall be construed to prevent a grant recipient from deterring child pornography, copyright infringement, or any other unlawful activity over its networks.

SEC. 110. The National Marine Fisheries Service is authorized to accept land, buildings, equipment, and other contributions including funding, from public and private sources, which shall be available until expended without further appropriation to conduct work associated with existing authorities.

This title may be cited as the "Department of Commerce Appropriations Act, 2010".

TITLE II

DEPARTMENT OF JUSTICE

GENERAL ADMINISTRATION

SALARIES AND EXPENSES

For expenses necessary for the administration of the Department of Justice, \$118,488,000, of which not to exceed \$4,000,000 for security and construction of Department of Justice facilities shall remain available until expended: Provided, That the Attorney General is authorized to transfer funds appropriated within General Administration to any office in this account: Provided further, That \$18,693,000 is for Department Leadership; \$8,101,000 is for Intergovernmental Relations/External Affairs; \$12,715,000 is for Executive Support/Professional Responsibility; and \$78,979,000 is for the Justice Management Division: Provided further, That any change in amounts specified in the preceding proviso greater than 5 percent shall be submitted for approval to the House and Senate Committees on Appropriations consistent with the terms of section 505 of this Act: Provided further, That this transfer authority is in addition to transfers authorized under section 505 of this Act.

JUSTICE INFORMATION SHARING TECHNOLOGY

For necessary expenses for information sharing technology, including planning, development, deployment and departmental direction, \$95,000,000, to remain available until expended, of which \$21,132,000 is for the unified financial management system.

TACTICAL LAW ENFORCEMENT WIRELESS COMMUNICATIONS

For the costs of developing and implementing a nation-wide Integrated Wireless Network supporting Federal law enforcement communications, and for the costs of operations and maintenance of existing Land Mobile Radio legacy systems, \$206,143,000, to remain available until expended: Provided, That the Attorney General shall transfer to this account all funds made available to the Department of Justice for the purchase of portable and mobile radios: Provided further, That any transfer made under the preceding proviso shall be subject to section 505 of this Act.

ADMINISTRATIVE REVIEW AND APPEALS

For expenses necessary for the administration of pardon and clemency petitions and immigration-related activities, \$300,685,000, of which \$4,000,000 shall be derived by transfer from the Executive Office for Immigration Review fees deposited in the "Immigration Examinations Fee" account.

DETENTION TRUSTEE

For necessary expenses of the Federal Detention Trustee, \$1,438,663,000, to remain available until expended: Provided, That the Trustee shall be responsible for managing the Justice Prisoner and Alien Transportation System: Provided further, That not to exceed \$5,000,000 shall be considered "funds appropriated for State and local law enforcement assistance" pursuant to 18 U.S.C. 4013(b).

OFFICE OF INSPECTOR GENERAL

For necessary expenses of the Office of Inspector General, \$84,368,000, including not to ex-

ceed \$10,000 to meet unforeseen emergencies of a confidential character, of which \$2,000,000 is designated as being for overseas deployments and other activities pursuant to sections 401(c)(4) and 423(a)(1) of S. Con. Res. 13 (111th Congress), the concurrent resolution on the budget for fiscal year 2010.

UNITED STATES PAROLE COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the United States Parole Commission as authorized, \$12,859,000.

LEGAL ACTIVITIES

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES

(INCLUDING TRANSFER OF FUNDS)

For expenses necessary for the legal activities of the Department of Justice, not otherwise provided for, including not to exceed \$20,000 for expenses of collecting evidence, to be expended under the direction of, and to be accounted for solely under the certificate of, the Attorney General; and rent of private or Government-owned space in the District of Columbia, \$875,097,000, of which \$2,500,000 is designated as being for overseas deployments and other activities pursuant to sections 401(c)(4) and 423(a)(1) of S. Con. Res. 13 (111th Congress), the concurrent resolution on the budget for fiscal year 2010; and of which not to exceed \$10,000,000 for litigation support contracts shall remain available until expended: Provided, That of the total amount appropriated, not to exceed \$10,000 shall be available to the United States National Central Bureau, INTERPOL, for official reception and representation expenses: Provided further, That notwithstanding section 205 of this Act, upon a determination by the Attorney General that emergent circumstances require additional funding for litigation activities of the Civil Division, the Attorney General may transfer such amounts to "Salaries and Expenses, General Legal Activities" from available appropriations for the current fiscal year for the Department of Justice, as may be necessary to respond to such circumstances: Provided further, That any transfer pursuant to the previous proviso shall be treated as a reprogramming under section 505 of this Act and shall not be available for obligation or expenditure except in compliance with the procedures set forth in that section: Provided further, That of the amount appropriated, such sums as may be necessary shall be available to reimburse the Office of Personnel Management for salaries and expenses associated with the election monitoring program under section 8 of the Voting Rights Act of 1965 (42 U.S.C. 1973f): Provided further, That of the amounts provided under this heading for the election monitoring program \$3,390,000 shall remain available until expended.

In addition, for reimbursement of expenses of the Department of Justice associated with processing cases under the National Childhood Vaccine Injury Act of 1986, not to exceed \$7,833,000, to be appropriated from the Vaccine Injury Compensation Trust Fund.

SALARIES AND EXPENSES, ANTITRUST DIVISION

For expenses necessary for the enforcement of antitrust and kindred laws, \$163,170,000, to remain available until expended: Provided, That notwithstanding any other provision of law, fees collected for premerger notification filings under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (15 U.S.C. 18a), regardless of the year of collection (and estimated to be \$102,000,000 in fiscal year 2010), shall be retained and used for necessary expenses in this appropriation, and shall remain available until expended: Provided further, That the sum herein appropriated from the general fund shall be reduced as such offsetting collections are received during fiscal year 2010, so as to result in

a final fiscal year 2010 appropriation from the general fund estimated at \$61,170,000.

SALARIES AND EXPENSES, UNITED STATES ATTORNEYS

For necessary expenses of the Offices of the United States Attorneys, including inter-governmental and cooperative agreements, \$1,926,003,000: Provided, That of the total amount appropriated, not to exceed \$8,000 shall be available for official reception and representation expenses: Provided further, That not to exceed \$25,000,000 shall remain available until expended: Provided further, That of the amount provided under this heading, not less than \$36,980,000 shall be used for salaries and expenses for assistant U.S. Attorneys to carry out section 704 of the Adam Walsh Child Protection and Safety Act of 2006 (Public Law 109-248) concerning the prosecution of offenses relating to the sexual exploitation of children.

UNITED STATES TRUSTEE SYSTEM FUND

For necessary expenses of the United States Trustee Program, as authorized, \$224,488,000, to remain available until expended and to be derived from the United States Trustee System Fund: Provided, That notwithstanding any other provision of law, deposits to the Fund shall be available in such amounts as may be necessary to pay refunds due depositors: Provided further, That, notwithstanding any other provision of law, \$210,000,000 of offsetting collections pursuant to 28 U.S.C. 589a(b) shall be retained and used for necessary expenses in this appropriation and shall remain available until expended: Provided further, That the sum herein appropriated from the Fund shall be reduced as such offsetting collections are received during fiscal year 2010, so as to result in a final fiscal year 2010 appropriation from the Fund estimated at \$9,488,000.

SALARIES AND EXPENSES, FOREIGN CLAIMS SETTLEMENT COMMISSION

For expenses necessary to carry out the activities of the Foreign Claims Settlement Commission, including services as authorized by section 3109 of title 5, United States Code, \$2,117,000.

FEES AND EXPENSES OF WITNESSES

For fees and expenses of witnesses, for expenses of contracts for the procurement and supervision of expert witnesses, for private counsel expenses, including advances, and for expenses of foreign counsel, \$168,300,000, to remain available until expended: Provided, That not to exceed \$10,000,000 may be made available for construction of buildings for protected witness safesites: Provided further, That not to exceed \$3,000,000 may be made available for the purchase and maintenance of armored and other vehicles for witness security caravans: Provided further, That not to exceed \$11,000,000 may be made available for the purchase, installation, maintenance, and upgrade of secure telecommunications equipment and a secure automated information network to store and retrieve the identities and locations of protected witnesses.

SALARIES AND EXPENSES, COMMUNITY RELATIONS SERVICE

For necessary expenses of the Community Relations Service, \$11,479,000: Provided, That notwithstanding section 205 of this Act, upon a determination by the Attorney General that emergent circumstances require additional funding for conflict resolution and violence prevention activities of the Community Relations Service, the Attorney General may transfer such amounts to the Community Relations Service, from available appropriations for the current fiscal year for the Department of Justice, as may be necessary to respond to such circumstances: Provided further, That any transfer pursuant to the preceding proviso shall be treated as a reprogramming under section 505 of this Act and

shall not be available for obligation or expenditure except in compliance with the procedures set forth in that section.

ASSETS FORFEITURE FUND

For expenses authorized by 28 U.S.C. 524(c)(1)(B), (F), and (G), \$20,990,000, to be derived from the Department of Justice Assets Forfeiture Fund.

UNITED STATES MARSHALS SERVICE

SALARIES AND EXPENSES

For necessary expenses of the United States Marshals Service, \$1,125,763,000; of which not to exceed \$30,000 shall be available for official reception and representation expenses; of which not to exceed \$4,000,000 shall remain available until expended for information technology systems.

CONSTRUCTION

For construction in space controlled, occupied or utilized by the United States Marshals Service for prisoner holding and related support, \$26,625,000, to remain available until expended; and of which not less than \$12,625,000 shall be available for the costs of courthouse security equipment, including furnishings, relocations, and telephone systems and cabling.

NATIONAL SECURITY DIVISION

SALARIES AND EXPENSES

For expenses necessary to carry out the activities of the National Security Division, \$87,938,000; of which not to exceed \$5,000,000 for information technology systems shall remain available until expended: Provided, That notwithstanding section 205 of this Act, upon a determination by the Attorney General that emergent circumstances require additional funding for the activities of the National Security Division, the Attorney General may transfer such amounts to this heading from available appropriations for the current fiscal year for the Department of Justice, as may be necessary to respond to such circumstances: Provided further, That any transfer pursuant to the preceding proviso shall be treated as a reprogramming under section 505 of this Act and shall not be available for obligation or expenditure except in compliance with the procedures set forth in that section.

INTERAGENCY LAW ENFORCEMENT

INTERAGENCY CRIME AND DRUG ENFORCEMENT

For necessary expenses for the identification, investigation, and prosecution of individuals associated with the most significant drug trafficking and affiliated money laundering organizations not otherwise provided for, to include inter-governmental agreements with State and local law enforcement agencies engaged in the investigation and prosecution of individuals involved in organized crime drug trafficking, \$515,000,000, of which \$50,000,000 shall remain available until expended: Provided, That any amounts obligated from appropriations under this heading may be used under authorities available to the organizations reimbursed from this appropriation.

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

For necessary expenses of the Federal Bureau of Investigation for detection, investigation, and prosecution of crimes against the United States; \$7,668,622,000, of which \$101,066,000 is designated as being for overseas deployments and other activities pursuant to sections 401(c)(4) and 423(a)(1) of S. Con. Res. 13 (111th Congress), the concurrent resolution on the budget for fiscal year 2010; and of which not to exceed \$150,000,000 shall remain available until expended: Provided, That not to exceed \$205,000 shall be available for official reception and representation expenses: Provided further, That

notwithstanding section 205 of this Act, the Director of the Federal Bureau of Investigation, upon a determination that additional funding is necessary to carry out construction of the Biometrics Technology Center, may transfer from amounts available for "Salaries and Expenses" to amounts available for "Construction" up to \$30,000,000 in fees collected to defray expenses for the automation of fingerprint identification and criminal justice information services and associated costs: Provided further, That any transfer made pursuant to the previous proviso shall be subject to section 505 of this Act.

CONSTRUCTION

For all necessary expenses, to include the cost of equipment, furniture, and information technology requirements, related to construction or acquisition of buildings, facilities and sites by purchase, or as otherwise authorized by law; conversion, modification and extension of federally owned buildings; and preliminary planning and design of projects; \$244,915,000, to remain available until expended.

DRUG ENFORCEMENT ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the Drug Enforcement Administration, including not to exceed \$70,000 to meet unforeseen emergencies of a confidential character pursuant to 28 U.S.C. 530C; and expenses for conducting drug education and training programs, including travel and related expenses for participants in such programs and the distribution of items of token value that promote the goals of such programs, \$2,014,682,000; of which \$10,000,000 is designated as being for overseas deployments and other activities pursuant to sections 401(c)(4) and 423(a)(1) of S. Con. Res. 13 (111th Congress), the concurrent resolution on the budget for fiscal year 2010; and of which not to exceed \$75,000,000 shall remain available until expended; and of which not to exceed \$100,000 shall be available for official reception and representation expenses.

BUREAU OF ALCOHOL, TOBACCO, FIREARMS AND EXPLOSIVES

SALARIES AND EXPENSES

For necessary expenses of the Bureau of Alcohol, Tobacco, Firearms and Explosives, not to exceed \$40,000 for official reception and representation expenses; for training of State and local law enforcement agencies with or without reimbursement, including training in connection with the training and acquisition of canines for explosives and fire accelerants detection; and for provision of laboratory assistance to State and local law enforcement agencies, with or without reimbursement, \$1,114,772,000, of which not to exceed \$1,000,000 shall be available for the payment of attorneys' fees as provided by section 924(d)(2) of title 18, United States Code; and of which \$10,000,000 shall remain available until expended: Provided, That no funds appropriated herein shall be available for salaries or administrative expenses in connection with consolidating or centralizing, within the Department of Justice, the records, or any portion thereof, of acquisition and disposition of firearms maintained by Federal firearms licensees: Provided further, That no funds appropriated herein shall be used to pay administrative expenses or the compensation of any officer or employee of the United States to implement an amendment or amendments to 27 CFR 478.118 or to change the definition of "Curios or relics" in 27 CFR 478.11 or remove any item from ATF Publication 5300.11 as it existed on January 1, 1994: Provided further, That none of the funds appropriated herein shall be available to investigate or act upon applications for relief from Federal firearms disabilities under 18 U.S.C. 925(c): Provided further, That such funds shall

be available to investigate and act upon applications filed by corporations for relief from Federal firearms disabilities under section 925(c) of title 18, United States Code: Provided further, That no funds made available by this or any other Act may be used to transfer the functions, missions, or activities of the Bureau of Alcohol, Tobacco, Firearms and Explosives to other agencies or Departments in fiscal year 2010: Provided further, That, beginning in fiscal year 2010 and thereafter, no funds appropriated under this or any other Act may be used to disclose part or all of the contents of the Firearms Trace System database maintained by the National Trace Center of the Bureau of Alcohol, Tobacco, Firearms and Explosives or any information required to be kept by licensees pursuant to section 923(g) of title 18, United States Code, or required to be reported pursuant to paragraphs (3) and (7) of such section 923(g), except to: (1) a Federal, State, local, tribal, or foreign law enforcement agency, or a Federal, State, or local prosecutor; or (2) a foreign law enforcement agency solely in connection with or for use in a criminal investigation or prosecution; or solely in connection with and for use in a criminal investigation or prosecution; or (3) a Federal agency for a national security or intelligence purpose; unless such disclosure of such data to any of the entities described in (1), (2) or (3) of this proviso would compromise the identity of any undercover law enforcement officer or confidential informant, or interfere with any case under investigation; and no person or entity described in (1), (2) or (3) shall knowingly or publicly disclose such data; and all such data shall be immune from legal process, shall not be subject to subpoena or other discovery, shall be inadmissible in evidence, and shall not be used, relied on, or disclosed in any manner, nor shall testimony or other evidence be permitted based on the data, in a civil action in any State (including the District of Columbia) or Federal court or in an administrative proceeding other than a proceeding commenced by the Bureau of Alcohol, Tobacco, Firearms and Explosives to enforce the provisions of chapter 44 of such title, or a review of such an action or proceeding; except that this proviso shall not be construed to prevent: (A) the disclosure of statistical information concerning total production, importation, and exportation by each licensed importer (as defined in section 921(a)(9) of such title) and licensed manufacturer (as defined in section 921(a)(10) of such title); (B) the sharing or exchange of such information among and between Federal, State, local, or foreign law enforcement agencies, Federal, State, or local prosecutors, and Federal national security, intelligence, or counterterrorism officials; or (C) the publication of annual statistical reports on products regulated by the Bureau of Alcohol, Tobacco, Firearms and Explosives, including total production, importation, and exportation by each licensed importer (as so defined) and licensed manufacturer (as so defined), or statistical aggregate data regarding firearms traffickers and trafficking channels, or firearms misuse, felons, and trafficking investigations: Provided further, That no funds made available by this or any other Act shall be expended to promulgate or implement any rule requiring a physical inventory of any business licensed under section 923 of title 18, United States Code: Provided further, That no funds under this Act may be used to electronically retrieve information gathered pursuant to 18 U.S.C. 923(g)(4) by name or any personal identification code: Provided further, That no funds authorized or made available under this or any other Act may be used to deny any application for a license under section 923 of title 18, United States Code, or renewal of such a license due to a lack of business activity, provided that the applicant is otherwise eligible

to receive such a license, and is eligible to report business income or to claim an income tax deduction for business expenses under the Internal Revenue Code of 1986.

CONSTRUCTION

For necessary expenses to construct or acquire buildings and sites to purchase, or as otherwise authorized by law (including equipment for such buildings); conversion and extension of federally owned buildings; and preliminary planning and design of projects; \$6,000,000, to remain until expended.

FEDERAL PRISON SYSTEM

SALARIES AND EXPENSES

For necessary expenses of the Federal Prison System for the administration, operation, and maintenance of Federal penal and correctional institutions, including purchase (not to exceed \$31, of which 743 are for replacement only) and hire of law enforcement and passenger motor vehicles, and for the provision of technical assistance and advice on corrections related issues to foreign governments, \$5,979,831,000, of which \$10,500,000 is designated as being for overseas deployments and other activities pursuant to sections 401(c)(4) and 423(a)(1) of S. Con. Res. 13 (111th Congress), the concurrent resolution on the budget for fiscal year 2010: Provided, That the Attorney General may transfer to the Health Resources and Services Administration such amounts as may be necessary for direct expenditures by that Administration for medical relief for inmates of Federal penal and correctional institutions: Provided further, That the Director of the Federal Prison System, where necessary, may enter into contracts with a fiscal agent or fiscal intermediary claims processor to determine the amounts payable to persons who, on behalf of the Federal Prison System, furnish health services to individuals committed to the custody of the Federal Prison System: Provided further, That not to exceed \$6,000 shall be available for official reception and representation expenses: Provided further, That not to exceed \$50,000,000 shall remain available for necessary operations until September 30, 2011: Provided further, That, of the amounts provided for contract confinement, not to exceed \$20,000,000 shall remain available until expended to make payments in advance for grants, contracts and reimbursable agreements, and other expenses authorized by section 501(c) of the Refugee Education Assistance Act of 1980 (8 U.S.C. 1522 note), for the care and security in the United States of Cuban and Haitian entrants: Provided further, That the Director of the Federal Prison System may accept donated property and services relating to the operation of the prison card program from a not-for-profit entity which has operated such program in the past notwithstanding the fact that such not-for-profit entity furnishes services under contracts to the Federal Prison System relating to the operation of pre-release services, halfway houses, or other custodial facilities.

BUILDINGS AND FACILITIES

For planning, acquisition of sites and construction of new facilities; purchase and acquisition of facilities and remodeling, and equipping of such facilities for penal and correctional use, including all necessary expenses incident thereto, by contract or force account; and constructing, remodeling, and equipping necessary buildings and facilities at existing penal and correctional institutions, including all necessary expenses incident thereto, by contract or force account, \$99,155,000, to remain available until expended, of which not less than \$73,769,000 shall be available only for modernization, maintenance and repair, and of which not to exceed \$14,000,000 shall be available to construct areas for inmate work programs: Provided, That labor of United States prisoners may be used for work performed under this appropriation.

FEDERAL PRISON INDUSTRIES, INCORPORATED

The Federal Prison Industries, Incorporated, is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available, and in accord with the law, and to make such contracts and commitments, without regard to fiscal year limitations as provided by section 9104 of title 31, United States Code, as may be necessary in carrying out the program set forth in the budget for the current fiscal year for such corporation, including purchase (not to exceed five for replacement only) and hire of passenger motor vehicles.

LIMITATION ON ADMINISTRATIVE EXPENSES, FEDERAL PRISON INDUSTRIES, INCORPORATED

Not to exceed \$2,700,000 of the funds of the Federal Prison Industries, Incorporated shall be available for its administrative expenses, and for services as authorized by section 3109 of title 5, United States Code, to be computed on an accrual basis to be determined in accordance with the corporation's current prescribed accounting system, and such amounts shall be exclusive of depreciation, payment of claims, and expenditures which such accounting system requires to be capitalized or charged to cost of commodities acquired or produced, including selling and shipping expenses, and expenses in connection with acquisition, construction, operation, maintenance, improvement, protection, or disposition of facilities and other property belonging to the corporation or in which it has an interest.

STATE AND LOCAL LAW ENFORCEMENT ACTIVITIES

OFFICE ON VIOLENCE AGAINST WOMEN VIOLENCE AGAINST WOMEN PREVENTION AND PROSECUTION PROGRAMS

For grants, contracts, cooperative agreements, and other assistance for the prevention and prosecution of violence against women, as authorized by the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711 et seq.) (6) \$41,000,000 for rural domestic violence and child abuse enforcement assistance grants, as authorized by section 40295 of the 1994 Act;

(7) \$3,000,000 for training programs as authorized by section 40152 of the 1994 Act, and for related local demonstration projects;

(8) \$3,000,000 for grants to improve the stalking and domestic violence databases, as authorized by section 40602 of the 1994 Act;

(9) \$9,500,000 for grants to reduce violent crimes against women on campus, as authorized by section 304 of the 2005 Act;

(10) \$45,000,000 for legal assistance for victims, as authorized by section 1201 of the 2000 Act;

(11) \$4,250,000 for enhanced training and services to end violence against and abuse of women in later life, as authorized by section 40802 of the 1994 Act;

(12) \$14,000,000 for the safe havens for children program, as authorized by section 1301 of the 2000 Act;

(13) \$6,750,000 for education and training to end violence against and abuse of women with disabilities, as authorized by section 1402 of the 2000 Act;

(14) \$3,000,000 for an engaging men and youth in prevention program, as authorized by section 41305 of the 1994 Act;

(15) \$1,000,000 for analysis and research on violence against Indian women, as authorized by section 904 of the 2005 Act;

(16) \$1,000,000 for tracking of violence against Indian women, as authorized by section 905 of the 2005 Act;

(17) \$3,500,000 for services to advocate and respond to youth, as authorized by section 41201 of the 1994 Act;

(18) \$3,000,000 for grants to assist children and youth exposed to violence, as authorized by section 41303 of the 1994 Act;

(19) \$3,000,000 for the court training and improvements program, as authorized by section 41002 of the 1994 Act;

(20) \$500,000 for the National Resource Center on Workplace Responses to assist victims of domestic violence, as authorized by section 41501 of the 1994 Act; and

(21) \$1,000,000 for grants for televised testimony, as authorized by part N of title I of the 1968 Act.

OFFICE OF JUSTICE PROGRAMS JUSTICE ASSISTANCE

For grants, contracts, cooperative agreements, and other assistance authorized by title I of the Omnibus Crime Control and Safe Streets Act of 1968; the Missing Children's Assistance Act (42 U.S.C. 5771 et seq.); the Prosecutorial Remedies and Other Tools to end the Exploitation of Children Today Act of 2003 (Public Law 108-21); the Justice for All Act of 2004 (Public Law 108-405); the Violence Against Women and Department of Justice Reauthorization Act of 2005 (Public Law 109-162); the Second Chance Act of 2007 (Public Law 110-199); the Victims of Child Abuse Act of 1990 (Public Law 101-647); the Victims of Crime Act of 1984 (Public Law 98-473); the Adam Walsh Child Protection and Safety Act of 2006 (Public Law 109-248); the PROTECT Our Children Act of 2008 (Public Law 110-401); subtitle D of title II of the Homeland Security Act of 2002 (Public Law 107-296), which may include research and development; and other programs (including the Statewide Automated Victim Notification Program); \$215,000,000, to remain available until expended, of which:

(1) \$40,000,000 is for criminal justice statistics programs, pursuant to part C of the 1968 Act, of which \$35,000,000 is for the National Crime Victimization Survey;

(2) \$48,000,000 is for research, development, and evaluation programs;

(3) \$12,000,000 is for the Statewide Victim Notification System of the Bureau of Justice Assistance;

(4) \$45,000,000 is for the Regional Information System Sharing System, as authorized by part M of title I of the 1968 Act; and

(5) \$70,000,000 is for the Missing Children's Program.

STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE

For grants, contracts, cooperative agreements, and other assistance authorized by the Violent Crime Control and Law Enforcement Act of 1994 (Public Law 103-322) ("the 1994 Act"); the Omnibus Crime Control and Safe Streets Act of 1968 ("the 1968 Act"); the Justice for All Act of 2004 (Public Law 108-405); the Victims of Child Abuse Act of 1990 (Public Law 101-647) ("the 1990 Act"); the Trafficking Victims Protection Reauthorization Act of 2005 (Public Law 109-164); the Violence Against Women and Department of Justice Reauthorization Act of 2005 (Public Law 109-162); the Adam Walsh Child Protection and Safety Act of 2006 (Public Law 109-248); the Second Chance Act of 2007 (Public Law 110-199); and the Victims of Trafficking and Violence Protection Act of 2000 (Public Law 106-386); and other programs; \$1,159,000,000, to remain available until expended as follows:

(1) \$510,000,000 for the Edward Byrne Memorial Justice Assistance Grant program as authorized by subpart 1 of part E of title I of the 1968 Act, (except that section 1001(c), and the special rules for Puerto Rico under section 505(g), of the 1968 Act, shall not apply for purposes of this Act), of which \$5,000,000 is for use by the National Institute of Justice in assisting units of local government to identify, select, develop, modernize, and purchase new technologies for use by law enforcement, \$2,000,000 is for a program to improve State and local law enforcement intelligence capabilities including anti-terrorism training and training to ensure that constitutional rights, civil liberties, civil rights, and privacy interests are protected throughout the intelligence process, \$10,000,000 is to support the Nationwide Pegasus Program in coordination with the National Sheriff's Association, for rural and non-urban law enforcement databases and connectivity to enhance information sharing technology capacity, and \$10,000,000 is for implementation of a student loan repayment assistance program pursuant to section 952 of Public Law 110-315;

(2) \$178,500,000 for discretionary grants to improve the functioning of the criminal justice system, to prevent or combat juvenile delinquency, and to assist victims of crime (other than compensation): Provided, That within the amounts appropriated, \$178,500,000 shall be used for the projects, and in the amounts specified in the table entitled "Congressionally designated projects" in the report of the Committee on Appropriations of the Senate to accompany this Act;

(3) \$40,000,000 for competitive grants to improve the functioning of the criminal justice system, to prevent or combat juvenile delinquency, and to assist victims of crime (other than compensation) of which \$8,000,000 shall be available for the SMART Office activities and \$2,000,000 shall be available for grants to States and local law enforcement agencies as authorized by section 5 of Public Law 110-344;

(4) \$2,000,000 for the purposes described in the Missing Alzheimer's Disease Patient Alert Program (section 240001 of the 1994 Act);

(5) \$15,000,000 for victim services programs for victims of trafficking, as authorized by section 107(b)(2) of Public Law 106-386 and for programs authorized under Public Law 109-164;

(6) \$40,000,000 for Drug Courts, as authorized by section 1001(25)(A) of title I of the 1968 Act;

(7) \$5,000,000 for prison rape prevention and prosecution and other programs, as authorized by the Prison Rape Elimination Act of 2003 (Public Law 108-79);

(8) \$20,000,000 for grants for Residential Substance Abuse Treatment for State Prisoners, as authorized by part S of title I of the 1968 Act;

(9) \$50,000,000 for offender re-entry programs, as authorized by the Second Chance Act of 2007 (Public Law 110-199), of which \$25,000,000 is for grants for adult and juvenile offender State, tribal and local reentry demonstration projects, \$15,000,000 is for grants for mentoring and transitional services and \$5,000,000 is for family-based substance abuse treatment;

(10) \$5,500,000 for the Capital Litigation Improvement Grant Program, as authorized by section 426 of Public Law 108-405;

(11) \$10,000,000 for mental health courts and adult and juvenile collaboration program grants, as authorized by parts V and HH of title I of the 1968 Act, and the Mentally Ill Offender Treatment and Crime Reduction Reauthorization and Improvement Act of 2008 (Public Law 110-416);

(12) \$30,000,000 for assistance to Indian tribes, of which—

(A) \$10,000,000 shall be available for grants under section 20109 of subtitle A of title II of the 1994 Act;

(B) \$10,000,000 shall be available for the Tribal Courts Initiative;

(C) \$7,000,000 shall be available for tribal alcohol and substance abuse reduction assistance grants; and

(D) \$3,000,000 shall be available for training and technical assistance and civil and criminal legal assistance as authorized by title I of Public Law 106-559;

(13) \$228,000,000 for the State Criminal Alien Assistance Program, as authorized by section 241(i)(5) of the Immigration and Nationality Act (8 U.S.C. 1231(i)(5)); and

(14) \$25,000,000 for the Border Prosecutor Initiative to reimburse State, county, parish, tribal, or municipal governments for costs associated with the prosecution of criminal cases declined by local offices of the United States Attorneys: Provided, That no less than \$20,000,000 shall be for prosecution efforts on the Southern border: Provided further, That no less than \$5,000,000 shall be for prosecution efforts on the Northern border:

Provided, That, if a unit of local government uses any of the funds made available under this heading to increase the number of law enforcement officers, the unit of local government will achieve a net gain in the number of law enforcement officers who perform nonadministrative public safety service.

WEED AND SEED PROGRAM FUND

For necessary expenses, including salaries and related expenses of the Office of Weed and Seed Strategies, \$20,000,000, to remain available until expended, as authorized by section 103 of title I of the Omnibus Crime Control and Safe Streets Act of 1968.

JUVENILE JUSTICE PROGRAMS

For grants, contracts, cooperative agreements, and other assistance authorized by the Juvenile Justice and Delinquency Prevention Act of 1974 ("the 1974 Act"), the Omnibus Crime Control and Safe Streets Act of 1968 ("the 1968 Act"), the Violence Against Women and Department of Justice Reauthorization Act of 2005 (Public Law 109-162), the Missing Children's Assistance Act (42 U.S.C. 5771 et seq.); the Prosecutorial Remedies and Other Tools to end the Exploitation of Children Today Act of 2003 (Public Law 108-21); the Victims of Child Abuse Act of 1990 (Public Law 101-647); the Adam Walsh Child Protection and Safety Act of 2006 (Public Law 109-248); the PROTECT Our Children Act of 2008 (Public

Law 110-401), and other juvenile justice programs, \$407,000,000, to remain available until expended as follows:

(1) \$75,000,000 for programs authorized by section 221 of the 1974 Act, and for training and technical assistance to assist small, non-profit organizations with the Federal grants process: Provided, That no less than \$5,000,000 shall be for the Safe Start Program, as authorized by the 1974 Act;

(2) \$82,000,000 for grants and projects, as authorized by sections 261 and 262 of the 1974 Act: Provided, That within the amounts appropriated, \$82,000,000 shall be used for the projects, and in the amounts, specified in the table entitled "Congressionally designated projects" in the report of the Committee on Appropriations of the Senate to accompany this Act;

(3) \$100,000,000 for youth mentoring grants;

(4) \$65,000,000 for delinquency prevention, as authorized by section 505 of the 1974 Act, of which, pursuant to sections 261 and 262 thereof—

(A) \$25,000,000 shall be for the Tribal Youth Program;

(B) \$10,000,000 shall be for a gang education initiative; and

(C) \$25,000,000 shall be for grants of \$360,000 to each State and \$4,840,000 shall be available for discretionary grants, for programs and activities to enforce State laws prohibiting the sale of alcoholic beverages to minors or the purchase or consumption of alcoholic beverages by minors, for prevention and reduction of consumption of alcoholic beverages by minors, and for technical assistance and training;

(5) \$25,000,000 for programs authorized by the Victims of Child Abuse Act of 1990; and

(6) \$60,000,000 for the Juvenile Accountability Block Grants program as authorized by part R of title I of the 1968 Act and Guam shall be considered a State:

Provided, That not more than 10 percent of each amount may be used for research, evaluation, and statistics activities designed to benefit the programs or activities authorized: Provided further, That not more than 2 percent of each amount may be used for training and technical assistance: Provided further, That the previous two provisos shall not apply to grants and projects authorized by sections 261 and 262 of the 1974 Act.

PUBLIC SAFETY OFFICER BENEFITS

For payments and expenses authorized under section 1001(a)(4) of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3796), such sums as are necessary (including amounts for administrative costs, which amounts shall be paid to the "Salaries and Expenses" account); and \$5,000,000 for payments authorized by section 1201(b) of such Act; and \$4,100,000 for educational assistance, as authorized by section 1218 of such Act, to remain available until expended.

COMMUNITY ORIENTED POLICING SERVICES

For activities authorized by the Violent Crime Control and Law Enforcement Act of 1994 (Public Law 103-322); the Omnibus Crime Control and Safe Streets Act of 1968 ("the 1968 Act"); the Violence Against Women and Department of Justice Reauthorization Act of 2005 (Public Law 109-162); subtitle D of title II of the Homeland Security Act of 2002 (Public Law 107-296), which may include research and development; and the USA PATRIOT Improvement and Reauthorization Act of 2005 (Public Law 109-177); the NICS Improvement Amendments Act of 2007 (Public Law 110-180); the Adam Walsh Child Protection and Safety Act of 2006 (Public Law 109-248) (the "Adam Walsh Act"); and the Justice for All Act of 2004 (Public Law 108-405), \$658,500,000, to remain available until expended: Provided, That

any balances made available through prior year deobligations shall only be available in accordance with section 505 of this Act. Of the amount provided (which shall be by transfer, for programs administered by the Office of Justice Programs)—

(1) \$30,000,000 for the matching grant program for law enforcement armor vests, as authorized by section 2501 of title I of the 1968 Act: Provided, That \$1,500,000 is transferred directly to the National Institute of Standards and Technology's Office of Law Enforcement Standards from the Community Oriented Policing Services Office for research, testing, and evaluation programs;

(2) \$39,500,000 for grants to entities described in section 1701 of title I of the 1968 Act, to address public safety and methamphetamine manufacturing, sale, and use in hot spots as authorized by section 754 of Public Law 109-177, and for other anti-methamphetamine-related activities: Provided, That within the amounts appropriated, \$34,500,000 shall be used for the projects, and in the amounts, specified in the table entitled "Congressionally designated projects" in the report of the Committee on Appropriations of the Senate to accompany this Act;

(3) \$187,000,000 for a law enforcement technologies and interoperable communications program, and related law enforcement and public safety equipment: Provided, That within the amounts appropriated, \$187,000,000 shall be used for the projects, and in the amounts, specified in the table entitled "Congressionally designated projects" in the report of the Committee on Appropriations of the Senate to accompany this Act;

(4) \$10,000,000 for grants to assist States and tribal governments as authorized by the NICS Improvements Amendments Act of 2007 (Public Law 110-180);

(5) \$10,000,000 for grants to upgrade criminal records, as authorized under the Crime Identification Technology Act of 1998 (42 U.S.C. 14601);

(6) \$166,000,000 for DNA related and forensic programs and activities as follows:

(A) \$151,000,000 for a DNA analysis and capacity enhancement program and for other local, State, and Federal forensic activities including the purposes of section 2 of the DNA Analysis Backlog Elimination Act of 2000 (the Debbie Smith DNA Backlog Grant Program);

(B) \$5,000,000 for the purposes described in the Kirk Bloodsworth Post-Conviction DNA Testing Program (Public Law 108-405, section 412);

(C) \$5,000,000 for Sexual Assault Forensic Exam Program Grants as authorized by Public Law 108-405, section 304; and

(D) \$5,000,000 for DNA Training and Education for Law Enforcement, Correctional Personnel, and Court Officers as authorized by Public Law 108-405, section 303;

(7) \$20,000,000 for improving tribal law enforcement, including equipment and training;

(8) \$15,000,000 for programs to reduce gun crime and gang violence;

(9) \$10,000,000 for training and technical assistance;

(10) \$20,000,000 for a national grant program the purpose of which is to assist State and local law enforcement to locate, arrest and prosecute child sexual predators and exploiters, and to enforce sex offender registration laws described in section 1701(b) of the 1968 Act, of which:

(A) \$5,000,000 for sex offender management assistance as authorized by the Adam Walsh Act and the Violent Crime Control Act of 1994 (Public Law 103-322); and

(B) \$1,000,000 for the National Sex Offender Public Registry;

(11) \$16,000,000 for expenses authorized by part AA of the 1968 Act (Secure our Schools);

(12) \$35,000,000 for Paul Coverdell Forensic Science Improvement Grants under part BB of title I of the 1968 Act; and

(13) \$100,000,000 for grants under section 1701 of title I of the 1968 Act (42 U.S.C. 3796dd) for the hiring and rehiring of additional career law enforcement officers under part Q of such title notwithstanding subsections (g) and (i) of such section and notwithstanding 42 U.S.C. 3796dd-3(c).

SALARIES AND EXPENSES

For necessary expenses, not elsewhere specified in this title, for management and administration of programs within the Office on Violence Against Women, the Office of Justice Programs and the Community Oriented Policing Services Office, \$179,000,000, of which not to exceed \$15,708,000 shall be available for the Office on Violence Against Women; not to exceed \$125,830,000 shall be available for the Office of Justice Programs; not to exceed \$37,462,000 shall be available for the Community Oriented Policing Services Office: Provided, That, notwithstanding section 109 of title I of Public Law 90-351, an additional amount, not to exceed \$21,000,000 shall be available for authorized activities of the Office of Audit, Assessment, and Management: Provided further, That the total amount available for management and administration of such programs shall not exceed \$200,000,000.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 201. In addition to amounts otherwise made available in this title for official reception and representation expenses, a total of not to exceed \$75,000 from funds appropriated to the Department of Justice in this title shall be available to the Attorney General for official reception and representation expenses.

SEC. 202. None of the funds appropriated by this title shall be available to pay for an abortion, except where the life of the mother would be endangered if the fetus were carried to term, or in the case of rape: Provided, That should this prohibition be declared unconstitutional by a court of competent jurisdiction, this section shall be null and void.

SEC. 203. None of the funds appropriated under this title shall be used to require any person to perform, or facilitate in any way the performance of, any abortion.

SEC. 204. Nothing in the preceding section shall remove the obligation of the Director of the Bureau of Prisons to provide escort services necessary for a female inmate to receive such service outside the Federal facility: Provided, That nothing in this section in any way diminishes the effect of section 203 intended to address the philosophical beliefs of individual employees of the Bureau of Prisons.

SEC. 205. Not to exceed 5 percent of any appropriation made available for the current fiscal year for the Department of Justice in this Act may be transferred between such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 10 percent by any such transfers: Provided, That any transfer pursuant to this section shall be treated as a reprogramming of funds under section 505 of this Act and shall not be available for obligation except in compliance with the procedures set forth in that section.

SEC. 206. The Attorney General is authorized to extend through September 30, 2011, the Personnel Management Demonstration Project transferred to the Attorney General pursuant to section 1115 of the Homeland Security Act of 2002, Public Law 107-296 (6 U.S.C. 533) without limitation on the number of employees or the positions covered.

SEC. 207. Notwithstanding any other provision of law, Public Law 102-395 section 102(b) shall extend to the Bureau of Alcohol, Tobacco, Fire-

arms and Explosives in the conduct of undercover investigative operations and shall apply without fiscal year limitation with respect to any undercover investigative operation by the Bureau of Alcohol, Tobacco, Firearms and Explosives that is necessary for the detection and prosecution of crimes against the United States.

SEC. 208. None of the funds made available to the Department of Justice in this Act may be used for the purpose of transporting an individual who is a prisoner pursuant to conviction for crime under State or Federal law and is classified as a maximum or high security prisoner, other than to a prison or other facility certified by the Federal Bureau of Prisons as appropriately secure for housing such a prisoner.

SEC. 209. (a) None of the funds appropriated by this Act may be used by Federal prisons to purchase cable television services, to rent or purchase videocassettes, videocassette recorders, or other audiovisual or electronic equipment used primarily for recreational purposes.

(b) The preceding sentence does not preclude the renting, maintenance, or purchase of audiovisual or electronic equipment for inmate training, religious, or educational programs.

SEC. 210. None of the funds made available under this title shall be obligated or expended for Sentinel, or for any other major new or enhanced information technology program having total estimated development costs in excess of \$100,000,000, unless the Deputy Attorney General and the investment review board certify to the Committees on Appropriations that the information technology program has appropriate program management and contractor oversight mechanisms in place, and that the program is compatible with the enterprise architecture of the Department of Justice.

SEC. 211. The notification thresholds and procedures set forth in section 505 of this Act shall apply to deviations from the amounts designated for specific activities in this Act and accompanying statement, and to any use of deobligated balances of funds provided under this title in previous years.

SEC. 212. None of the funds appropriated by this Act may be used to plan for, begin, continue, finish, process, or approve a public-private competition under the Office of Management and Budget Circular A-76 or any successor administrative regulation, directive, or policy for work performed by employees of the Bureau of Prisons or of Federal Prison Industries, Incorporated.

SEC. 213. Notwithstanding any other provision of law, no funds shall be available for the salary, benefits, or expenses of any United States Attorney assigned dual or additional responsibilities by the Attorney General or his designee that exempt that United States Attorney from the residency requirements of 28 U.S.C. 545.

SEC. 214. None of the funds appropriated in this or any other Act shall be obligated for the initiation of a future phase of the Federal Bureau of Investigation's Sentinel program until the Attorney General certifies to the Committees on Appropriations that existing phases currently under contract for development or fielding have completed a majority of the work for that phase under the performance measurement baseline validated by the integrated baseline review conducted in 2008: Provided, That this restriction does not apply to planning and design activities for future phases: Provided further, That the Bureau will notify the Committees on Appropriations of any significant changes to the baseline.

SEC. 215. In addition to any amounts that otherwise may be available (or authorized to be made available) by law, with respect to funds appropriated by this Act under the headings

“Justice Assistance”, “State and Local Law Enforcement Assistance”, “Weed and Seed”, “Juvenile Justice Programs”, and “Community Oriented Policing Services”—

(1) Up to 3 percent of funds made available to the Office of Justice Programs for grants or reimbursement may be used to provide training and technical assistance; and

(2) Up to 1 percent of funds made available to such Office for formula grants under such headings may be used for research or statistical purposes by the National Institute of Justice or the Bureau of Justice Statistics, pursuant to, respectively, sections 201 and 202, and sections 301 and 302 of title I of Public Law 90–351.

SEC. 216. Section 5759(e) of title 5, United States Code, is amended by striking subsection (e).

SEC. 217. (a) The Attorney General shall submit quarterly reports to the Inspector General of the Department of Justice regarding the costs and contracting procedures relating to each conference held by the Department of Justice during fiscal year 2010 for which the cost to the Government was more than \$20,000.

(b) Each report submitted under subsection (a) shall include, for each conference described in that subsection held during the applicable quarter—

(1) a description of the subject of and number of participants attending that conference;

(2) a detailed statement of the costs to the Government relating to that conference, including—

(A) the cost of any food or beverages;

(B) the cost of any audio-visual services; and

(C) a discussion of the methodology used to determine which costs relate to that conference; and

(3) a description of the contracting procedures relating to that conference, including—

(A) whether contracts were awarded on a competitive basis for that conference; and

(B) a discussion of any cost comparison conducted by the Department of Justice in evaluating potential contractors for that conference.

SEC. 218. (a) Subchapter IV of chapter 57 of title 5, United States Code, is amended by adding at the end of the following:

“§5761. Foreign language proficiency pay awards for the Federal Bureau of Investigation

“The Director of the Federal Bureau of Investigation may, under regulations prescribed by the Director, pay a cash award of up to 10 percent of basic pay to any Bureau employee who maintains proficiency in a language or languages critical to the mission or who uses one or more foreign languages in the performance of official duties.”.

(b) The analysis for chapter 57 of title 5, United States Code, is amended by adding at the end the following:

“§5761. Foreign language proficiency pay awards for the Federal Bureau of Investigation.”

SEC. 219. The Attorney General is authorized to waive the application of 42 U.S.C. 3755(d)(2)(A) with respect to grants made to units of local government pursuant to 42 U.S.C. 3755(d)(1), if such units of local government were eligible to receive such grants under the transitional rule in 42 U.S.C. 3755(d)(2)(B).

This title may be cited as the “Department of Justice Appropriations Act, 2010”.

TITLE III

SCIENCE

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

For necessary expenses of the Office of Science and Technology Policy, in carrying out the purposes of the National Science and Technology Policy, Organization, and Priorities Act

of 1976 (42 U.S.C. 6601–6671), hire of passenger motor vehicles, and services as authorized by 5 U.S.C. 3109, not to exceed \$2,500 for official reception and representation expenses, and rental of conference rooms in the District of Columbia, \$6,154,000.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

SCIENCE

For necessary expenses, not otherwise provided for, in the conduct and support of science research and development activities, including research, development, operations, support, and services; maintenance; construction of facilities including repair, rehabilitation, revitalization, and modification of facilities, construction of new facilities and additions to existing facilities, facility planning and design, and restoration, and acquisition or condemnation of real property, as authorized by law; environmental compliance and restoration; space flight, spacecraft control, and communications activities; program management; personnel and related costs, including uniforms or allowances therefor, as authorized by 5 U.S.C. 5901–5902; travel expenses; purchase and hire of passenger motor vehicles; and purchase, lease, charter, maintenance, and operation of mission and administrative aircraft, \$4,517,000,000, to remain available until September 30, 2011.

AERONAUTICS

For necessary expenses, not otherwise provided for, in the conduct and support of aeronautics research and development activities, including research, development, operations, support, and services; maintenance; construction of facilities including repair, rehabilitation, revitalization, and modification of facilities, construction of new facilities and additions to existing facilities, facility planning and design, and restoration, and acquisition or condemnation of real property, as authorized by law; environmental compliance and restoration; space flight, spacecraft control, and communications activities; program management; personnel and related costs, including uniforms or allowances therefor, as authorized by 5 U.S.C. 5901–5902; travel expenses; purchase and hire of passenger motor vehicles; and purchase, lease, charter, maintenance, and operation of mission and administrative aircraft, \$507,000,000, to remain available until September 30, 2011.

EXPLORATION

For necessary expenses, not otherwise provided for, in the conduct and support of exploration research and development activities, including research, development, operations, support, and services; maintenance; construction of facilities including repair, rehabilitation, revitalization, and modification of facilities, construction of new facilities and additions to existing facilities, facility planning and design, and restoration, and acquisition or condemnation of real property, as authorized by law; environmental compliance and restoration; space flight, spacecraft control, and communications activities; program management, personnel and related costs, including uniforms or allowances therefor, as authorized by 5 U.S.C. 5901–5902; travel expenses; purchase and hire of passenger motor vehicles; and purchase, lease, charter, maintenance, and operation of mission and administrative aircraft, \$3,940,400,000, to remain available until September 30, 2011.

SPACE OPERATIONS

For necessary expenses, not otherwise provided for, in the conduct and support of space operations research and development activities, including research, development, operations, support and services; space flight, spacecraft control and communications activities including operations, production, and services; maintenance; construction of facilities including repair, rehabilitation, revitalization and modification of facilities, construction of new facilities and additions to existing facilities, facility planning and design, and restoration, and acquisition or condemnation of real property, as authorized by law; environmental compliance and restoration; program management; personnel and related costs, including uniforms or allowances therefor, as authorized by 5 U.S.C. 5901–5902; travel expenses; purchase and hire of passenger motor vehicles; and purchase, lease, charter, maintenance, and operation of mission and administrative aircraft, \$6,161,600,000, to remain available until September 30, 2011.

For necessary expenses, not otherwise provided for, in the conduct and support of science, aeronautics, exploration, space operations and education research and development activities, including research, development, operations, support, and services; maintenance; construction of facilities including repair, rehabilitation, revitalization, and modification of facilities, construction of new facilities and additions to existing facilities, facility planning and design, and restoration, and acquisition or condemnation of real property, as authorized by law; environmental compliance and restoration; program management; personnel and related costs, including uniforms or allowances therefor, as authorized by 5 U.S.C. 5901–5902; travel expenses; purchase and hire of passenger motor vehicles; and purchase, lease, charter, maintenance, and operation of mission and administrative aircraft, \$140,100,000, to remain available until September 30, 2011.

EDUCATION

For necessary expenses, not otherwise provided for, in carrying out aerospace and aeronautical education research and development activities, including research, development, operations, support, and services; program management; personnel and related costs, uniforms or allowances therefor, as authorized by 5 U.S.C. 5901–5902; travel expenses; purchase and hire of passenger motor vehicles; and purchase, lease, charter, maintenance, and operation of mission and administrative aircraft, \$140,100,000, to remain available until September 30, 2011.

CROSS AGENCY SUPPORT

For necessary expenses, not otherwise provided for, in the conduct and support of science, aeronautics, exploration, space operations and education research and development activities, including research, development, operations, support, and services; maintenance; construction of facilities including repair, rehabilitation, revitalization, and modification of facilities, construction of new facilities and additions to existing facilities, facility planning and design, and restoration, and acquisition or condemnation of real property, as authorized by law; environmental compliance and restoration; space flight, spacecraft control, and communications activities; program management; personnel and related costs, including uniforms or allowances therefor, as authorized by 5 U.S.C. 5901–5902; travel expenses; purchase and hire of passenger motor vehicles; not to exceed \$70,000 for official reception and representation expenses; and purchase, lease, charter, maintenance, and operation of mission and administrative aircraft, \$3,383,500,000, to remain available until September 30, 2011: Provided, That within the amounts appropriated \$47,000,000 shall be used for the projects, and in the amounts, specified in the table entitled “Congressionally designated projects” in the report of the Committee on Appropriations of the Senate to accompany this Act.

OFFICE OF INSPECTOR GENERAL

For necessary expenses of the Office of Inspector General in carrying out the Inspector General Act of 1978, \$36,400,000, to remain available until September 30, 2011.

ADMINISTRATIVE PROVISIONS

Notwithstanding the limitation on the duration of availability of funds appropriated to the National Aeronautics and Space Administration for any account in this Act, except for “Office of Inspector General”, when any activity has been initiated by the incurrence of obligations for environmental compliance and restoration activities as authorized by law, such amount available for such activity shall remain available until expended.

Notwithstanding the limitation on the availability of funds appropriated to the National Aeronautics and Space Administration for any account in this Act, except for “Office of Inspector General”, the amounts appropriated for construction of facilities shall remain available until September 30, 2014.

Funds for announced prizes otherwise authorized shall remain available, without fiscal year limitation, until the prize is claimed or the offer is withdrawn.

Not to exceed 5 percent of any appropriation made available for the current fiscal year for the National Aeronautics and Space Administration in this Act may be transferred between such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 10 percent by any such transfers. Any transfer pursuant to this provision shall be treated as a reprogramming of funds under section 505 of this Act and shall not be available for obligation except in compliance with the procedures set forth in that section.

Notwithstanding any other provision of law, no funds shall be used to implement any Reduction in Force or other involuntary separations (except for cause) by the National Aeronautics and Space Administration prior to September 30, 2010.

The unexpired balances of the Science, Aeronautics, and Exploration account, for activities for which funds are provided under this Act, may be transferred to the new accounts established in this Act that provide such activity. Balances so transferred shall be merged with the funds in the newly established accounts, but shall be available under the same terms, conditions and period of time as previously appropriated.

Funding designations and minimum funding requirements contained in any other Act shall not be applicable to funds appropriated by this title for the National Aeronautics and Space Administration.

NATIONAL SCIENCE FOUNDATION
RESEARCH AND RELATED ACTIVITIES
(INCLUDING TRANSFER OF FUNDS)

For necessary expenses in carrying out the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861–1875), and the Act to establish a National Medal of Science (42 U.S.C. 1880–1881); services as authorized by 5 U.S.C. 3109; maintenance and operation of aircraft and purchase of flight services for research support; acquisition of aircraft; and authorized travel; \$5,618,000,000, to remain available until September 30, 2011, of which not to exceed \$570,000,000 shall remain available until expended for polar research and operations support, and for reimbursement to other Federal agencies for operational and science support and logistical and other related activities for the United States Antarctic program: Provided, That from funds specified in the fiscal year 2010 budget request for icebreaking services, \$54,000,000 shall be transferred to the U.S. Coast Guard “Operating Expenses”: Provided further, That receipts for scientific support services and materials furnished by the National Research Centers and other National Science Foundation supported research facilities may be credited to this appropriation: Provided further, That not less than \$147,800,000 shall be available for activities authorized by section 7002(c)(2)(A)(iv) of Public Law 110–69.

MAJOR RESEARCH EQUIPMENT AND FACILITIES
CONSTRUCTION

For necessary expenses for the acquisition, construction, commissioning, and upgrading of major research equipment, facilities, and other such capital assets pursuant to the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861–1875), including authorized travel, \$122,290,000, to remain available until expended.

EDUCATION AND HUMAN RESOURCES

For necessary expenses in carrying out science and engineering education and human resources programs and activities pursuant to the National Science Foundation Act of 1950, as

amended (42 U.S.C. 1861–1875), including services as authorized by 5 U.S.C. 3109, authorized travel, and rental of conference rooms in the District of Columbia, \$857,760,000, to remain available until September 30, 2011: Provided, That not less than \$55,000,000 shall be available until expended for activities authorized by section 7030 of Public Law 110–69.

AGENCY OPERATIONS AND AWARD MANAGEMENT

For agency operations and award management necessary in carrying out the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861–1875); services authorized by 5 U.S.C. 3109; hire of passenger motor vehicles; not to exceed \$9,000 for official reception and representation expenses; uniforms or allowances therefor, as authorized by 5 U.S.C. 5901–5902; rental of conference rooms in the District of Columbia; and reimbursement of the Department of Homeland Security for security guard services; \$300,370,000: Provided, That contracts may be entered into under this heading in fiscal year 2010 for maintenance and operation of facilities, and for other services, to be provided during the next fiscal year.

OFFICE OF THE NATIONAL SCIENCE BOARD

For necessary expenses (including payment of salaries, authorized travel, hire of passenger motor vehicles, the rental of conference rooms in the District of Columbia, and the employment of experts and consultants under section 3109 of title 5, United States Code) involved in carrying out section 4 of the National Science Foundation Act of 1950, as amended (42 U.S.C. 1863) and Public Law 86–209 (42 U.S.C. 1880 et seq.), \$4,340,000: Provided, That not to exceed \$2,500 shall be available for official reception and representation expenses.

OFFICE OF INSPECTOR GENERAL

For necessary expenses of the Office of Inspector General as authorized by the Inspector General Act of 1978, as amended, \$14,000,000.

This title may be cited as the “Science Appropriations Act, 2010”.

TITLE IV
RELATED AGENCIES
COMMISSION ON CIVIL RIGHTS
SALARIES AND EXPENSES

For necessary expenses of the Commission on Civil Rights, including hire of passenger motor vehicles, \$9,400,000: Provided, That none of the funds appropriated in this paragraph shall be used to employ in excess of four full-time individuals under Schedule C of the Excepted Service exclusive of one special assistant for each Commissioner: Provided further, That none of the funds appropriated in this paragraph shall be used to reimburse Commissioners for more than 75 billable days, with the exception of the chairperson, who is permitted 125 billable days.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION
SALARIES AND EXPENSES

For necessary expenses of the Equal Employment Opportunity Commission as authorized by title VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, the Equal Pay Act of 1963, the Americans with Disabilities Act of 1990, the Civil Rights Act of 1991, the Genetic Information Non-Discrimination Act (GINA) of 2008 (Public Law 110–23); the ADA Amendments Act of 2008 (Public Law 110–325), and the Lilly Ledbetter Fair Pay Act of 2009 (Public Law 111–2), including services as authorized by 5 U.S.C. 3109; hire of passenger motor vehicles as authorized by 31 U.S.C. 1343(b); nonmonetary awards to private citizens; and not to exceed \$30,000,000 for payments to State and local enforcement agencies for authorized services to the Commission, \$367,303,000: Provided, That the Commission is authorized to make available for official reception and rep-

resentation expenses not to exceed \$2,500 from available funds: Provided further, That the Commission may take no action to implement any workforce repositioning, restructuring, or reorganization until such time as the House and Senate Committees on Appropriations have been notified of such proposals, in accordance with the reprogramming requirements of section 505 of this Act: Provided further, That the Chair is authorized to accept and use any gift or donation to carry out the work of the Commission.

INTERNATIONAL TRADE COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the International Trade Commission, including hire of passenger motor vehicles, and services as authorized by 5 U.S.C. 3109, and not to exceed \$2,500 for official reception and representation expenses, \$82,700,000, to remain available until expended.

LEGAL SERVICES CORPORATION

PAYMENT TO THE LEGAL SERVICES CORPORATION

For payment to the Legal Services Corporation to carry out the purposes of the Legal Services Corporation Act of 1974, \$400,000,000, of which \$374,600,000 is for basic field programs and required independent audits; \$4,000,000 is for the Office of Inspector General, of which such amounts as may be necessary may be used to conduct additional audits of recipients; \$17,000,000 is for management and grants oversight; \$3,400,000 is for client self-help and information technology; and \$1,000,000 is for loan repayment assistance: Provided, That the Legal Services Corporation may continue to provide locality pay to officers and employees at a rate no greater than that provided by the Federal Government to Washington, DC-based employees as authorized by 5 U.S.C. 5304, notwithstanding section 1005(d) of the Legal Services Corporation Act, 42 U.S.C. 2996(d).

ADMINISTRATIVE PROVISION—LEGAL SERVICES
CORPORATION

None of the funds appropriated in this Act to the Legal Services Corporation shall be expended for any purpose prohibited or limited by, or contrary to any of the provisions of, sections 501, 502, 503, 504, 505, and 506 of Public Law 105–119, and all funds appropriated in this Act to the Legal Services Corporation shall be subject to the same terms and conditions set forth in such sections, except that all references in sections 502 and 503 to 1997 and 1998 shall be deemed to refer instead to 2009 and 2010, respectively.

MARINE MAMMAL COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Marine Mammal Commission as authorized by title II of Public Law 92–522, \$3,250,000.

OFFICE OF THE UNITED STATES TRADE
REPRESENTATIVE

SALARIES AND EXPENSES

For necessary expenses of the Office of the United States Trade Representative, including the hire of passenger motor vehicles and the employment of experts and consultants as authorized by 5 U.S.C. 3109, \$48,326,000, of which \$1,000,000 shall remain available until expended: Provided, That not to exceed \$124,000 shall be available for official reception and representation expenses: Provided further, That negotiations shall be conducted within the World Trade Organization to recognize the right of members to distribute monies collected from antidumping and countervailing duties: Provided further, That negotiations shall be conducted within the World Trade Organization consistent with the negotiating objectives contained in the Trade Act of 2002, Public Law 107–210 to maintain strong U.S. remedies laws, correct the problem of

overreaching by World Trade Organization Panels and Appellate Body, and prevent the creation of obligation never negotiated or expressly agreed to by the United States.

STATE JUSTICE INSTITUTE

SALARIES AND EXPENSES

For necessary expenses of the State Justice Institute, as authorized by the State Justice Institute Authorization Act of 1984 (42 U.S.C. 10701 et. seq.) \$5,000,000, of which \$500,000 shall remain available until September 30, 2011: Provided, That not to exceed \$3,000 shall be available for official reception and representation expenses.

TITLE V

GENERAL PROVISIONS

SEC. 501. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 502. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 503. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 504. If any provision of this Act or the application of such provision to any person or circumstances shall be held invalid, the remainder of the Act and the application of each provision to persons or circumstances other than those as to which it is held invalid shall not be affected thereby.

SEC. 505. (a) None of the funds provided under this Act, or provided under previous appropriations Acts to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2009, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through the reprogramming of funds that:

(1) creates or initiates a new program, project or activity;

(2) eliminates a program, project or activity, unless the House and Senate Committees on Appropriations are notified 15 days in advance of such reprogramming of funds;

(3) increases funds or personnel by any means for any project or activity for which funds have been denied or restricted by this Act, unless the House and Senate Committees on Appropriations are notified 15 days in advance of such reprogramming of funds;

(4) relocates an office or employees, unless the House and Senate Committees on Appropriations are notified 15 days in advance of such reprogramming of funds;

(5) reorganizes or renames offices, programs or activities, unless the House and Senate Committees on Appropriations are notified 15 days in advance of such reprogramming of funds;

(6) contracts out or privatizes any functions or activities presently performed by Federal employees, unless the House and Senate Committees on Appropriations are notified 15 days in advance of such reprogramming of funds;

(7) proposes to use funds directed for a specific activity by either the House or Senate Committee on Appropriations for a different purpose, unless the House and Senate Committees on Appropriations are notified 15 days in advance of such reprogramming of funds;

(8) augments funds for existing programs, projects or activities in excess of \$500,000 or 10

percent, whichever is less, or reduces by 10 percent funding for any program, project or activity, or numbers of personnel by 10 percent as approved by Congress, unless the House and Senate Committees on Appropriations are notified 15 days in advance of such reprogramming of funds; or

(9) results from any general savings, including savings from a reduction in personnel, which would result in a change in existing programs, projects or activities as approved by Congress, unless the House and Senate Committees on Appropriations are notified 15 days in advance of such reprogramming of funds.

(b) None of the funds provided under this Act, or provided under previous appropriations Acts to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2010, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through the reprogramming of funds after August 1, except in extraordinary circumstances, and only after the House and Senate Committees on Appropriations are notified 30 days in advance of such reprogramming of funds.

SEC. 506. Hereafter, none of the funds made available in this or any other Act may be used to implement, administer, or enforce any guidelines of the Equal Employment Opportunity Commission covering harassment based on religion, when it is made known to the Federal entity or official to which such funds are made available that such guidelines do not differ in any respect from the proposed guidelines published by the Commission on October 1, 1993 (58 Fed. Reg. 51266).

SEC. 507. If it has been finally determined by a court or Federal agency that any person intentionally affixed a label bearing a "Made in America" inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that is not made in the United States, the person shall be ineligible to receive any contract or subcontract made with funds made available in this Act, pursuant to the debarment, suspension, and ineligibility procedures described in sections 9.400 through 9.409 of title 48, Code of Federal Regulations.

SEC. 508. The Departments of Commerce and Justice, the National Science Foundation, and the National Aeronautics and Space Administration, shall provide to the House and Senate Committees on Appropriations a quarterly accounting of the cumulative balances of any unobligated funds that were received by such agency during any previous fiscal year.

SEC. 509. Any costs incurred by a department or agency funded under this Act resulting from, or to prevent, personnel actions taken in response to funding reductions included in this Act shall be absorbed within the total budgetary resources available to such department or agency: Provided, That the authority to transfer funds between appropriations accounts as may be necessary to carry out this section is provided in addition to authorities included elsewhere in this Act: Provided further, That use of funds to carry out this section shall be treated as a reprogramming of funds under section 505 of this Act and shall not be available for obligation or expenditure except in compliance with the procedures set forth in that section.

SEC. 510. None of the funds provided by this Act shall be available to promote the sale or export of tobacco or tobacco products, or to seek the reduction or removal by any foreign country of restrictions on the marketing of tobacco or tobacco products, except for restrictions which are not applied equally to all tobacco or tobacco products of the same type.

SEC. 511. None of the funds appropriated pursuant to this Act or any other provision of law may be used for—

(1) the implementation of any tax or fee in connection with the implementation of subsection 922(t) of title 18, United States Code; and

(2) any system to implement subsection 922(t) of title 18, United States Code, that does not require and result in the destruction of any identifying information submitted by or on behalf of any person who has been determined not to be prohibited from possessing or receiving a firearm no more than 24 hours after the system advises a Federal firearms licensee that possession or receipt of a firearm by the prospective transferee would not violate subsection (g) or (n) of section 922 of title 18, United States Code, or State law.

SEC. 512. None of the funds made available in this Act may be used to pay the salaries and expenses of personnel of the Department of Justice to obligate more than \$705,000,000 during fiscal year 2010 from the fund established by section 1402 of chapter XIV of title II of Public Law 98-473 (42 U.S.C. 10601): Provided, That hereafter the availability of funds under section 1402(d)(3) to improve services shall be understood to mean availability for pay or salary, including benefits for the same.

SEC. 513. None of the funds made available to the Department of Justice in this Act may be used to discriminate against or denigrate the religious or moral beliefs of students who participate in programs for which financial assistance is provided from those funds, or of the parents or legal guardians of such students.

SEC. 514. None of the funds made available in this Act may be transferred to any department, agency, or instrumentality of the United States Government, except pursuant to a transfer made by, or transfer authority provided in, this Act or any other appropriations Act.

SEC. 515. Any funds provided in this Act used to implement E-Government Initiatives shall be subject to the procedures set forth in section 505 of this Act.

SEC. 516. (a) Tracing studies conducted by the Bureau of Alcohol, Tobacco, Firearms and Explosives are released without adequate disclaimers regarding the limitations of the data.

(b) The Bureau of Alcohol, Tobacco, Firearms and Explosives shall include in all such data releases, language similar to the following that would make clear that trace data cannot be used to draw broad conclusions about firearms-related crime:

(1) Firearm traces are designed to assist law enforcement authorities in conducting investigations by tracking the sale and possession of specific firearms. Law enforcement agencies may request firearms traces for any reason, and those reasons are not necessarily reported to the Federal Government. Not all firearms used in crime are traced and not all firearms traced are used in crime.

(2) Firearms selected for tracing are not chosen for purposes of determining which types, makes, or models of firearms are used for illicit purposes. The firearms selected do not constitute a random sample and should not be considered representative of the larger universe of all firearms used by criminals, or any subset of that universe. Firearms are normally traced to the first retail seller, and sources reported for firearms traced do not necessarily represent the sources or methods by which firearms in general are acquired for use in crime.

SEC. 517. (a) The Inspectors General of the Department of Commerce, the Department of Justice, the National Aeronautics and Space Administration, the National Science Foundation, and the Legal Services Corporation shall conduct audits, pursuant to the Inspector General Act (5 U.S.C. App.), of grants or contracts for which funds are appropriated by this Act, and

shall submit reports to Congress on the progress of such audits, which may include preliminary findings and a description of areas of particular interest, within 180 days after initiating such an audit and every 180 days thereafter until any such audit is completed.

(b) Within 60 days after the date on which an audit described in subsection (a) by an Inspector General is completed, the Secretary, Attorney General, Administrator, Director, or President, as appropriate, shall make the results of the audit available to the public on the Internet website maintained by the Department, Administration, Foundation, or Corporation, respectively. The results shall be made available in redacted form to exclude—

(1) any matter described in section 552(b) of title 5, United States Code; and

(2) sensitive personal information for any individual, the public access to which could be used to commit identity theft or for other inappropriate or unlawful purposes.

(c) A grant or contract funded by amounts appropriated by this Act may not be used for the purpose of defraying the costs of a banquet or conference that is not directly and programmatically related to the purpose for which the grant or contract was awarded, such as a banquet or conference held in connection with planning, training, assessment, review, or other routine purposes related to a project funded by the grant or contract.

(d) Any person awarded a grant or contract funded by amounts appropriated by this Act shall submit a statement to the Secretary of Commerce, the Attorney General, the Administrator, Director, or President, as appropriate, certifying that no funds derived from the grant or contract will be made available through a subcontract or in any other manner to another person who has a financial interest in the person awarded the grant or contract.

(e) The provisions of the preceding subsections of this section shall take effect 30 days after the date on which the Director of the Office of Management and Budget, in consultation with the Director of the Office of Government Ethics, determines that a uniform set of rules and requirements, substantially similar to the requirements in such subsections, consistently apply under the executive branch ethics program to all Federal departments, agencies, and entities.

SEC. 518. None of the funds appropriated or otherwise made available under this Act may be used to issue patents on claims directed to or encompassing a human organism.

SEC. 519. None of the funds made available in this Act shall be used in any way whatsoever to support or justify the use of torture by any official or contract employee of the United States Government.

SEC. 520. (a) Notwithstanding any other provision of law or treaty, none of the funds appropriated or otherwise made available under this Act or any other Act may be expended or obligated by a department, agency, or instrumentality of the United States to pay administrative expenses or to compensate an officer or employee of the United States in connection with requiring an export license for the export to Canada of components, parts, accessories or attachments for firearms listed in Category I, section 121.1 of title 22, Code of Federal Regulations (International Trafficking in Arms Regulations (ITAR), part 121, as it existed on April 1, 2005) with a total value not exceeding \$500 wholesale in any transaction, provided that the conditions of subsection (b) of this section are met by the exporting party for such articles.

(b) The foregoing exemption from obtaining an export license—

(1) does not exempt an exporter from filing any Shipper's Export Declaration or notification letter required by law, or from being otherwise

eligible under the laws of the United States to possess, ship, transport, or export the articles enumerated in subsection (a); and

(2) does not permit the export without a license of—

(A) fully automatic firearms and components and parts for such firearms, other than for end use by the Federal Government, or a Provincial or Municipal Government of Canada;

(B) barrels, cylinders, receivers (frames) or complete breech mechanisms for any firearm listed in Category I, other than for end use by the Federal Government, or a Provincial or Municipal Government of Canada; or

(C) articles for export from Canada to another foreign destination.

(c) In accordance with this section, the District Directors of Customs and postmasters shall permit the permanent or temporary export without a license of any unclassified articles specified in subsection (a) to Canada for end use in Canada or return to the United States, or temporary import of Canadian-origin items from Canada for end use in the United States or return to Canada for a Canadian citizen.

(d) The President may require export licenses under this section on a temporary basis if the President determines, upon publication first in the Federal Register, that the Government of Canada has implemented or maintained inadequate import controls for the articles specified in subsection (a), such that a significant diversion of such articles has and continues to take place for use in international terrorism or in the escalation of a conflict in another nation. The President shall terminate the requirements of a license when reasons for the temporary requirements have ceased.

SEC. 521. Notwithstanding any other provision of law, no department, agency, or instrumentality of the United States receiving appropriated funds under this Act or any other Act shall obligate or expend in any way such funds to pay administrative expenses or the compensation of any officer or employee of the United States to deny any application submitted pursuant to 22 U.S.C. 2778(b)(1)(B) and qualified pursuant to 27 CFR section 478.112 or .113, for a permit to import United States origin "curios or relics" firearms, parts, or ammunition.

SEC. 522. None of the funds made available in this Act may be used to include in any new bilateral or multilateral trade agreement the text of—

(1) paragraph 2 of article 16.7 of the United States-Singapore Free Trade Agreement;

(2) paragraph 4 of article 17.9 of the United States-Australia Free Trade Agreement; or

(3) paragraph 4 of article 15.9 of the United States-Morocco Free Trade Agreement.

SEC. 523. None of the funds made available in this Act may be used to authorize or issue a national security letter in contravention of any of the following laws authorizing the Federal Bureau of Investigation to issue national security letters: The Right to Financial Privacy Act; The Electronic Communications Privacy Act; The Fair Credit Reporting Act; The National Security Act of 1947; USA PATRIOT Act; and the laws amended by these Acts.

SEC. 524. If at any time during any quarter, the program manager of a project within the jurisdiction of the Departments of Commerce or Justice, the National Aeronautics and Space Administration, or the National Science Foundation totaling more than \$75,000,000 has reasonable cause to believe that the total program cost has increased by 10 percent, the program manager shall immediately inform the Secretary, Administrator, or Director. The Secretary, Administrator, or Director shall notify the House and Senate Committees on Appropriations within 30 days in writing of such increase, and shall include in such notice: the date on which such de-

termination was made; a statement of the reasons for such increases; the action taken and proposed to be taken to control future cost growth of the project; changes made in the performance or schedule milestones and the degree to which such changes have contributed to the increase in total program costs or procurement costs; new estimates of the total project or procurement costs; and a statement validating that the project's management structure is adequate to control total project or procurement costs.

SEC. 525. Funds appropriated by this Act, or made available by the transfer of funds in this Act, for intelligence or intelligence related activities are deemed to be specifically authorized by the Congress for purposes of section 504 of the National Security Act of 1947 (50 U.S.C. 414) during fiscal year 2010 until the enactment of the Intelligence Authorization Act for fiscal year 2010.

SEC. 526. The Departments, agencies, and commissions funded under this Act, shall establish and maintain on the homepages of their Internet websites—

(1) a direct link to the Internet websites of their Offices of Inspectors General; and

(2) a mechanism on the Offices of Inspectors General website by which individuals may anonymously report cases of waste, fraud, or abuse with respect to those Departments, agencies, and commissions.

SEC. 527. None of the funds appropriated or otherwise made available by this Act may be used to enter into a contract in an amount greater than \$5,000,000 or to award a grant in excess of such amount unless the prospective contractor or grantee certifies in writing to the agency awarding the contract or grant that, to the best of its knowledge and belief, the contractor or grantee has filed all Federal tax returns required during the three years preceding the certification, has not been convicted of a criminal offense under the Internal Revenue Code of 1986, and has not, more than 90 days prior to certification, been notified of any unpaid Federal tax assessment for which the liability remains unsatisfied, unless the assessment is the subject of an installment agreement or offer in compromise that has been approved by the Internal Revenue Service and is not in default, or the assessment is the subject of a non-frivolous administrative or judicial proceeding.

SEC. 528. None of the funds appropriated or otherwise made available in this Act may be used in a manner that is inconsistent with the principal negotiating objective of the United States with respect to trade remedy laws to preserve the ability of the United States—

(1) to enforce vigorously its trade laws, including antidumping, countervailing duty, and safeguard laws;

(2) to avoid agreements that—

(A) lessen the effectiveness of domestic and international disciplines on unfair trade, especially dumping and subsidies; or

(B) lessen the effectiveness of domestic and international safeguard provisions, in order to ensure that United States workers, agricultural producers, and firms can compete fully on fair terms and enjoy the benefits of reciprocal trade concessions; and

(3) to address and remedy market distortions that lead to dumping and subsidization, including overcapacity, cartelization, and market-access barriers.

SEC. 529. None of the funds made available in this Act may be used to purchase first class or premium airline travel in contravention of sections 301–10.122 through 301–10.124 of title 41 of the Code of Federal Regulations.

SEC. 530. None of the funds made available in this Act may be used to send or otherwise pay for the attendance of more than 50 employees from a Federal department or agency at any

single conference occurring outside the United States.

(RESCISSIONS)

SEC. 531. (a) Of the unobligated balances available to the Department of Justice from prior appropriations, the following funds are hereby rescinded, not later than September 30, 2010, from the following accounts in the specified amounts:

(1) "Legal Activities, Assets Forfeiture Fund", \$379,000,000, of which \$136,000,000 shall be permanently rescinded and returned to the general fund;

(2) "Office of Justice Programs", \$42,000,000; and

(3) "Community Oriented Policing Services", \$40,000,000.

(b) The Department of Justice shall, within 30 days of enactment of this Act, submit to the Committee on Appropriations of the House of Representatives and the Senate a report specifying the amount of each rescission made pursuant to this section.

(c) The rescissions contained in this section shall not apply to funds provided in this Act.

SEC. 532. Section 504(a) of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1996 (as contained in Public Law 104-134) is amended:

(1) in subsection (a), in the matter preceding paragraph (1), by inserting after "(1)" the following: "that uses Federal funds (or funds from any source with regard to paragraphs (14) and (15) in a manner";

(2) by striking subsection (d); and

(3) by redesignating subsections (e) and (f) as subsections (d) and (e), respectively.

SEC. 533. None of the funds made available under this Act may be distributed to the Association of Community Organizations for Reform Now (ACORN) or its subsidiaries.

REVIEW AND AUDIT OF ACORN FEDERAL FUNDING

SEC. 534. (a) REVIEW AND AUDIT.—The Comptroller General of the United States shall conduct a review and audit of Federal funds received by the Association of Community Organizations for Reform Now (referred to in this section as "ACORN") or any subsidiary or affiliate of ACORN to determine—

(1) whether any Federal funds were misused and, if so, the total amount of Federal funds involved and how such funds were misused;

(2) what steps, if any, have been taken to recover any Federal funds that were misused;

(3) what steps should be taken to prevent the misuse of any Federal funds; and

(4) whether all necessary steps have been taken to prevent the misuse of any Federal funds.

(b) REPORT.—Not later than 180 days after the date of enactment of this Act, the Comptroller General shall submit to Congress a report on the results of the audit required under subsection (a), along with recommendations for Federal agency reforms.

This Act may be cited as the "Commerce, Justice, Science, and Related Agencies Appropriations Act, 2010".

MOTION OFFERED BY MR. OBEY

The text of the motion is as follows:

MR. OBEY moves that the House concur in the Senate amendment to H.R. 2847 with the amendment printed in part B of House Report 111-380.

The SPEAKER pro tempore. The House amendment to the Senate amendment to the bill H.R. 2847 contains an emergency designation for purposes of pay-as-you-go principles.

Accordingly, the Chair must put the question of consideration under clause 10(c)(3) of rule XXI.

The question is, Will the House now consider the motion to concur in the Senate amendment with an amendment?

The question of consideration was decided in the affirmative.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 976, the amendment printed in part B of House Report 111-380 and the motion shall be considered as read.

The text of the amendment is as follows:

House amendment to Senate amendment:

In lieu of the matter proposed to be inserted by the amendment of the Senate, insert the following:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 2010, and for other purposes, namely:

TITLE I—INFRASTRUCTURE AND JOBS INVESTMENT

CHAPTER 1—JUSTICE

DEPARTMENT OF JUSTICE

COMMUNITY ORIENTED POLICING SERVICES

(INCLUDING TRANSFER OF FUNDS)

For an additional amount for "Community Oriented Policing Services", for grants under section 1701 of title I of the 1968 Omnibus Crime Control and Safe Streets Act (42 U.S.C. 3796dd) for hiring and rehiring of additional career law enforcement officers under part Q of such title, notwithstanding subsection (i) of such section, \$1,179,000,000, of which \$2,950,000 shall be transferred to "State and Local Law Enforcement Activities, Salaries and Expenses" for management, administration and oversight of such grants.

CHAPTER 2—ENERGY AND WATER DEVELOPMENT

CORPS OF ENGINEERS—CIVIL WORKS

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL CONSTRUCTION

(INCLUDING TRANSFERS OF FUNDS)

For an additional amount for "Construction", \$715,000,000: Provided, That section 102 of Public Law 109-103 (33 U.S.C. 2221) shall not apply to funds provided in this title: Provided further, That not less than \$30,000,000 of the funds provided shall be for water-related environmental infrastructure assistance: Provided further, That up to \$30,000,000 of the funds provided under this heading may be transferred to "Mississippi Rivers and Tributaries" for authorized projects and activities: Provided further, That notwithstanding any other provision of law, funds provided under this heading shall not be cost shared with the Inland Waterways Trust Fund as authorized in Public Law 99-662: Provided further, That funds provided under this heading shall only be allocated to programs, projects or activities that heretofore received funds provided in Acts making appropriations available for Energy and Water Development and that are selected using only the following criteria in order of priority: programs, projects or activities that can be commenced quickly; programs, projects or activities that will create immediate employment; programs, projects or activities that will be executed by contract or direct hire of temporary labor; and programs, projects or activities that are located in a State with high unemployment: Provided further, That the limitation concerning total project costs in section 902 of the Water Resources Development Act of 1986 (33 U.S.C. 2280), shall not apply during fiscal years 2010 and 2011 for any

project receiving funds provided in this title: Provided further, That for projects that are being completed with funds appropriated in this paragraph that would otherwise be expired for obligation, expired funds appropriated in this paragraph may be used to pay the cost of associated supervision, inspection, overhead, engineering and design on those projects and on subsequent claims, if any: Provided further, That funds made available under this heading shall be apportioned by the Office of Management and Budget not later than 30 days after the date of enactment of this Act and allocated by the Secretary of the Army to specific programs, projects or activities not later than 45 days after the date of enactment of this Act: Provided further, That the Secretary of the Army shall submit a quarterly report to the Committees on Appropriations of the House of Representatives and the Senate detailing the allocation, obligation and expenditures of these funds, including an explanation of how each selected program, project or activity fulfills the funding criteria above, beginning not later than 45 days after the date of enactment of this Act: Provided further, That the Secretary shall have unlimited reprogramming authority for the funds provided under this heading: Provided further, That up to 0.5 percent of funds provided under this heading may be transferred to "Expenses" for the purposes of management and oversight of the programs, projects or activities funded by this paragraph.

DEPARTMENT OF THE INTERIOR

BUREAU OF RECLAMATION

WATER AND RELATED RESOURCES

(INCLUDING TRANSFERS OF FUNDS)

For an additional amount for "Water and Related Resources", \$100,000,000: Provided, That of the amount appropriated under this heading, not less than \$26,000,000 shall be used for water reclamation and reuse projects authorized under title XVI of Public Law 102-575: Provided further, That up to \$30,000,000 of the funds provided under this heading may be used for programs, projects, and activities authorized by Public Law 108-361 and up to \$10,000,000 of the funds provided under this heading may be transferred to the Department of the Interior for programs, projects, and activities authorized by titles II-V of Public Law 102-575: Provided further, That funds provided under this heading shall only be allocated to programs, projects or activities that heretofore received funds provided in Acts making appropriations available for Energy and Water Development: Provided further, That for projects that are being completed with funds appropriated in this paragraph that would otherwise be expired for obligation, expired funds appropriated in this paragraph may be used to pay the cost of associated supervision, inspection, overhead, engineering and design on those projects and on subsequent claims, if any: Provided further, That the Secretary of the Interior shall submit a quarterly report to the Committees on Appropriations of the House of Representatives and the Senate detailing the allocation, obligation and expenditures of these funds, beginning not later than 45 days after the date of enactment of this Act: Provided further, That the Secretary shall have unlimited reprogramming authority for the funds provided under this heading: Provided further, That up to 0.5 percent of funds appropriated under this heading may be transferred to "Policy and Administration" for the purposes of management and oversight of the programs, projects, or activities funded by this paragraph.

DEPARTMENT OF ENERGY
ENERGY PROGRAMS

TITLE 17 INNOVATIVE TECHNOLOGY LOAN
GUARANTEE PROGRAM

For an additional amount for “Title 17 Innovative Technology Loan Guarantee Program” for the cost of guaranteed loans authorized by section 1705 of the Energy Policy Act of 2005, \$2,000,000,000, available until expended: Provided, That the cost of such loans, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974.

GENERAL PROVISION, THIS CHAPTER

INCENTIVES FOR INNOVATIVE TECHNOLOGIES LOAN
GUARANTEE PROGRAM

SEC. 1201. (a) SPECIFIC APPROPRIATION OR CONTRIBUTION.—Section 1702 of the Energy Policy Act of 2005 (42 U.S.C. 16512) is amended—

(1) by striking subsection (b) and inserting the following:

“(b) SPECIFIC APPROPRIATION OR CONTRIBUTION.—

“(1) IN GENERAL.—No guarantee shall be made unless—

“(A) an appropriation for the cost has been made;

“(B) the Secretary has received from the borrower a payment in full for the cost of the obligation and deposited the payment into the Treasury; or

“(C) a combination of appropriations or payments from the borrower has been made sufficient to cover the cost of the obligation.

“(2) LIMITATION.—The source of payments received from a borrower under paragraph (1)(B) or (C) shall not be a loan or other debt obligation, that is made or guaranteed by the Federal Government.”; and

(2) by adding at the end the following:

“(k) CREDIT REPORT.—If, in the opinion of the Secretary, a third-party credit rating of the applicant or project is not relevant to the determination of the credit risk of a project, if the project costs are not projected to exceed \$100,000,000, and the applicant agrees to accept the credit rating assigned to the applicant by the Secretary, the Secretary may waive any otherwise applicable requirement (including any requirement described in part 609 of title 10, Code of Federal Regulations) to provide a third-party credit report.

“(l) DIRECT HIRE AUTHORITY.—

“(1) IN GENERAL.—Notwithstanding section 3304 and sections 3309 through 3318 of title 5, United States Code, the head of the loan guarantee program under this title (referred to in this subsection as the ‘Executive Director’) may, on a determination that there is a severe shortage of candidates or a severe hiring need for particular positions to carry out the functions of this title, recruit and directly appoint highly qualified critical personnel with specialized knowledge important to the function of the programs under this title into the competitive service.

“(2) EXCEPTION.—The authority granted under paragraph (1) shall not apply to positions in the excepted service or the Senior Executive Service.

“(3) REQUIREMENTS.—In exercising the authority granted under paragraph (1), the Executive Director shall ensure that any action taken by the Executive Director—

“(A) is consistent with the merit principles of section 2301 of title 5, United States Code; and

“(B) complies with the public notice requirements of section 3327 of title 5, United States Code.

“(4) SUNSET.—The authority provided under paragraph (1) shall terminate on January 1, 2011.

“(m) MULTIPLE SITES.—Notwithstanding any contrary requirement (including any provision

under part 609.12 of title 10, Code of Federal Regulations) an eligible project may be located on 2 or more non-contiguous sites in the United States.”.

(b) APPLICATIONS FOR MULTIPLE ELIGIBLE PROJECTS.—Section 1705 of the Energy Policy Act of 2005 (42 U.S.C. 16516) is amended—

(1) by redesignating subsection (e) as subsection (f); and

(2) by inserting after subsection (d) the following:

“(e) MULTIPLE APPLICATIONS.—Notwithstanding any contrary requirement (including any provision under part 609.3(a) of title 10, Code of Federal Regulations), a project applicant or sponsor of an eligible project may submit an application for more than 1 eligible project under this section.”.

(c) ENERGY EFFICIENCY LOAN GUARANTEES.—Section 1705(a) of the Energy Policy Act of 2005 (42 U.S.C. 16516(a)) is amended by adding at the end the following:

“(4) Energy efficiency projects, including projects to retrofit residential, commercial, and industrial buildings, facilities, and equipment.”.

CHAPTER 3—HOMELAND SECURITY

DEPARTMENT OF HOMELAND SECURITY

FEDERAL EMERGENCY MANAGEMENT AGENCY

FIREFIGHTER ASSISTANCE GRANTS

For an additional amount for “Firefighter Assistance Grants” for necessary expenses for programs authorized by section 34 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229a), \$500,000,000: Provided, That notwithstanding any provision under section 34(a)(1)(A) such Act specifying that grants must be used to increase the number of firefighters in fire departments, the Secretary of Homeland Security, in making grants under section 34 of such Act for fiscal year 2010, shall grant waivers from the requirements of subsections (a)(1)(B), (c)(1), (c)(2), and (c)(4)(A) of such section: Provided further, That section 34(a)(1)(E) of such Act shall not apply with respect to funds appropriated in this or any other Act making appropriations for fiscal year 2010 for grants under section 34 of such Act: Provided further, That the Secretary of Homeland Security, in making grants under section 34 of such Act, shall ensure that funds appropriated under this or any other Act making appropriations for fiscal year 2010 are made available for the retention of firefighters and shall award grants not later than 120 days after the date of enactment of this Act: Provided further, That the Secretary may transfer any unused funds under this heading to make grants for programs authorized by section 33 of such Act (15 U.S.C. 2229) after notification to the Committees on Appropriations of the Senate and the House of Representatives.

CHAPTER 4—INTERIOR AND
ENVIRONMENT

DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES

For an additional amount for “Management of Lands and Resources”, for activities on all Bureau of Land Management lands using term employment, \$20,000,000.

UNITED STATES FISH AND WILDLIFE SERVICE

RESOURCE MANAGEMENT

For an additional amount for “Resource Management”, for activities using term employment, \$30,000,000.

NATIONAL PARK SERVICE

OPERATION OF THE NATIONAL PARK SYSTEM

For an additional amount for “Operation of the National Park System”, for activities on all national park units using term employment, \$50,000,000.

DEPARTMENT-WIDE PROGRAMS

WILDLAND FIRE MANAGEMENT

For an additional amount for “Wildland Fire Management”, for hazardous fuels reduction and related activities including necessary inventory and monitoring, using term employment, \$20,000,000.

ENVIRONMENTAL PROTECTION AGENCY

STATE AND TRIBAL ASSISTANCE GRANTS

(INCLUDING TRANSFERS OF FUNDS)

For an additional amount for “State and Tribal Assistance Grants”, \$2,000,000,000, of which \$1,000,000,000 shall be for capitalization grants for the Clean Water State Revolving Funds under title VI of the Federal Water Pollution Control Act and \$1,000,000,000 shall be for capitalization grants under section 1452 of the Safe Drinking Water Act: Provided, That the Administrator may retain up to 1 percent of the funds appropriated herein for management and oversight purposes: Provided further, That funds appropriated herein shall not be subject to the matching or cost share requirements of sections 602(b)(2), 602(b)(3) or 202 of the Federal Water Pollution Control Act nor the matching requirements of section 1452(e) of the Safe Drinking Water Act: Provided further, That the Administrator shall reallocate funds appropriated herein for the Clean and Drinking Water State Revolving Funds (Revolving Funds) where projects are not under contract or construction within 8 months of the date of enactment of this Act: Provided further, That notwithstanding the priority rankings they would otherwise receive under each program, priority for funds appropriated herein shall be given to projects on a State priority list that are ready to proceed to construction within 12 months of the date of enactment of this Act: Provided further, That notwithstanding the requirements of section 603(d) of the Federal Water Pollution Control Act or section 1452(f) of the Safe Drinking Water Act, for the funds appropriated herein, each State shall use not less than 50 percent of the amount of its capitalization grants to provide additional subsidization to eligible recipients in the form of forgiveness of principal, negative interest loans or grants or any combination of these: Provided further, That, to the extent there are sufficient eligible project applications, not less than 20 percent of the funds appropriated herein for the Revolving Funds shall be for projects to address green infrastructure, water or energy efficiency improvements or other environmentally innovative activities: Provided further, That notwithstanding the limitation on amounts specified in section 518(c) of the Federal Water Pollution Control Act, up to 2.0 percent of the funds appropriated herein for the Clean Water State Revolving Funds may be reserved by the Administrator for tribal grants under section 518(c) of such Act: Provided further, That up to 4 percent of the funds appropriated herein for tribal set-asides under the Revolving Funds may be transferred to the Indian Health Service to support management and oversight of tribal projects: Provided further, That none of the funds appropriated herein shall be available for the purchase of land or easements as authorized by section 603(c) of the Federal Water Pollution Control Act or for activities authorized by section 1452(k) of the Safe Drinking Water Act: Provided further, That notwithstanding section 603(d)(2) of the Federal Water Pollution Control Act and section 1452(f)(2) of the Safe Drinking Water Act, funds may be used to buy, refinance, or restructure the debt obligations of eligible recipients only where such debt was incurred on or after October 1, 2009: Provided further, That section 1606 of title XVI of Public Law 111-5 shall apply to the use of the funds provided under this heading.

DEPARTMENT OF AGRICULTURE
FOREST SERVICE

STATE AND PRIVATE FORESTRY

For an additional amount for "State and Private Forestry for financial assistance to States and territories for authorized activities using term employment, \$75,000,000.

NATIONAL FOREST SYSTEM

For an additional amount for "National Forest System", for activities on the National Forest System using term employment, \$40,000,000.

WILDLAND FIRE MANAGEMENT

For an additional amount for "Wildland Fire Management", for hazardous fuels reduction and related activities using term employment, \$35,000,000.

GENERAL PROVISIONS, THIS CHAPTER

(INCLUDING TRANSFER OF FUNDS)

SEC. 1401. Funds made available to the Environmental Protection Agency by this Act for management and oversight purposes shall remain available until September 30, 2012, and may be transferred to the "Environmental Programs and Management" account as needed.

SEC. 1402. In carrying out the work for which funds in this title are being made available, the Secretary of the Interior and the Secretary of Agriculture shall utilize, to the maximum extent practicable, the Public Lands Corps, Youth Conservation Corps, Student Conservation Association, Job Corps, Corps Network members, and other related partnerships with Federal, State, local, tribal or non-profit groups that serve young adults, underserved and minority populations, veterans, and special needs individuals.

CHAPTER 5—LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES

DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

TRAINING AND EMPLOYMENT SERVICES

For an additional amount for "Training and Employment Services" for activities under the Workforce Investment Act of 1998 ("WIA"), \$1,250,000,000, which shall be available for obligation on the date of enactment of this Act, as follows:

(1) \$500,000,000 for grants to the States for youth activities: Provided, That such funds shall be used solely for summer employment programs for youth: Provided further, That no portion of such funds shall be reserved to carry out section 127(b)(1)(A) of the WIA: Provided further, That for purposes of section 127(b)(1)(C)(iv) of the WIA, funds available for youth activities shall be allotted as if the total amount available for youth activities in the fiscal year does not exceed \$1,000,000,000: Provided further, That the work readiness performance indicator described in section 136(b)(2)(A)(ii)(I) of the WIA shall be the only measure of performance used to assess the effectiveness of summer employment for youth provided with such funds: Provided further, That an in-school youth shall meet the requirement that eligible youth be a low-income individual under section, 101(13)(B) of the WIA if such youth has been determined to meet the eligibility requirements for free meals under the National School Lunch Act (42 U.S.C. 1751 et seq.) during the most recent school year; and

(2) \$750,000,000 for a program of competitive grants for worker training and placement in high growth and emerging industry sectors: Provided, That \$275,000,000 shall be for job training projects that prepare workers for careers in energy efficiency and renewable energy as described in section 171(e)(1)(B) of the WIA, of which \$225,000,000 shall be for Pathways Out of Poverty projects: Provided further, That awarding grants from those funds not dedicated in the

preceding proviso, the Secretary of Labor shall give priority to projects that prepare workers for careers in the health care sector.

DEPARTMENT OF EDUCATION

EDUCATION JOBS FUND

For necessary expenses for an Education Jobs Fund, \$23,000,000,000, which shall remain available for obligation through September 30, 2010 and shall be administered under the terms and conditions of sections 14001 through 14013 of title XIV, and title XV, of division A of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5), except as follows:

(1) ALLOTMENTS TO STATES AND TERRITORIES.—Such funds shall be available only for allocations by the Secretary under subsections (a) and (d) of section 14001.

(2) RESERVATION.—With respect to funds appropriated under this heading, a State that receives an allocation may reserve not more than 5 percent, for—

(A) the administrative costs of carrying out its responsibilities with respect to those funds, provided the State reserves not more than 1 percent of its total allocation for those costs; and

(B) retaining or creating positions in the State educational agency or the State agency for higher education, and other State agency positions related to the administration or support of early childhood, elementary, secondary or postsecondary education.

(3) AWARDS TO LOCAL EDUCATIONAL AGENCIES AND PUBLIC INSTITUTIONS OF HIGHER EDUCATION.—

(A) Except as specified under paragraph (2), allocation of such funds to a State under section 14001(d) shall be used only for awards to local educational agencies and public institutions of higher education for the support of elementary, secondary, and postsecondary education. The Governor shall determine how the funds appropriated under this heading are allocated for elementary and secondary education and for public institutions of higher education. In making the determination in the preceding sentence, the Governor shall allocate funds among the categories of elementary and secondary education and public institutions of higher education generally in proportion to any reductions in State funds for such categories.

(B) Funds used to support elementary and secondary education, shall be distributed through the State's primary elementary and secondary funding formulae.

(C) Section 14002(a) and (b) shall not apply.

(4) INAPPLICABILITY OF EDUCATION REFORM ASSURANCES.—Subsection (b)(2), and paragraphs (1) through (5) of subsection (d), of section 14005 shall not apply to any application for an allocation of such funds.

(5) REQUIREMENT TO USE FUNDS TO RETAIN OR CREATE EDUCATION JOBS.—Notwithstanding sections 14003(a) and 14004(a), such funds may be used only for compensation and benefits and other expenses, such as support services, necessary to retain existing employees, for activities defined in section 101(31) of the Workforce Investment Act of 1998, and to hire new employees in order to provide early childhood, elementary, secondary, or postsecondary educational and related services or for modernization, renovation, and repair of public school facilities and facilities of institutions of higher education.

(6) PROHIBITION ON USE OF FUNDS FOR RAINY-DAY FUNDS OR DEBT RETIREMENT.—A State that receives an allocation may not use such funds, directly or indirectly, to establish, restore, or supplement a rainy-day fund, or to supplant State funds in a manner that has the effect of establishing, restoring, or supplementing a rainy-day fund; or to reduce or retire debt obligations incurred by the State, or to supplant State funds in a manner that has the effect of reducing or retiring debt obligations incurred by

the State, provided that this prohibition shall not apply to fund balances that are necessary to comply with any State requirement to maintain a balanced budget.

(7) APPLICATION CONSIDERATIONS.—If, by a date set by the Secretary, a Governor has not submitted an approvable application under section 14005(a), the Secretary may provide for the distribution of funds allocated under section 14001(d) to another entity or other entities in the State, under such terms and conditions as the Secretary may establish, provided that all terms and conditions that apply to the appropriation under this heading shall apply to such funds distributed to such entity or entities.

(8) LOCAL EDUCATIONAL AGENCY APPLICATION.—Section 442 of the General Education Provisions Act does not apply to a local educational agency that has previously submitted an application to the State under title XIV of division A of the American Recovery and Reinvestment Act of 2009. The assurances provided under that application shall continue to apply to funds awarded under this heading.

(9) MAINTENANCE OF EFFORT.—The Secretary shall not allocate funds to a State under paragraph (1) unless the Governor of the State provides an assurance to the Secretary that the State will—

(A) for fiscal year 2010—

(i) maintain State support for elementary, secondary, and public higher education (not including support for capital projects or research and development or tuition and fees paid by students), in the aggregate, at the level of such support for fiscal year 2009; or

(ii) maintain State support for elementary, secondary, and public higher education (not including support for capital projects or research and development or tuition and fees paid by students), in the aggregate, at a level no less than such support for fiscal year 2006, provided that if a State has enacted a reduction to such aggregate level of fiscal year 2010 State support for elementary, secondary, and public higher education after December 12, 2009, the State shall maintain State support for elementary, secondary, and public higher education at a percentage of the total revenues available to the State that is equal to or greater than the percentage provided for such purpose for fiscal year 2010 prior to December 12, 2009; and

(B) for fiscal year 2011—

(i) comply with subparagraph (A)(i); or

(ii) maintain State support, for elementary, secondary, and public higher education (not including support, for capital projects or research and development or tuition and fees paid by students), in the aggregate, at a percentage of the total revenues available to the State that is equal to or greater than the percentage provided for such purpose for fiscal year 2010.

STUDENT FINANCIAL ASSISTANCE

For an additional amount for "Student Financial Assistance" to carry out part C of title IV of the Higher Education Act of 1965, \$300,000,000, which, shall remain available through September 30, 2011.

RELATED AGENCIES

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

OPERATING EXPENSES

(INCLUDING TRANSFER OF FUNDS)

For an additional amount for "Operating Expenses" to carry out the Domestic Volunteer Service Act of 1973 ("1973 Act") and the National and Community Service Act of 1990 ("1990 Act"), \$132,000,000, which shall remain available through September 30, 2011: Provided, That not less than \$90,000,000 of the funds made available in this paragraph shall be used to make additional awards to existing AmeriCorps grantees and may be used to provide adjustments to

awards under subtitle C of title I of the 1990 Act made prior to September 30, 2011 for which the Chief Executive Officer of the Corporation for National and Community Service ("CEO") determines that a waiver of the Federal share limitation is warranted under section 2521.70 of title 45 of the Code of Federal Regulations: Provided further, That up to \$30,000,000 shall be for programs under title I, part A of the 1973 Act: Provided further, That any funds provided in the previous proviso shall not be made available in connection with cost-share agreements authorized under section 192A(g)(10) of the 1990 Act: Provided further, That of the amount made available in this paragraph, not less than \$7,000,000 shall be transferred to "Salaries and Expenses" to administer the funds provided in this paragraph, including making any necessary information technology upgrades: Provided further, That the CEO shall provide to the Committees on Appropriations of the house of Representatives and the Senate a fiscal year 2010 operating plan for the funds appropriated in this paragraph prior to making any Federal obligations of such funds in fiscal year 2010, but not later than 90 days after the date of enactment of this Act, and a fiscal year 2011 operating plan for such funds in fiscal year 2011, but not later than November 1, 2010, that detail the allocation of resources and the increased number of members supported by the AmeriCorps programs: Provided further, That the CEO shall provide to the Committees on Appropriations of the House of Representatives and the Senate a report on the actual obligations, expenditures, and unobligated balances for each activity funded under this heading not later than 90 days after issuance of the operating plan, and quarterly thereafter as long as funding provided under this heading is available for obligation or expenditure.

**NATIONAL SERVICE TRUST
(INCLUDING TRANSFER OF FUNDS)**

For an additional amount for "National Service Trust" established under subtitle D of title I of the National and Community Service Act of 1990 ("1990 Act"), \$68,000,000, which shall remain available until expended: Provided, That the Corporation for National and Community Service may transfer additional funds from the amount provided within "Operating Expenses" allocated to grants under subtitle C of title I of the 1990 Act to the National Service Trust upon determination that such transfer is necessary to support the activities of national service participants and after notice is transmitted to the Committees on Appropriations of the House of Representatives and the Senate: Provided further, That the amount appropriated or transferred to the National Service Trust may be invested under section 145(b) of the 1990 Act without regard to the requirements to apportion funds under 31 U.S.C. 1513(b).

GENERAL PROVISION, THIS CHAPTER

**ISSUER ALLOWED REFUNDABLE CREDIT FOR
QUALIFIED ZONE ACADEMY BONDS AND QUALIFIED
SCHOOL CONSTRUCTION BONDS**

SEC. 1501. (a) IN GENERAL.—Section 6431 of the Internal Revenue Code of 1986 is amended by adding at the end the following new subsection:

"(f) APPLICATION OF SECTION TO QUALIFIED ZONE ACADEMY BONDS AND QUALIFIED SCHOOL CONSTRUCTION BONDS—

"(1) IN GENERAL.—In the case of any specified tax credit bond—

"(A) such bond shall be treated as a qualified bond for purposes of this section,

"(B) subsection (a) shall be applied without regard to the requirement that the qualified bond be issued before January 1, 2011,

"(C) the amount of the payment determined under subsection (b) with respect to any interest

payment date under such bond shall be equal to the lesser of—

"(i) the amount of interest payable under such bond on such date, or

"(ii) the amount of interest which would have been payable under such bond on such date if such interest were determined at the applicable credit rate determined under section 54A(b)(3) with respect to such bond,

"(D) interest on any such bond shall be includible in gross income for purposes of this title, and

"(E) no credit shall be allowed under section 54A with respect to such bond.

"(2) SPECIFIED TAX CREDIT BOND.—For purposes of nets of this subsection, the term 'specified tax credit bond' means any qualified tax credit bond (as defined in section 54A(d)) if—

"(A) such bond is a qualified zone academy bond (as defined in section 54E) or a qualified school construction bond (as defined in section 54F), and

"(B) the issuer of such bond makes an irrevocable election to have this subsection apply."

**(b) TECHNICAL CORRECTIONS RELATING TO
QUALIFIED SCHOOL CONSTRUCTION BONDS.—**

(1) The second sentence of section 54F(d)(1) of such Code is amended by striking "by the State" and inserting "by the State education agency (or such other agency as is authorized under State law to make such allocation)".

(2) The second sentence of section 54F(e) of such Code is amended by striking "subsection (d)(4)" and inserting "paragraphs (2) and (4) of subsection (d)".

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendment made by this section shall apply to bonds issued after December 31, 2009.

(2) TECHNICAL CORRECTIONS.—The amendments made by subsection (b) shall take effect as if included in section 1521 of the American Recovery and Reinvestment Tax Act of 2009.

**CHAPTER 6—TRANSPORTATION AND
HOUSING AND URBAN DEVELOPMENT
DEPARTMENT OF TRANSPORTATION**

FEDERAL AVIATION ADMINISTRATION

GRANTS-IN-AID FOR AIRPORTS

For an additional amount for "Grants-In-Aid for Airports", to enable the Secretary of Transportation to make grants for discretionary projects as authorized by subchapter 1 of chapter 471 and subchapter 1 of chapter 475 of title 49, United States Code, \$500,000,000: Provided, That such funds shall not be subject to apportionment formulas, special apportionment categories, or minimum percentages under chapter 471 of such title: Provided further, That the Secretary shall distribute funds provided under this heading as discretionary grants to airports using the criteria established under chapters 471 and 475 of such title, but with priority given to those projects that demonstrate to his satisfaction their ability to be completed within 2 years of enactment of this Act: Provided further, That the Secretary shall award grants under this heading within 120 days of enactment of this Act: Provided further, That the amount made available under this heading shall not be subject to any limitation on obligations for the Grants-in-Aid for Airports program set forth in any Act: Provided further, That the Federal share payable of the costs for which a grant is made under this heading shall be, at the option of the recipient, up to 100 percent: Provided further, That the amounts provided under this heading may be used for expenses the agency incurs in administering this program in addition to amounts provided for administrative expenses for the Grants-in-Aid Airport Improvement Program from any other Act.

FEDERAL HIGHWAY ADMINISTRATION

HIGHWAY INFRASTRUCTURE INVESTMENT

For an additional amount for "Highway Infrastructure Investment" for restoration, repair, construction and other activities eligible under paragraph (b) of section 133 of title 23, United States Code, and for passenger and freight rail transportation and port infrastructure projects eligible for assistance under subsection 601(a)(8) of such title, \$27,500,000,000 to remain available through September 30, 2011: Provided, That, after making the set-asides required under this heading, 50 percent of the funds made available under this heading shall be apportioned to States using the formula set forth in section 104(b)(3) of title 23, United States Code, and the remaining funds shall be apportioned to States in the same ratio as the obligation limitation for fiscal year 2008 was distributed among the States in accordance with the formula specified in section 120(a)(6) of division K of Public Law 110-161: Provided further, That funds made available under this heading shall be apportioned not later than 21 days after the date of enactment of this Act: Provided further, That in selecting projects to be carried out with funds apportioned under this heading, priority shall be given to projects that are projected for completion within a 3-year time frame, and are located in economically distressed areas as defined by section 301 of the Public Works and Economic Development Act of 1965, as amended (42 U.S.C. 3161): Provided further, That in selecting projects to be carried out with funds apportioned under this heading, States shall ensure an equitable geographic distribution of funds and an appropriate balance in addressing the needs of urban and rural communities in the State: Provided further, That 90 days following the date of such apportionment, the Secretary of Transportation shall withdraw from each State an amount equal to 50 percent of the funds awarded to that State less the amount of funding under contract, as determined by the Secretary, and the Secretary shall redistribute such amounts to other States that have had no funds withdrawn under this proviso in the manner described in section 120(c) of division K of Public Law 110-161: Provided further, That 1 year following the date of such apportionment, the Secretary shall withdraw from each recipient of funds apportioned under this heading any funds that are not under contract, as determined by the Secretary, and the Secretary shall redistribute such amounts to States that have had no funds withdrawn under this proviso in the manner described in section 120(c) of division K of Public Law 110-161: Provided further, That at the request of a State, the Secretary of Transportation may provide an extension of such 1-year period only to the extent that he feels satisfied that the State has encountered extreme conditions that create an unworkable bidding environment or other extenuating circumstances: Provided further, That before granting such an extension, the Secretary shall send a letter to the House and Senate Committees on Appropriations that provides a thorough justification for the extension: Provided further, That 3 percent of the funds apportioned to a State under this heading shall be set aside for the purposes described in subsection 133(d)(2) of title 23, United States Code (without regard to the comparison to fiscal year 2005): Provided further, That 30 percent of the funds apportioned to a State under this heading shall be suballocated within the State in the manner and for the purposes described in the first sentence of subsection 133(d)(3)(A), in subsection 133(d)(3)(B), and in subsection 133(d)(3)(D): Provided further, That such suballocation shall be conducted in every State: Provided further, That of the funds provided under this heading,

\$105,000,000 shall be for the Puerto Rico highway program authorized under section 165 of title 23, United States Code, and \$45,000,000 shall be for the territorial highway program authorized under section 215 of title 23, United States Code: Provided further, That of the funds provided under this heading, \$60,000,000 shall be for capital expenditures eligible under section 147 of title 23, United States Code (without regard to subsection (d)): Provided further, That the Secretary of Transportation shall distribute such \$60,000,000 as competitive discretionary grants to States, with priority given to those projects that demonstrate to his satisfaction their ability to be completed within 2 years of enactment of this Act: Provided further, That of the funds provided under this heading, \$550,000,000 shall be for investments in transportation at Indian reservations and Federal lands: Provided further, That of the funds identified in the preceding proviso, \$310,000,000 shall be for the Indian Reservation Roads program, \$170,000,000 shall be for the Park Roads and Parkways program, \$60,000,000 shall be for the Forest Highway Program, and \$10,000,000 shall be for the Refuge Roads program: Provided further, That for investments at Indian reservations and Federal lands, priority shall be given to capital investments, and to projects and activities that can be completed within 2 years of enactment of this Act: Provided further, That 1 year following the enactment of this Act, to ensure the prompt use of the \$550,000,000 provided for investments at Indian reservations and Federal lands, the Secretary shall have the authority to redistribute unobligated funds within the respective program for which the funds were appropriated: Provided further, That up to 4 percent of the funding provided for Indian Reservation Roads may be used by the Secretary of the Interior for program management and oversight and project-related administrative expenses: Provided further, That section 134(f)(3)(C)(ii)(I) of title 23, United States Code, shall not apply to funds provided under this heading: Provided further, That of the funds made available under this heading, \$20,000,000 shall be for highway surface transportation and technology training under section 140(b) of title 23, United States Code, and \$20,000,000 shall be for disadvantaged business enterprises bonding assistance under section 332(e) of title 49, United States Code: Provided further, That funds made available under this heading shall be administered as if apportioned under chapter 1 of title 23, United States Code, except for funds made available for investments in transportation at Indian reservations and Federal lands, and for the territorial highway program, which shall be administered in accordance with chapter 2 of title 23, United States Code, and except for funds made available for disadvantaged business enterprises bonding assistance, which shall be administered in accordance with chapter 3 of title 49, United States Code: Provided further, That the Federal share payable on account of any project or activity carried out with funds made available under this heading shall be, at the option of the recipient, up to 100 percent of the total cost thereof: Provided further, That funds made available by this paragraph shall not be obligated for the purposes authorized under section 115(b) of title 23, United States Code: Provided further, That funding provided under this heading shall be in addition to any and all funds provided for fiscal years 2010 and 2011 in any other Act for "Federal-aid Highways" and shall not affect the distribution of funds provided for "Federal-aid Highways" in any other Act: Provided further, That the amount made available under this heading shall not be subject to any limitation on obligations for Federal-aid highways or highway safety construction programs set forth in any Act: Pro-

vided further, That section 1101(b) of Public Law 109-59 shall apply to funds apportioned under this heading: Provided further, That the Administrator of the Federal Highway Administration may retain up to \$45,000,000 of the funds provided under this heading to fund the oversight by the Administrator of projects and activities carried out with funds made available to the Federal Highway Administration in this Act, of which \$5,000,000 shall be for the Office of Expedited Project Delivery in the Office of the Administrator of the Federal Highway Administration, and such funds shall be available through September 30, 2013.

FEDERAL RAILROAD ADMINISTRATION

CAPITAL GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION

For an additional amount for "Capital Grants to the National Railroad Passenger Corporation" to enable the Secretary of Transportation to make capital grants to The National Railroad Passenger Corporation (Amtrak) as authorized by section 101(c) of the Passenger Rail Investment and Improvement Act of 2008 (Public Law 110-432), \$800,000,000, for fleet modernization, including rehabilitation of existing and acquisition of new passenger equipment, including fuel efficient locomotives: Provided, That none of the funds provided under this heading shall be used to subsidize the operating losses of Amtrak: Provided further, That section 24305(f)(4)(B) of title 49, United States Code, shall not apply to any new equipment acquired with funds provided under this heading: Provided further, That funds provided under this heading shall be awarded not later than 60 days after the date of enactment of this Act.

FEDERAL TRANSIT ADMINISTRATION

TRANSIT CAPITAL ASSISTANCE

For an additional amount for "Transit Capital Assistance" for transit capital assistance grants authorized under section 5302(a)(1) of title 49, United States Code, \$6,150,000,000: Provided, That the Secretary of Transportation shall provide 80 percent of the funds appropriated under this heading for grants under section 5307 of title 49, United States Code, and apportion such funds in accordance with section 5336 of such title (other than subsections (i)(I) and (j)): Provided further, That the Secretary shall apportion 10 percent of the funds appropriated under this heading in accordance with section 5340 of such title: Provided further, That the Secretary shall provide 10 percent of the funds appropriated under this heading for grants under section 5311 of title 49, United States Code, and apportion such funds in accordance with such section: Provided further, That funds apportioned under this heading shall be apportioned not later than 21 days after the date of enactment of this Act: Provided further, That 90 days following the date of such apportionment, the Secretary shall withdraw from each urbanized area or State an amount equal to 50 percent of the funds apportioned to such urbanized areas or States less the amount of funding under contract, as determined by the Secretary, and the Secretary shall redistribute such amounts to other urbanized areas or States that have had no funds withdrawn under this proviso utilizing whatever method he deems appropriate to ensure that all funds redistributed under this proviso shall be

utilized promptly: Provided further, That at the request of an urbanized area or State, the Secretary of Transportation may provide an extension of such 1-year period if he feels satisfied that the urbanized area or State has encountered an unworkable bidding environment or other extenuating circumstances: Provided further, That before granting such an extension, the Secretary shall send a letter to the House and Senate Committees on Appropriations that provides a thorough justification for the extension: Provided further, That of the funds provided for section 5311 of title 49, United States Code, 2.5 percent shall be made available for section 5311(c)(1): Provided further, That of the funding provided under this heading, \$100,000,000 shall be distributed as discretionary grants to public transit agencies for capital investments that will assist in reducing the energy consumption or greenhouse gas emissions of their public transportation systems: Provided further, That for such grants on energy-related investments, priority shall be given to projects based on the total energy savings that are projected to result from the investment, and projected energy savings as a percentage of the total energy usage of the public transit agency: Provided further, That applicable chapter 53 requirements shall apply to funding provided under this heading, except that the Federal share of the costs for which any grant is made under this heading shall be, at the option of the recipient, up to 100 percent: Provided further, That the amount made available under this heading shall not be subject to any limitation on obligations for transit programs set forth in any Act: Provided further, That section 1101(b) of Public Law 109-59 shall apply to funds appropriated under this heading: Provided further, That the funds appropriated under this heading shall not be commingled with any prior year funds: Provided further, That a recipient and subrecipient of funds made available under this heading may use up to 10 percent of the amount apportioned to a State or urbanized area for the operating costs of equipment and facilities for use in public transportation or for eligible activities under section 5311(f): Provided further, That in selecting projects to be carried out with funds apportioned under this heading, priority shall be given to projects that are located in economically distressed areas as defined by section 301 of the Public Works and Economic Development Act of 1965, as amended (42 U.S.C. 3161): Provided further, That in selecting projects to be carried out with funds apportioned under this heading, States shall ensure an equitable geographic distribution of funds and an appropriate balance in addressing the needs of urban and rural communities in the State: Provided further, That notwithstanding any other provision of law, three-quarters of 1 percent of the funds provided for grants under section 5307 and section 5340, and one-half of 1 percent of the funds provided for grants under section 5311, shall be available for administrative expenses and program management oversight, and such funds shall be available through September 30, 2013.

FIXED GUIDEWAY INFRASTRUCTURE INVESTMENT

For an amount for capital expenditures authorized under section 5309(b)(2) of title 49, United States Code, \$1,750,000,000: Provided, That the Secretary of Transportation shall apportion funds under this heading pursuant to the formula set forth in section 5337 of title 49, United States Code: Provided further, That the funds appropriated under this heading shall not be commingled with any prior year funds: Provided further, That funds made available under this heading shall be apportioned not later than 21 days after the date of enactment of this Act: Provided further, That 90 days following the date of such apportionment, the Secretary shall

withdraw from each urbanized area an amount equal to 50 percent of the funds apportioned to such urbanized area less the amount of funding under contract, as determined by the Secretary, and the Secretary shall redistribute such amounts to other urbanized areas that have had no funds withdrawn under this proviso utilizing whatever method he deems appropriate to ensure that all funds redistributed under this proviso shall be utilized promptly: Provided further, That 1 year following the date of such apportionment, the Secretary shall withdraw from each urbanized area any funds that are not under contract, as determined by the Secretary, and the Secretary shall redistribute such amounts to other urbanized areas that have had no funds withdrawn under this proviso utilizing whatever method he deems appropriate to ensure that all funds redistributed under this proviso shall be utilized promptly: Provided further, That at the request of an urbanized area, the Secretary of Transportation may provide an extension of such 1-year period if he feels satisfied that the urbanized area has encountered an unworkable bidding environment or other extenuating circumstances: Provided further, That before granting such an extension, the Secretary shall send a letter to the House and Senate Committees on Appropriations that provides a thorough justification for the extension: Provided further, That applicable chapter 53 requirements shall apply except that the Federal share of the costs for which a grant is made under this heading shall be, at the option of the recipient, up to 100 percent: Provided further, That the provisions of section 1101(b) of Public Law 109-59 shall apply to funds made available under this heading: Provided further, That notwithstanding any other provision of law, up to 1 percent of the funds under this heading shall be available for administrative expenses and program management oversight and shall remain available for obligation until September 30, 2013.

CAPITAL INVESTMENT GRANTS

For an additional amount for "Capital Investment Grants", as authorized under section 5338(c)(4) of title 49, United States Code, and allocated under section 5309(m)(2)(A) of such title, to enable the Secretary of Transportation to make discretionary grants as authorized by section 5309(d) and (e) of such title, \$500,000,000, of which \$1,500,000 shall be for the Office of Expedited Project Delivery in the Office of the Administrator of the Federal Transit Administration: Provided, That such amount shall be allocated without regard to the limitation under section 5309(m)(2)(A)(i): Provided further, That in selecting projects to be funded, priority shall be given to projects that are able to award contracts within 90 days of enactment of this Act: Provided further, That the provisions of section 1101(b) of Public Law 109-59 shall apply to funds made available under this heading: Provided further, That funds appropriated under this heading shall not be commingled with any prior year funds: Provided further, That applicable chapter 53 requirements shall apply, except that notwithstanding any other provision of law, up to 1 percent of the funds provided under this heading shall be available for administrative expenses and program management oversight, and shall remain available through September 30, 2013: Provided further, That, notwithstanding any other provision of law, the provisions of section 3011(f) of Public Law 109-59 shall apply to all projects evaluated under sections 5309(d) and 5309(e) of title 49, United States Code, and funded in fiscal years 2010 and 2011 with funds made available in the Act or any other Act.

MARITIME ADMINISTRATION

MARITIME GUARANTEED LOAN (TITLE XI) PROGRAM ACCOUNT

(INCLUDING TRANSFER OF FUNDS)

For the cost of guaranteed loans, as authorized, \$100,000,000: Provided, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974, as amended: Provided further, That the Maritime Administrator may retain, and transfer to "Maritime Administration, Operations and Training" up to 2 percent of the funds provided under this heading to carry out the guaranteed loan program.

GENERAL PROVISION, DEPARTMENT OF TRANSPORTATION

SEC. 1601. (a) MAINTENANCE OF EFFORT.—

(1) CERTIFICATION.—

(A) CERTIFICATION THROUGH SEPTEMBER 30, 2010.—The certification made by the Governor of each State under section 1201(a) of division A of the American Recovery and Reinvestment Act of 2009 (Pub. L. 111-5, 123 Stat. 115, 212) shall continue in effect under this Act.

(B) CERTIFICATION THROUGH SEPTEMBER 30, 2011.—Not later than 30 days after the date enactment of this Act, for each amount that is distributed to a State or agency thereof from an appropriation in this Act for a covered program, the Governor of the State shall certify to the Secretary of Transportation that the State will maintain its effort with regard to State funding for the types of projects that are funded by the appropriation. As part of this certification, the Governor shall submit to the Secretary of Transportation a statement identifying the amount of State funds the State planned to expend from State sources as of the date of enactment of this Act for the period of October 1, 2010, through September 30, 2011, for the types of projects that are funded by the appropriation. For the period of October 1, 2010, through September 30, 2011, the Governor of a State may calculate planned expenditures from State funds in the same manner as under section 1201(a) of division A of the American Recovery and Reinvestment Act of 2009 or may calculate the amount by pro rating the amount certified under section 1201(a) of division A of the American Recovery and Reinvestment Act of 2009 to establish the amount of planned expenditures for such period.

(2) DEFINITION OF STATE FUNDS.—For purposes of the certifications required by section 1201(a) of division A of the American Recovery and Reinvestment Act of 2009 and paragraph (1)(B), State funding means State funds used for transportation purposes that are expended by the State agency that is primarily responsible for carrying out the covered program. State funding does not include State transportation funds that are expended by on at the direction of non-State governmental entities.

(b) REQUIREMENT TO MAINTAIN EFFORT.—

(1) REPORTS.—Each State shall submit to the Department of Transportation for each covered program the actual aggregate expenditures from State funds during the period of February 17, 2009, through September 30, 2011, as compared to the level of such expenditures from State funds that were planned to occur during such period as certified in accordance with subsection (a). The State shall submit the maintenance of effort reports in the same manner and in the same timeframe required by subsection (c), except the State is not required to submit a maintenance of effort report on February 17, 2013. The covered agencies shall submit the reports to Congress in accordance with subsection (c)(1).

(2) DETERMINATION OF MAINTENANCE OF EFFORT.—A State is deemed to have met its level of effort if the aggregate amount of actual expenditures of State funds reported in the February 17, 2012 report in accordance with paragraph (1)

meets or exceeds the aggregate amount of planned expenditures of State funds identified in the certification required by subsection (a).

(3) PENALTY FOR FAILURE TO MAINTAIN EFFORT.—If a State is unable to maintain the level of effort certified pursuant to subsection (a), the State will be prohibited by the Secretary of Transportation from receiving additional limitation pursuant to the redistribution of the limitation on obligations for Federal-aid highway and highway safety construction programs that occurs after August 1 for fiscal year 2012.

(c) PERIODIC REPORTS.—

(1) IN GENERAL.—Notwithstanding any other provision of law, each grant recipient shall submit to the covered agency from which they received funding periodic reports on the use of the funds appropriated in this chapter for the Department of Transportation for covered programs. Such reports shall be collected and compiled by the covered agency and transmitted to Congress. Covered agencies may develop such reports on behalf of grant recipients to ensure the accuracy and consistency of such reports.

(2) CONTENTS OF REPORTS.—For amounts received under each covered program by a grant recipient under this chapter for the Department of Transportation, the grant recipient shall include in the periodic reports information tracking—

(A) the amount of Federal funds appropriated, allocated, obligated, and outlayed under the appropriation;

(B) the number of projects that have been put out to bid under the appropriation and the amount of Federal funds associated with such projects;

(C) the number of projects for which contracts have been awarded under the appropriation and the amount of Federal funds associated with such contracts;

(D) the number of projects for which work has begun under such contracts and the amount of Federal funds associated with such contracts;

(E) the number of projects for which work has been completed under such contracts and the amount of Federal funds associated with such contracts; and

(F) the number of direct, on-project jobs created or sustained by the Federal funds provided for projects under the appropriation and, to the extent possible, the estimated indirect jobs created or sustained in the associated supplying industries, including the number of job-years created and the total increase in employment since the date of enactment of this Act.

(3) TIMING OF REPORTS.—Each grant recipient shall submit the first of the periodic reports required under this subsection not later than 1 year after the date of enactment of the American Recovery and Reinvestment Act of 2009 and shall submit updated reports not later than 15 months, 18 months, 2 years, 3 years, and 4 years after such date of enactment.

(d) DEFINITIONS.—In this section, the following definitions apply:

(1) COVERED AGENCY.—The term "covered agency" means the Federal Aviation Administration, the Federal Highway Administration, the Federal Railroad Administration, the Federal Transit Administration, and the Maritime Administration of the Department of Transportation.

(2) COVERED PROGRAM.—The term "covered program" means funds appropriated in this Act for Grants-in-Aid for Airports to the Federal Aviation Administration; for "Highway Infrastructure Investment" to the Federal Highway Administration; for "Capital Grants to the National Railroad Passenger Corporation" to the Federal Railroad Administration; for "Transit Capital Assistance", "Fixed Guideway Infrastructure Investment", and "Capital Investment Grants" to the Federal Transit Administration;

and for "Maritime Guaranteed Loan (Title XI) Program Account" to the Maritime Administration.

(3) **GRANT RECIPIENT.**—The term "grant recipient" means a State or other recipient of assistance provided under a covered program in this Act. Such term does not include a Federal department or agency.

(e) **EXEMPTION.**—Notwithstanding any other provision of law, sections 3501–3521 of title 44 United States Code, shall not apply to the provisions of this section.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

PUBLIC AND INDIAN HOUSING

PUBLIC HOUSING CAPITAL FUND

For an additional amount for the "Public Housing Capital Fund" to carry out capital and management activities for public housing agencies, as authorized under section 9 of the United States Housing Act of 1937 (42 U.S.C. 1437g) (in this heading referred to as the "Act"), \$1,000,000,000: Provided, That the Secretary of Housing and Urban Development shall make the funds provided under this heading available by competition for priority investments, including investments that leverage private sector funding or financing for renovations and energy conservation retrofit investments: Provided further, That the Secretary shall obligate the funds provided under this heading by such competition within 60 days of the date of the enactment of this Act: Provided further, That in using the funds provided under this heading public housing authorities shall give priority to capital projects that can award contracts based on bids within 120 days from the date that the funds are made available to the public housing authorities: Provided further, That in using such funds provided under this heading public housing agencies shall give priority consideration to the rehabilitation of vacant rental units: Provided further, That in using such funds provided under this heading public housing agencies shall prioritize capital projects that are already underway or included in the 5-year capital fund plans required by section 5A of the Act (42 U.S.C. 1437c-1(a)): Provided further, That notwithstanding any other provision of law, funds provided under this heading (1) may not be used for operating or rental assistance activities, and (2) shall not be subject to any restriction of funding to replacement housing uses: Provided further, That notwithstanding section 9(j) of the Act, public housing agencies shall obligate 50 percent of the funds provided under this heading within 180 days of the date on which such funds become available to the agency for obligation, and shall expend 100 percent of such funds within one year of the date on which such funds become available to the agency for obligation: Provided further, That if a public housing agency fails to comply with the 180-day obligation requirement under the preceding proviso, the Secretary shall recapture all funds provided under this heading awarded to the public housing agency that remain unobligated and reallocate such funds to agencies that are in compliance with such requirement: Provided further, That in administering funds appropriated or otherwise made available under this heading, the Secretary may waive or specify alternative requirements for any provision of any statute or regulation in connection with the obligation by the Secretary or the use of such funds (except for requirements related to fair housing, non-discrimination, labor standards, and the environment), upon a finding that such a waiver is necessary to expedite or facilitate the use of such funds: Provided further, That, in addition to waivers authorized under the preceding proviso, the Secretary may direct that requirements relating to the procurement of goods and services arising under State and local laws and reg-

ulations shall not apply to funds provided under this heading.

COMMUNITY PLANNING AND DEVELOPMENT HOUSING TRUST FUND

For the Housing Trust Fund established pursuant to section 1338 of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (12 U.S.C. 4568), \$1,065,000,000, for use under such section: Provided, That of the total amount provided under this heading, \$65,000,000 shall be available to the Secretary of Housing and Urban Development only for incremental project-based voucher assistance or project-based rental assistance, to be allocated to States pursuant to the formula established under such section 1338, to be used solely in conjunction with grant funds awarded under such section 1338.

CHAPTER 7—GENERAL PROVISIONS, THIS TITLE

TARP REDUCTION

SEC. 1701. The limitation under section 115(a)(3) of the Emergency Economic Stabilization Act of 2008 (12 U.S.C. 5225(a)(3)) in effect on the (date of the enactment of this Act is decreased by \$150,000,000,000.

LIMIT ON FUNDS

SEC. 1702. All funds provided under this title shall be subject to the requirements of section 1604 of division A of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5).

RECOVERY ACT REPORTING REQUIREMENTS

SEC. 1703. (a) Funds made available by this title shall be subject to the reporting, transparency, and oversight requirements established by title XV of division A of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5), on the same basis as funds made available in division A of that Act.

(b) Amounts appropriated in division A of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) to any Office of Inspector General or to the Recovery Accountability and Transparency Board shall also be available for the same purposes with respect to any programs, grants, projects, and activities for which funds are made available by this title.

TITLE II—SURFACE TRANSPORTATION EXTENSION

SHORT TITLE

SEC. 2001. This title may be cited as the "Surface Transportation Extension Act of 2009".

FEDERAL-AID HIGHWAYS

SEC. 2002. (a) **IN GENERAL.**—

(1) **APPLICABILITY OF PROVISIONS.**—Except as provided in this title, requirements, authorities, conditions, eligibilities, limitations, and other provisions authorized under titles I, V, and VI of SAFETEA-LU (119 Stat. 1144), the SAFETEA-LU Technical Corrections Act of 2008 (122 Stat. 1572), titles I and VI of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 1914), titles I and V of the Transportation Equity Act for the 21st Century (112 Stat. 107), and title 23, United States Code (excluding chapter 4 of that title), which would otherwise expire on or cease to apply after September 30, 2009, or the date specified in section 106(3) of the Continuing Appropriations Resolution, 2010 (Public Law 111-68), are incorporated by reference and shall continue in effect through September 30, 2010.

(2) **AUTHORIZATION OF APPROPRIATIONS.**—Except as provided in subsection (b), there are authorized to be appropriated out of the Highway Trust Fund (other than the Mass Transit Account) for fiscal year 2010 an amount equal to the sum of the amounts authorized to be appropriated out of the Highway Trust Fund (other than the Mass Transit Account) for programs, projects, and activities for fiscal year 2009 under titles I, V, and VI of SAFETEA-LU (119 Stat.

1144) and title 23, United States Code (excluding administrative expenses under section 104(a) and programs, projects, and activities under chapter 4 of that title), minus \$1,394,358,419.

(3) **USE OF FUNDS.**—

(A) **FISCAL YEAR 2010.**—Except as otherwise expressly provided in this title, funds authorized to be appropriated under paragraph (2) for fiscal year 2010 shall be distributed, administered, limited, and made available for obligation in the same manner as the total amount of funds authorized to be appropriated out of the Highway Trust Fund (other than the Mass Transit Account) for fiscal year 2009 to carry out programs, projects, activities, eligibilities, and requirements under SAFETEA-LU (119 Stat. 1144), the SAFETEA-LU Technical Corrections Act of 2008 (122 Stat. 1572), titles I and VI of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 1914), titles I and V of the Transportation Equity Act for the 21st Century (112 Stat. 107), and title 23, United States Code (excluding chapter 4 of that title).

(B) **CALCULATION.**—The amounts authorized to be appropriated under paragraph (2) shall be calculated without regard to any rescission or cancellation of funds or contract authority for fiscal year 2009 under SAFETEA-LU (119 Stat. 1144) or any other law.

(C) **DISTRIBUTION BETWEEN PROGRAMS.**—Funds authorized to be appropriated under paragraph (2) shall be distributed under subparagraph, (A) among programs, projects, and activities referenced in such subparagraph in the ratio that—

(i) the amount authorized to be appropriated out of the Highway Trust Fund (other than the Mass Transit Account) for such program, project, or activity for fiscal year 2009; bear to

(ii) the amount authorized to be appropriated out of the Highway Trust Fund (other than the Mass Transit Account) for all such programs, projects, and activities for fiscal year 2009.

(D) **CONTRACT AUTHORITY.**—

(i) **IN GENERAL.**—Except as provided in clause (ii), funds authorized to be appropriated under this subsection shall be available for obligation in the same manner as if such funds were apportioned under chapter 1 of title 23, United States Code, and subject to a limitation on obligations for Federal-aid highways and highway safety construction programs included in an Act making appropriations for fiscal year 2010.

(ii) **EXCEPTIONS.**—

(I) **IN GENERAL.**—A limitation on obligations described in clause (i) shall not apply to any obligation under—

(aa) section 125 of title 23, United States Code; or

(bb) section 105 of title 23, United States Code, but only in an amount equal to \$639,000,000.

(II) **SPECIAL RULES.**—Except as otherwise expressly provided by this title, any special rule that applied in fiscal year 2009 to any program, project, or activity for which funds are authorized to be appropriated under paragraph (2) shall continue to apply through September 30, 2010.

EXTENSION FLEXIBILITY FOR CERTAIN ALLOCATED PROGRAMS.—

(A) **FISCAL YEAR 2010.**—

(i) **IN GENERAL.**—Notwithstanding any other provision of law, for fiscal year 2010, the portion of the share of funds of a State under paragraph (2) determined by the amount that the State received or was authorized to receive for fiscal year 2009 to carry out sections 1307, 1702, and 1934 of SAFETEA-LU (119 Stat. 1217, 1256, and 1485) and section 144(f)(1) of title 23, United States Code, shall be—

(I) made available to the State for programs specified in section 105(a)(2) of title 23, United States Code (except the high priority projects program), and in the same proportion for each such program that—

(aa) the amount apportioned to the State for that program for fiscal year 2009; bears to

(bb) the amount apportioned to the State for fiscal year 2009 for all such programs; and

(II) administered in the same manner and with the same period of availability as such funding as administered under programs identified in clause (i), except that no funds may be used to carry out the project described in section 1307(d)(1) of SAFETEA-LU (119 Stat. 1217; 122 Stat. 1577).

(ii) TERRITORIES AND PUERTO RICO.—

(I) IN GENERAL.—Notwithstanding any other provision of law, the portion of the share of funds of a territory or Puerto Rico under paragraph (2) determined by the amount that the territory or Puerto Rico received or was authorized to receive for fiscal year 2009 to carry out section 1934 of SAFETEA-LU (119 Stat. 1485), shall be—

(aa) for a territory, made available and administered in the same manner as funding is made available and administered under section 215 of title 23, United States Code; and

(bb) for Puerto Rico, made available and administered in the same manner as funding is made available and administered under section 165 of title 23, United States Code.

(II) TERRITORY DEFINED.—In this clause, the term “territory” means any of the following territories of the United States: American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, or the United States Virgin Islands.

(B) ADDITIONAL FUNDS.—

(I) IN GENERAL.—No additional funds shall be provided for any project or activity under paragraph (3)(A) that the Secretary of Transportation determines was sufficiently funded before or during fiscal year 2009 to achieve the authorized purpose of the project or activity.

(ii) RESERVATION AND REDISTRIBUTION AMONG STATES.—

(I) IN GENERAL.—Funds made available in accordance with paragraph (3)(A) for a project or activity described in clause (i) shall be—

(aa) reserved by the Secretary of Transportation; and

(bb) apportioned among all States such that each State's share of funds so apportioned is equal to the State's share for fiscal year 2009 of funds apportioned or allocated for the programs specified in subclause (II).

(II) SPECIFIC PROGRAMS.—The programs referred to in subclause (I) are—

(aa) the programs listed in section 105(a)(2) of title 23, United States Code;

(bb) the program authorized by section 144(f)(1) of such title; and

(cc) the program authorized by section 1934 of SAFETEA-LU (119 Stat. 1485).

(iii) DISTRIBUTION AMONG PROGRAMS.—Funds apportioned to a State pursuant to clause (ii) shall be—

(I) made available to the State for programs specified in section 105(a)(2) of title 23, United States Code (except the high priority projects program), and in the same proportion for each such program that—

(aa) the amount apportioned to the State for that program for fiscal year 2009; bears to

(bb) the amount apportioned to the State for fiscal year 2009 for all such programs; and

(II) administered in the same manner and with the same period of availability as such funding is administered under programs identified in subclause (I).

(C) COMPETITIVE DISTRIBUTION OF CERTAIN DISCRETIONARY FUNDS.—

(i) PROJECTS OF NATIONAL AND REGIONAL SIGNIFICANCE.—Notwithstanding section 1301(m) of SAFETEA-LU (119 Stat. 1202), the Secretary shall allocate funds authorized to be appropriated under paragraph (2) for the projects of

national and regional significance program on the basis of a competitive selection process in accordance with sections 1301(d), 1301(e), and 1301(f) of that Act (119 Stat. 1199).

(ii) NATIONAL CORRIDOR INFRASTRUCTURE IMPROVEMENT PROGRAM.—Notwithstanding section 1302 (e) of SAFETEA-LU (119 Stat. 1205), the Secretary shall allocate funds authorized to be appropriated under paragraph (2) for the national corridor infrastructure improvement program on the basis of a competitive selection process in accordance with section 1302(b) of that Act (119 Stat. 1204).

(5) EXTENSION OF AUTHORIZATION UNDER TITLE V OF SAFETEA-LU.—

(A) IN GENERAL.—The programs authorized under paragraphs (1) through (5) of section 5101(a) of SAFETEA-LU (119 Stat. 1779) shall be continued for fiscal year 2010 at the funding levels authorized for those programs for fiscal year 2009.

(B) DISTRIBUTION OF FUNDS.—Funds for programs continued under subparagraph (A) shall be distributed to major program areas under those programs in the same proportions as funds were allocated for those program areas for fiscal year 2009, except that designations for specific activities shall not be required to be continued for fiscal year 2010.

(C) ADDITIONAL FUNDS.—

(i) IN GENERAL.—No additional funds shall be provided for any project or activity under this paragraph that the Secretary of Transportation determines was sufficiently funded before or during fiscal year 2009 to achieve the authorized purpose of the project or activity.

(ii) DISTRIBUTION.—Funds that would have been made available under subparagraph (A) for a project or activity but for the prohibition under clause (i) shall be distributed in accordance with subparagraph (B).

(b) ADMINISTRATION EXPENSES.—

(I) AUTHORIZATION OF CONTRACT AUTHORITY.—Notwithstanding other provision of this title or any other law, there is authorized to be appropriated from the Highway Trust Fund (other than the Mass Transit Account), \$420,562,000 for administrative expenses of the Federal-aid highway program for fiscal year 2010.

(2) CONTRACT AUTHORITY.—Funds authorized to be appropriated by this subsection shall be—

(A) available for obligation, and shall be administered, in the same manner as if such funds were apportioned under chapter 1 of title 23, United States Code, except that such funds shall remain available until expended; and

(B) subject to a limitation on obligations for Federal-aid highways and highway safety construction programs included in an Act making appropriations for fiscal year 2010.

(c) RECONCILIATION OF FUNDS.—The Secretary shall reduce the amount apportioned or allocated for a program, project, or activity continued under this section by any amount apportioned or allocated for such program, project, or activity pursuant to the Continuing Appropriations Resolution, 2010 (Public Law 111-68).

(d) REFERENCES.—Except as otherwise expressly provided, any reference in this section to an Act, or a provision contained in an Act, shall be considered to include the amendments made by that Act or provision.

EXTENSION OF HIGHWAY SAFETY PROGRAMS OF NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

SEC. 2003. (a) CHAPTER 4 HIGHWAY SAFETY PROGRAMS.—Section 2001(a)(1) of SAFETEA-LU (119 Stat. 1519) is amended—

(1) by striking “and”; and

(2) by inserting after “2009” the following: “, and \$235,000,000 for fiscal year 2010”.

(b) HIGHWAY SAFETY RESEARCH AND DEVELOPMENT.—Section 2001(a)(2) of such Act (119 Stat. 1519) is amended—

(1) by striking “and”; and

(2) by inserting after “2009” the following: “, and \$105,500,000 for fiscal year 2010”.

(c) OCCUPANT PROTECTION INCENTIVE GRANTS.—

(1) EXTENSION OF PROGRAM.—Section 405 of title 23, United States Code, is amended—

(A) in subsection (a)(3) by striking “6” and inserting “7”; and

(B) in subsection (a)(4)(C) by striking “in each of the fifth and sixth fiscal years beginning after September 30, 2003,” and inserting “in each subsequent fiscal year”.

(2) AUTHORIZATION OF APPROPRIATIONS.—Section 2001(a)(3) of such Act (119 Stat. 1519) is amended—

(A) by striking “and”; and

(B) by inserting after “2009” the following: “, and \$25,000,000 for fiscal year 2010”.

(d) SAFETY BELT PERFORMANCE GRANTS.—

(1) EXTENSION OF PROGRAM.—Section 406(c)(1) of title 23, United States Code, is amended by striking “2009” and inserting “2010”.

(2) AUTHORIZATION OF APPROPRIATIONS.—Section 2001(a)(4) of such Act (119 Stat. 1519) is amended—

(A) by striking “and”; and

(B) by inserting after “2009” the following: “, and \$124,500,000 for fiscal year 2010”.

(e) STATE TRAFFIC SAFETY INFORMATION SYSTEM IMPROVEMENTS.—Section 2001(a)(5) of such Act (119 Stat. 1519) is amended—

(1) by striking “and”; and

(2) by inserting after “2009” the following: “, and \$34,500,000 for fiscal year 2010”.

(f) ALCOHOL-IMPAIRED DRIVING COUNTERMEASURES INCENTIVE GRANT PROGRAM.—

(1) EXTENSION OF PROGRAM.—Section 410 of title 23, United States Code, is amended—

(A) in subsection (a)(3)(C) by striking “in each of the fifth, sixth, seventh, and eighth fiscal years” and inserting “in each subsequent fiscal year”; and

(B) in subsection (b)(2)(C) by striking “and 2009” and inserting “, 2009, and 2010”.

(2) AUTHORIZATION OF APPROPRIATIONS.—Section 2001(a)(6) of such Act (119 Stat. 1519) is amended—

(A) by striking “and”; and

(B) by inserting after “2009” the following: “, and \$139,000,000 for fiscal year 2010”.

(g) NATIONAL DRIVER REGISTER.—Section 2001(a)(7) of such Act (119 Stat. 1520) is amended—

(1) by striking “and”; and

(2) by inserting after “2009” the following: “and \$4,000,000 for fiscal year 2010”.

(h) HIGH VISIBILITY ENFORCEMENT PROGRAM.—

(1) EXTENSION OF PROGRAM.—Section 2009(a) of such Act (23 U.S.C. 402 note; 119 Stat. 1535) is amended by striking “2009” and inserting “2010”.

(2) AUTHORIZATION OF APPROPRIATIONS.—Section 2001(a)(8) of such Act (119 Stat. 1520) is amended—

(A) by striking “and”; and

(B) by inserting after “2009” the second place it appears the following: “, and \$29,000,000 for fiscal year 2010”.

(i) MOTORCYCLIST SAFETY.—

(1) EXTENSION OF PROGRAM.—Section 2010(d)(1)(B) of such Act (23 U.S.C. 402 note; 119 Stat. 1536) is amended by striking “and fourth” and inserting “fourth, and fifth”.

(2) AUTHORIZATION OF APPROPRIATIONS.—Section 2001(a)(9) of such Act (119 Stat. 1520) is amended—

(A) by striking “and”; and

(B) by inserting after “2009” the following: “, and \$7,000,000 for fiscal year 2010”.

(j) CHILD SAFETY AND CHILD BOOSTER SEAT SAFETY INCENTIVE GRANTS.—

(1) EXTENSION OF PROGRAM.—Section 2011(c)(2) of such Act (23 U.S.C. 405 note; 119

Stat. 1538) is amended by striking “fourth fiscal year” and inserting “fourth and fifth fiscal years”.

(2) **AUTHORIZATION OF APPROPRIATIONS.**—Section 2001(a)(10) of such Act (11.9 Stat. 1520) is amended—

(A) by striking “and”; and

(B) by inserting after “2009” the following: “, and \$7,000,000 for fiscal year 2010”.

(k) **ADMINISTRATIVE EXPENSES.**—Section 2001(a)(11) of such Act (11.9 Stat. 1520) is amended—

(1) by striking “and” the last place it appears; and

(2) by inserting after “2009” the following: “, and \$18,500,000 for fiscal year 2010”.

(l) **APPLICABILITY OF TITLE 23.**—Section 2001(c) of such Act (11.9 Stat. 1520) is amended by striking “2009” and inserting “2010”.

(m) **DRUG-IMPAIRED DRIVING ENFORCEMENT.**—Section 5013(7) of such Act (23 U.S.C. 103 note; 119 Stat. 1:540) is amended by striking “2009” and inserting “2010”.

(n) **OLDER DRIVER SAFETY; LAW ENFORCEMENT TRAINING.**—Section 2017 of such Act (23 U.S.C. 402 note; 119 Stat. 1541) is amended—

(1) in subsection (a)(1) by striking “2009” and inserting “2010”; and

(2) in subsection (b)(2) by striking “2009” and inserting “2010”.

EXTENSION OF FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION PROGRAMS

SEC. 2004. (a) MOTOR CARRIER SAFETY GRANTS.—Section 31104(a) of title 49, United States Code, is amended—

(1) by striking “and” at the end of paragraph (4);

(2) by striking the period at the end of paragraph (5) and inserting “; and”; and

(3) by adding at the end the following:

“(6) \$212,070,000 for fiscal year 2010.”.

(b) **ADMINISTRATIVE EXPENSES.**—Section 31104(1)(1) of title 49, United States Code is amended—

(1) by striking “and” at the end of subparagraph (D);

(2) by striking the period at the end of subparagraph (E) and inserting “; and”; and

(3) by adding at the end the following:

“(F) \$239,828,000 for fiscal year 2010.”.

(c) **HIGH PRIORITY ACTIVITIES.**—Section 31104(k)(2) of title 49, United States Code, is amended by striking “2009” and inserting “2010”.

(d) **GRANT PROGRAM.**—Section 4104(c) of SAFETEA-LU (119 Stat. 1715) is amended—

(1) in paragraph (1) by striking “2009” and inserting “2010”; and

(2) in paragraph (2) by striking “and 2009” and inserting “2009, and 2010”; and

(3) in paragraph (3) by striking “and 2009” and inserting “2009, and 2010”; and

(4) in paragraph (4) by striking “2009” and inserting “2010”; and

(5) in paragraph (5) by striking “2009” and inserting “2010”.

(e) **COMMERCIAL DRIVER'S LICENSE INFORMATION SYSTEM MODERNIZATION.**—Section 4123(d) of SAFETEA-LU (119 Stat. 1736) is amended—

(1) by striking “and” at the end of paragraph (3);

(2) by striking the period at the end of paragraph (4) and inserting “; and”; and

(3) by adding at the end the following:

“(5) \$8,000,000 for fiscal year 2010.”.

(f) **OUTREACH AND EDUCATION.**—Section 4127(e) of such Act (119 Stat. 1741) is amended by striking “and 2009” and inserting “2009, and 2010”.

(g) **GRANT PROGRAM FOR COMMERCIAL MOTOR VEHICLE OPERATORS.**—Section 4134(c) of such Act (119 Stat. 1744) is amended by striking “2009” and inserting “2010”.

(h) **WORKING GROUP FOR DEVELOPMENT OF PRACTICES AND PROCEDURES TO ENHANCE FED-**

ERAL-STATE RELATIONS.—Section 4213(d) of such Act (119 Stat. 1759) is amended by striking “2009” and inserting “2010”.

(i) **OFFICE OF INTERMODALISM.**—Section 5503(1) of title 49, United States Code, is amended by striking “2009” and inserting “2010”.

EXTENSION OF FEDERAL TRANSIT ASSISTANCE PROGRAMS

SEC. 2005. (a) EXTENSION OF FEDERAL TRANSIT ASSISTANCE PROGRAMS.—Except as otherwise provided in this title, requirements, authorities, conditions, eligibilities, limitations, and other provisions authorized under title III of SAFETEA-LU (119 Stat. 1544), the SAFETEA-LU Technical Corrections Act of 2008 (122 Stat. 1572), title III of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 2087), title III of the Transportation Equity Act for the 21st Century (112 Stat. 338), and chapter 53 of title 49, United States Code, which would otherwise expire on or cease to apply after September 30, 2009, or the date specified in section 106(3) of the Continuing Appropriations Resolution, 2010 (Public Law 111-68), are incorporated by reference and shall continue in effect through September 30, 2010.

(b) **AUTHORIZATIONS.**—For fiscal year 2010—

(1) their shall be available from the Mass Transit Account of the Highway Trust Fund \$8,343,171,000 for each Federal transit assistance program under section 5338(b) of title 49, United States Code, to be allocated among such programs in proportion to the amounts provided for each such program in fiscal year 2009; and

(2) there is authorized to be appropriated \$2,164,581,000 for each Federal transit program under subsections (c) and (d) of section 5338 of title 49, United States Code, and for administrative expenses under subsection (e) of such section.

(c) **EXCEPTIONS.**—

(1) **PROJECTS FOR BUS AND BUS-RELATED FACILITIES AND CLEAN FUELS GRANT PROGRAM.**—The project designations contained in section 3044 of SAFETEA-LU (119 Stat. 1652) shall not apply to funds made available under subsection (b)(1).

(2) **ALLOCATIONS FOR NATIONAL RESEARCH AND TECHNOLOGY PROGRAMS.**—A program, project, or activity identified in section 3046 of SAFETEA-LU (119 Stat. 1706) that the Secretary of Transportation determines was sufficiently funded before or during fiscal year 2009 to achieve the authorized purpose of the program, project, or activity shall not be eligible for funds authorized to be appropriated under subsection (b)(2).

(d) **CONTRACT AUTHORITY.**—A grant or contract approved by the Secretary and financed with amounts made available from the Mass Transit Account of the Highway Trust Fund through September 30, 2010, to carry out sections 5305, 5307, 5308, 5309, 5310, 5311, 5316, 5317, 5320, 5335, 5339 and 5340 of title 49, United States Code, and section 3038 of the Transportation Equity Act for the 21st Century (49 U.S.C. 5310 note; 112 Stat. 392) is a contractual obligation of the Government to pay the Federal share of the cost of the project.

(e) **RECONCILIATION OF FUNDS.**—The Secretary shall reduce the amount apportioned or allocated for a program, project, or activity continued under this section by any amount apportioned or allocated for such program, project, or activity pursuant to the Continuing Appropriation Resolution, 2010 (Public Law 111-68).

(f) **REFERENCES.**—Except as otherwise expressly provided, any reference in this section to an Act, or a provision contained in an Act, shall be considered to include the amendments made by that Act or provision.

BOATING SAFETY EXTENSION

SEC. 2006. Section 4 of the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777c) is amended—

(1) in subsection (a) by striking “2009, and the period from October 1, 2009, and the period from October 1, 2009, through the date specified in section 106(3) of the first Continuing Appropriations Resolution for Fiscal Year 2010 enacted into law, and inserting “2010,”; and

(2) in subsection (b)(1)(A) by striking “2009 and the period from October 1, 2009, through the date specified in section 106(3) of the first Continuing Appropriations Resolution for Fiscal Year 2010 enacted into law,” and inserting “2010,”.

LEVEL OF OBLIGATION LIMITATIONS

Sec. 2007. (a) HIGHWAY CATEGORY.—Section 8003(a) of SAFETEA-LU (119 Stat. 1917) is amended—

(1) by striking “and” at the end of paragraph (4);

(2) by striking the period at the end of paragraph (5) and inserting “; and”; and

(3) by adding at the end the following:

“(6) for fiscal year 2010, \$42,469,970,178.”.

(b) **MASS TRANSIT CATEGORY.**—Section 8003(b) of SAFETEA-LU (119 Stat. 1917) is amended—

(1) by striking “and” at the end of paragraph (4);

(2) by striking the period at the end of paragraph (5) and inserting “; and”; and

(3) by inserting after paragraph (5) the following:

“(6) for fiscal year 2010, \$10,338,065,000.”.

HAZARDOUS MATERIALS RESEARCH

SEC. 2008. Section 7131(e) of SAFETEA-LU (119 Stat. 1910) is amended by striking “2009” and inserting “2010”.

EXTENSION AND EXPANSION OF EXPENDITURE AUTHORITY FROM TRUST FUNDS

SEC. 2009. (a) HIGHWAY TRUST FUND.—

(1) **HIGHWAY ACCOUNT.**—Paragraph (1) of section 9503(c) of the Internal Revenue Code of 1986 is amended—

(A) by striking “September 30, 2009 (October 1, 2009)” and inserting “September 30, 2010 (October 1, 2010),” and

(B) by striking “under” and all that follows and inserting “under the Surface Transportation Extension Act of 2009 or any other provision of law which was referred to in this paragraph before the date of the enactment of such Act (as such Act and provisions of law are in effect on the date of the enactment of such Act).”.

(2) **MASS TRANSIT ACCOUNT.**—Paragraph (3) of section 95303(e) of such Code is amended—

(A) by striking “October 1, 2009” and inserting “October 1, 2010,” and

(B) by striking “in accordance with” and all that follows and inserting “in accordance with the Surface Transportation Extension Act of 2009 or any other provision of law which was referred to in this paragraph before the date of the enactment of such Act (as such Act and provisions of law are in effect on the date of the enactment of such Act).”.

(3) **EXCEPTION TO LIMITATION ON TRANSFERS.**—Subparagraph (B) of section 9503(b)(6) of such Code is amended by striking “September 30, 2009 (October 1, 2009)” and inserting “September 30, 2010 (October 1, 2010)”.

(b) **SPORT FISH RESTORATION AND BOATING TRUST FUND.**—

(1) **IN GENERAL.**—Paragraph (2) of section 9504(b) of such Code is amended—

(A) by striking “(as in effect)” in subparagraph (A) and all that follows in such subparagraph and inserting “(as in effect on the date of the enactment of the Surface Transportation Extension Act of 2009),”.

(B) by striking “(as in effect)” in subparagraph (B) and all that follows in such subparagraph and inserting “(as in effect on the date of the enactment of the Surface Transportation Extension Act of 2009), and”, and

(C) by striking “(as in effect)” in subparagraph (C) and all that follows in such subparagraph and inserting “(as in effect on the date of

the enactment of the Surface Transportation Extension Act of 2009).”.

(2) EXCEPTION TO LIMITATION ON TRANSFERS.—Paragraph (2) of section 9504(d) of such Code is amended by striking “October 1, 2009” and inserting “October 1, 2010”.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on September 30, 2009.

DETERMINATION OF HIGHWAY TRUST FUND BALANCES

SEC. 2010. (a) RESTORATION OF CERTAIN FOREGONE INTEREST TO HIGHWAY TRUST FUND.—Subsection (f) of section 9503 of the Internal Revenue Code of 1986 (relating to determination of trust fund balances after September 30, 1998) is amended—

(1) by striking paragraph (2); and

(2) by adding at the end the following new paragraph:

“(2) RESTORATION OF FOREGONE INTEREST.—Out of money in the Treasury not otherwise appropriated, there is hereby appropriated (without fiscal year limitation)—

“(A) \$14,700,000,000 to the Highway Account (as defined in subsection (e)(5)(B)) of the Highway Trust Fund, and

“(B) \$4,800,000,000 to the Mass Transit Account of the Highway Trust Fund.”.

(b) REPEAL OF PROVISION PROHIBITING CREDITING OF INTEREST TO HIGHWAY TRUST FUND.—

(1) IN GENERAL.—Paragraph (1) of section 9503(f) of such Code is amended by striking subparagraph (B).

(2) CONFORMING AMENDMENTS.—Such paragraph, as amended by paragraph (1), is further amended—

(A) by striking “, and” at the end of subparagraph (A) and inserting a period, and

(B) by striking “1998” in the matter preceding subparagraph (A) and all that follows through “the opening balance” and inserting “1998, the opening balance”.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the enactment of this Act.

REPEAL OF TRANSFERS FROM HIGHWAY TRUST FUND FOR REPAYMENTS AND CREDITS

SEC. 2011. (a) IN GENERAL.—Subsection (c) of section 9503 of the Internal Revenue Code of 1986 is amended by striking paragraph (2) and by redesignating paragraphs (3), (4), (5), and (6) as paragraphs (2), (3), (4), and (5).

(b) CONFORMING AMENDMENTS.—

(1) Section 9502(a) of such Code is amended by striking “section 9503(c)(7)” and inserting “section 9503(c)(5)”.

(2) Section 9503(b)(4)(D) of such Code is amended by striking “paragraph (4)(D) or (5)(B)” and inserting “paragraph, (3)(D) or (4)(B)”.

(3) Section 9503(c)(2) of such Code, as redesignated by subsection (a), is amended by adding at the end the following sentence: “The amounts payable from the Highway Trust Fund under the preceding sentence shall be determined by taking into account only the portion of the taxes which are deposited into the Highway Trust Fund.”.

(4) Section 9503(e)(5)(A) of such Code is amended by striking “paragraphs (2), (3), and (4)” and inserting “paragraphs (2) and (3)”.

(5) Section 9504(a) of such Code is amended by striking “section 9503(c)(4), section 9503(c)(5)” and inserting “section 9503(c)(3), section 9503(c)(4)”.

(6) Section 9504(b)(2) of such Code is amended by striking “section 9503(c)(5)” and inserting “section 9503(c)(4)”.

(7) Section 9504(e) of such Code is amended by striking “section 9503(c)(4)” and inserting “section 9503(c)(3)”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to amounts paid, and

credits allowed with respect to fuel used, in calendar quarters beginning after the date of the enactment of this Act.

FEDERAL SHARE

SEC. 2012. (a) IN GENERAL.—Notwithstanding any other provision of law, the Federal share of the cost of a covered project or activity (or portion of a covered project or activity) funded with amounts obligated during the period beginning on the date of enactment of this Act and ending on September 30, 2010, shall be, at the option of the recipient, up to 100 percent.

(b) COVERED PROJECT OR ACTIVITY DEFINED.—(1) IN GENERAL.—In this section, the term “covered project or activity” means a project or activity eligible for assistance under titles I through VI of SAFETEA-LU (119 Stat. 1144), the SAFETEA-LU Technical Corrections Act of 2008 (122 Stat. 1572), titles I through VI of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 1914), titles I through V of the Transportation Equity Act for the 21st Century (112 Stat. 107), title 23, United States Code, chapter 53 of title 49, United States Code, chapter 303 of title 49, United States Code, or part B of subtitle VI of title 49, United States Code.

(2) EXCLUSIONS.—Notwithstanding paragraph (1), the term does not include a project or activity funded pursuant to—

(A) section 1301 or 1302 of SAFETEA-LU (119 Stat. 1198, 1204); SAFETEA-LU (119 Stat. 1144), the SAFETEA-LU Technical Corrections Act of 2008 (122 Stat. 1572), titles I through VI of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 1914), titles I through V of the Transportation Equity Act for the 21st Century (112 Stat. 107), title 23, United States Code, chapter 303 of title 49, United States Code, or part B of subtitle VI of title 49, United States Code.

(2) EXCLUSIONS.—Notwithstanding paragraph (1), the term does not include a project or activity funded pursuant to Chapter 53 of title 49, United States Code.

(A) section 1301 Or 1302 of SAFETEA-LU (119 Stat. 1198, 1204);

(B) section 5309(d) or 5309(e) of title 49, United States Code;

(C) the national infrastructure investments program in the Office of the Secretary of Transportation; or

(D) section 122 of the Department of Transportation Appropriations Act, 2010.

(c) REFERENCES.—Any reference in this section to an Act, or a provision contained in an Act, shall be considered include the amendments made by that Act or provision.

BUY AMERICA REQUIREMENTS FOR HIGHWAY AND PUBLIC TRANSPORTATION PROJECTS

SEC. 2013. (a) HIGHWAYS.—Section 313 of title 23, United States Code, is amended—

(1) by redesignating subsections (c) through (f) as subsections (e) through (h), respectively;

(2) by inserting after subsection (b) the following:

“(c) REQUIREMENTS FOR ISSUANCE OF WAIVERS.—

“(1) PUBLIC INTEREST WAIVERS.—The Secretary may issue a waiver under subsection (b)(1) only after the Secretary has considered the potential impacts of the waiver on domestic manufacturing employment.

“(2) INSUFFICIENT DOMESTIC SOURCE WAIVERS.—The Secretary may issue a waiver under subsection (b)(2) with respect to a material or product only if the Secretary publishes notice of the waiver on the Internet for a period of at least 5 business days prior to issuance of the waiver and a sufficient domestic source of the material or product does not identify itself during the period.

“(d) TRANSPARENCY OF WAIVERS.—

“(1) IN GENERAL.—When the Secretary receives a written request for a waiver under this section, the Secretary shall—

“(A) publish the request on the Internet within 5 business days of the date of receipt of the request; and

“(B) if the Secretary decides to issue a waiver based on the request, publish on the Internet, within 30 days following the date of issuance of the waiver, a detailed written justification as to why the waiver is necessary, including an identification of the amount of Federal funds associated with the waiver.

“(2) EMPLOYMENT IMPACT STATEMENT.—In issuing a waiver based on a finding under subsection (b)(1), the Secretary shall include, as part of the Secretary’s written justification for the waiver decision, a statement detailing the short- and long-term impact of the decision on domestic manufacturing employment.”; and

(3) by adding at the end the following:

“(1) APPLICATION TO BRIDGE PROJECTS.—In the case of a bridge project, the requirements of this section apply to all construction contracts carried out within the scope of the applicable decision under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and carried out on the bridge from abutment to abutment (including the abutments) regardless of the funding source of the contracts if at least one contract for construction with respect to the bridge is funded with amounts made available under this title.”.

(b) PUBLIC TRANSPORTATION.—Section 5323(j) of title 49, United States Code, is amended—

(1) in paragraph (2)(C) in the matter preceding clause (i) by inserting “, but excluding a rolling stock prototype” after “equipment”;

(2) by redesignating paragraphs (3) through (9) as paragraphs (5) through (11), respectively; and

(3) by inserting after paragraph (2) the following:

“(3) REQUIREMENTS FOR ISSUANCE OF WAIVER.—

“(A) PUBLIC INTEREST WAIVERS.—The Secretary may issue a waiver under paragraph (2)(A) only after the Secretary has considered the potential impacts of the waiver on domestic manufacturing employment.

“(B) INSUFFICIENT DOMESTIC SOURCE WAIVERS.—The Secretary may issue a waiver under paragraph (2)(B) with respect to a material or product only if the Secretary publishes notice of the waiver on the Internet for a period of at least 5 business days prior to issuance of the waiver and a sufficient domestic source of the material or product does not identify itself during the period.

“(4) TRANSPARENCY OF WAIVERS.—

“(A) IN GENERAL.—When the Secretary receives a written request for a waiver under this subsection, the Secretary shall—

“(i) publish the request on the Internet within 5 business days of the date of receipt of the request; and

“(ii) if the Secretary decides to issue a waiver based on the request, publish on the Internet, within 30 days following the date of issuance of the waiver, a detailed written justification as to why the waiver is necessary, including an identification of the amount of Federal funds associated with the waiver.

“(B) EMPLOYMENT IMPACT STATEMENT.—In issuing a waiver based on a finding under paragraph (2)(A), the Secretary shall include, as part of the Secretary’s written justification of the waiver decision, a statement detailing the short- and long-term impact of the decision on domestic manufacturing employment.”.

(c) IMPLEMENTATION.—

(1) FINAL GUIDANCE.—Not later than 120 days after the date of enactment of this Act, the Secretary shall issue final guidance to carry out the amendments made by this section.

(2) EFFECTIVE DATE.—The requirements of the amendments made by subsections (a) and (b)

shall begin to apply only after issuance of final guidance by the Secretary under paragraph (1).

(d) **SEMIANNUAL REPORT.**—Not later than 6 months after the date of enactment of this Act, and semiannually thereafter through September 30, 2011, the Comptroller General shall submit to the Committee on Transportation and Infrastructure and the Committee on Education and Labor of the House of Representatives and the Committee on Environment and Public Works, the Committee on Banking, Housing, and Urban Affairs, and the Committee on Health, Education, Labor, and Pensions of the Senate a report on the number of waivers issued by the Secretary of Transportation under section 313(b) of title 23, United States Code, and section 5323(j)(2) of title 49, United States Code, the reasons relied upon for issuing the waivers, and the amount of Federal funds associated with each waiver and in total for the period examined.

TITLE III—UNEMPLOYMENT AND OTHER EMERGENCY NEEDS

CHAPTER 1—AGRICULTURE AND RURAL DEVELOPMENT

DEPARTMENT OF AGRICULTURE

GENERAL PROVISION, THIS CHAPTER

RELIEF FOR DISCRIMINATION IN A CREDIT PROGRAM OF THE DEPARTMENT OF AGRICULTURE UNDER THE EQUAL CREDIT OPPORTUNITY ACT

Sec. 3101. (a) **IN GENERAL.**—To the extent permitted by the Constitution, and notwithstanding any other period of limitations, in the case of an eligible complaint alleging discrimination in violation of the Equal Credit Opportunity Act (15 U.S.C. 1691) involving a credit program of the Department of Agriculture, a complainant may, before the end of the filing period—

(1) file a civil action under subsection (c); or
(2) request administrative review under subsection (d).

(b) **ELIGIBLE COMPLAINT.**—For purposes of this section, the term “eligible complaint” means any written complaint—

(1) that is not employment related;
(2) that was filed with the Department of Agriculture after December 31, 1997, and before the earlier of—

(A) 2 years after the date of the alleged violation of the Equal Credit Opportunity Act; and
(B) the date of the enactment of this Act; and
(3) with respect to which the complainant—

(A) was not a party to the consent decree in the case entitled “Pigford v. Glickman”, approved by the United States District Court for the District of Columbia on April 14, 1999; and
(B) has not obtained relief from the Department of Agriculture or a court of competent jurisdiction.

(c) **CIVIL ACTION.**—A civil action may be filed under this subsection if, with respect to the eligible complaint, the complainant—

(1) has not requested administrative review; or
(2) has requested administrative review, and the Secretary, with respect to each request, has either—

(A) issued a determination; or
(B) failed to issue a determination by a date that is 180 days after the date such request was made.

(d) **ADMINISTRATIVE REVIEW.**—Administrative review may be requested under this subsection as follows:

(1) **DETERMINATION ON THE MERITS.**—A complainant may request a determination on the merits if the complainant, with respect to the eligible complaint, has not filed a civil action.

(2) **HEARING ON THE RECORD.**—A complainant may request a hearing on the record if the complainant, with respect to the eligible complaint—

(A) has not filed a civil action;
(B) has requested a determination on the merits, and the Secretary has not issued such deter-

mination by the issuance deadline in subsection (f)(2)(A); and

(C) requests such hearing no later than 180 days after the issuance deadline in subsection (f)(2)(A).

(e) **INFORMAL RESOLUTION.**—Notwithstanding any other provision of this section, the Secretary may informally resolve an eligible complaint with a complainant.

(f) **SPECIAL RULES FOR ADMINISTRATIVE REVIEW.**—For purposes of this section:

(1) **REQUESTS FOR ADMINISTRATIVE REVIEW.**—A request for administrative review shall be—

(A) in writing; and
(B) filed in accordance with procedures established by the Secretary.

(2) **RESPONSIBILITY OF SECRETARY.**—If a complainant requests a determination, on the merits under subsection (d)(1), then, unless a complainant, with respect to the eligible complaint, files a civil action or requests a hearing on the record, the Secretary shall, with respect to the eligible complaint, take the following actions:

(A) **ISSUANCE OF DETERMINATION.**—The Secretary shall, not later than an issuance deadline that is 1 year after the date on which the complainant requests a determination on the merits—

(i) investigate the eligible complaint; and
(ii) issue a written determination.

(B) **NOTICE OF FAILURE TO ISSUE TIMELY DETERMINATION.**—If the Secretary does not issue a written determination by the issuance deadline in subparagraph (A), the Secretary shall promptly issue to the Complainant, in writing and by registered mail, notice—

(i) that the Secretary has not issued a timely determination; and
(ii) of the period of time during which the complainant may bring a civil action or request a hearing on the record.

(3) **FINALITY OF DETERMINATION WITH RESPECT TO HEARING ON THE RECORD.**—A determination with respect to a hearing on the record shall be final.

(4) **JUDICIAL REVIEW OF ADMINISTRATIVE DETERMINATION.**—A determination on the merits or a determination with respect to a hearing on the record shall be subject to de novo review.

(g) **FILING PERIOD.**—

(1) **IN GENERAL.**—For purposes of this section, the term “filing period” means the 2-year period beginning on the date of enactment of this Act.

(2) **TOLLING.**—The running of the filing period in paragraph (1), for the purpose of filing a civil action under subsection (c) or requesting a hearing on the record under subsection (d)(2), shall be tolled for the period that, with respect to the eligible complaint—

(A) begins on the date of a request for a determination on the merits; and

(B) ends on the date on which the Secretary issues a determination with respect to a determination on the merits or a hearing on the record.

(h) **RELIEF.**—

(1) **AMOUNT.**—Subject to paragraph (2), a complainant shall, under subsection (a), and may, under subsection (e), be awarded such relief as the complainant would be afforded under the Equal Credit Opportunity Act, including—

(A) actual damages;
(B) the costs of the action, together with a reasonable attorney’s fee; and
(C) debt relief, including—
(i) write-downs or write-offs of the principal on a loan;
(ii) write-downs or write-offs of the interest on a loan;
(iii) reduction of the interest rate on a loan;
(iv) waiver or reduction of penalties with respect to a loan; or
(v) other modification of the terms of a loan.

(2) **LIMITATIONS ON RELIEF.**—

(A) **IN GENERAL.**—The total amount awarded under this section for all claims shall not exceed \$100,000,000.

(B) **ACTUAL DAMAGES, COSTS, AND ATTORNEY’S FEES.**—The sum of the total amount awarded under paragraph (1)(A) for all claims, plus the total amount awarded under paragraph (1)(B) for all claims, shall not exceed \$40,000,000.

(C) **DEBT RELIEF.**—The total amount awarded under paragraph (1)(C) for all claims shall not exceed \$60,000,000.

(3) **EXEMPTION FROM TAXATION.**—Any award under clauses (ii), (iii), or (iv) of subparagraph (C) of paragraph (1) shall not be included in gross income for purposes of chapter 1 of the Internal Revenue Code of 1986.

(i) **FUNDING.**—

(1) There is hereby appropriated to the Secretary, for relief awarded under subsection (h)(1), \$100,000,000, to remain available until expended.

(2) Of the funds derived from interest on the cushion of credit payments including funds in the current fiscal year, as authorized by section 313 of the Rural Electrification Act of 1936, an additional \$100,000,000 shall not be obligated and an additional \$100,000,000 are rescinded.

(j) **SECRETARY.**—For purposes of this section, the term “Secretary” means the Secretary of Agriculture.

CHAPTER 2—FINANCIAL SERVICES AND GENERAL GOVERNMENT

SMALL BUSINESS ADMINISTRATION

BUSINESS LOANS PROGRAM ACCOUNT

For an additional amount for “Business Loans Program Account” for fee reductions and eliminations under section 501 of division A of the American Recovery and Reinvestment Act of 2009 (Public Law 111–5) and for the cost of guaranteed loans under section 502 of such division, \$354,000,000: Provided, That such cost shall be as defined in section 502 of the Congressional Budget Act of 1974: Provided further, That authority to guarantee loans under section 502 of division A of the American Recovery and Reinvestment Act of 2009 shall remain in effect through September 30, 2010, notwithstanding subsection (f) of such section.

GENERAL PROVISION, THIS CHAPTER

RESCISSIONS

SEC. 3201. The following funds are hereby rescinded from the following accounts and programs in the specified amounts:

(1) “National Telecommunications and Information Administration—Digital-to-Analog Converter Box Program” in the Department of Commerce, \$111,000,000.

(2) “Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)” of the Department of Agriculture, \$243,000,000, to be derived from unobligated balances available from amounts placed in reserve in title I of division A of the American Recovery and Reinvestment Act of 2009 (Public Law 111–5; 123 Stat. 115).

CHAPTER 3—LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION

GENERAL PROVISIONS, THIS CHAPTER

ASSISTANCE FOR UNEMPLOYED WORKERS AND STRUGGLING FAMILIES

SEC. 3301. (a)(1) Section 4007 of the Supplemental Appropriations Act, 2008 (Public Law 110–252; 26 U.S.C. 3304 note) is amended—

(A) by striking “December 31, 2009” each place it appears and inserting “June 30, 2010”;
(B) in the heading for subsection (b)(2), by striking “DECEMBER 31, 2009” and inserting “JUNE 30, 2010”; and

(C) in subsection (b)(3), by striking “May 31, 2010” and inserting “November 30, 2010”.

(2) Section 2002(e) of the Assistance for Unemployed Workers and Struggling Families Act, as

contained in Public Law 111-5 (26 U.S.C. 3304 note; 123 Stat. 438), is amended—

(A) in paragraph (1)(B), by striking “January 1, 2010” and inserting “July 1, 2010”;

(B) in the heading for paragraph (2), by striking “JANUARY 1, 2010” and inserting “JULY 1, 2010”; and

(C) in paragraph (3), by striking “June 30, 2010” and inserting “December 31, 2010”.

(3) Section 2005 of the Assistance for Unemployed Workers and Struggling Families Act, as contained in Public Law 111-5 (26 U.S.C. 3304 note; 123 Stat. 444), is amended—

(A) by striking “January 1, 2010” each place it appears and inserting “July 1, 2010”; and

(B) in subsection (c), by striking “June 1, 2010” and inserting “December 1, 2010”.

(4) Section 5 of the Unemployment Compensation Extension Act of 2008 (Public Law 110-449; 26 U.S.C. 3304 note) is amended by striking “May 30, 2010” and inserting “November 30, 2010”.

(b) Section 4004(e)(1) of the Supplemental Appropriations Act, 2008 (Public Law 110-252; 26 U.S.C. 3304 note) is amended by striking “by reason of” and all that follows and inserting the following: “by reason of—

“(A) the amendments made by section 2001(a) of the Assistance for Unemployed Workers and Struggling Families Act;

“(B) the amendments made by sections 2 through 4 of the Worker, Homeownership, and Business Assistance Act of 2009; and

“(C) the amendments made by section 3301(a)(1) of the Jobs for Main Street Act, 2010; and”.

EXTENSION AND IMPROVEMENT OF PREMIUM ASSISTANCE FOR COBRA BENEFITS

SEC. 3302. (A) EXTENSION OF ELIGIBILITY PERIOD.—Subsection (a)(3)(A) of section 3001 of division B of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) is amended by striking “December 31, 2009” and inserting “June 30, 2010”.

(b) EXTENSION OF MAXIMUM DURATION OF ASSISTANCE.—Subsection (a)(2)(A)(ii)(I) of such section is amended by striking “9 months” and inserting “15 months”.

(c) RULES RELATED TO 2009 EXTENSION.—Subsection (a) of such section is further amended by adding at the end the following:

“(16) RULES RELATED TO 2009 extension.—

“(A) ELECTION TO PAY PREMIUMS RETROACTIVELY AND MAINTAIN COBRA COVERAGE.—In the case of any premium for a period of coverage during an assistance eligible individual’s transition period, such individual shall be treated for purposes of any COBRA continuation provision as having timely paid the amount of such premium if—

“(i) such individual was covered under the COBRA continuation coverage to which such premium relates for the period of coverage immediately preceding such transition period, and

“(ii) such individual pays, not later than 60 days after the date of the enactment of this paragraph (or, if later, 30 days after the date of provision of the notification required under subparagraph (D)(ii)), the amount of such premium, after the application of paragraph (1)(A).

“(B) REFUNDS AND CREDITS FOR RETROACTIVE PREMIUM ASSISTANCE ELIGIBILITY.—IN THE CASE OF AN ASSISTANCE ELIGIBLE INDIVIDUAL WHO PAYS, WITH RESPECT TO ANY PERIOD OF COBRA CONTINUATION COVERAGE DURING SUCH INDIVIDUAL’S TRANSITION PERIOD, THE PREMIUM AMOUNT FOR SUCH COVERAGE WITHOUT REGARD TO PARAGRAPH (1)(A), RULES SIMILAR TO THE RULES OF PARAGRAPH (12)(E) SHALL APPLY.

“(C) TRANSITION PERIOD.—

“(i) IN GENERAL.—For purposes of this paragraph, the term ‘transition period’ means, with respect to any assistance eligible individual, any period of coverage if—

“(I) such period begins before the date of the enactment of this paragraph, and

“(II) paragraph (1)(A) applies to such period by reason of the amendment made by section 3302(b) of the Jobs for Main Street Act, 2010.

“(ii) CONSTRUCTION.—Any period during the period described in subclauses (I) and (II) of clause (i) for which the applicable premium has been paid pursuant to subparagraph (A) shall be treated as a period of coverage referred to in such paragraph, irrespective of any failure to timely pay the applicable premium (other than pursuant to subparagraph (A)) for such period.

“(D) NOTIFICATION.—

“(i) IN GENERAL.—In the case of an individual who was an assistance eligible individual at any time on or after October 31, 2009, or experiences a qualifying event (consisting of a reduction of hours or termination of employment) relating to COBRA continuation coverage on or after such date, the administrator of the group health plan (or other entity) involved shall provide an additional notification with information regarding the amendments made by the Jobs for Main Street Act, 2010 within 60 days after the date of the enactment of such Act or, in the case of a qualifying event occurring after such date of enactment, consistent with the timing of notifications under paragraph (7)(A).

“(ii) TO INDIVIDUALS WHO LOST ASSISTANCE.—In the case of an assistance eligible individual described in subparagraph (A)(i) who did not timely pay the premium for any period of coverage during such individual’s transition period or paid the premium for such period without regard to paragraph (1)(A), the administrator of the group health plan (or other entity) involved shall provide to such individual, within the first 60 days of such individual’s transition period, an additional notification with information regarding the amendments made by the Jobs for Main Street Act, 2010, including information on the ability under subparagraph (A) to make retroactive premium payments with respect to the transition period of the individual in order to maintain COBRA continuation coverage.

“(iii) APPLICATION OF RULES.—Rules similar to the rules of paragraph (7) shall apply with respect to notifications under this subparagraph.”.

(d) CLARIFICATIONS RELATING TO SECTION 3001 OF ARRA.—

(1) CLARIFICATION THAT ELIGIBILITY AND NOTICE IS BASED ON TIMING OF QUALIFYING EVENT.—Subsection (a) of such section is amended—

(A) in paragraph (3)(A)—

(i) by striking “at any time” and inserting “such qualified beneficiary is eligible for COBRA continuation coverage related to a qualifying event occurring”; and

(ii) by striking “, such qualified beneficiary is eligible for COBRA continuation coverage”; and

(B) in paragraph (7) (A), by striking “become entitled to elect COBRA continuation coverage and inserting “have a qualifying event relating to COBRA continuation coverage”.

(2) CLARIFICATION REGARDING RETIREE COVERAGE.—Subsection (a)(2)(A)(i) of such section is amended by inserting “coverage under a retiree health plan,” after “other than”.

(3) CLARIFICATION REGARDING COBRA CONTINUATION RESULTING FROM REDUCTIONS IN HOURS.—Subsection (a) of such section is further amended—

(A) in paragraph (3)(C), by inserting before the period at the end the following: “or consists of a reduction of hours followed by such an involuntary termination of employment during such period”; and

(B) by adding at the end the following:

“(17) SPECIAL RULES IN CASE OF INDIVIDUALS LOSING COVERAGE BECAUSE OF A REDUCTION OF HOURS.—

“(A) NEW ELECTION PERIOD.—

“(i) IN GENERAL.—For the purposes of the COBRA continuation provisions, in the case of an individual described in subparagraph (C) who did not make (or who made and discontinued) an election of COBRA continuation coverage on the basis of the reduction of hours of employment, the involuntary termination of employment of such individual after the (date of the enactment of the Jobs for Main Street Act, 2010, shall be treated as a qualifying event.

“(ii) COUNTING COBRA DURATION PERIOD FROM PREVIOUS QUALIFYING EVENT.—In any case of an individual referred to in clause (i), the period of such individual’s continuation coverage shall be determined as though the qualifying event were the reduction of hours of employment.

“(iii) CONSTRUCTION.—Nothing in this paragraph shall be construed as requiring an individual referred to in clause (i) to make a payment for COBRA continuation coverage between the reduction of hours and the involuntary termination of employment.

“(iv) PREEXISTING CONDITIONS.—With respect to an individual referred to in clause (i) who elects COBRA continuation coverage pursuant to such clause, rules similar to the rules in paragraph (4)(C) shall apply.

“(B) NOTICES.—In the case of an individual described in subparagraph (C), the administrator of the group health plan (or other entity) involved shall provide, during the 60-day period beginning on the date of such individual’s termination of employment, an additional notification described in paragraph (7)(A), including information on the provisions of this paragraph. Rules similar to the rules of paragraph (7) shall apply with respect to such notification.

“(C) INDIVIDUALS DESCRIBED.—Individuals described in this subparagraph are individuals who are assistance eligible individuals on the basis of a qualifying event consisting of a reduction of hours occurring during the period described in paragraph (3)(A) followed by an involuntary termination of employment insofar as such termination of employment occurred after the date of the enactment of the Jobs for Main Street Act, 2010.”.

(4) CLARIFICATION OF PERIOD OF ASSISTANCE.—Subsection (a)(2)(A)(ii)(I) of such section is amended by striking “of the first month”.

(5) ENFORCEMENT.—Subsection (a)(5) of such section is amended by adding at the end the following: “In addition to civil actions that may be brought to enforce applicable provisions of such Act or other laws, the appropriate Secretary or an affected individual may bring a civil action to enforce such determinations and for appropriate relief. In addition, such Secretary may assess a penalty against a plan sponsor or health insurance issuer of not more than \$110 per day for each failure to comply with such determination of such Secretary after 10 days after the date of the plan sponsor’s or issuer’s receipt of the determination.”

(6) AMENDMENTS RELATING TO SECTION 3001 OF ARRA.—

(A) Subsection (g) of section 35 of the Internal Revenue Code of 1986 is amended by striking “section 3002(a) of the Health Insurance Assistance for the Unemployed Act of 2009” and inserting “section 3001(a) of title III of division B of the American Recovery and Reinvestment Act of 2009”.

(B) Section 139C of such Code is amended by striking “section 3002 of the Health Insurance Assistance for the Unemployed Act of 2009” and inserting “section 3001 of title III of division B of the American Recovery and Reinvestment Act of 2009”.

(C) Section 6432 of such Code is amended—

(i) in subsection (a), by striking “section 3002(a) of the Health Insurance Assistance for the Unemployed Act of 2009” and inserting “section 3001(a) of title III of division B of the American Recovery and Reinvestment Act of 2009”; and

(ii) in subsection (c)(3), by striking “section 3002(a)(1)(A) of such Act” in subsection (c)(3) and inserting “section 3001(a)(1)(A) of title III of division B of the American Recovery and Reinvestment Act of 2009”; and

(iii) by redesignating subsections (e) and (f) as subsections (f) and (g), respectively, and inserting after subsection (d) the following new subsection:

“(e) **EMPLOYER DETERMINATION OF QUALIFYING EVENT AS INVOLUNTARY TERMINATION.**—For purposes of this section, in any case in which—

“(1) based on a reasonable interpretation of section 3001(a)(3)(C) of division B of the American Recovery and Reinvestment Act of 2009 and administrative guidance thereunder, an employer determines that the qualifying event with respect to COBRA continuation coverage for an individual was involuntary termination of a covered employee’s employment, and

“(2) the employer maintains supporting documentation of the determination, including an attestation by the employer of involuntary termination with respect to the covered employee, the qualifying event for the individual shall be deemed to be involuntary termination of the covered employee’s employment.”.

(D) Subsection (a) of section 6720C of such Code is amended by striking “section 3002 (a) (2)(C) of the Health Insurance Assistance for the Unemployed Act of 2009” and inserting “section 3001(a)(2)(C) of title III of division B of the American Recovery and Reinvestment Act of 2009”.

(e) **EFFECTIVE DATE.**—The amendments made by this section shall take effect as if included in the provisions of section 3001 of division B of the American Recovery and Reinvestment Act of 2009 to which they relate, except that—

(1) the amendments made by subsections (d)(2) and (d)(3) shall apply to periods of coverage beginning after the date of the enactment of this Act; and

(2) the amendment made by subsection (d)(5) shall take effect on the date of the enactment of this Act.

EXTENSION OF RECOVERY ACT INCREASE IN FMAP

SEC. 3303. Section 5001 of the American Recovery and Reinvestment Act of 2009 (Public Law 111–5) is amended—

(1) in subsection (a)(3), by striking “first calendar quarter” and inserting “first 3 calendar quarters”;

(2) in subsection (b)(2), by inserting before the period at the end the following: “and such paragraph shall not apply to calendar quarters beginning on or after October 1, 2010”;

(3) in subsection (c)(4)(C)(ii), by striking “December 2009” and “January 2010” and inserting “June 2010” and “July 2010”, respectively;

(4) in subsection (d), by inserting “ending before October 1, 2010” after “entire fiscal years” and after “with respect to fiscal years”;

(5) in subsection (g)(1), by striking “September 30, 2011” and inserting “March 31, 2012”; and

(6) in subsection (h)(3), by striking “December 31, 2010” and inserting “June 30, 2011”.

REPEAL OF EARNED INCOME THRESHOLD FOR DETERMINING REFUNDABLE PORTION OF CHILD TAX CREDIT

SEC. 3304. (a) **IN GENERAL.**—Clause (i) of section 24(d)(1)(B) of the Internal Revenue Code of 1986 is amended to read as follows:

“(i) 15 percent of the taxpayer’s earned income (within the meaning of section 32) which is taken into account in computing taxable income, or”.

(b) **CONFORMING AMENDMENTS.**—Subsection (d) of section 24 of such Code is amended—

(1) by striking paragraph (3), and

(2) by striking paragraph (4).

(c) **EFFECTIVE DATE.**—The amendments made by this section shall apply to taxable years beginning after December 31, 2009.

(d) **APPLICATION OF EGTRRA SUNSET.**—The amendments made by subsection (a) and (b)(1) shall be subject to title IX of the Economic Growth and Tax Relief Reconciliation Act of 2001 in the same manner as the provision of such Act to which such amendment relates.

HHS POVERTY GUIDELINES

SEC. 3305. Notwithstanding section 673(2) of the Omnibus Budget Reconciliation Act of 1981 (42 U.S.C. 9902(2)) or any other provision of law, the poverty line for 2010 issued by the Secretary of Health and Human Services under such section 673(2) shall be not lower than the poverty line so issued on January 23, 2009 (74 Fed. Reg. 14). This section shall have no effect on such Secretary’s revision of the poverty line for 2011.

REFUNDS DISREGARDED IN THE ADMINISTRATION OF FEDERAL PROGRAMS AND FEDERALLY ASSISTED PROGRAMS

SEC. 3306. (a) **IN GENERAL.**—Subchapter A of chapter 65 of the Internal Revenue Code of 1986 is amended by adding at the end the following new section:

“SEC. 6409. REFUNDS DISREGARDED IN THE ADMINISTRATION OF FEDERAL PROGRAMS AND FEDERALLY ASSISTED PROGRAMS.

“(a) **IN GENERAL.**—Notwithstanding any other provision of law, any refund (or advance payment with respect to a refundable credit) made to any individual under this title shall not be taken into account as income, and shall not be taken into account as resources for the month of receipt and the following 11 months, for purposes of determining the eligibility of such individual (or any other individual) for benefits or assistance (the amount or extent of benefits or assistance) under any Federal program or under any State or local program financed in whole or in part with Federal funds.

“(b) **TERMINATION.**—Subsection (a) shall not apply to any amount received after December 31, 2010.”.

(b) **CLERICAL AMENDMENT.**—The table of sections for such subchapter is amended by adding at the end the following new item:

“Sec. 6109. Refunds disregarded in the administration of Federal programs and Federally assisted programs.”.

(c) **EFFECTIVE DATE.**—The amendment made by this section shall apply to amounts received after December 31, 2009.

PERMANENT EXTENSION OF FEE WITHHOLDING PROCEDURES TO TITLE XVI AND TO QUALIFIED NON-ATTORNEY REPRESENTATIVES

SEC. 3307. (a) **PERMANENT EXTENSION OF ATTORNEY FEE WITHHOLDING PROCEDURES TO TITLE XVI.**—

(1) **IN GENERAL.**—Section 302 of the Social Security Protection Act of 2004 (Public Law 108–203; 118 Stat. 519) is amended—

(A) in the section heading, by striking “**TEMPORARY**”; and

(B) in subsection (c), by striking “**EFFECTIVE DATE.**—” and all that follows through “The amendments” and inserting “**EFFECTIVE DATE.**—The amendments”, and by striking paragraph (2).

(2) **CLERICAL AMENDMENT.**—The item relating to section 302 in the table of contents in section 1(b) of such Act is amended by striking “Temporary extension” and inserting “Extension”.

(b) **PERMANENT EXTENSION OF FEE WITHHOLDING PROCEDURES TO QUALIFIED NON-ATTORNEY REPRESENTATIVES.**—

(1) **IN GENERAL.**—Section 206 of the Social Security Act (42 U.S.C. 406) is amended by adding at the end the following new subsection:

“(e)(1) The Commissioner shall provide for the extension of the fee withholding procedures and assessment procedures that apply under the preceding provisions of this section to agents and other persons, other than attorneys, who represent claimants under this title before the Commissioner.

“(2) Fee-withholding procedures may be extended under paragraph (1) to any nonattorney representative only if such representative meets at least the following prerequisites:

“(A) The representative has been awarded a bachelor’s degree from an accredited institution of higher education, or has been determined by the Commissioner to have equivalent qualifications derived from training and work experience.

“(B) The representative has passed an examination, written and administered by the Commissioner, which tests knowledge of the relevant provisions of this Act and the most recent developments in agency and court decisions affecting this title and title XVI.

“(C) The representative has secured professional liability insurance, or equivalent insurance, which the Commissioner has determined to be adequate to protect claimants in the event of malpractice by the representative.

“(D) The representative has undergone a criminal background check to ensure the representative’s fitness to practice before the Commissioner.

“(E) The representative demonstrates ongoing completion of qualified courses of continuing education, including education regarding ethics and professional conduct, which are designed to enhance professional knowledge in matters related to entitlement to, or eligibility for, benefits based on disability under this title and title XVI. Such continuing education, and the instructors providing such education, shall meet such standards as the Commissioner may prescribe.

“(3)(A) The Commissioner may assess representatives reasonable fees to cover the cost to the Social Security Administration of administering the prerequisites described in paragraph (2).

“(B) Fees collected under subparagraph (A) shall be credited to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, or deposited as miscellaneous receipts in the general fund of the Treasury, based on such allocations as the Commissioner determines appropriate.

“(C) The fees authorized under this paragraph shall be collected and available for obligation only to the extent and in the amount provided in advance in appropriations Acts. Amounts so appropriated are authorized to remain available until expended for administering the prerequisites described in paragraph (2).”.

(2) CONFORMING AMENDMENTS.—

(A) Section 1631(d)(2)(A) of such Act (42 U.S.C. 1383(d)(2)(A)) is amended—

(i) in clause (iv), by striking “and” at the end;

(ii) in clause (v), by striking the period at the end and inserting “; and”; and

(iii) by adding at the end the following new clause:

“(vi) by substituting, in subsection (e)(1)—

“(I) ‘subparagraphs (B) and (C) of section 1631(d)(2)’ for ‘the preceding provisions of this section’; and

“(II) ‘title XVI’ for ‘this title’.”.

(B) Section 303(e)(2) of the Social Security Protection Act of 2004 (Public Law 108–203; 118 Stat. 523) is amended by striking “AND FINAL REPORT” in the heading and by striking the last sentence.

(3) **EFFECTIVE DATE.**—The Commissioner of Social Security shall provide for full implementation of the provisions of section 206(e) of the Social Security Act (as added by paragraph (1)) and the amendments made by paragraph (2) not later than March 1, 2010.

CHAPTER 4—GENERAL PROVISIONS, THIS TITLE

EMERGENCY DESIGNATIONS

SEC. 3401. (a) **IN GENERAL.**—Each amount in this title is designated as an emergency requirement and necessary to meet emergency needs

pursuant to sections 403 and 423(b) of S. Con. Res. 13 (111th Congress), the concurrent resolution on the budget for fiscal year 2010.

(b) PAYGO.—All applicable provisions in this title are designated as an emergency for purposes of pay-as-you-go principles.

TITLE IV—GENERAL PROVISIONS, THIS ACT

PERIOD OF AVAILABILITY

SEC. 4001. No part of any appropriation contained in this Act shall remain available for obligation beyond September 30, 2010, unless expressly so provided herein.

BUY AMERICA

SEC. 4002. All funds provided under this Act shall be subject to the requirements of section 1605 of division A of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5).

This Act may be cited as the "Jobs for Main Street Act, 2010".

The SPEAKER pro tempore. The motion shall be debatable for 1 hour equally divided and controlled by the Chair and ranking minority member of the Committee on Appropriations.

The gentleman from Wisconsin (Mr. OBEY) and the gentleman from California (Mr. LEWIS) each will control 30 minutes.

The Chair recognizes the gentleman from Wisconsin.

GENERAL LEAVE

Mr. OBEY. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the pending legislation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. OBEY. Madam Speaker, I think people understand what this legislation is—it is an effort to redirect some \$75 billion from TARP funds that in the past have been directed to help Wall Street. Instead, direct them to Main Street to try to help Americans who are struggling to hang onto their jobs, their houses, and their health care. I think the need for it is obvious, and I urge passage.

I reserve the balance of my time.

Mr. LEWIS of California. Madam Speaker, Chairman OBEY calls this legislation the Jobs for Main Street Act; I call it economic insanity. Truly, this is one of those rare occasions when I hardly know where to begin.

It is because of legislation like this and the manner in which it was produced that the public has lost faith in this Congress and why confidence in Washington is at an all-time low.

This legislation repeats the failures of the so-called "Recovery Act" by pouring another \$150 billion into programs included in the original stimulus package that have so far failed to produce real results or real jobs.

Secondly, this legislation adds an additional \$150 billion to a budget deficit that has already tripled in the last year. The Democrat majority claims that this spending is offset with funds

from the TARP program, but under present law these dollars are already dedicated to reducing our debt. The public should not be fooled; every dollar will come out of the Treasury and taxpayers will be footing the bill.

Further, this legislation is a virtual mystery to almost every single Member of the House. I think we got the basic material like at 11 o'clock last night, I think. Its contents were released just shy of midnight last night for most, and there is no way for anyone to have read or understood it completely. How much thought or Member input really went into it? I dare say very, very little.

Ironically, it was Chairman OBEY who said on December 11, 2006, We will work to restore an accountable, above-board, transparent process for funding decisions and put an end to the abuses that have harmed the credibility of the Congress. This is a demonstration project of just how serious Mr. OBEY was about that.

Let me take just a moment to outline the transparent process by which this legislation comes before us today. Chairman OBEY instructed his majority staff not to share any details or information with the minority staff about the bill. Chairman OBEY's staff sent the bill to the Rules Committee at 11 o'clock last night. It has had no hearings, no markup, and is prevented from being amended on the House floor today. Mr. Speaker, martial law in the House of Representatives is hardly change that we can believe in.

Yet another irony in today's debate is that the Democrat majority has suddenly found religion by championing so-called "PAYGO" rules. This is occurring at the very same time that they are proposing to spend another \$150 billion and even as they have voted to increase the debt limit. We pass the debt limit, spend another \$150 billion.

Not long ago, small business in America was the backbone and the lifeblood of our national economy. Today, higher taxes and excessive government regulations have small business in a stranglehold, and that's even before Congress puts its stamp of approval on government-run health care.

With all this reliance on Uncle Sam, why don't we just put everyone in the United States on the Federal Government payroll and call it a day? In essence, that's what this fatally flawed process attempts to do.

□ 1645

According to Transportation Weekly, "Even if you only count title I of the stimulus II bill as an appropriations bill, it would still be the third largest fiscal year 2010 discretionary appropriations bill—bigger than Agriculture, Commerce-Justice, Energy and Water, Financial Services, Homeland Security, Interior and Environment, legislative branch, State/foreign operations, and the THUD bill."

Imagine what Ranking Member DAVID OBEY's reaction would have been had a GOP majority moved a supplement of this size to the House floor on less than 24-hours' notice and with no committee markup? Can you imagine the screaming from the rooftops? We have seen that before.

On more than one occasion, my friend, the majority leader, has suggested that the House minority has become the so-called party of "no," but he forgot to finish the sentence. House Republicans are the party of no more spending beyond our means. We are the party of no more increases to the historic debt limit. Republicans in the House are the party of no more busting the spending cap and calling it "emergency spending."

Our country's economy will never recover as long as Congress continues making the same mistakes over and over again. Spending by this House majority is unconstrained and unsustainable. Billions and billions and billions spent on the continued expansion of government will only exacerbate our financial troubles and will bring little or no relief to those without jobs.

Through this legislation, Congress is demonstrating once again that it is both unwilling and incapable of restraining its appetite to spend. This is nothing short of a taxpayer-funded Christmas shopping spree, financed with money borrowed from the Chinese.

I appeal to my friends, the Blue Dogs, to take a stand on this legislation. If you are serious about making a statement, this is your chance. Are the Blue Dogs serious about deficit reduction? If so, then vote "no."

Madam Speaker, simply put, this is an awful bill produced through a dreadful process. I strongly urge a "no" vote.

I reserve the balance of my time.

Mr. OBEY. Madam Speaker, I thank the gentleman for his support.

I now yield 4 minutes to the distinguished gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. I thank the distinguished Chair of the Appropriations Committee, my good friend from across the waters in Wisconsin, Mr. OBEY, and I applaud him for his extraordinary persistence and leadership in bringing to us this Jobs for Main Street Act. He has been consistent, persistent, forceful, vocal, and very laser beam-oriented on creating jobs.

Madam Speaker, in this Jobs for Main Street, \$39 billion is allocated to additional transportation and infrastructure investment to create and sustain family-wage construction jobs and, at the same time, rebuilding the Nation's highways and bridges and wastewater treatment systems.

We extend in this provision the highway and highway safety and transit

programs through September 30, 2010. There is \$27.5 billion for highways, \$8.4 billion for transit, as in the current Recovery Act. There is \$800 million for Amtrak, \$500 million for airports where an extraordinary success was achieved with nearly all of the airport projects being either completed or under contract on the job, improving our airport capacity. There is \$1 billion for the Clean Water State Revolving Loan Funds to improve wastewater treatment facilities and to build new ones where they don't exist today. There is \$715 million for the Corps of Engineers, and there is \$100 million for ship construction to help our maritime interests.

We have a highly successful record on that portion of the stimulus that comes from the Committee on Transportation and Infrastructure from which both Mr. OBEY and the distinguished Republican leader are graduates.

There are 220,000 direct jobs on over 8,000 projects. There are 630,000 direct jobs and jobs in the supply chain, supplying asphalt, cement, pipe, concrete, and culverts for this program. There is \$10 billion paid in payroll checks and \$179 million in unemployment insurance compensation checks avoided, and there is \$230 million in taxes paid to the Federal Government by those on these jobs, and there is more to come.

The results: There are 28,000 miles of highway pavement—improved, widened, expanded—underway right now. That is what we have achieved to this day, and we have more to come. There are 1,200 bridges restored, repaired, replaced, and with this addition in the Jobs for Main Street Act, we will have 56,000 miles of pavement rebuilt in the coming year. That will be 10,000 miles more than the entire Interstate Highway System just in this one bill.

That is an investment in America.

I assure my colleagues that this Committee on Transportation and Infrastructure will continue its vigorous oversight and accountability and transparency. Every month, every Member has received this report from our committee, a report with 14 categories of progress for each State under these key programs. You can track how many funds are associated with projects completed, how many projects are underway, the total job hours created and sustained, and the total payroll for hours created or sustained in every month for every State.

We are making this clear that we are accountable and that we are investing in America and that we will continue to do this under the Jobs for Main Street program.

Madam Speaker, I rise in strong support of H.R. 2847, the “Jobs for Main Street Act, 2010”.

This bill provides more than \$39 billion of additional transportation and infrastructure investment to help create and sustain family-

wage construction jobs and rebuild our Nation's infrastructure. The bill also extends the highway, highway safety, and public transit programs for the current fiscal year, through September 30, 2010.

One-half of the \$75 billion provided by H.R. 2847 is dedicated to transportation infrastructure investment, including: \$27.5 billion for highways, \$8.4 billion for transit, \$800 million for Amtrak, \$500 million for airports, and \$100 million for ship construction.

In addition, H.R. 2847 provides \$11 billion for other infrastructure investment, including \$1 billion for Clean Water State Revolving Funds and \$715 million for Corps of Engineers infrastructure investments.

Each of these investments is paid for—we use the Wall Street bailout funds to rebuild Main Street.

These investments will build upon the investments already underway pursuant to the American Recovery and Reinvestment Act of 2009 (P.L. 111–5) (Recovery Act), and will create and sustain more than 1 million good, family-wage jobs.

The transportation and infrastructure investments of the Recovery Act have already played a key role in putting Americans back to work. Federal agencies, States, and their local partners have demonstrated they can deliver transportation and infrastructure projects and create urgently needed employment in the tight timeframes set forth in the Recovery Act. This Act has already resulted in almost 7,900 highway and transit projects breaking ground as well as hundreds of thousands of workers getting off the bench and back on the job all across the Nation.

However, we have only begun to stem the tide of unemployment caused by the worst recession since the Great Depression. More than 1.7 million construction workers are out of work and the unemployment rate in construction is 19.4 percent—the highest unemployment rate of any industrial sector. In addition, the private sector construction market has collapsed. At a recent hearing of the Committee on Transportation and Infrastructure, the president of an asphalt supply company testified that, although historically his company has received one-half of its work from the private sector and one-half of its work from the public sector, 98.5 percent of his current business is public sector work.

To make matters worse, State budget crises are severely limiting States' ability to move forward with their own infrastructure programs or find matching funds for Federal transportation programs.

Although the critical investments made by the Recovery Act have stemmed the tide of unemployment in the construction industry, they have not been sufficient to completely counteract the loss of private sector and State investments.

Congress must act now to pass the “Jobs for Main Street Act, 2010”, and build upon the successes of the Recovery Act.

The Jobs Act “doubles down” on the highway and transit investments of the Recovery Act and will immediately create and sustain jobs. The Jobs Act provides almost \$36 billion for highway and transit investment and much of it can be, and will be, put to use within 90 days for ready-to-go projects.

According to a December 2009 American Association of State Highway and Transportation Officials, AASHTO, survey of State Departments of Transportation, there are 7,497 ready-to-go highway and bridge projects, totaling \$47.3 billion. Furthermore, according to a December 2009 American Public Transportation Association, APTA, survey, there are thousands of ready-to-go transit projects, totaling \$15 billion.

In addition, Congress must also act now to extend the core Federal highway, highway safety, and transit programs. The long-term authorization for these programs, SAFETEA-LU, expired on September 30, 2009. Since then, these programs have been extended on a short-term basis at a funding level that is about \$12 billion below the fiscal year 2009 authorized level. H.R. 3326, the fiscal year 2010 Defense appropriations bill, will provide an additional short-term extension of these programs, to February 28, 2010, but still at the reduced funding level.

H.R. 2847 includes the Surface Transportation Extension Act (STEA) of 2009, which extends the highway, highway safety, and transit programs through September 30, 2010, at the levels assumed in the FY 2010 budget resolution. This one-year extension will provide greater certainty for States in their transportation planning, and increase funding to nearly the FY 2009 authorized level.

STEA also includes provisions that will stabilize the Highway Trust Fund. Specifically, STEA restores to the Highway Trust Fund interest payments foregone on the Trust Fund's previous cash balances. Since 1998, the Trust Fund has been the only major Federal trust fund that does not accrue interest. The restoration of interest for this period, 1998–2009, results in transferring \$14.7 billion to the Highway Account of the Highway Trust Fund, and \$4.8 billion to the Mass Transit Account of the Highway Trust Fund.

In addition, STEA allows the Highway Trust Fund to accrue interest on all balances going forward, which will increase Trust Fund receipts by an estimated \$500 million to \$1 billion annually, in the near-term.

Finally, under STEA, the General Fund, rather than the Highway Trust Fund, will support longstanding fuel tax exemptions, such as those provided to State and local governments. Full refund payments will continue to be made from the General Fund, but the Highway Trust Fund will no longer bear the cost of these refunds. The end user will see no change in their process for obtaining a refund. This provision will increase Trust Fund revenues by about \$1.7 billion annually, for a total of \$9.8 billion over six years.

I regret that the Other Body was unable to complete action on a multi-year surface transportation bill this year. I urge the Senate to focus on the needs of the millions of Americans who are without jobs or who are in danger of losing their jobs, Americans who are struggling to provide for their families, and desperately need the jobs that would be created not only by the bill before us today, but also by a long-term authorization of surface transportation programs.

I urge my colleagues to join me in supporting H.R. 2847, the “Jobs for Main Street Act, 2010”.

Mr. LEWIS of California. Madam Speaker, I yield 2 minutes to the gentleman from Georgia, JACK KINGSTON.

Mr. KINGSTON. I thank the gentleman for yielding.

Madam Speaker, I want to say, in January, the President rushed through a massive stimulus bill of \$787 billion, which was supposed to be targeted and timely for shovel-ready projects. We had to do this to keep unemployment from going to 8 percent. Well, now it's at 10 percent. Rather than going back into the stimulus program and doing major surgery, we are adding yet another spending bill from a different account.

To begin with, the stimulus bill only had about 27 percent in public work-type projects. Most of it went to plus-up pet political projects of Congress and to create 31 brand new Federal Government programs. Even then, 12 percent of the money is all that has left town. Most of it is still in Washington, D.C.

To give you some examples, there is a Smart Grid program of \$4.5 billion. None of the funds have been spent. There is a \$2.2 billion alternative fuel program. None of those funds have been spent. There is a \$4 billion energy innovative technology loan program. Only \$2 million has been spent. There is an \$8 billion high-speed rail project of which zero funds have been spent. There is \$1 billion for the COPS grants program, and no funds from it have left Washington, D.C.

Before we go spending additional money, wouldn't it make sense to try to figure out what the logjam is?

You can go to the Web site of the stimulus program, and you can see the jobs that were created in the 99th District of the Virgin Islands or in the 42nd District of Connecticut. The only problem is there are no such districts. They are fictitious numbers. You could go to Augusta, Georgia, and look at the housing projects where 317 jobs were created. Only it really wasn't for creating jobs. It was a bonus for existing employees. Again, from the administration's Web site, \$937 million was spent on 10,000 projects from which no jobs were created. The stimulus program is not working. We need to revamp it.

Another reason we don't have jobs under this administration is because of the cap-and-trade policy.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. LEWIS of California. I yield an additional 30 seconds to the gentleman from Georgia.

Mr. KINGSTON. The cap-and-trade proposal is a scheme based on some phony numbers, not all of the numbers. Incidentally, I don't recommend Al Gore's book to anybody, but if you have time for reading today, keep that one in mind. It's going to run jobs overseas. We need to take a look at it.

Particularly, it needs to be based on real numbers, not on phony numbers.

The health care policy is an 8 percent tax on small businesses with a myriad of new rules and regulations with the possibility of lawsuits. There is the banking bill, which is just going to crunch credit all over America. This is not the right thing to do at the last minute.

Mr. OBEY. Madam Speaker, I yield 3 minutes to the distinguished gentleman from California (Mr. GEORGE MILLER), chairman of the Education and Labor Committee.

Mr. GEORGE MILLER of California. I thank the gentleman for yielding, and I thank him for all of his work on this legislation.

Madam Speaker, today, Congress has the opportunity to continue the effort to rebuild the American economy. We have made significant progress since January when more than 600,000 people were losing their jobs. Last month, it was 11,000—a dramatic improvement. In fact, in November, a year ago, it was over 700,000 people who were losing their jobs. I don't know what the figure has to be before the Republicans decide they ought to help Americans keep their jobs, to find new jobs, and to get jobs so they can support their families.

The fact is, every day, as to the Recovery Act, which they want to continue to lampoon and the rest of it, more and more economists and more and more fiscal analysts of the markets in this country are telling us that the Recovery Act is the reason that we have moved from a negative GDP to a positive GDP. It is the reason we have saved or created more than 1.6 million jobs. Those aren't our words. Those are the words of the people who are in the private sector who are talking about this market.

What are they warning us about now?

It's not just the traditional jobs. It's a question of—and this comes again from private analysts—whether or not local governments which are somewhere between \$200 billion and \$300 billion underwater because of the economy, because of the recession and because of their loss of receipts and revenues can create a wave of unemployment that will swamp the good news that is taking place and the news that we hope will get better and that we think will get better. It can overwhelm the positive job numbers that we are starting to see, and it can create that kind of problem.

It also means that, once again, we can see—and what this legislation prevents—is that wave of layoffs in teachers, in firefighters, in police, and in first responders because we know that that's about keeping our communities healthy and safe. It's about making sure that our kids do not become the victims of this economy because of the layoffs, the shorter school days, the larger classes that are taking place,

and the shorter school years. The States are going to struggle with this.

We know from the private sector, if you look around at what has taken place in this recession, that the leaders in the private sector decided, in this kind of economy, this is when you want to invest in your future. That is what we are doing. We are investing in the future of our children and of our young people going to college. We are creating additional slots so they can get into community colleges, so that they can get job training, and so that they can have teachers and decent class sizes. That is what this legislation is about.

It's about trying to create job opportunities, and it's about holding onto job opportunities for American families. It's also to make sure that their children do not lose a year of educational opportunity and so that they do not slide back from the progress that we're seeing. All across this country, as the test scores are getting better and as proficiency is getting better among fourth graders and eighth graders, that is the progress that we have made. This recession could wreck it all, and we've seen it all across the country.

Rio Vista, Texas, laid off 15 percent of its teachers. Dearborn, Michigan, just approved 200 teacher layoffs. The LA Unified School District laid off 2,000 teachers and maybe another 1,500 teachers next year.

You can stop that from happening. You can stop that from happening by voting for this legislation.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. OBEY. I yield the gentleman an additional 1 minute.

Mr. GEORGE MILLER of California. This is about our future. This is about a jobs program that is paid for. This is about taking the money that was dedicated to working on Wall Street and making sure that it works for Main Street. This is your opportunity so that you can go home and say that you did everything you could to try to maintain the positive direction that the economy is starting to indicate, but we are not there yet.

Again, if you listen to the analysts, it can be overwhelmed by the loss of jobs and by the wave of unemployment that could take place at State and local governments, and our children's educational opportunities can be overwhelmed.

Mr. OBERSTAR laid out the infrastructure piece that is so important in terms of the investment, not only in jobs, but in terms of the investment in the future of this country in highways and transit. This is about human capital. This is about whether or not we can retain first responders, teachers and whether or not we can retain the growth, economic proficiency, and achievement that our children are getting in school today.

Let's not lose that because, through no fault of their own, the recession whacked their teachers, whacked their classrooms, whacked their school districts, and then all of a sudden, those opportunities were gone. We should not let that happen. We can vote against its happening today. We can vote for a jobs bill that works on Main Street.

□ 1700

Mr. LEWIS of California. Madam Speaker, I am very pleased to recognize the gentleman from New Jersey (Mr. FRELINGHUYSEN) for 2 minutes.

Mr. FRELINGHUYSEN. I thank the gentleman for yielding.

Madam Speaker, there is no question that the American people are hurting. Since the start of this recession in 2007, 6.9 million people have lost their jobs. A third of those without jobs have been unemployed for more than 6 months. That's a post-World War II high.

Clearly Congress needs to find a way to spur private sector job creation, a bipartisan way, not one rammed through without public hearings. Madam Speaker, a famous son of New Jersey once said, and that's Yogi Berra, "It's déjà vu all over again."

Congress and the President enacted in February a trillion-dollar stimulus package with the promise that its shovel-ready spending would keep unemployment from exceeding 8 percent. While the Nation's official unemployment is 10 percent, the real unemployment and underemployment now exceed 17 percent.

Yet the majority is suggesting that we double down on spending borrowed dollars in many of the same areas touched by the first stimulus. For example, only 7 percent of the \$2 billion in the stimulus bill for the Army Corps of Engineers civil construction has been spent. Yet this bill adds another \$750 million.

Only 8 percent of the \$1 billion in the stimulus for Bureau of Reclamation water projects has been spent. This legislation includes another \$100 million.

The stimulus contained \$4 billion for Energy Innovation Loans. Just 10 percent has been spent since February. So let's make sure to approve another \$1 billion.

Of the \$36 billion the Department of Energy has been given, about \$955 million has been spent and only \$17.5 billion has been obligated.

If this isn't bad enough, where is the funding coming from? It's coming from the TARP program, Troubled Asset Relief Program. That money, when it is paid back, is supposed to go to reduce the deficit. Here we are spending.

I rise to oppose this bill. This bill needs to be opposed.

Mr. OBEY. I yield 1 minute to the distinguished gentleman from Georgia (Mr. SCOTT).

Mr. SCOTT of Georgia. Thank you very much, Mr. Chairman. I appreciate

you giving me a minute to speak on this.

This is the single most important issue facing the American people, jobs. You talk about troubled assets, what greater troubled assets do we have than jobs and homes? These are the troubled assets that the American people want us to respond to.

Throughout the length and breadth of this country, small towns, country towns, from Michigan, Ohio, throughout wherever it is, people are concerned about jobs. The misery index is high, the depression index is high. Do you know what a job means?

Here we have got \$75 billion. What better place to put it than in small businesses, into the heart and the soul of the American economy, at the middle and at the bottom where people will spend it.

Ladies and gentlemen of this Congress, this is Christmastime. Next week is Christmas. What better Christmas gift can we give the American people than this jobs bill that will put our people back to work, that will build our homes, that will help our families, that will give them hope where they need it. They deserve this Christmas present this day.

Mr. LEWIS of California. Madam Speaker, it is my honor to recognize the ranking member of the Subcommittee on Labor, Health and Human Services, Education, and Related Agencies, the gentleman from Kansas, for 3 minutes, Mr. TIAHRT.

Mr. TIAHRT. I thank the gentleman from California.

Madam Speaker, 10 months ago we stood here and told you the stimulus bill would not help the economy recover. We told you it would not work because the \$787 billion plus interest would only grow the size of government. You can't grow the economy from the government down. You have to grow it from the ground up.

By any standard, we were right. Now we have news accounts of how the money was spent, mostly on government workers writing more government regulations. Then there was the news about the pay raises for Head Start teachers and the buyouts for university professors and unemployment is double digits. It's 10 percent.

Today on the floor we have the "son of the stimulus" bill. It's another \$154 billion of failed economic policies that will only prolong the economic pain.

This bill includes another \$750 million for green jobs on top of the previous bill's \$750 million. So far, no green jobs have been created.

The "son of the stimulus" adds \$23 billion to State and local governments on top of the \$53 billion in the stimulus bill.

You can't isolate State and local governments from the recession. If you do, they will do nothing to help with the recovery. History tells us what works.

When we have the opportunity in America, new ideas come into the marketplace and the economy will grow. When the economy grows, the Federal revenue grows without raising taxes.

Here is how you create opportunity: stop spending, stop borrowing. You can't grow the economy from the government down. Freeze regulations, audit every one of them and only keep the ones where the benefit exceeds the cost.

Keep taxes low. When you do, people save. They invest; they spend. All of that's good for the economy. Lower health care costs, not by taking over with the government, but by addressing tort reform and by incorporating free market principles and then become energy independent. That alone would solve your unemployment problem.

Now, it's true that providing the opportunity for the economy to grow does not pay back the government unions for all they have done for you in the last election. Government unions should be pleased with this bill, but the American taxpayers should not. They should be angry.

For those that are unemployed workers, well, we are sorry, because this bill will not do anything for the unemployment rate. It's a failed economic policy that only pays back those who invested in the last election for the majority party.

Madam Speaker, I would ask my colleagues to vote "no" on this legislation and, instead, do something that will help the economy recover by providing opportunity for the unemployed workers.

Mr. OBEY. Madam Speaker, I yield myself 2 minutes.

Madam Speaker, when President Bush left office, we were losing over 700,000 jobs a month. We passed the economic recovery package, and we have gotten that down to about 11,000 jobs a month. That's not enough, but it's terrific progress.

I am somewhat bemused, however, by all of the comments by our friends on the minority side of the aisle denouncing the recovery package and saying that it didn't work. Not a single one of them voted for it on this House floor.

But if you check newspaper accounts around the country, you will see, for instance, that the minority leader, in a June 15 press statement, said that he was pleased that Federal officials stepped in and ordered Ohio to use all of its construction dollars for shovel-ready projects that will create much-needed jobs.

The minority whip vowed to shed partisan politics to help the economy. He met with transportation officials about how his home State of Virginia could apply for stimulus grants to build a rail line.

The minority chief deputy whip, in his own press release, outright praised

the courthouse in his district receiving funds from the recovery package to build a new courthouse. He said, "I applaud this funding for the Bakersfield Federal courthouse."

My Republican colleague from New Jersey (Mr. LANCE) announced by a press release that his district received \$13 million from the Recovery Act for local flood control projects. "This is outstanding news," he said. He even sent a letter to President Obama asking for speedy release of those recovery funds.

Another of our colleagues from Michigan on that side of the aisle issued a press release saying he was pleased to announce that his international airport would receive \$12.7 million from funds received by the Recovery Act.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. OBEY. I yield myself 1 additional minute.

Another of our colleagues on the minority side from Illinois said, "There is no question these grants will be of assistance in creating jobs."

I can go on and on and on citing Member after Member who denounced the bill on the House floor and then went home to their districts and issued grandiose press releases expressing their support for the results of the recovery package.

I have a little difficulty following that ping pong ball when it's bouncing on both sides of the table. I have a little difficulty following the folks on that side of the aisle when they decide to fall off both sides of the same horse. I wish you would make up your mind: which do we believe, your statements that you make at home or the statements and the votes you cast on this House floor?

Mr. LEWIS of California. I yield 2 minutes to the gentlewoman from Missouri, who is the ranking member on the Financial Services and General Government Subcommittee, Mrs. EMERSON.

Mrs. EMERSON. Madam Speaker, I want to say a couple of things first. Number one, I don't know if the American people realize that since 2007 this Congress has increased spending on nondefense, nonveterans discretionary spending and, including the stimulus in that, by 85 percent, 85 percent. In so doing, we still have 30 percent unemployment in the construction trades in the State of Missouri, and there is no excuse for that. This bill does very little to help that, very, very little.

As a matter of fact, some of the stimulus money that went to create new jobs in my congressional district—actually, our job training people were told that anybody who is in job training counted as a new job. Now that's disingenuous at best, and it's not fair to a person who is being counted as having a job and one is not there waiting for them when they graduate.

I really want to talk today about my concerns about the use of TARP funds to offset additional government spending. You know, when we debated this legislation, we were told the funds were going to be repaid and that in the long term the Federal Government could make money on the TARP program.

However, today we are debating whether to use TARP funds, which the administration really had no plans to spend, as an offset for yet more government spending. This is a gimmick extraordinaire.

We just debated a bill to increase the debt limit to \$12.4 trillion. Using this budget gimmick as an offset for \$75 billion in new spending is not going to reduce the debt one bit. Every economist in America says if we don't reduce the debt in this country, then our economy will go away.

It is going to ensure, this bill does, that our government debt is going to continue to grow, increasing our dependence on China, on other foreign investors and increasing the financial burden on our children and grandchildren.

Mr. OBEY. Could I inquire how much time is left on both sides.

The SPEAKER pro tempore. The gentleman from Wisconsin has 17½ minutes remaining, and the gentleman from California has 14 minutes remaining.

Mr. OBEY. I yield 3 minutes to the distinguished chairman of the Ways and Means Committee (Mr. RANGEL).

Mr. RANGEL. Chairman OBEY, let me thank you for not just saying what are we going to do about the jobs, but bringing this all together and doing something about it. One of our great Presidents, Jack Kennedy, once said that sometimes your party just asks too much of you.

I know that's what my Republican friends must feel today, because there is no question in my mind that they have just as much compassion in their heart for those jobless people as we do. They know, as we do, that those who have lost their homes, lost their dignity, lost their job, didn't do it by being Democrats or being Republicans.

I recognize that when you go in a room and make a decision to say "no," you are kind of stuck with it, so we are not naive enough to believe that I can change your mind about what you already decided, but I do hope that when you go back to your home districts, and you recognize what is happening to people who are jobless, many of whom are hopeless, many have lost their skills and many who hope soon it will not continue, have lost what it's like to believe that in this great country there is no limit to how far that you could go.

□ 1715

So maybe next year would be different. Maybe the guys in the street

will be following you around, as we find people grabbing Members of the Congress, saying, Hey, my dad needs a job, Congressman, Congresswoman, can you help?

We're trying to help. It was a big crisis and a lot of blame to go around. But collectively someone thought that TARP would work. Well, it had some successes. One thing is certain: We're not going back there. This time it's not the banks. It's not Wall Street in my area. It's now going to be Main Street, so that once again you have an opportunity to explain what are you doing in the Congress.

Well, I know it didn't go over big to say that you were bailing out banks. It certainly didn't go over in my district. How about we're trying to bail out our people. We're trying to restore the hope and confidence they had. We're trying to keep kids in school. We're trying to put food on their table. Sure, we talk about food stamps and food pantry, but we're trying to restore that dignity that make Americans so much different from other people.

In the Ways and Means Committee, where we have jurisdiction over COBRA, this is another step to have dignity. You lose your job, you lose your health care. What a terrible thing to be looking for work and you're sick and you can't even go to the doctor. Worse still, if there are sick people in your family and you don't have the insurance. Well, the Federal Government comes in not with handouts but saying can we give you a hand with your responsibility to provide health care? And that's what we've done on our committee.

We've taken unemployment benefits. You know, you can get enough checks for the length of time—

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. OBEY. I yield the gentleman an additional 1 minute.

Mr. RANGEL. Thank you, Mr. Chairman.

In any event, we got aid out there for school construction. It's not just to make certain that we have a place for our kids to learn to become the leaders of tomorrow but also that people can get bricks and mortar and rebuild those schools and renovate those schools, and that's what we're doing.

We've been able to make certain that at least the Ways and Means Committee can join in with the other committees, under the leadership of our great Speaker and DAVE OBEY, to be able to say this is not all that we want to do; this is all that we can do.

Maybe over the holidays you might be able to get back to your leadership and say, We've been faithful. But we've found out that many in our districts have lost jobs, lost their home, lost their health insurance, and really lost hope. Just saying "no" is not going to work.

Mr. LEWIS of California. Madam Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. CAMP), ranking member of the Ways and Means Committee.

Mr. CAMP. I thank the gentleman for yielding.

Albert Einstein once said, "The definition of insanity is doing the same thing over and over again and expecting different results."

Yet even though their stimulus bill hasn't created a single job and has resulted in 10 percent unemployment, House Democrats have brought to the floor today a stimulus II bill that explicitly amends, continues, or expands numerous provisions of their failed stimulus I bill.

And here's a graphic depiction of this insanity.

How does spending more on the Bureau of Reclamation create jobs now when it didn't before? How does transit capital assistance create jobs now when it didn't before? And how do more loan guarantees create jobs now when they didn't before?

This is a "son of stimulus" bill. Let's stop the insanity. Vote "no."

Mr. OBEY. Madam Speaker, I yield 3 minutes to the gentleman from Massachusetts (Mr. FRANK), the chairman of the banking committee.

Mr. FRANK of Massachusetts. Madam Speaker, the assertion that the economic recovery bill, the stimulus bill, has created no jobs is, I must say, one of the least intellectually supportable statements I have heard on this House floor, and I've been here a long time. There's an argument about how much and how little, but no competent economist denies that it helped create jobs.

Here's where we are: The fact is that the Obama recovery from the Bush recession has been going more slowly than many of us would like, but it is undeniable by every statistic it is going forward.

Now, if you listen to my Republican colleagues, you learn that the third worst day in American history was January 21, 2009. The worst day, of course, was Pearl Harbor, and then we had the terrible mass murders of 2001. But to pick a day when there were no mass deaths, what was the worst day? January 21, 2009, because according to this debate, guess what happened on January 21, 2009? The Federal budget, which was apparently in surplus, all of a sudden punched into deficit. Unemployment suddenly appeared. The war in Afghanistan, by the way, was going wonderfully until January 21, 2009. There were no bailouts until January 21, 2009. Some of you may have thought they happened in September of last year, but, no, apparently it all started on January 21, 2009.

And not only that—and I have to say I'm quoting my partner, Jim, here—it was one of the worst outbreaks of dis-

ease in American history. Mass amnesia seized the Republican Party on January 21, 2009. They forgot that the Bush recession started under President Bush in 2007, after they had controlled both the House and the Senate and the Presidency for the longest time. They forgot that the deficit had mushroomed under them. They forgot that trying to pay for two wars with five tax cuts was kind of a bad idea, and at least you shouldn't be surprised it resulted in a deficit.

So what we are now doing is trying to undo that. And adults understand that you cannot go from a terrible decline to rapid increase without passing through a transitional period. We are passing through it by every economic statistic.

Now, I agree the situation was worse than we thought, and it is getting better more slowly than we had hoped, but it is clearly getting better. And, again, if you listen to my Republican colleagues, the world began on January 21, 2009. I know some of them thought it started 4,000 years ago, and they didn't believe in evolution. I didn't think they thought it all started when Barack Obama became President.

We do try here to help. I was astounded to hear the gentleman from Michigan say it hasn't created one job. Madam Speaker, tell that to the cops and firefighters in my district who were rehired because of this. Tell that to the people now working to clean up a Superfund site in my district which was funded by this bill. This denial of reality to evade responsibility for the dilemma we are in is breathtaking.

So I want to congratulate the gentleman from Wisconsin, who has been the most consistent advocate of social fairness and economic effectiveness that we've had, for a wonderful bill.

Mr. LEWIS of California. Madam Speaker, it's my privilege to yield 2 minutes to the gentleman from Texas (Mr. HENSARLING), Chairman FRANK's great friend from the committee.

Mr. HENSARLING. I thank the gentleman for yielding.

You know, repeating failure over and over might be amusing if it wasn't for the fact that so many of our countrymen are suffering.

I heard the distinguished chairman of the Financial Services Committee share with us his history lesson, but also I might add if we look at press reports, clearly Democrats have had trouble counting jobs in America.

What we do know is that the Department of Labor says that we still have double-digit unemployment under this President and this Democratic Congress. What we know is that the Department of Labor says that since the first stimulus bill was passed, to add an extra trillion dollars of spending and debt for future generations to pick up, that 3.6 million of our fellow countrymen have lost their jobs.

The history lesson that I hope my friends on the other side of the aisle would learn is that you cannot spend your way into more jobs. You cannot borrow your way into more jobs. And you cannot bail out your way into more jobs. And, Madam Speaker, the legislation they bring before us does exactly that. It's more of the same. It is "son of stimulus."

Spend another \$150 billion of taxpayer money. How many more jobs have to be lost? It wasn't an hour ago that this body just voted for \$290 billion more of debt ceiling, borrowing the money from the Chinese, sending the bill to our children and grandchildren. How many more jobs have to be lost? Bailout funds, bailout funds for the States, bailout funds for the municipalities. How many more bailouts, how many more jobs have to be lost?

In this economy, small business, they want to create the jobs, but take away your trillion-dollar takeover of health care, take away your \$600 billion national energy tax, take away your perpetual Wall Street bailout bill, and jobs will come back to America.

Those are the policies that we need, Madam Speaker.

Mr. OBEY. Madam Speaker, I yield 2 minutes to the distinguished gentleman from Connecticut (Ms. DELAURO).

Ms. DELAURO. Madam Speaker, I rise in support of this jobs bill.

We have seen 23 straight months of job losses. What does this mean? It means that families are under a huge stress. It means there are hungry children in the United States of America. It means a lost generation of American workers.

We owe a response to those families contending with joblessness and the financial havoc it wreaks on their lives. It is not only the moral thing to do; it is our obligation as legislators and as citizens.

I urge my colleagues to support this bill. It redirects \$75 billion of TARP funds, money that was spent on Wall Street, and it moves it toward key infrastructure investments, which will provide jobs now. It provides a foundation for long-term prosperity. It helps to stabilize our public sector workforce. It supports teachers, police officers, firefighters, and other public servants. And as important, it cuts taxes for 16 million struggling families by making the child tax credit available to working families with children.

They lost their jobs. They lost their health benefits. Their work hours were cut short. And, yes, their child tax credit was decreased. Refundable tax credits are the most fiscally stimulative policies that we can put into place. Don't listen to me. Listen to economists. And it puts money into the hands of families who are living today paycheck to paycheck, and their spending in turn leads to a strong boost in

job creation. Let's put that TARP money to work where it always belonged, in the hands of the American people.

I urge my colleagues to support this bill. We need to get America back to work.

Mr. LEWIS of California. Madam Speaker, it's my privilege to yield 2 minutes to the gentleman from Virginia (Mr. CANTOR), the Republican whip.

Mr. CANTOR. I thank the gentleman from California.

Madam Speaker, Winston Churchill once said that, "All men make mistakes, but only wise men learn from their mistakes."

Today it is apparent that Congress has not learned anything. The bill on the floor today is just another round of spending that doubles down the failure of last February's so-called stimulus plan while ballooning the deficit.

The first stimulus plan and bill failed to hold down unemployment, but it successfully increased our reliance on borrowed money. Worse, a lot of the money designated for infrastructure, those shovel-ready projects we all heard about, hasn't even gotten out of Washington yet. Why is it still here if it was designed to create jobs?

Sadly, pouring billions into the very same programs will meet a similar dismal fate. Just as bad, this legislation continues to fall hopelessly short of providing real relief to small businesses so they can resume hiring, investing, and expanding.

Now is not the time to spend an additional \$150 billion we don't have. It's time to come together to ease the burden on small businesses and to start giving them a sense of certainty so they can go about the business of creating jobs and prosperity.

Madam Speaker, I urge a "no" vote on this so-called "jobs" bill.

□ 1730

Mr. OBEY. I yield 1 minute to the distinguished gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Only the lack of clarity and poor eyesight can call this the so-called jobs bill, because if we've looked over the last year, the American Recovery and Reinvestment Act helped save 3.5 million jobs. They named Chairman Bernanke as the person of the year, but his twin was the work that was done on this floor by the Democratic leadership to invest in America. My district has a 9 percent unemployment. In Saturday's Washington Post, three parents were seen with lights out and children who are hungry. Oh, yes, this sounds like spend, spend, spend, but I tell you, if we can invest a billion dollars in infrastructure, we create 27,800 jobs, and I'm proud to invest 35 billion of those dollars in fixing the highways and the roads of America.

I am glad 150,000 Americans will now be able to get training in high professional jobs, and I am glad that we are working on a metro system that will create jobs in our district.

Vote for this bill. It's jobs, jobs, jobs. Get good glasses and you'll see that.

Mr. LEWIS of California. Madam Speaker, by way of inquiry of my chairman, aside, Mr. Chairman, from the unprecedented and secretive process by which this bill was put together and is being brought to the floor, the rule before us contained a most unusual provision to allow the chairman to submit a report explaining the legislation. It would be very helpful to all Members before we vote on over \$154 billion in spending to actually have the benefit of the chairman's explanation.

I, for one, have not only not seen this report, I didn't even know he was writing one. Therefore, I would ask the chairman, is there a copy of this report, and will you make it available now so that Members will have a chance to see it before we vote on this bill?

Mr. OBEY. Well, I find it very interesting that the gentleman has not raised this point with respect to the Defense appropriations bill. But let me simply say that the explanatory statement for this bill is very short. It is on our Web site. It was posted there this morning.

Mr. LEWIS of California. The chairman certainly might have given us the courtesy of communicating that that was his intention ahead of time. And it's very clearly stated within the report that the Members would have it available to them. Obviously, the chairman has chosen to ignore that side of the responsibility.

With that, I reserve the balance of my time.

Mr. OBEY. Might I inquire how much time is remaining on both sides?

The SPEAKER pro tempore. The gentleman from Wisconsin controls 7½ minutes, and the gentleman from California controls 8 minutes.

Mr. OBEY. I yield 1 minute to the distinguished gentleman from Pennsylvania (Mr. FATTAH).

Mr. FATTAH. Madam Speaker, I rise in support of this legislation. The Republican minority has been fairly consistent. When we focused on health care, they said, well, 85 percent of the people in the country have health care, so let's not turn things upside down, let's not sacrifice too much to try to deal with the tens of millions who don't have it; 85 percent have it.

On the jobs front, 90 percent of the people in the country have jobs. So I can see their lack of empathy for the 10 percent who don't, and they don't see a need for us to act. But as we come to this holiday season, as we look and see many of our citizens who not only have not a job at this moment, mainly because of policies enacted, this unwar-

ranted war in Iraq and fiscal policies that have had us a double-digit national debt in the trillions before Barack Obama was sworn into office, but they don't really see a need for us to do a great deal of effort here to try to put Americans back to work.

I want to thank the chairman for authoring this legislation which is bifurcated, both focused on jobs and also in helping people in a difficult moment. That's what I think America ought to be about. I rise in support of this legislation.

Mr. OBEY. Could I inquire of the gentleman how many speakers he has remaining?

Mr. LEWIS of California. We have no speakers remaining. I might make a few remarks after I hear what the chairman has to say.

Mr. OBEY. Well, I am the last speaker, and since I have the right to close, I would suggest you use your time and then we'll use ours.

Mr. LEWIS of California. Can you give me an idea how much of your time you intend to take?

Mr. OBEY. The remainder of the time.

Mr. LEWIS of California. Ten minutes?

Mr. OBEY. No, we don't have 10 minutes.

The SPEAKER pro tempore. The gentleman from Wisconsin controls 6½ remaining minutes, and the gentleman from California 8 minutes.

Mr. LEWIS of California. I think it would be very important for the Members to know, Madam Speaker, that up to this point, only about 15 percent of the first piece of this package has been spent, so Stimulus I is a long ways away from being spent. And I think we all know that the agencies are awash in money coming through the pipeline, and they wonder where it's going to go from here. It's significant to know that as we spend the people's money in this process, with very, very little information available to our Members, the majority is choosing to push another \$150 billion down that pipeline, regardless of what has been spent already.

It seems to me that one of the lessons to be learned here is that the American people are much smarter than we give them credit for. They know that just throwing money at every perceived problem out there is no way to solve such a problem. In the meantime, I will listen with interest to my chairman's closing remarks.

I yield back the balance of my time.

Mr. OBEY. Madam Speaker, we have heard three times at least now our friends on the minority side indicate that only 12 percent of the original stimulus funding has, quote, left the Treasury. That's a very slippery way to put it, because the fact is that what "left the Treasury" means is that after funds are obligated to those who will actually spend it, and after the bills

have been paid by those recipients, then the money has, indeed, left the Treasury. The real term to focus on is what has been obligated. And the fact is that for the programs in this bill, 70 percent of the funds previously appropriated to those programs have already been obligated. So much for that argument.

Example: The minority press release states, "No funds out of the \$1 billion provided for COPS has left the Treasury." The fact is, all of that funding has been awarded.

The minority press release states, "Only \$235 million out of the \$6.4 billion for EPA wastewater grants has left the Treasury." The fact is, 99 percent of that funding has already been provided to the States. So much for that straw man.

Let me, Madam Speaker, simply make this observation: we have before us a bill that determines to redirect \$75 billion, which had initially been directed to help Wall Street, and we want to, instead, redirect that money to help Main Street. So we provide \$27 billion, for instance, for highway infrastructure projects to put people back in construction. You're either for it or you're against it.

We have provided enough funding in this legislation to assist more than 670 communities address their growing backlog of water and sewer repairs and put people to work in the process. You're either for it or against it.

We've provided \$27 billion from Wall Street to Main Street to try to stabilize public service jobs. We're trying to preserve 250,000 teaching jobs over the next 2 years, for instance. You're either for doing that or you're against it.

We're trying to use \$500 million to preserve the jobs of thousands of firefighters all across the country. You are either going to help or you're not.

We are trying to provide 250,000 disadvantaged youth with summer employment opportunities. You're either going to help them or you're not.

We're trying to provide 250,000 students with additional college work study funds so they can stay in school. You're either going to help those students or you're not.

We're trying to provide funding for approximately 150,000 individuals in high-growth and emerging industry sectors where we know there are job growth possibilities. You're either going to help support that or not.

We are trying to provide unemployment insurance for 6 months rather than the 2-month extension that was in the previous bill today. You're either going to help those people or not.

We are trying to provide \$23 billion to extend the higher Federal match for payments to doctors, or we're not.

So, basically, it's about time to decide where you're coming from. An article in the New York Times today de-

scribed what happens when you lose your job. It pointed out that more than half of the Nation's unemployed workers have had to borrow money from friends or relatives since losing their jobs. They've had to cut back on doctor visits. That same article indicates that a quarter of those polled had said they'd lost their home or been threatened with foreclosure. They also noted that half of the adults surveyed admitted to feeling embarrassed or ashamed as a result of being out of work. And nearly half of the respondents said they no longer had health insurance. The question is, are you going to help those people or not?

We can argue what our economic philosophy is until the cows come home, as they say in my area, but it seems to me that the question simply is, We've got a problem; what are you going to do about it?

JOBS FOR MAIN STREET ACT, 2010

EXPLANATORY STATEMENT

THE JOBS CRISIS

A jobs bill is urgently needed because of the worst job situation since the Great Depression of the 1930s. The vast majority of fair-minded economists have concluded that the Recovery Act has had a positive effect on the job situation and they also agree that sizeable and targeted deficit spending makes sense at this time of unusually high unemployment, low inflation, and low interest rates, but not after the economy recovers.

The current recession has been especially severe in the labor market:

The unemployment rate has reached 10 percent. Almost every age and education group is experiencing higher unemployment than at any time since the 1930s.

This dismal unemployment situation is not expected to improve any time soon. The Blue Chip consensus of economic forecasters expects the unemployment rate to get worse early next year and still be 9.9 percent at the end of 2010.

The number of people unemployed has more than doubled in the last two years, from 7.2 million to 15.4 million, an increase of 8.2 million. 10.6 million more people would have a job today if employment growth had simply kept up with population growth over the last two years.

The crisis in the job-market goes beyond the increase in unemployment. The number of people working part time but seeking full-time work has doubled in two years, from 4.5 million to 9.2 million. The number of people who want a job but are too discouraged to look for work has risen by 1.4 million or 30 percent in two years.

The total number of people who are either unemployed or working part-time for economic reasons or have dropped out of the labor force but want a job has risen by 14.2 million in just two years.

Other indicators make the case for a jobs bill:

For the first time since the 1930s, manufacturing is using less than two-thirds of its capacity. So much unused capacity means that production can be very responsive to new demand without increases in prices.

With its Federal funds rate at virtually zero, the Federal Reserve's capacity to stimulate the economy is limited.

The rates on Federal government borrowing remain unusually low.

The evidence is overwhelming that the Recovery Act has made the job situation sub-

stantially better than it would have been without the Recovery Act:

The Congressional Budget Office recently estimated that, as of September, the Recovery Act had already raised employment by 600,000 to 1.6 million. All major private forecasters have made similar estimates.

The rate of job loss has declined from 700,000 a month for the three months before the Recovery Act to just 11,000 job losses last month.

A recent Wall Street Journal survey of economic forecasters found that a clear majority supported additional jobs measures, a position that they would not have taken unless they believed the first round had worked.

Continued high unemployment takes a toll on those unemployed and their families who experience the frustration of not finding work. Local communities also suffer a loss of tax base which forces cutbacks on education and other services vital to everyone in the community.

It makes sense for the Federal government to invest more in expanding training opportunities at times of high unemployment. State and local governments face pressures to cut back on all spending, including education. On the other hand, the lack of work opportunities gives many people more time to devote to education and upgrading job skills.

Faster reduction of unemployment is in the long-term interest of the Nation's economy. When people have jobs, they have money to spend that has a multiplier effect on the economy generally. In addition, prolonged unemployment causes workers' skills to erode which reduces the Nation's productive capacity.

TITLE I—INFRASTRUCTURE AND JOBS INVESTMENT

CHAPTER 1—DEPARTMENT OF JUSTICE

COMMUNITY ORIENTED POLICING SERVICES

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$1,179,000,000 for Community Oriented Policing Services grants for the hiring and rehiring of an estimated 5,500 law enforcement officers.

CHAPTER 2—ENERGY AND WATER DEVELOPMENT

CORPS OF ENGINEERS—CIVIL WORKS

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

CONSTRUCTION

(INCLUDING TRANSFERS OF FUNDS)

The bill provides an additional \$715,000,000 for Construction to support an estimated 7,800 jobs. This funding will support the construction of water resource projects in areas where they can quickly create jobs. Unemployment in the construction industry in November was 19.4 percent, up from just 6.2 percent two years ago. The projects will also provide long-term economic benefits through lasting infrastructure improvements. The Corps is directed to consider the following criteria when allocating funds: programs, projects or activities that can be commenced quickly; programs, projects or activities that will create high and immediate employment; programs, projects or activities that will be executed by contract or direct hire of temporary labor; and programs, projects or activities that are located in a state with high unemployment.

DEPARTMENT OF THE INTERIOR

BUREAU OF RECLAMATION

WATER AND RELATED RESOURCES

(INCLUDING TRANSFERS OF FUNDS)

The bill provides an additional \$100,000,000 to support an estimated 1,000 jobs for the

programs of the Bureau of Reclamation. This funding will support the construction of water supply projects in areas where they can quickly create jobs in the construction industry. Unemployment in that sector was 19.4 percent in November, up from just 6.2 percent two years ago. The Bureau is directed to consider the following criteria when allocating funds: programs, projects or activities that can be commenced quickly; programs, projects or activities that will create high and immediate employment; programs, projects or activities that will be executed by contract or direct hire of temporary labor; and programs, projects or activities that are located in a state with high unemployment. Additionally, funds are provided to respond to drought in western and southwestern United States by expediting projects and activities that supplement existing water supplies such as through the title XVI program, meeting fish and wildlife needs, adding flexibility to water delivery systems, or addressing other factors to reduce conflict over limited water supplies.

DEPARTMENT OF ENERGY ENERGY PROGRAMS

TITLE 17 INNOVATIVE TECHNOLOGY LOAN GUARANTEE PROGRAM

The bill provides an additional \$2,000,000,000 for the cost of guaranteed loans authorized by section 1705 of the Energy Policy Act of 2005. This funding should support an estimated 22,000 jobs in the renewable energy sector, providing a boost to the construction industry as well as contribute to the Nation's goals for energy independence. Most renewable energy funds are spent on materials and workmanship to build and maintain the facilities, rather than on costly energy imports. Further, as we build manufacturing capability in the United States, renewable energy technologies developed and built here can be sold overseas, providing a boost to the U.S. trade deficit.

INCENTIVES FOR INNOVATIVE TECHNOLOGIES LOAN GUARANTEE PROGRAMS

Section 1201 includes a provision modifying the Energy Policy Act of 2005 authorization for the Department of Energy's Innovative Loan Guarantee Program.

CHAPTER 3—HOMELAND SECURITY FEDERAL EMERGENCY MANAGEMENT AGENCY

FIREFIGHTER ASSISTANCE GRANTS

This bill provides \$500,000,000 to retain, re-hire, and hire an estimated 2,500 firefighters across the United States and directs the Department of Homeland Security to make these awards within 120 days. The Secretary may transfer any unused funds to firefighter assistance equipment grants subject to notification.

CHAPTER 4—INTERIOR AND THE ENVIRONMENT

DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES

The bill provides \$20,000,000 as an additional amount for "Management of Lands and Resources" to support an estimated 1,000 term jobs. These funds should be used to increase term employment for activities on all Bureau of Land Management lands including maintenance, resource management, invasive species management, and inventory and monitoring.

UNITED STATES FISH AND WILDLIFE SERVICE

RESOURCE MANAGEMENT

The bill provides \$30,000,000 as an additional amount for "Resource Management" to support an estimated 1,500 term jobs. These funds should be used to increase term employment for activities funded under this heading, including activities on all national wildlife refuges and national fish hatcheries such as maintenance, invasive species management, inventory and monitoring, and for high priority habitat restoration projects.

NATIONAL PARK SERVICE

OPERATION OF THE NATIONAL PARK SYSTEM

The bill provides \$50,000,000 as an additional amount for "Operation of the National Park System" to support an estimated 2,700 term jobs. These funds should be used to increase term employment for activities on all national park units such as maintenance, interpretive, and resource management activities including invasive species management, inventory and monitoring, restoration of historical resources, and work with the National Register of Historic Places.

DEPARTMENT-WIDE PROGRAMS

WILDLAND FIRE MANAGEMENT

The bill provides \$20,000,000 as an additional amount for "Wildland Fire Management" to support an estimated 1,000 term jobs. These funds should be used to increase term employment for activities on all Interior Department lands, particularly for hazardous fuels reduction and related activities including necessary inventory and monitoring.

ENVIRONMENTAL PROTECTION AGENCY

STATE AND TRIBAL ASSISTANCE GRANTS

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$2,000,000,000 for water and wastewater infrastructure improvements, of which \$1,000,000,000 is for the Clean Water State Revolving Fund and \$1,000,000,000 is for the Safe Drinking Water State Revolving Fund. This funding will support approximately 44,000 jobs and will assist more than 670 communities and cities construct vitally needed projects to address the ever growing backlog of sewer and water repairs and rehabilitation. The bill provides that half of the funds include additional subsidies such as principal forgiveness and grants, making it easier for more communities to have access to this program.

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

STATE AND PRIVATE FORESTRY

The bill provides \$75,000,000 as an additional amount for "State and Private Forestry" to support an estimated 3,800 term jobs. These funds are for financial assistance to States and other authorized cooperators, to increase term employment for activities, including reducing wildfire hazards, forest health management, restoring and rehabilitating forests damaged by pests or invasive species, enhancing urban and community ecosystems, and providing cooperation and technical assistance. The Forest Service should not require cost share for the use of these urgently needed funds.

NATIONAL FOREST SYSTEM

The bill provides \$40,000,000 as an additional amount for "National Forest System" to support an estimated 2,000 term jobs. These funds should be used to increase term employment, including management, protection, improvement and utilization activities

on the National Forest System, and including maintenance, resource management, visitor services enhancement, forest health, habitat and watershed enhancement, invasive species management, and necessary inventory and monitoring.

WILDLAND FIRE MANAGEMENT

The bill provides \$35,000,000 as an additional amount for "Wildland Fire Management" to support an estimated 1,800 term jobs. These funds should be used to increase term employment for Forest Service authorized activities, including hazardous fuels reduction and related activities, such as necessary inventory and monitoring.

GENERAL PROVISIONS—THIS CHAPTER

Section 1401 allows funds for management and oversight provided to the Environmental Protection Agency in this Act to be available until September 30, 2012, and the funds may be transferred to the "Environmental Programs and Management" account as needed.

Section 1402 requires the Secretaries of the Interior and Agriculture to utilize, to the maximum extent practicable, the Public Lands Corps, Youth Conservation Corps, Student Conservation Association, Job Corps, Corps Network members and other related partnerships with Federal, State, local, tribal or non-profit groups that serve young adults, underserved and minority populations, veterans and special needs individuals.

CHAPTER 5—LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES

DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

TRAINING AND EMPLOYMENT SERVICES

The bill includes \$500,000,000 for a summer employment program for youths. According to the Bureau of Labor Statistics (BLS), the unemployment rate for teenagers (age 16-19) reached 26.7 percent in November 2009—the highest level recorded since BLS began collecting data. These funds will support summer youth employment for approximately 250,000 disadvantaged youths.

HIGH GROWTH JOBS

The bill includes \$750,000,000 for competitive grants to support job training for approximately 150,000 individuals in high growth and emerging industry sectors, particularly in the health care and green industries that are adding jobs despite difficult economic conditions. Grants for job training in green industries will focus on programs that train workers living in areas of high poverty.

DEPARTMENT OF EDUCATION

EDUCATION JOBS FUND

The bill includes \$23,000,000,000 for an Education Jobs Fund to help States cope with the most dramatic decline in State tax receipts on record—due to the worst recession in 30 years. These funds will help States to save or create an estimated 250,000 jobs over the next two years. Of the total appropriation, 95 percent of the funds will be allocated by States to school districts and public institutions of higher education to retain or create jobs providing early childhood education, elementary, secondary, or postsecondary education services or for modernization, renovation, and repair of facilities. The remaining 5 percent of funds is reserved for State education-related jobs and administration of the Education Jobs Fund.

STUDENT FINANCIAL ASSISTANCE

The bill includes \$300,000,000 to support the College Work Study program, which supports

low- and moderate-income undergraduate and graduate students who work while attending college. Together with institutional matching funds, this appropriation will support work-study jobs for approximately 250,000 financially needy students.

RELATED AGENCIES

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

OPERATING EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

The bill provides \$200,000,000 for AmeriCorps programs and the National Service Trust, which will support an additional 25,000 AmeriCorps Members. This funding will enable these individuals to serve their communities while earning an education award to further their education or pay off student loans. AmeriCorps members conduct vital services for nonprofits and communities including financial counseling, disaster response, housing support, and after school programs. The Corporation has seen an unprecedented level of interest from States, localities, and nonprofit organizations in its programs. Between November 2008 and April 2009, AmeriCorps received 76,404 online applications, up 230 percent compared to the same period in the year before.

GENERAL PROVISIONS—THIS CHAPTER

ISSUER ALLOWED REFUNDABLE CREDIT FOR QUALIFIED ZONE ACADEMY BONDS (QZABS) AND QUALIFIED SCHOOL CONSTRUCTION BONDS (QSCBs)

Section 1501 includes several provisions pertaining to QSCBs and QZABS, which finance public school construction, rehabilitation, and repair. Because the market for tax credits on QSCBs and QZABS currently is small given economic conditions, the bill would allow a State, local government, or tribal government issuing QSCBs or QZABS to elect to receive a direct payment from the Federal government equal to the amount of the tax credit that would have otherwise been payable on these bonds. The bill also includes a technical correction that clarifies that large local school districts are allowed to carry their 2009 and 2010 allocations of QSCBs into future years if they are not issued.

CHAPTER 6—TRANSPORTATION AND HOUSING AND URBAN DEVELOPMENT

DEPARTMENT OF TRANSPORTATION

FEDERAL AVIATION ADMINISTRATION

GRANTS-IN-AID FOR AIRPORTS

The bill provides \$500,000,000 for the Federal Aviation Administration to provide discretionary airport grants to repair and improve critical infrastructure at our Nation's airports. Projects funded under this Act, as well as under the American Recovery and Reinvestment Act, use the criteria established for grants under the AIP program and provide long-term economic, safety and capacity benefits to the Nation's airport system. This funding will support an estimated 5,000 jobs.

FEDERAL HIGHWAY ADMINISTRATION

HIGHWAY INFRASTRUCTURE INVESTMENT

The bill provides \$27,500,000,000 for additional highway infrastructure investment to support an estimated 299,000 jobs. Funds are distributed by formula, with a portion of the funds within each State being suballocated by population areas. Set asides are also provided for: management and oversight; Indian reservation roads; park roads and parkways; forest highways; refuge roads; ferry boats;

on-the-job training programs focused on minorities, women, and the socially and economically disadvantaged; a bonding assistance program for minority and disadvantaged businesses; Puerto Rico and the territories; and environmentally friendly transportation enhancements.

FEDERAL RAILROAD ADMINISTRATION

CAPITAL GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION

The bill provides \$800,000,000 for capital grants to the National Railroad Passenger Corporation (Amtrak) for fleet modernization, including the rehabilitation of existing and acquisition of new passenger equipment, including fuel efficient locomotives. The Secretary of Transportation is directed to give priority to domestically manufactured equipment, including components and sub-components used for rehabilitation. In addition, new acquisitions should be part of a larger strategy to work with domestic manufacturers to create a standardized next generation corridor equipment fleet. This funding supports an estimated 9,000 jobs.

FEDERAL TRANSIT ADMINISTRATION

TRANSIT CAPITAL ASSISTANCE

The bill provides \$6,150,000,000 for urban and rural formula grants to support an estimated 67,000 jobs. Within the total amount, 80 percent of the funds shall be provided through the Federal Transit Administration's (FTA) urbanized formula; 10 percent shall be provided through FTA's rural formula; and 10 percent shall be provided through FTA's growing states and high density formula. In addition, the bill provides 2.5 percent of the rural funds for tribal transit needs and includes \$100,000,000 for discretionary grants to public transit agencies for capital investments that will assist in reducing the energy consumption or greenhouse gas emissions of their public transit agencies.

FIXED GUIDEWAY INFRASTRUCTURE INVESTMENT

The bill provides \$1,750,000,000, to support an estimated 19,000 jobs, to be distributed through an existing authorized formula for capital projects to modernize or improve existing fixed guideway systems, including purchase and rehabilitation of rolling stock, track, equipment and facilities.

CAPITAL INVESTMENT GRANTS

The bill provides \$500,000,000, to support an estimated 5,000 jobs, to be distributed on a discretionary basis for New Starts and Small Starts projects that are already in construction or are nearly ready to begin construction.

MARITIME ADMINISTRATION

MARITIME GUARANTEED LOAN (TITLE XI)

PROGRAM ACCOUNT

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$100,000,000 for the Maritime Guaranteed Loan (Title XI) program to allow vessels and shipyards to obtain long-term financing for growth and modernization projects.

GENERAL PROVISION—DEPARTMENT OF TRANSPORTATION

MAINTENANCE OF EFFORT

Section 1601 ensures continued State investment in certain identified programs for which the State receives funding in this Act and requires grant recipients to report regularly on the use of those funds.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

PUBLIC AND INDIAN HOUSING

PUBLIC HOUSING CAPITAL FUND

The bill provides \$1,000,000,000 for the Public Housing Capital Fund for additional re-

pairs and rehabilitation of public housing, including increasing the energy efficiency of units and making critical safety repairs. The Secretary is directed to award these funds competitively to public housing agencies that submitted applications in the competition for funds conducted in fiscal year 2009. In that competition, HUD received applications totaling approximately \$3,700,000,000 for Capital Fund projects, but was only able to fund \$1,000,000,000 in awards. This funding will spur construction quickly, especially since HUD has ready-to-go applications for projects on hand. This funding will support an estimated 10,900 construction jobs.

COMMUNITY PLANNING AND DEVELOPMENT

HOUSING TRUST FUND

The bill provides \$1,000,000,000 for the National Housing Trust Fund to provide communities with funds to build, preserve, and rehabilitate rental homes that are affordable for extremely and very low income households; and \$65,000,000 for project-based vouchers to support units built by the Trust Fund. Nationwide, for every 100 extremely low income renter households, there are only 37 homes they can afford, further, capital expenditures for housing will create jobs in the construction industry. This funding will support an estimated 19,000 construction jobs.

CHAPTER 7—GENERAL PROVISION

TARP REDUCTION

Section 1701 reduces the ceiling on loans, investments and other assistance under the Troubled Asset Relief Program (TARP) by \$150,000,000.

Section 1702 provides that all funds under this title shall be subject to section 1604 of division A of the American Recovery and Reinvestment Act of 2009.

Section 1703 makes appropriations in this title subject to American Recovery and Reinvestment Act reporting and transparency requirements and Inspector General oversight.

TITLE II—SURFACE TRANSPORTATION EXTENSION

This title extends the authorization for the highway, transit, highway safety and motor carrier safety programs of the Department of Transportation until September 30, 2010. In addition, the bill includes language that provides 100 percent federal share for the transportation programs authorized in the title, repeals the provision that prohibits Highway Trust Fund balances from earning interest, and restores \$20,000,000,000 to the Highway Trust Fund.

This title also strengthens the Buy America requirements for highway and transit projects, and provides greater transparency for Buy America waivers.

TITLE III—UNEMPLOYMENT AND OTHER EMERGENCY NEEDS

CHAPTER 1—AGRICULTURE AND RURAL DEVELOPMENT

DEPARTMENT OF AGRICULTURE

GENERAL PROVISION—THIS CHAPTER

(RESCISSION)

RELIEF FOR DISCRIMINATION IN A CREDIT PROGRAM OF THE DEPARTMENT OF AGRICULTURE UNDER THE EQUAL CREDIT OPPORTUNITY ACT

Section 3101 extends the statute of limitations for claims of discrimination in USDA's credit programs that have been pending at USDA.

CHAPTER 2—FINANCIAL SERVICES AND
GENERAL GOVERNMENT
INDEPENDENT AGENCIES

SMALL BUSINESS ADMINISTRATION
BUSINESS LOANS PROGRAM ACCOUNT

The bill provides \$354,000,000 to the Small Business Administration (SBA), to continue two temporary enhancements to SBA loan guarantee programs made by the American Recovery and Reinvestment Act of 2009 and which are nearly out of funding. One of the enhancements being extended allows the SBA to guarantee 90 percent of certain small business loans, instead of the 75 percent allowed under permanent law (or 85 percent for small loans), thereby encouraging banks to make these loans by reducing the amount they have at risk and the reserves they must hold. The other reduces fees paid by lenders and borrowers. The funding provided in the bill is estimated to be sufficient to continue both items through the end of fiscal year 2010. The bill also extends the expiration date of the authorization for the 90 percent loan guarantees to September 30, 2010.

GENERAL PROVISION—THIS CHAPTER
(RESCISSION)

Section 3201 rescinds funds that will lapse at the end of fiscal year 2010.

CHAPTER 3—LABOR, HEALTH AND
HUMAN SERVICES, AND EDUCATION
GENERAL PROVISIONS—THIS CHAPTER
ASSISTANCE FOR UNEMPLOYED WORKERS AND
STRUGGLING FAMILIES

Section 3301 provides a six-month extension of expiring UI benefit provisions that were established or continued in the American Recovery and Reinvestment Act, including the Emergency Unemployment Compensation program, 100 percent Federal funding for the Extended Benefits program, and the extra \$25 weekly UI benefit.

EXTENSION AND IMPROVEMENT OF PREMIUM
ASSISTANCE FOR COBRA BENEFITS

Section 3302 extends the 65 percent COBRA health insurance subsidy from nine to 15 months for individuals who have lost their jobs. The job loss eligibility date is extended in the provision through June 30, 2010.

EXTENSION OF RECOVERY ACT INCREASE IN THE
FEDERAL MEDICAL ASSISTANCE PERCENTAGE
(FMAP)

Section 3303 extends for six months, through June 2010, the FMAP provision in the Recovery Act, which increases the Federal match for Medicaid for all State programs.

REPEAL OF EARNED INCOME THRESHOLD FOR
DETERMINING REFUNDABLE PORTION OF
CHILD TAX CREDIT

Section 3304 increases the eligibility for the refundable portion of the child tax credit. The bill would increase the eligibility for the refundable child tax credit in 2010. For 2009, the child tax credit is refundable to the extent of 15 percent of the taxpayer's earned income in excess of \$3,000. The bill would eliminate this floor for 2010.

DEPARTMENT OF HEALTH AND HUMAN
SERVICES (HHS) POVERTY GUIDELINES

Section 3305 includes a provision to freeze the HHS poverty guidelines at 2009 levels in order to prevent a reduction in eligibility for certain means-tested programs, including Medicaid, Supplemental Nutrition Assistance Program (SNAP), and child nutrition, in 2010.

REFUNDS DISREGARDED IN THE ADMINISTRATION
OF FEDERAL PROGRAMS AND FEDERALLY ASSISTED PROGRAMS

Section 3306 provides, for one year, the exclusion of tax refunds as income for the pur-

pose of assessing eligibility for means-tested programs supported by Federal funds.

Section 3307 permanently authorizes a provision to help Social Security and Supplemental Security Income disability claimants retain professional representation.

CHAPTER 4—GENERAL PROVISION—THIS
TITLE

Section 3401 provides an emergency designation and PAYGO emergency designation.

TITLE IV—GENERAL PROVISIONS—THIS
ACT

Section 4001 establishes a period of availability for funds.

Section 4002 requires Buy America requirements.

DISCLOSURE OF EARMARKS AND CONGRESSIONALLY DIRECTED SPENDING ITEMS

Pursuant to clause 9 of rule XXI of the Rules of the House of Representatives, neither the amended bill nor the explanatory statement contains any congressional earmarks, limited tax benefits, or limited tariff benefits.

With that, I would yield to the Speaker to conclude my remarks.

The SPEAKER pro tempore. The gentlewoman from California is recognized.

Mr. LEWIS of California. Madam Speaker, I certainly would not object, but I had asked the chairman about additional speakers, and clearly I would never, ever detract from our Speaker, but in the meantime, a little straightforward discussion would be helpful.

Mr. OBEY. If the gentleman would yield. Well, he doesn't have the time. I will simply take the time to say that if I had known that the Speaker had been able to come to the floor, I certainly would have told the gentleman. I simply didn't know, and I trust that he believes me.

Mr. LEWIS of California. I certainly do.

Mr. OBEY. I thank the gentleman for that clarification.

Ms. PELOSI. Madam Speaker, I thank the distinguished chairman for yielding, for his unyielding work on behalf of America's working families, and in this case today for the creation of jobs, to grow our economy and to help those who have lost their jobs through no fault of their own.

I am grateful to the distinguished ranking member, Mr. LEWIS, for his courtesy. Yes, my apology. I didn't realize the debate would go to this point. But I did want to take the opportunity to talk about jobs to our colleagues and to this Congress in general.

Just to put it in perspective, 1 year ago, in January, the job loss was 740,000 jobs for that 1 month alone. Fast forward to now, and the job loss for November is 11,000 jobs. Seven hundred forty thousand 10 months ago; 11,000 jobs this month. We don't want to lose any jobs. But we are on the road to recovery, and we are there because this Congress made some very important and difficult decisions to take us there. We are on the road to recovery because

of the leadership of President Barack Obama, who stood on the steps of the Capitol on his inauguration and asked for swift, bold action now so that we could take the country in a new direction and create jobs and grow our economy.

□ 1745

One week and 1 day from the President's inaugural address, this House of Representatives passed the Recovery Act. We were able to do so because we were ready. We had been ready with job creation packages, but we could not get the resources until we had a new President to make the investments, which took us from 740,000 jobs lost in January, in the first month of this year—the President, I am reminded, was inaugurated on January 20, toward the end of that month—and then 11,000 jobs.

I also want to call to our colleagues' attention back to the first quarter of 2009, and the GDP rate of growth was a negative. It was a minus 6.4 percent, a result of the failed economic policies of the previous administration. As of November 24, 2009, the GDP has a positive 2.8 and is growing; a swing of 9.2 percent in the GDP from negative, minus 6.4 to positive 2.8.

At the same time, I call to the attention of my colleagues that because of this new direction to grow our economy, the stock market was at a nadir. The first of 2009, we're at 7,000. We are now over 10,000, an increase of over 3,000 points in the stock market. Economists tell us that some of this change is directly related to the recovery package that we passed in January, the fiscally sound budget that we passed 100 days after the President's inauguration, which was a blueprint for the future, a statement of our national values that talked about how we could create jobs, lower taxes for the middle class—over 95 percent of the American people got a tax cut—and how we could reduce the deficit. It's all about job creation and reducing the deficit.

Three pillars of changing the economy in that budget were investments in health care, in education, and in energy to prevent climate change, to create new green jobs for the future, and to do so through science and innovation. Innovation begins in the classroom and is central to our competitiveness—innovation to reduce the cost of health care to families, to businesses, to our budget, and to our economy to make us competitive and keep us number one in the world's economy. All of this was passed by the House of Representatives: energy, climate change, education, and health care.

Then finally, this past week, we passed the regulatory reform legislation. Mr. FRANK is here, our chairman. It is the work of many people in this Congress. We passed regulatory reform to hold Wall Street accountable, to say

that the party is over, to say that we are creating jobs for Main Street, not just wealth for Wall Street. We respect the creation of wealth and what it means to an economy and how it relates to the creation of jobs, but we cannot have a creation of wealth at the exploitation of the American worker. We did pass this regulatory reform without one Republican vote to hold Wall Street accountable, without one Republican vote.

So here we are today, after this plan that started on the steps of the Capitol—the inauguration of our new President—that had deep seeds in what we had tried to do before we had a Democratic administration but what we had been working for, so we were ready. And now today we want to pass this legislation which does two things: It creates jobs and saves jobs by investments in building the infrastructure of America. It doesn't do everything we would want, but what we do in there is paid for, building the infrastructure of America.

What it also invests in is to help States, cities, and localities keep their fiscal soundness so that they don't have to lay off teachers, firefighters, police officers, and people who work to meet the health needs of people in our community. This is important not only for public safety. That is self-evident. It is not only important because we don't want to lose our teachers. It is about the education of our children and how seriously that can be undermined with the layoffs and the uncertainty in the local and State budgets.

But on top of all of that, while we're concerned about what this does to working families and how important it is for people to have their jobs—they are also consumers—to the extent that they lose their jobs, our economy loses consumers. And when our economy loses consumers, we're in big trouble, economic trouble. We cannot let that happen.

So today, we have before us that package for job creation and job retention which is fiscally sound and which is paid for by using TARP funds, the unused TARP funds which were the subject of great debate but which, I do believe, saved us, pulled us from the brink of the financial crisis we were in as our recovery package later pulled us from the brink of economic disaster.

In addition to that, we have some safety net provisions about the extension of unemployment insurance, of COBRA to meet the health needs of those who are unemployed, which all expire the end of December, and other issues that relate to the well-being of America's working families, to address the concerns of the unemployed but, in addition to that, to create jobs in a fiscally sound way.

Fiscal responsibility is very important to us. It is our responsibility to our children not to increase the deficit,

and that is why our health bill does not add one dime to the deficit; in fact, it decreases the deficit. I see Chairman RANGEL shaking his head. It is an important part of paying for that legislation. And Mr. MILLER and Mr. WAXMAN were so much an important part of that health care bill.

So here we are today with an opportunity to modestly and in a paid-for way address the issue of jobs. It's a four-letter word. Let's use that four-letter word everywhere we go—jobs, jobs, jobs.

I urge my colleagues, while some of your districts and some of your States may be doing better than other parts of the country, this is the time for us to recognize that we are a national economy and that what happens in one State has an impact on our national recovery.

I thank Chairman OBEY for his great leadership in putting this package together. I urge our colleagues to act on behalf of America's working families through the creation of jobs in a fiscally sound way, to honor our responsibility of public safety by protecting our first responders and our responsibility to our children to make sure that their education does not have a gap, because we have a budgetary gap, and understanding the role that consumers play in our economy. I hope that we will have a strong "yes" vote on this legislation.

With that, Mr. Chairman, I commend you again.

Mr. LANGEVIN. Madam Speaker, I rise in strong support of H.R. 2847, the Jobs for Main Street Act, which redirects Trouble Asset Relief Program (TARP) funds from Wall Street to Main Street, where our towns, small businesses and families need it most.

While we have seen some significant improvements since this time last year, we are still feeling the repercussions of the worst economic downturn since the Great Depression. Many older Americans are entering retirement with deflated savings, forced to dramatically adjust plans and expectations for their golden years. Millions of our constituents remain unemployed, desperately searching for jobs that simply aren't there. Rhode Island families are struggling to pay bills and mortgage payments, and in too many cases, those who used to have two salaries to rely on must now make do with only one. While we have brought the economy back from the brink, we must do more to limit job loss and create new employment opportunities.

H.R. 2847 addresses these issues by redirecting \$48 billion in unused TARP funds to highway infrastructure, school renovation grants, public transportation investments and airport improvement grants. To address our housing needs, this measure contains \$1 billion for the National Housing Trust Fund that provides communities with funds to build, preserve and rehabilitate affordable rental homes and \$1 billion for the Public Housing Capital Fund for repairs and rehabilitation of public housing.

The Jobs for Main Street Act also uses \$27 billion in TARP funds to stabilize public service

jobs, including teachers, firefighters and police officers. It funds an Education Jobs Fund to help states retain or create jobs in school districts and public higher education institutions. And it includes funding for AmeriCorps, the College Work Study program, and job training for high growth and emerging industry sectors, including those in health care and green industries.

Small businesses have borne the brunt of this economic crisis, and their inability to access credit to keep their businesses operating has clearly added to the high unemployment rate across the nation, and especially in Rhode Island. It is imperative that our small businesses have access to the tools they need to weather this economic downturn, as well as to keep and create jobs. H.R. 2847 will help by extending Recovery Act provisions that eliminated fees on SBA loans and guaranteeing these loans at 90 percent. This gives local banks and credit unions the confidence to lend to small businesses.

This measure also extends crucial American Recovery and Reinvestment Act safety net programs that provide invaluable health and social services to our nation's low-income and disabled citizens with the inclusion of \$23.5 billion in enhanced funding for state Medicaid programs. It further extends a provision to assist recently unemployed individuals and their families by helping them maintain their health coverage through a 65 percent subsidy for health insurance premiums under COBRA from nine months to 15 months and also extends unemployment benefits by six months.

This job creation package will help move our country further down the road to recovery and help our families in need during this holiday season. I urge my colleagues to support this bill.

Mr. DINGELL. Madam Speaker, I rise today to offer my unequivocal support for H.R. 2847, the Jobs for Main Street Act. As a federal representative from the state of Michigan, I can attest to the hardship facing my constituents, and others across the state, as a direct result of unemployment. This legislation will build off the progress made by the American Recovery and Reinvestment Act and create jobs quickly through projects needed by the community such as new roads, water facilities, and by protecting the jobs we have in the fields of education and law enforcement.

H.R. 2847 is legislation that will greatly help the 15th District in Michigan. There is no question that Michigan has been hit the hardest and the earliest by this economic recession, leading unemployment across the country for months, which is now almost 15 percent. Yet this does not tell the full story. Since 2000, Michigan has lost over 800,000 jobs, roughly one in every six, and in Detroit alone 45 percent of working-age adults are unemployed. Combine this with the fact that for every job opening about six people are applying, and you can see why the workers in Michigan are facing a perfect storm.

This legislation will help to calm this storm by investing in public works projects that will create new jobs, setting aside \$48 billion for rebuilding our roads and bridges, modernizing public buildings, constructing new water facilities, and building and preserving affordable rental houses. We will also help to save or

create jobs in our public schools, our police and fire departments, while training workers in growing fields such as health care and alternative energy or "green" fields.

Further, this legislation will extend emergency unemployment benefits through June 2010, and extend and expand the COBRA subsidy through June and expand the months of help from 9 months to 15 months. These changes will help the nearly one million workers exhausting their unemployment benefits by January and the hundreds of thousands of workers who have already begun rolling off the COBRA subsidy program.

It is imperative that both the House and the Senate pass H.R. 2847 quickly. This legislation is not a hand-out; rather it is an immediate injection into local economies across the country. It is funding America families will use to keep their heat on this Christmas, to pay their mortgage for the next few months, and keep their health insurance through the summer. Quite frankly this funding is a crutch until these workers can find their next job, or complete the training they need for a second career.

Madam Speaker, after spending this summer bailing out Wall Street, it is time that we help Main Street. I urge my colleagues to reiterate their support to the American families in need and vote in favor of H.R. 2847.

Mr. LINDER. Madam Speaker, I rise in opposition to this legislation, and in particular the provisions adding \$40 billion to the deficit, leading to even more tax hikes on jobs, and ultimately increasing unemployment across the Nation. Those provisions are just the latest in a series of massive expansions of Federal unemployment benefits dating back to 2008. And here we are again with yet another extension of Federal unemployment benefits, at enormous expense to taxpayers. But no matter how much Congress spends and no matter how many benefit extensions this body passes, my colleagues on the other side of the aisle can't seem to understand that Americans want paychecks, not unemployment checks. Until they drop their job-killing government health care takeover and energy and other massive tax hikes, jobs and paychecks will continue to be in far too short supply.

PROMISING MILLIONS OF NEW JOBS, DELIVERING
MILLIONS MORE UNEMPLOYED

Jobs and paychecks are definitely not what Democrats have delivered to date. They insisted their so-called 2009 stimulus bill would create 3.5 million jobs and keep unemployment from rising above 8 percent. Instead we have lost almost 3 million jobs since then as unemployment rose to 10 percent:

GRAPHIC REMOVED

These rates are more than just abstract numbers. They represent real Americans who are no longer receiving a paycheck to provide for themselves and their families—a total of 3.7 million more unemployed than the President promised if his stimulus bill became law. Those 3.7 million people could form an unemployment line stretching literally from Washington, D.C. to Chicago, Illinois. No amount of Federal spending, no White House jobs summit, and not even millions of unemployment checks can distract from that sorry record of job destruction.

The American people are not fooled, either. A current CBS/New York Times poll finds that

61 percent think the \$1 trillion 2009 stimulus bill has either had no effect or made the economy worse. Half as many, only 32 percent, think the stimulus bill has made things better.

WORST "JOBS SPEAKER" EVER

In an attempt to distract from this grim record, Democrats have taken to blaming the last President for the failure of their own stimulus plan to create jobs. On December 4, 2009, 35 months after she became Speaker and 11 months after Barack Obama became President, House Speaker NANCY PELOSI said "Bush Administration policies created a huge jobs deficit." Yet every one of the "Bush Administration" job losses she decried happened on her watch as Speaker. The facts show NANCY PELOSI is the worst Speaker in terms of job creation since official data began in 1939. More than 6 million jobs—4.5 percent of all jobs in the U.S. economy—have been destroyed since she became Speaker in 2007:

GRAPHIC REMOVED

WORST "JOBS PRESIDENT" SINCE HERBERT HOOVER

Further, and despite repeated claims from the President and various Administration officials that stimulus "is working," Barack Obama has compiled the worst jobs record since Herbert Hoover:

GRAPHIC REMOVED

PROVIDING RECORD AMOUNTS OF UNEMPLOYMENT
BENEFITS

In response to this horrific record of rising unemployment and job destruction, the Democrat leadership has only one "solution"—paying even more unemployment benefits. This latest extension comes just one month after the House considered the last expansion of unemployment benefits, which added 20 more weeks of Federal unemployment benefits, increasing total benefits to an unprecedented 99 weeks in most of the U.S.:

GRAPHIC REMOVED

The USA Today last week called this payment of 99 weeks of unemployment benefits "excessive" and "a disincentive to find work." They're right. Everyone from Presidential advisor Larry Summers to the New York Times, Washington Post, and Congressional Budget Office agree that's a concern, especially as the job market starts to recover. And we all hope it will start to recover in the coming months.

CREATING RECORD UNEMPLOYMENT BENEFIT RECEIPT

But regardless of Democrats' current "jobs" rhetoric, there is no evidence this bill will deliver jobs and paychecks—just millions more unemployment checks. Those checks will be in addition to the all-time record number of unemployment benefits currently being paid to 9.5 million Americans per week last month. The Federal extended benefits programs are now so enormous—and the 2009 stimulus law was such an utter failure at stemming the tide of job loss and long-term unemployment—that soon more Americans will collect Federal extended benefits than regular State unemployment checks for the first time ever:

GRAPHIC REMOVED

ADDING MASSIVELY TO DEFICITS AND DEBT

These unemployment checks cost a tremendous amount of money. Since "emergency" Federal unemployment benefits began in mid-2008, the Federal government has spent an astonishing \$100 billion on these programs.

That is 4 times what the Federal government spent on emergency unemployment benefits in the wake of the 2001 recession and terrorist attacks. The tidal wave of recent spending has bankrupted the Federal unemployment accounts and forced Democrats to engage in a massive and growing bailout with general revenues. The legislation before us adds to those massive totals, increasing Federal spending by \$7 billion per month, or a total of over \$40 billion more during just the next six months. All of which will add to our record deficits and debt.

Tellingly, none of these additional unemployment benefits will be paid for, despite Democrats' recent claims of fiscal responsibility. For example, last week on the House floor, senior Ways and Means Member Sander Levin of Michigan said of a bill that permanently raised taxes to pay for temporary tax relief "What we are suggesting here is fiscal responsibility. Don't dig the hole deeper and deeper. Step up and pay for it." The next day, Speaker PELOSI held a news conference at which she said: "On jobs, we hope next week that in our final appropriations bill we will be able to have a jobs piece that will create jobs in the near term to address the needs of those who are unemployed and do so in a fiscally sound way."

Yet here we are again digging that hole deeper, and doing nothing "in a fiscally sound way." None of our Democrat colleagues suggest we "step up and pay for" this new spending either. This despite the fact that, even before this measure passes, debt and unemployment have increased by a staggering 55 percent since President Obama took office just 11 months ago:

GRAPHIC REMOVED

MORE UNEMPLOYMENT AND BENEFIT SPENDING TO COME

No one seriously thinks all this spending—or the job losses—will end with this extension, either. That means at least some of the "emergency" spending in today's bill is likely to continue for years ahead. The President's economist, Dr. Christina Romer, anticipated as much this past weekend when she said "I'm not going to say the recession is over until the unemployment rate is down to normal levels." She went on to define "normal" as "where we were before the recession." How long might that take? According to a recent study by economists at Rutgers, the U.S. won't return to pre-recession employment levels until 2017. That would mean the current recession, in Dr. Romer's view, would last a decade, or as long as the Depression of the 1930s.

THE COMING WAVE OF JOB-KILLING TAX HIKES

The Federal unemployment accounts are exhausted and most Federal benefits are currently supported by general revenues—the same source of funding for welfare benefits. State unemployment benefits, in contrast, remain supported either by State payroll taxes, or Federal loans—also supported by Federal general revenues and which will also have to be repaid with future State tax hikes.

Those State tax hikes are already under way. On December 8, 2009, the bipartisan National Association of State Workforce Administrators issued a report that 35 States will increase State unemployment payroll taxes in 2010. These are direct taxes on jobs, made worse by the failure of the 2009 stimulus law

to create jobs and stem unemployment. The NASWA report notes the 2010 tax hikes range up to a stunning 600 percent. As one small businessman said simply, "This is a job killer." (A list of other recent quotes about how these tax hikes will destroy jobs is included below.)

As the above data shows, Democrat stimulus legislation has succeeded in increasing unemployment, not reducing it. Instead of creating 3.5 million new jobs, the 2009 stimulus bill has been followed by almost 3 million job losses. And now record unemployment benefit payments that followed have become their own engine of job destruction, contributing to an enormous wave of Federal borrowing and State tax hikes that will stifle job growth for years to come.

Adding to the pain, Democrat energy policies would increase the price of energy and kill millions of jobs. Democrat health policies would make health care and health insurance more expensive and kill millions more jobs. And other Democrat spending proposals in this second (or really third or fourth, depending on how one counts) stimulus bill will further drive up the debt and kill even more jobs.

We can and must do better. It's well past time for us to shelve Democrats' job-killing energy, health care, and tax hike agendas. We will then unleash America's job creation engine so laid off workers can finally get back to work. That effort should start with a vote against this legislation, and a renewed commitment to offer unemployed workers real help in finding new work, instead of just more benefit checks.

APPENDIX: RECENT QUOTES ABOUT HOW STATE UNEMPLOYMENT TAX HIKES WILL KILL JOBS FROM SEA TO SHINING SEA

California: "Tax may feed unemployment: business owners fear insurance spike," March 30, 2009:

"Thanks to the tanking economy and past benefit hikes, the state's system for providing unemployment benefits is insolvent. And the fix that state lawmakers are considering is to dramatically raise the taxes employers pay into the system. The irony: That could force companies to lay off employees. Take, for example, Steve Diels, who owns a Redondo Beach call center. Any tax increase could force him to fill out some pink slips. 'Right now, my profit margin has slipped and I'm doing everything I can to avoid laying anyone off,' said Diels, a Redondo Beach city councilman who employs 38 people at Aamcom Inc. 'But if they increase the unemployment tax, employers like me will have to lay people off and that will only make things worse with the unemployment fund.'"

Connecticut: "State may tax business to bail out broke jobless fund," December 5, 2009:

"Tony Sheridan, president of the Chamber of Commerce of Eastern Connecticut, said . . . 'It's a tough situation and there's not one single business that can stand a tax increase'."

Florida: "Creating more jobs is 'Job No. 1,'" December 10, 2009

"A good example of policy that discourages hiring is the impending radical increase in the unemployment tax in Florida, triggered by the depletion of the unemployment trust fund by record jobless claims. That increase is so steep—from \$8.40 per employee to \$100 for

the minimum tax; from \$378 to \$459 for the maximum—that it could not only discourage hiring, it could put some businesses under."

Hawaii: "Big payroll tax reset weighs on Hawaii business," December 4, 2009:

"Big Island contractor Hinchcliff Drywall Construction will see a more than six-fold increase in its payroll taxes next year, which will soar from the current \$18,500 annually to \$116,350. . . . 'I don't understand why the rates were not raised gradually over the period of two or three years—it almost seems a bit backwards,' said Michelle Danihel-Kreusling, controller of Hinchcliff Drywall, which employs 80 people. 'Practically cutting off your nose to spite your face,' she said. 'This rate hike will either require many businesses to either drastically reduce their labor force or close shop completely, both of which would increase the unemployment rate.'"

Maine: "Maine raises unemployment tax by \$54 million," December 1, 2009:

"David Clough, Maine director of the National Federation of Independent Businesses, said his members will be hit hard by the tax hike. He said it will cost jobs, either from layoffs or positions that go unfilled."

Maryland: "Rising unemployment taxes could hinder hiring," November 22, 2009:

"Employers already are squeezed by tight credit, rising health care costs, wary consumers and a higher minimum wage. Now, the surging jobless rate is imposing another cost. It's forcing higher state taxes on companies to pay for unemployment insurance claims. Some employers say the extra costs make them less likely to hire. . . . Chuck Ferrar, who owns a liquor store in Annapolis, Md., expects to pay \$9,000 in unemployment taxes next year, up from \$3,000 this year. Health care costs for his employees will rise by \$8,000, or 17.5 percent. 'When you start adding this up, it turns into real money,' he said. 'If I lose an employee through attrition, I will not replace him. You can't afford to do it.'"

Massachusetts: "Unemployment at 33-year high; insurance fund running dry," October 16, 2009:

"'This is a breathtakingly bad picture,' said Michael Widmer, president of the Massachusetts Taxpayers Foundation, a business-funded public policy group, and also a member of the advisory council that monitors the solvency of the two accounts that fund unemployment benefits. 'They're putting additional taxes on employers, and we are seeing our jobs erode,' Widmer said in an interview. 'It's devastating in terms of the state's competitiveness.'"

Michigan: "New unemployment-insurance taxes: \$63 million in 2010," September 13, 2009:

"Frank Lope, an alliance board member and chairman of Romulus-based Aztec Manufacturing Corp., said . . . 'It's going to be another impediment on businesses as they go to look at hiring people,' Lopez said. 'It's just another, so to speak, of the many nails in the coffin for continued growth of businesses in the state of Michigan.'"

Nevada: "Businesses May See Huge Tax Increase," September 23, 2009:

"Some financial experts are still concerned that a huge jump in the unemployment benefit tax will force businesses to lay off employees to pay for the increase."

North Carolina: "N.C. borrowing billions for jobless," December 1, 2009:

"Walden, the economist, said raising taxes would be a mistake as long as the economy is hurting. 'In essence, you can look at that as a tax on new employees, and we don't want to do that,' he said. The deep recession has made it impossible for North Carolina to forecast how much unemployment tax funds the state will receive from employers next year, Clegg said. 'Not to be maudlin, but I don't know who will be paying taxes in the first quarter of 2010 because I don't know what businesses will survive,' he said."

Rhode Island: "R.I. businesses to pay higher jobless taxes," November 23, 2009:

"Mark Higgins, dean of the University of Rhode Island's College of Business Administration, said the tax hike was inevitable. . . . Depending on the circumstances, the tax increase is one factor that could discourage a business from hiring next year, Higgins said. Higher unemployment tax 'just increases the cost of hiring somebody,' he said. 'It increases the cost of payroll . . . [and] of keeping [an employee] on the payroll,' he said."

Mr. VAN HOLLEN. Madam Speaker, I rise in strong support of the Jobs for Main Street Act. Now that recent initiatives aimed at stabilizing our financial system and stimulating our economy are beginning to have their intended effect, this targeted legislation is laser-focused on job creation to ensure that all Americans will have an opportunity to participate in our ongoing economic recovery.

Specifically, the Jobs for Main Street Act invests \$48 billion in our nation's highways, transit systems, school facilities, water infrastructure and housing stock. In addition to putting hundreds of thousands of Americans back to work, these funds will make needed improvements and renovations to our nation's aging infrastructure. \$27 billion is provided to hire, train and equip an estimated 820,000 teachers, police, firefighters and other public service personnel. Job-generating small businesses will get greater access to Small Business Administration (SBA) loans by eliminating fees and by providing higher guarantees to the private banks that lend to them. These measures, in addition to the small business Recovery Act initiatives that preceded them, will help generate well over \$9 billion in new small business lending.

To help Americans who are out of work or have lost their employer-provided health insurance, this legislation extends emergency unemployment and COBRA benefits through June, 2010. States will receive an extra six months of federal matching funds to help cover their Medicaid costs through June, 2011, and the families of 16 million low-income children will get a tax cut through greater access to the Child Tax Credit.

Madam Speaker, this Congress on a bipartisan basis extended support to Wall Street during a period of potentially catastrophic systemic risk and extraordinary need. It is now high time we make an equally extraordinary effort on behalf of creating jobs for Main Street so that the prosperity we are creating is broadly shared by all.

Mr. BUYER. Madam Speaker, I rise in opposition to H.R. 2847 the, "Jobs for Main Street Act of 2009."

Madam Speaker, once again members are being asked to vote on a 100-page bill, which was posted in the dead of night in the name of creating jobs that unfortunately will probably never materialize. What it will do is needlessly expand the size of the Federal Government. Madam Speaker, this is not the type of open and transparent process that the American people want or deserve.

I am especially concerned that this bill spends millions of taxpayer dollars on innumerable pork barrel programs and pet projects, but it does not spend a dime to help create jobs for veterans. Recent unemployment numbers from the U.S. Bureau of Labor Statistics show that in the month of November there were over one million unemployed veterans, and that is unacceptable.

The unemployment rate among our newest veterans, ages 18–24, remains extremely high at 20 percent. Equally disturbing is that 700,000 of the one million unemployed veterans are between the ages of 35 and 64, the years normally characterized by both highest earning power and highest financial need for important items such as paying mortgages and tuitions.

Madam Speaker, it is because of these alarming statistics that earlier this month I was joined by many members of the Committee on Veterans' Affairs in introducing H.R. 4220 the Promoting Jobs for Veterans Act of 2009. H.R. 4220 would help veterans find employment by providing funding and incentives for them to pursue employment training and education. The bill would also expand opportunities within the Federal Government for veteran-owned and service disabled veteran-owned small businesses.

It was my hope that any "jobs package" would have included provisions such as those from H.R. 4220 to help those who have defended freedom, and it is unfortunate that the heavy handed tactics being used today have effectively prevented anyone from offering an amendment to include these provisions.

Madam Speaker, I believe that veterans could serve as an important catalyst to economic recovery. Veterans are dedicated employees and engaged entrepreneurs, and this would expand job and entrepreneurial opportunities for these selfless individuals. It is my hope that early in the next session we can consider H.R. 4220 and examine other ways to improve employment opportunities for our veterans.

Mr. DeFAZIO. Madam Speaker, the U.S. economy continues to limp along mired in a jobless recovery. Wall Street banks have begun to recover thanks to a \$700 billion bailout paid for by taxpayers. Unfortunately, everyone else continues to suffer the effects of the economic collapse. Oregon's unemployment rate exceeds 11 percent and small businesses in my district can't get banks to lend to them. I have long advocated for a targeted jobs recovery program that focuses on substantial investments in our Nation's infrastructure, which will create jobs quickly and leave a long-term benefit for future generations.

I reluctantly voted for H.R. 2847, the Jobs for Main Street Act because it begins to make these investments that are both desperately needed and effective at creating jobs. There are nearly 10,000 of ready-to-go infrastructure

projects across the country that have been postponed or delayed due to decades of underinvestment and underfunding. There are 61,000 miles of the National Highway System in poor or fair condition. 152,000 bridges are structurally deficient or functionally obsolete. The Nation's largest transit agencies face a combined \$80 billion maintenance backlog to bring their rail systems to a state of good repair.

The American Recovery and Reinvestment Act, ARRA, provided a mere \$34 billion for highway and transit formula programs. Nearly 70 percent of the funding has already been put out to bid on over 9,500 infrastructure projects. The 7,900 Recovery Act infrastructure projects have created or sustained more than 210,000 direct jobs, as well as 630,000 indirect jobs in the past nine months.

As the ARRA Act infrastructure funding draws to a close, there are still over 9,000 shovel ready infrastructure projects across the country that could proceed within 120 days. The projects include 7,500 in ready-to-go highway and bridge projects; over 1,800 in ready-to-go transit, rail, port, and aviation projects; and an estimated \$21 billion worth of projects that transit agencies across the country could undertake immediately. These projects will create not just public sector construction jobs, but will procure American-made transit buses, trains, electrical equipment, computer systems and software designed by private sector, American engineers.

H.R. 2847 represents the bare minimum of what we need to do. Should the Senate redirect this effort to tax cuts or other ineffective job creation policies, I will have a very difficult time supporting a final bill.

Mr. CONYERS. Madam Speaker, I rise in support of passage of the Jobs for Main Street Act of 2010.

I believe this legislation is one of the most cost effective ways to provide cities across this country with desperately needed federal funding to help create and stabilize jobs, assist families who need their unemployment benefits extended, and to ensure that they can keep their health insurance.

Passage of the Jobs for Main Street Act of 2010 is critically important for America's working families, and unemployed individuals, given the current economic status of this country.

The Nation is experiencing extreme difficulties leading to high unemployment rates, especially in my home State of Michigan. Passage of this bill will provide real tangible relief for those who are depending on the Federal Government to help them survive in a time of financial crisis—not empty rhetoric and promises that help nobody.

The Jobs for Main Street Act of 2010 will help reduce these problems by stabilizing and creating jobs through infrastructure investments, an increase in public service jobs, and provide emergency relief for families hurt by the economy.

The bill will provide billions of dollars to create or save jobs with targeted investments for highways and transit, school renovation, hiring teachers, police, and firefighters, small business, job training and affordable housing which are essential elements in promoting economic growth.

However, passage of the Jobs for Main Street Act of 2010 is just the beginning of the process to put America back to work. We must act quickly to establish a full-employment economy, where every American who wants a job should be able to find one; and at a livable wage. This can and must be done if America is ever going to become a truly productive country.

During the depression, President Roosevelt put millions of Americans to work by creating public service jobs such as building roads, national parks, and rural electrification systems. We can do the same by creating a 21st century public works jobs program for America that can quickly employ the millions of citizens in this country who simply cannot find employment in the private sector.

The passage of this legislation will help put our Nation on the road to recovery. Therefore, I urge my colleagues to support this bill.

Mr. HOLT. Madam Speaker, I rise in support of H.R. 2847, the Jobs for Main Street Act. This legislation would provide jobs for tens of thousands of Americans, preserve thousands more jobs, and continue essential benefits to aid the unemployed without increasing the national debt.

We have taken important steps to bring our economy back from the worst economic crisis in three-quarters of a century. We've made important investments in our infrastructure, clean energy jobs, science research, and the next generation of workers.

There are clear signs that the economy is improving. Instead of shrinking by 6.4 percent a quarter, the economy has grown by 2.8 percent. Instead of losing 741,000 jobs a month, as the economy did a year ago, last month the economy shed 11,000 jobs. These are encouraging signs.

Yet, I'm not going to sit on my hands and wait for job creation. Families in New Jersey, who have lost a job or had their hours or paychecks cut, are still hurting. And we know employers have cut jobs more sharply and are more hesitant to replace them than in previous downturns.

The government can and should work together to increase employment opportunities in the short-term, mid-term, and long-term. Economists, business leaders, financial experts, among others, have argued that the Federal Government, and only the Federal Government, can inject into the economy a stimulus of sufficient size to make up for the frozen, collapsing economy. The package we are considering today will build on our previous investment, creating needed jobs and helping those who continue to be unemployed.

The Jobs for Main Street Act would redirect \$48.3 billion to put Americans to work rebuilding our Nation's crumbling roads and bridges, modernizing public buildings, and improving air and water quality. Specifically it would invest \$27.5 billion in highway infrastructure improvements, \$8.4 billion for transit improvements, and \$800 million to improve Amtrak. It is estimated that this investment will create over 750,000 new jobs. Additionally, H.R. 2847 would invest \$2.8 billion in clean water infrastructure, aquatic ecosystem restoration, and flood mitigation; creating another 50,000 jobs. It also will put contractors back to work by providing states with \$4.1 billion for school

construction, rehabilitation, and renovations. The \$270 million that this legislation would invest in improving and protecting Federal, State, and local public lands would support approximately 14,000 short-term jobs, improving service to visitors, reducing the large backlog in facilities and habitat restoration needs, and reducing hazardous fuels that lead to damaging and expensive wildfires. These investments will do more than create jobs in the short term, they will provide long term benefits to all Americans.

Over the past year, I have held a number of events focused on jobs. Two months ago, I brought 50 central Jersey small business owners to Washington to hear their concerns and help them access helpful programs. Two weeks ago, I hosted a jobs forum in central New Jersey. At both events, I heard from small business owners struggling to get the credit and loans they need. The Jobs for Main Street Act would help those small businesses by eliminating fees on Small Business Administration loans and by providing a strong guarantee for Small Business Administration loans to encourage more banks to lend to small businesses. Small businesses are the engine that drives our economy, and during rough economic times they are also the engine that drives job creation. This is one step that Congress is taking to help our small businesses, who generate jobs and develop the innovative products of the future.

I especially am pleased this bill provides funding to ensure that states can keep police officers, firefighters, teachers, and other State and local employees on the job. Without this funding, States would be forced to make the difficult decision between cutting jobs and services or increasing taxes. That is a choice that no state should have to make, especially in difficult economic times.

The Jobs for Main Street Act includes \$1.18 billion to help put more than 5,500 law enforcement officers on the beat throughout the United States, and \$500 million to retain, rehire, and hire firefighters across the United States. According to the International Association of Firefighters, nearly 6,000 firefighters have been laid off or are subject to layoffs. An additional 6,000 positions have been lost through attrition. The bill would provide \$18.9 billion to school districts and public institutions of higher education to retain or create 250,000 teaching jobs.

The recession has hit those between the ages of 16 and 25 particularly hard, and the unemployment rate is especially high for this group. The Jobs for Main Street Act would provide much needed job training and temporary public service positions to get these individuals back to work. The bill would provide \$200 million to hire an additional 25,000 AmeriCorps Members, this funding would enable those individuals to serve their communities while earning an education award to further their education or pay off student loans. With the teenage unemployment rate at its highest rate in history, 27.8 percent, this legislation would invest \$500 million to create 250,000 summer jobs for disadvantaged youth. H.R. 2847 would help up to 250,000 students stay in school by investing \$300 million in the College Work Study program, which supports low- and moderate-income under-

graduate and graduate students who work while attending college. Additionally, this legislation would provide \$750 million for competitive grants to support job training for approximately 150,000 individuals in high growth and emerging industry sectors, particularly in the health care and green industries that are adding jobs despite difficult economic conditions.

For those workers struggling to maintain their health insurance while in between jobs, this bill would extend the COBRA subsidy established in the Recovery Act, which has already benefited approximately 7 million Americans. This expanded COBRA subsidy would help workers for 15 months with their COBRA health insurance premiums and help more Americans access this benefit. Job losses also have caused State Medicaid rolls to swell. This bill temporarily would increase the Federal Government's contribution to Medicaid to ensure States are able to provide health coverage to these workers. This two-prong approach will help ensure millions of unemployed workers are able to maintain health coverage for their families.

When we talk about jobs, we are not just talking about the economy. We are talking about the dignity that comes from holding a steady job that supports your family. The Jobs for Main Street Act recognizes this, and would help our families in real ways. I urge my colleagues to support it.

Mr. ETHERIDGE. Madam Speaker, I rise in support of H.R. 2847, the Jobs for Main Street Act. Over the last year, our economy has sustained serious damage. Although recent signs are pointing to an upswing in the overall economy, millions of Americans are jobless or have seen their hours drastically cut. The national unemployment rate is 10 percent while in my State of North Carolina the figure is 11 percent statewide, and reaches as high as 13 percent in parts of my district. Action is needed to help solve this crisis.

H.R. 2847 builds on earlier actions taken by Congress to create jobs and get Americans back to work. This bill provides \$48.3 billion for highway construction, mass transit, and other infrastructure projects. Our Nation's infrastructure is in need of a serious update, and repairing our highways, renovating our schools, building new mass transit, and improving our airports and water and sewer facilities provides vitally needed jobs to Americans across the country. This bill also extends authorization for highway, transit, and safety funding, the Safe, Accountable, Flexible, Efficient Transportation Equity Act (SAFETEA-LU) through September of 2010. H.R. 2847 is a timely bill and gets funding in place for infrastructure projects that can start with the spring construction season.

I would like to thank Chairman RANGEL, and Speaker PELOSI, for their work to make Qualified School Construction Bonds more effective in this bill. I worked with Chairman RANGEL to create these bonds to put the Federal Government in partnership with local schools to meet their needs and help create jobs. Where these bonds have been issued, they are having a great impact on our economy and our communities. However, contrary to the intentions of the bill, only 15 percent of the 2009 QSCB bond allocations have been used to date. This bill allows State or local governments who

issue QSCBs or Qualified Zone Academy Bonds to choose a direct payment to cover the interest they would otherwise have to fund themselves, at no additional cost to the Federal Government since the payment is equal to the tax credit that would otherwise be received by the investor. As I have mentioned before, investing in school construction and modernization is one of the best ways to help Main Street, create jobs, and address pressing national needs. I am pleased that we were able to make this change in the bill to bring funds quickly to our local schools and communities.

H.R. 2847 also provides \$26.7 billion in aid for State and local governments. These funds are used to retain police, firefighters, teachers, and other workers who would otherwise lose their jobs due to State and local revenue shortfalls. This bill also provides assistance for those struggling the most in today's economy by extending the emergency unemployment benefits initiative for six months and the COBRA health insurance subsidy for an additional six months. H.R. 2847 includes \$26.1 billion in tax credits for other assistance initiatives like the Child Care Tax Credit and Social Security legal assistance. Finally, H.R. 2847 targets small businesses, the economic engines that create the majority of new jobs, by extending funds for the Small Business Administration to continue affordable long-term loans for new startups.

Not only does this bill create jobs and boost the economy, it does so in a fiscally responsible manner. It includes the previously House-passed PAYGO language and would be paid for in part by savings from the Troubled Asset Relief Program, TARP. It's time for Wall Street to help shoulder some of the burden on Main Street. I support strong job creation measures and I support H.R. 2847. I urge my colleagues to join me in voting for its passage.

Mr. CARSON of Indiana. Madam Speaker, as we consider this final important jobs creating measure, I would like to draw attention to one of the important pieces of the legislation: the extension of the eligibility period for COBRA benefits. Unemployment numbers continue to hover nationally at 10 percent; however, in many areas of the country these numbers are far higher. With these high numbers comes a decline in access to healthcare benefits and thus the need for this critical provision.

Congress passed the landmark Consolidated Omnibus Budget Reconciliation Act (COBRA) health benefit provisions in 1986, and it has maintained a successful program by providing a continuation of group health coverage for individuals and families that might otherwise have been terminated. And, through the economic stimulus package passed in February, a 65 percent subsidy was provided for COBRA benefits for nine months and has been a welcome relief for thousands of unemployed workers who otherwise would not have been able to afford the COBRA premiums.

Many individuals and families have already exhausted their subsidy and are trying to figure out how to maintain their health insurance coverage. The problem is especially felt by older Americans who are close to retirement age and not yet eligible for Medicare, as they

tend to use more health care services. Providing our constituents with the ability to maintain health coverage when they become unemployed is a key to ensuring these individuals do not fall through the cracks and end up without the health insurance they need. I urge passage of this important legislation.

Ms. JACKSON-LEE of Texas. Madam Speaker, I rise in support of H.R. 2487, the Jobs for Main Street Act. I salute my colleague Chairman OBEY for this bill that is the opening salvo in our effort to tackle one of the most important issues of the day facing our nation.

The bill redirects \$48.3 billion from Wall Street to help put people to work rebuilding our crumbling roads and bridges, modernizing public buildings, and cleaning our air and water. I'm happy that we gave the American people a gift with \$27.5 billion to make additional highway infrastructure investments. These projects support jobs in the short term while saving commuters time and money in the long term.

Another gift was made in the area of transit, with \$8.4 billion for public transportation investments including \$6.15 billion for urban and rural formula grants; \$500 million for capital investment grants for new or expanded fixed guideway projects; and \$1.75 billion in formula funds to address repair needs of existing subway, light rail and commuter rail systems. Public transportation saves Americans time and money, reducing carbon emissions by 37 million metric tons each year, which is timely as the world's eyes are centered on the debates in Copenhagen.

These gifts are news to the ears of my constituents. Let me share with you that in my district, which covers parts of the nation's fourth largest city, Houston, TX, our unemployment rate stands at nearly 9%. While this rate is more than a full percentage point below the national average, it should be noted that over 110,000 jobs were lost in the first 10 months of this year. Regrettably, a disproportionate share of those impacted by these job losses in my district have been African Americans and Latinos.

Yet, this "jobs disparity" is not limited to Houston; data from the Department of Labor indicates that African Americans throughout the nation today, in the era of President Obama, are still the last hired and the first fired. Specifically, the Bureau of Labor Statistics reports that the unemployment rate for African American men (20 and older) was 16.5 percent as of October of this year, and 12.4 percent for African American women at the same age level.

Historically, experts have suggested that the antidote to unemployment is education. However, Labor Department statistics appear to indicate that education, alone, does not level the playing field. In fact, higher education amongst African Americans may strangely enough even make it more difficult to obtain a job. For the first 10 months of this year, as the recession has dragged on, unemployment for least educated workers was the same for African Americans and the general population. However, in 2009, the unemployment rate for African American college graduates 25 and older has been nearly twice that of their Caucasian American male counterparts (8.4 percent com-

pared with 4.4 percent). According to a New York Times article published on December 1st, even African American college graduates with degrees from Ivy League schools such as Yale, my alma mater, are finding themselves in the ranks of the unemployed.

In addition to the racial dimension of this "jobs disparity," the recent economic downturn has focused a spotlight on a widening gap between employment rates among men and women, particularly in the African American community. It has been reported that since the nation's slowdown has been most pronounced in the manual labor sectors, men with the lowest levels of education have suffered the brunt of the unemployment crisis. CNN commentators recently described our current economic condition as a "man-cession."

According to a recent Bureau of Labor Statistics report, the unemployment rate for African American men aged 20 and older was 4.1 percent higher than the unemployment rate for African American women of the same age group, which was 12.4 percent. This gender unemployment gap among African Americans mirrors a similar gap between Caucasian and Latino Americans, thus demonstrating a nationwide trend.

Friends, we are in a battle for the hearts and souls of America, literally and figuratively. To win this battle, we must take bold action, like passing health care reform legislation in both chambers of Congress. Madam Speaker, I concur with the assessment that the health reform legislation voted out of this chamber last month in fact a "jobs bill."

As evidence of this, the Bureau of Labor Statistics reports that last month's slight dip in the unemployment rate was caused by the fact that for the third straight month, hospitals reported solid payroll additions, with 6,800 new jobs created. In the first 11 months of this year, the healthcare sector created 249,700 new jobs, an average of 22,700 new health care jobs each month, according to BLS' preliminary data. Since the start of the recession in December 2007, overall 7.9 million people in America have lost their jobs, while the healthcare sector has created 613,000 jobs.

In an article published in HealthLeaders Media, it was reported that the healthcare sector—from hospitals, to physicians' offices, to residential mental health homes, kidney dialysis centers, and blood and organ banks—grew by 21,000 payroll additions in November and 613,000 payroll additions since the start of the recession in December 2007. The home healthcare services sector reported 7,300 payroll additions in November, BLS preliminary data show.

Recognizing this Madam Speaker, I am working with health care and labor leaders to craft a jobs bill that create innovative new retraining programs in partnership with our Historically Black Colleges and Universities like Texas Southern University in my District or Howard University, here in Washington, DC. These training programs would focus on retooling workers for jobs in the growth sectors such as health, biotech, and information technology. In addition to funding for job training, I propose that we provide stipends to those who are unemployed and who participate in training programs to assist them in caring for their families. Along with this, my jobs bill

would allow unemployed workers participating in job retraining to continue receiving unemployment benefits.

As a senior member of the Judiciary Committee, I am also working with the DOJ to incorporate into my jobs legislation a measure that would assist ex-offenders who are returning to the job market with strikes against them. In addition to eliminating any barriers for ex-offenders, I am also studying how we can encourage states to suspend criminal prosecution of fathers and other parents who are delinquent in child support so long as they are making good faith efforts to find jobs in this difficult employment market.

Madam Speaker, I also propose that we task the Department of Labor to expand its definition of the unemployed to cover not only those currently receiving unemployment compensation, but also those who have run out of unemployment insurance, known as the long term unemployed. I suspect that if we had accurate data that captured the entire unemployment picture, we would see jobless figures of upwards of 25–30 percent.

In addition, Madam Speaker, I also plan to propose we offer assistance to the underemployed, including thousands of lawyers and other professionals who work as part-timers or temp workers. Many of these professionals split their time between working for others and operating their own small firms. Furthermore, it has been noted that while larger firms are enjoying the benefit of government funded bailouts, our African American law firms, accounting firms, investment banking firms and media outlets are being left out of the funds directed at stimulating Wall Street. As Comcast and NBC Universal and other firms seek government permission to merge, I intend to work with these companies to ensure that our African American businesses are included, not left out of the deal flow.

Another jobs initiative would focus on creating apprentice and internship programs managed by cities and nonprofits like the Urban League. This is a take off of a Department of Labor that was very successful in the 1970s, which helped our nation rebound from its last recession.

Madam Speaker, during the 1930s–40s, the FDR Administration developed the Work Progress Administration (WPA). The WPA created thousands of jobs and helped lift our nation from depression. I am drafting legislation that would create a WPA for the 21st Century. This concept involves providing stimulus dollars to several federal agencies such as Interior, Transportation, and HHS to fund large scale projects.

Under my legislation, the new WPA would include modern day infrastructure and other projects including making broadband wireless Internet service available for all Americans, not just in wealthier suburban and downtown districts. In addition, we should create high speed rail and environmentally friendly highways and byways.

Finally, I plan that we work with HHS and the Energy Department to build new Green Hospitals across the country. This project would ensure that our nation's healthcare facilities are themselves healthy.

Madam Speaker, many of our unemployed constituents in Houston and around the nation

are asking us a simple question: how long, how long before I can find a job? I say to them, not long . . . help is on the way. With the introduction and passage of jobs legislation offered by myself and the rest of the Congressional Black Caucus, help for the unemployed and underemployed, help for small businesses, is on the way.

I ask my colleagues to join me in supporting H.R. 2847, the Jobs for Main Street Act.

The SPEAKER pro tempore. All time for debate has expired.

CALL OF THE HOUSE

Mr. OBEY. Madam Speaker, pursuant to clause 7 of rule XX, I move a call of the House.

The SPEAKER pro tempore. The previous question being ordered, the Chair notes the absence of a quorum in accord with clause 7(c) of rule XX and chooses to entertain a motion for a call of the House pursuant to clause 7(b) of rule XX.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

[Roll No. 990]

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the call). Although some of the amber lights in the display over the south gallery are not operational, the other sys-

tem displays confirm that all of the Members listed in the affected column have recorded their presence.

□ 1845

The SPEAKER pro tempore. 429 Members have recorded their presence. A quorum is present.

JOBS FOR MAIN STREET ACT, 2010

The SPEAKER pro tempore. Pursuant to House Resolution 976, the previous question is ordered.

The question is on the motion offered by the gentleman from Wisconsin (Mr. OBEY).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. LEWIS of California. Madam Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, this 15-minute vote on the motion to concur will be followed by a 5-minute vote on the motion to suspend the rules and pass H.R. 4194, if ordered.

The vote was taken by electronic device, and there were—ayes 217, noes 212, not voting 6, as follows:

[Roll No. 991]

Mr. BAIRD changed his vote from “no” to “aye.”

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated against:

Mr. RADANOVICH. Madam Speaker, I was unable to make today's votes on the House floor due to a family illness. Had I been present I would have voted as follows:

“No” on rollcall vote No. 991, on the motion to adopt H.R. 2847, the Jobs for Main Street Act.

LAW STUDENT CLINIC PARTICIPATION ACT OF 2009

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 4194.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Tennessee (Mr. COHEN) that the House suspend the rules and pass the bill, H.R. 4194.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

LOCAL COMMUNITY RADIO ACT OF 2009

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 1147, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Virginia (Mr. BOUCHER) that the House suspend the rules and pass the bill, H.R. 1147, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

REAPPOINTMENT AS MEMBERS TO UNITED STATES-CHINA ECONOMIC AND SECURITY REVIEW COMMISSION

The SPEAKER pro tempore. Pursuant to section 1238(b)(3) of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (22 U.S.C. 7002),

amended by division P of the Consolidated Appropriations Resolution, 2003 (22 U.S.C. 6901), and the order of the House of January 6, 2009, the Chair announces the Speaker's reappointment of the following members on the part of the House to the United States-China Economic and Security Review Commission, effective January 1, 2010:

Ms. Carolyn Bartholomew, Washington, D.C.

Mr. Jeffrey L. Fiedler, Great Falls, VA

RESIGNATION FROM THE HOUSE OF REPRESENTATIVES

The SPEAKER pro tempore laid before the House the following resignation from the House of Representatives:

CONGRESS OF THE UNITED STATES,

December 16, 2009.

Hon. NANCY PELOSI,
*Speaker of the House of Representatives, H-232,
U.S. Capitol, Washington, DC.*

DEAR SPEAKER PELOSI: This letter is to formally notify you that on October 26, 2009 I sent a letter to Governor Charlie Crist of Florida stating that I will be resigning as the United States Representative from the 19th Congressional District of Florida at the end of the day on January 3, 2010.

I have been honored to serve in the United States House of Representatives for the past 13 years, and I will be eternally grateful to the residents of Florida's 19th Congressional District for giving me the opportunity to be their representative in Washington. When I leave Congress this January, I will serve as the president of the Center for Middle East Peace and Economic Cooperation, where I will take on the critical challenges facing the Middle East. In the coming years, Israeli, Palestinian, and Arab leaders will be faced with monumental decisions that will dramatically affect the region and the entire world for decades. I am confident that now is the best time for me to dedicate myself fully to these significant issues.

While I am deeply saddened to leave this august body, I am looking forward to continuing much of my work in Congress in a different capacity in my new role with the Center for Middle East Peace. I especially want to thank you personally, Speaker Pelosi, for your extraordinary leadership during these difficult times for our nation as well as the kindness and courtesy you have always extended to me. I have particularly admired the dignified manner and deep sense of conviction that you display as Speaker of the House. The opportunity to work with you and all our colleagues in the House has been a great privilege indeed, and I hope to continue these friendships for many years to come.

With warm regards,

ROBERT WEXLER.

HONORING MS. PATRICIA FISHER

(Mr. MEEKS of New York asked and was given permission to address the House for 1 minute.)

Mr. MEEKS of New York. Mr. Speaker, I rise today to honor a remarkable woman. Ms. Pat Fisher, who is my office manager, who is retiring next week after 33 years on the Hill.

She came into my office not too long ago and said, You know, I've been thinking about it. I served 11 years with your predecessor, Floyd Flake, and 11 years with his predecessor, Joe Addabbo, and now 11 years with you, and it's time for me to go home to my family.

And she has done it with such grace and such style. She is indeed a treasure and comes here with her father, who served in this House for 50 years. They love this place.

But let me tell you that Pat Fisher, she is a time-honored treasure who will truly be missed. She has been the gatekeeper for the Sixth Congressional District of New York for 33 years. And not only will Washington and this House miss her, but the 640,000 people who comprise the Sixth Congressional District of New York. We will miss her dearly. We wish her well and much success. Our loss will be her husband, Joe's, gain, and the rest of her family's: her daughter, her son, and her grandchild.

We wish you all the luck in the world. Thank you for your service to this great Nation and to the Sixth Congressional District.

TRIBUTE TO STAFF SERGEANT DENNIS J. HANSEN

(Mr. JORDAN of Ohio asked and was given permission to address the House for 1 minute.)

Mr. JORDAN of Ohio. Mr. Speaker, I rise today to honor the life of one of America's fallen heroes, Army Staff Sergeant Dennis J. Hansen of Scottsville, New York, and formerly of Indian Lake, Ohio.

Born in Salt Lake City, Staff Sergeant Hansen was stationed at Fort Drum, New York, and assigned to the 1st Battalion, 32nd Infantry Regiment, 10th Mountain Division. He spent more than 8 years in the Marine Corps before joining the Army.

During his military career, Dennis served deployments in Africa, Kosovo, Japan, Panama, Cuba, Iraq, Afghanistan, and the Mediterranean.

He died on December 7, 2009, as a result of injuries sustained while serving his country in Afghanistan in support of Operation Enduring Freedom. Dennis, age 31, is survived by his loving family, including his wife, Jennifer; their children; and his parents, Dwight and Bonnie.

In reading of Dennis's life and speaking with his family members, it was clear he had a positive impact on the lives of everyone around him. He was a leader, a family man, an accomplished wrestler in his youth, and a champion in every sense of the word. He bravely stood up and volunteered to serve. He gave his life in defense of his family, his community, his State, and his Nation. For this we owe him and his family a great debt of gratitude.

Dennis will be missed each and every day. But the strength of his character and the courage he demonstrated through his service will live on.

□ 1915

TRIBUTE TO THE HONORABLE ROBERT WEXLER

(Mr. COHEN asked and was given permission to address the House for 1 minute.)

Mr. COHEN. Mr. Speaker, today ends the first year of the 111th Congress, a Congress that's done much to try to preserve this country's economic security, improve its place among the nations of the world, worked against the global warming problems we have, and protect our planet.

So much of what we've accomplished has been a group effort, and one of the people that's been a part of that group is Congressman ROBERT WEXLER of Florida. I was privileged to sit next to Congressman WEXLER in the Judiciary Committee. Congressman WEXLER served 13 years in this House, and today he cast his last vote and walked off this floor.

I watched him as he walked off. I was sad to see him leave because he was an outstanding Member of Congress like so many people are here who are dedicated to making this country better, working hard, speaking his opinion to try to make this country a better place. I'm proud to have served in this Congress and to have served with ROBERT WEXLER. I'm proud to be a Member of this Congress, and I want to say to ROBERT WEXLER, you've been an outstanding Congressman, and this Congress will miss you.

OUR UNCONSCIONABLE NATIONAL DEBT

(Mr. COFFMAN of Colorado asked and was given permission to address the House for 1 minute.)

Mr. COFFMAN of Colorado. Mr. Speaker, the Democrat majority voted today to raise our national debt limit by \$290 billion. That vote we took today to raise the debt limit, rollcall vote 988, served as a terrible reminder of all of the votes we didn't take. The debt limit increase vote is the direct opposite of the votes we should have cast earlier this year—the votes to curb spending, the votes to cut pork, the votes for real economic stimulus, the votes for meaningful fiscal discipline.

Today our national debt is \$12.13 trillion. More exactly, it is \$12,134,970,556,795.04. Since January 6, 2009, the start of this 111th Congress, the national debt has increased by \$1.4 trillion. I am sadly familiar with these numbers because I began to place the amount of the national debt in the CONGRESSIONAL RECORD on a daily basis

since last month as a reminder to all of us. We need to stop this borrowing and spending. I urge all of my colleagues to embrace fiscal discipline.

JOBS ARE BEING CREATED IN OUR COMMUNITIES

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise today to indicate that jobs are being created in our communities. And if anyone thinks that the loss of 109,000 jobs in my community in Harris County has not hurt families during this season, then they need to be aware of the necessity of the various people who need work.

I'm very proud that in the Defense bill that was passed, we have created jobs. We have created a number of jobs, and those jobs have been the kind of jobs that will serve the entire community: solar jobs, \$800,000; technology jobs, \$1 million; Post-Traumatic Stress Disorder Center for the Riverside General Hospital that will help our local soldiers, that is \$1 million.

All total, \$4.8 million have been secured by the 18th Congressional District to provide jobs in Houston to ensure minority research or research on health issues, to ensure green technology jobs, to put people to work.

Mr. Speaker, this is the beginning of a great day when we provide jobs for the 18th Congressional District and all of America. Merry Christmas to my constituents, as I've said, and Merry Christmas to our first family and all that they have done for America.

WHO DAT!

(Mr. CAO asked and was given permission to address the House for 1 minute.)

Mr. CAO. Mr. Speaker, the New Orleans Saints are having an historic season. Their success has provided our city so much hope that I wanted to give constituents a chance to honor them.

Today's statement is from Michael DesJardins of New Orleans. Michael writes:

"I believe! Finally. It's been 40 or so years of hope and disappointment—much more disappointment. As I bask in the glow of another victory by the Saints, I have finally let my heart believe that this could be the year. They have the spirit, the talent and the determination. They seem to like and support one another. Their success is not a product of stardom but of common effort by the whole team. They have transformed the Saints into a powerful organization that lifts up the whole community. We can all learn from them.

"Long-suffering, leading to hope, only to be dashed by the heartbreak of

defeat and disappointment. This story of the Saints' past could be the story of our city government.

"Our Sainted team has been transformed into a constellation of bright shining stars. Dare we believe that New Orleans can share in that transformation?"

Thank you, and I yield back. Who Dat!

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. GARAMENDI). Under the Speaker's announced policy of January 6, 2009, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

CREDIT IS FROZEN IN THIS COUNTRY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. KAPTUR) is recognized for 5 minutes.

Ms. KAPTUR. Mr. Speaker, the job market is bleak. A major reason is that bank credit is frozen in this country still. Business can't get loans to hire and function. The Federal Deposit Insurance Corporation reports that lending has declined for the last five consecutive quarters.

This chart amply demonstrates that. It was in the Washington Post yesterday.

Credit in the real banking sector has dried up. I'm not talking about the political TARP bailout fund banking sector being managed by Treasury. I'm talking about the impact of that on the rest of the banking system where credit is simply not being lent across this country. Businesses are clamoring to get loans, only to be rejected from coast to coast. The normal banking sector is not functioning. TARP destroyed over \$600 billion of real bank capital as the Treasury moved itself into the driver's seat of picking winners and losers. Wall Street banks literally, and the way they've been handled, have blunted real economic recovery as businesses cannot get loans to conduct their affairs, to hire new employees, to pay current employees or buy equipment because they simply don't have access to credit.

Sadly, what's happened over this period of time is our local banks and the non Big 5 banks in the country have tried to compete in this economy. The Big 5—the ones that got the TARP funds from the taxpayers—have gone from holding 30 percent of the deposits in this country to 40 percent. They're getting bigger, which means it's even harder for the other thousands of banks across this country to compete.

Our financial system started seizing up after TARP was passed when normal banks refused to lend to each other in overnight transactions, and this has

just gotten worse ever since. They lost confidence in the banking system itself.

So, where does small business go to get operating loans? The Washington Post gave us a little insight on that yesterday, and I wish to place that article in the RECORD. Some of what it says is:

"The administration's options continue to be constrained by the belief of many officials that meddling in the details of banking is counterproductive."

Well, what do they think the TARP is? It's ultimate meddling. It's total meddling. And, in fact, it prevents normal lending from being restored as banks across this country see that some banks get a special deal if they go to the Treasury and others get thrown aside or merged. A lot of those big banks have used the money to buy other banks, making our banking system much less competitive, much more concentrated.

While the White House has raised the temperature of its rhetoric in recent weeks about what's going wrong, their policy measures simply have not followed. Indeed, they extended the TARP for another year.

Now there are some activists across this country calling on the President to do much more. One of them, Reverend Jesse Jackson, left a meeting in Atlanta on Monday with ministers and others who are facing foreclosure even on their churches and homes. The Reverend Jackson, as the article reports, called on President Obama to use future Federal fair lending laws to force the banks to help struggling communities. He said, and I quote, "Banks got Federal money at zero interest, but homeowners and churches are paying pre-TARP prices for their losses. The banking system must be made accountable. The Attorney General should have been in that meeting as well." I agree with Reverend Jackson.

"The banking industry," the article says, "has reduced lending"—as this chart demonstrates—"for five consecutive quarters, even as it has regained profitability thanks to vast public aid from the people of the United States. The amount of money on loan from banks fell by about \$600 billion, or 7.2 percent, from September 2008 to September 2009, according to the Federal Deposit Insurance Corporation."

□ 1930

This is not a recipe for economic recovery, not in the real economy. This is the second time the President has convened bank executives to urge their increased lending. The first was in March. But you know what the article says, it did little to slow the slide.

There are two actions that immediately could make a difference. One deals with the President meeting with the Securities and Exchange Commission and the Financial Accounting

Standards Board and looking at mark-to-market accounting, which has destroyed over \$600 billion of capital in our financial system. Credit is frozen. The very banks we have bailed out have decreased their lending over these five quarters that I've talked about, and Treasury, who is in charge of the TARP, literally is picking winners and losers.

We need reform of mark-to-market accounting, and we need somebody in the administration to look at the Making Home Affordable program to make sure that we allow people to remain in their homes so we don't have increasing foreclosures, particularly over these winter months. The problem is that they can't see the forest because the big trees, the big five, are blocking their view of what is happening across this country.

[From the Washington Post, Dec. 15, 2009]
IN WHITE HOUSE MEETING, OBAMA CALLS ON
BANKS TO INCREASE LENDING

(By Binyamin Appelbaum and Michael A. Fletcher)

President Obama exhorted the nation's biggest banks on Monday to make "extraordinary" efforts to increase lending, even as some of those firms are racing to distance themselves from government control.

The nation's most powerful bankers sat in the Roosevelt Room at the White House and nodded as the president spoke, but some executives and industry officials said afterward that increasing lending is largely beyond their ability.

Meanwhile, Citigroup and Wells Fargo announced plans Monday to spend billions of dollars—not on lending, but to repay federal aid. Citigroup chief executive Vikram Pandit missed the White House meeting to rally investor support.

Bank executives say they itch to make profitable loans, as many as possible, but are struggling to find qualified borrowers. They also say that the administration is asking for increased lending even as it pursues financial reforms that will limit the ability of banks to make loans.

Some note that a recession caused by an orgy of lending must be solved in part through greater restraint.

Obama has come under increasing pressure to demonstrate his concern for the plight of Americans caught in a rising tide of joblessness, even as the larger economy appears headed to recovery. The White House portrayed Monday's meeting as a chance for the president to channel the anger of Americans who think federal programs intended to revive the broader economy have succeeded only in restoring Wall Street's profitability.

"America's banks received extraordinary assistance from American taxpayers to rebuild their industry," the president said after the meeting. "And now that they're back on their feet, we expect an extraordinary commitment from them to help rebuild our economy."

Obama added that he expects not just effort but "results."

Some administration officials privately conceded that borrowing always declines during recessions, and that they are struggling to find effective ways of spurring new lending. Furthermore, the administration's options continued to be constrained by the belief of many officials that meddling in the details of banking is counterproductive.

The administration also is surrendering a measure of leverage over the industry as banks repay federal aid provided under the Troubled Assets Relief Program—although officials are eager to shed the political baggage of aiding big Wall Street firms. With the announcements Monday by Citigroup and Wells Fargo that they would repay federal aid, all of the nine major banks that got money late last year will be on track to pay it back.

As a result, while the White House has raised the temperature of its rhetoric in recent weeks, policy measures have not followed.

Some activists are calling on the president to do more. Just after leaving an Atlanta meeting Monday with ministers and others, some of whom are facing foreclosure on their churches and homes, the Rev. Jesse Jackson called on Obama to use federal fair-lending laws to force the banks to help struggling communities.

"Banks got federal money at zero interest, but homeowners and churches are paying pre-TARP prices for their loans," Jackson said. "The banking system must be made accountable. The attorney general should have been in that meeting."

The Congressional Black Caucus and other Democrats, who are concerned that administration efforts to slow foreclosures have come nowhere near meeting their stated goals, have also been pressing for additional steps to help distressed homeowners.

The banking industry has reduced lending for five consecutive quarters, even as it has regained profitability thanks to vast public aid. The amount of money on loan from banks fell by about \$600 billion, or 7.2 percent, from September 2008 to September 2009, according to the Federal Deposit Insurance Corp.

The White House initially portrayed the meeting with bankers as an opportunity to discuss strategies for increasing lending. But the president set a sterner tone over the weekend, telling the CBS show "60 Minutes": "I did not run for office to be helping out a bunch of fat-cat bankers on Wall Street."

One day later, the president was more temperate, saying that he did not intend to "vilify" any company or industry and that he appreciated existing efforts to increase lending, such as reviewing rejected applications to see whether loans can be approved. The president suggested Monday that banks should review applications three and four times if necessary.

Bankers also emerged from the meeting in a conciliatory mood, saying they share the administration's goals.

"Every bank in that room talked about adding many, many small-business originators and setting very aggressive goals for small-business lending next year," said Richard Davis, chief executive of US Bancorp.

Bank of America plans to increase small-business lending by \$5 billion next year. J.P. Morgan Chase has committed to an increase of \$4 billion.

"This is simply what a bank should do," J.P. Morgan chief executive Jamie Dimon said in a statement released before the meeting.

This is the second time the president has convened bank executives to urge increased lending. The first meeting, in March, did little to slow the slide. The president said Monday that he continues to get "too many letters from small businesses who explain that they are creditworthy and banks that they've had a long-term relationship with are still having problems giving them

loans." But the White House on Monday defended the value of the rhetoric.

"I think that the bully pulpit can be a powerful thing," said press secretary Robert Gibbs.

Obama said he also discussed the need for financial reform, urging the bank executives not to lobby against proposals such as the creation of an agency to protect borrowers from lending abuses. And the president said he once again urged moderation in executive compensation.

"I made it clear that it is both in the country's interest and ultimately in the financial industry's interest to have updated rules of the road to prevent abuse and excess," Obama said afterward. "I have no intention of letting their lobbyists thwart reforms."

Bank executives, however, say that they strongly favor reform—they just differ with the administration about some of the particulars.

The guest list for the meeting included the top executives of 12 of the nation's largest banks, but there were three late scratches. Goldman Sachs's Lloyd C. Blankfein, John Mack of Morgan Stanley and Citigroup's Richard Parsons participated in the meeting by telephone because the flight all three had planned to take from New York to Washington was delayed by fog.

AMERICANS MAKE THIS COUNTRY GREAT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Ms. FOXX) is recognized for 5 minutes.

Ms. FOXX. Mr. Speaker, at the close of 2009, as we look to and prepare for a new year, I'm prompted to call attention to the remarkable American people who have, once again, weathered a difficult year with dignity and toughness. Sometimes the Washington establishment forgets that the solutions to America's problems lie outside this capital city.

Yes, Americans from almost every walk of life are tightening their belts and making do with less this year, but Americans continue to be an extraordinarily resourceful people who inspire me in my work every day.

As we prepare to celebrate Christmas, entering in a new year, I hope we can all draw inspiration from the American people. We live in a Nation of innovators and hardworking entrepreneurs. Their resourcefulness is unlimited. The spirit of American opportunity lives and thrives among them.

And let's not forget the North Carolinians who, with their characteristic generosity and work ethic, illustrate the greatness at work in America, even in seasons of considerable difficulty. I look to them as a source of inspiration and hope. People like those who call North Carolina home have always been the best hope for the preservation of our tradition of individual liberty and government by and for the people, whether in good times or bad.

Mr. Speaker, Washington would do well to stop and watch, listen, and learn from everyday Americans as they

go about their lives and do the things that help make our Nation great.

May God continue to bless us all.

AMERICANS WANT THEIR COUNTRY BACK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE of Texas. Mr. Speaker, as we end the month, the year, the decade, this session of Congress, some observations:

Fifteen million Americans are unemployed. We have 10 percent unemployment and higher throughout the United States.

Spending is totally out of control. The country is broke, so we borrow money from China and Japan, and it seems they own our Nation. And the taxacrats have not seen a tax bill they didn't believe in.

Domestic policy is simple: Spend money, spend money we don't have, then borrow it, and then raise taxes on the American people.

The government's financial system is also simple: If it moves, tax it; if it keeps moving, regulate it; and if it stops moving, then subsidize it. Today we raised the debt ceiling so more money can be spent as soon as we get back in January. Now we're over \$12 trillion in debt.

The House has turned our Nation's health care over to the government. You know, the government who tried to run a health care vaccine program that was a total failure, where school kids didn't get the vaccine while Wall Street fat cats did. And yet the Federal Government wants to now run America's health.

The House voted on a cap-and-trade tax bill that will add a tax on energy consumption for all Americans and punish energy consumption and encourage domestic oil producers to go somewhere else.

Congress has given more money away to foreign countries that hate us while ignoring problems at home.

Many Members of Congress have already left on planes, headed to Denmark to talk about how we must control the climate because man is the evildoer and scourge of the Earth. Of course, the Al Gore warmers have been caught this year hiding data that shows reasonable minds disagree with their theory of global warming. Plus, the warmers want to force Americans to spend millions of dollars to implement changes on their yet unproven theories.

The government, in essence, has taken over Wall Street, the financial industry, the automobile industry. You know, General Motors needs to change its name to Government Motors. The Federal Government has taken over the mortgage industry, the banks, and the salaries of some executives.

More American freedom and liberty has been stolen from us, and more assaults on the Constitution have occurred than at any time in our history. And today, the radical open border crowd has announced new legislation, arrogantly demanding amnesty for millions of illegals in this country with, also, visa preferences for those nations with the most foreigners in the United States. So much for border security.

We have a new military strategy that's implemented. It's called the surge and retreat plan. That strategy is in Afghanistan where we're going to surge and send a bunch of troops in, but yet in 18 months, according to the administration, they're coming home. No strategy like that has ever been used in military history before.

And of course Gitmo, down there in Cuba where we house terrorists, it's getting a new ZIP Code. We're moving it to the United States and putting it in Illinois. And of course the country has seen that we've prosecuted our Navy SEALs and given rides to terrorists.

What an odd year it's been. It is the arrogance of power that says government is the answer to everything. Our lives, our fortunes, and our sacred honor have been turned over to government opportunists. Reagan said that government is the problem, not the answer, and I agree with him.

But, Mr. Speaker, not all is gloom, doom, and despair. There is great hope. The American people are not fooled. People in our country now fear the government, and people are mad, and people are involved. And even though the D.C. crowd pays no attention to them, I've got news for the elites: The people are not going away in the darkness of the night. They will not give up without a fight, because the American cause is righteous, and the people's actions are just.

Government should not underestimate the American soul and the American spirit. They are a force to be reckoned with. Mr. Speaker, the people want their country back, and they will get it back. After all, the Constitution says, "We the People," not, "We, the subjects."

And that's just the way it is.

HONORING SPECIALIST MICHAEL COTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Louisiana (Mr. CASSIDY) is recognized for 5 minutes.

Mr. CASSIDY. Mr. Speaker, this may be the last address given on the floor of the House of Representatives this year. It is fitting that it is a tribute to Michael Cote, a specialist who gave his life while fighting to defend us in Iraq.

Specialist Cote was from Denham Springs, Louisiana. After graduating from Denham Springs High School, he

met his wife, Ashlee, when the two were in basic training. They passed notes back and forth during their training and snuck off to church services to be together on weekends. Just days after basic training ended, the two soldiers were married.

Michael was serving in Iraq when their daughter, Brooke, was born in March, but he found a way to be on the phone with Ashlee during the delivery. She delivered in Baton Rouge.

Ashlee tells me that Michael liked to fish and hunt. She says he was an all-around country boy who liked to goof around but always knew when it was time to be a soldier.

Michael was serving as a crew chief when his Black Hawk helicopter went down in Balad, Iraq, in September.

On the day of his memorial service, the people of Denham Springs lined the streets to wave American flags as the procession went by. Families brought their children and grandchildren out to honor Specialist Cote, a tribute to a man friends and family in Denham Springs say they knew would grow up to be a soldier.

His mother, Carol Bass, tells me that she visits the grave daily.

Mr. Speaker, we mourn with Ashlee, Brooke, and Mrs. Bass the loss of Specialist Cote, but let us celebrate his patriotism, his dedication to country, his sacrifice on behalf of our security.

We are forever indebted to the men and women of our armed services, soldiers like Michael Cote, who put themselves in harm's way so that we may live freely and in peace.

REFLECTIONS FROM 2009

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

Ms. JACKSON-LEE of Texas. Mr. Speaker, in the rush of a debate in an earlier 1-minute, I was not able to capture the somberness of the moment. As our colleagues have finished their work and have, in fact, recognized the need of this Nation, I think it is important to summarize how important it is to keep our minds focused as we return back in the new year.

We know that this country is a resilient country. People are tough, and they've gotten tougher. We are blessed by the fact that we have a country of laws. We're a democratic Nation. If there is oppression in our Nation, we have a court system to seek to be redeemed. We have the amenities of life, technology, transportation, clean water. But in every country comes a time when things are not as good as they need to be, and I think we should clarify what has been done over these last couple of months.

I was here during the past two Presidential terms. When I say "two Presidential terms," the past and former

Presidents. I voted for the 1997 Budget Reconciliation Act that generated an enormous surplus and created an opportunity for millions of our children to be insured. That was 1997. We had a surplus as that previous administration, the Clinton administration, left office.

We had a tragedy on 9/11, and we had to respond to that enormous tragedy, a terrorist act, and I joined with my colleagues to respond to that by allowing our Nation to defend itself by going into Afghanistan. I did not support the detour into Iraq. However, I support the men and women, and I mourn for those families who have lost loved ones.

So what have we done over this year? We have fought for America, and that is why there was the political sacrifice. Some people say that's your job, to vote for the TARP—not willingly. We didn't want a fat-cat bill. We didn't want a bill that paid people to stuff their pockets. We wanted to ensure that businesses stayed open, that we had the opportunity for small businesses, my friends and neighbors, my constituents to get money to keep those jobs.

All right, it wasn't perfect, but the numbers don't fib. We did create jobs. We kept businesses open. The President has gone to the mat by saying to these fat cats, Look, we are in a capitalistic system. I understand that. But he's gone to them and said, You have to lend to small businesses.

□ 1945

Mr. Speaker, we have done a lot. And in doing a lot, we have provided the opportunity for the kinds of dollars coming to the districts.

So let me just say this: \$48 billion in highways, transit and other infrastructure. We are going to be able to stop the bleeding by keeping our teachers, our police, our firefighters and job training. That's \$27 billion. We are going to guarantee the loans, guarantee loans to ensure that we will have the opportunity to loan money to our small businesses. That's an important statement.

And I wanted to be sure by looking at what I have to let my constituents know of the kind of projects that come out of the Defense bill. Because someone would make the argument, why support a Defense bill? Let me tell you. I've already spoken about the first post-traumatic stress disorder center in an African American hospital for \$1 million, \$800,000 for the Center for Research on Minority Health-Prostate Cancer research project, jobs; \$800,000 for high-efficiency solar energy generation and storage, jobs; \$1.6 million for science, technology, engineering and mathematics initiative, jobs. And then \$1 million with a private collaborator that is independent of Federal dollars that will give \$1 million to one of the

poorest school districts in my community, public and private partnership, Mr. Speaker.

Let us not leave this place in shame. We came from the deep darkness of an economic recession. We have saved jobs. We are creating jobs. We are moving forward. And I want to stop reading articles about mothers who are on the front pages of our newspapers who cannot turn on the lights and cannot feed their children.

Let me wish everyone, again, as I have done, a happy holiday and say that this Congress deserves the recognition for those who have put themselves on the line to be able to help the needy. I look forward to us coming back, passing health care, and going on with the jobs effort.

REVISIONS TO THE ALLOCATIONS AND BUDGETARY AGGREGATES ESTABLISHED BY THE CONCURRENT RESOLUTIONS ON THE BUDGET FOR FISCAL YEAR 2010 AND THE PERIOD OF FISCAL YEAR 2010 THROUGH 2014

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. SPRATT) is recognized for 5 minutes.

Mr. SPRATT. Madam Speaker, under sections 421(a)(4) and 423(a)(1) of S. Con. Res. 13, the concurrent resolution on the budget for fiscal year 2010, I hereby submit for printing in the CONGRESSIONAL RECORD a revision to the budget aggregates and allocations for certain House committees for fiscal year 2010 and the period of fiscal years 2010 through 2014. These adjustments respond to House consideration of the House amendment to the Sen-

ate amendment to the bill H.R. 3326, Making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes. Section 1011 of the House amendment includes funding for Medicare improvements. The House amendment also designates certain funding for overseas deployments and other activities pursuant to S. Con. Res. 13. Corresponding tables are attached.

This revision represents an adjustment for the purposes of sections 302 and 311 of the Congressional Budget Act of 1974, as amended. For the purposes of the Congressional Budget Act of 1974, as amended, this revised allocation is to be considered as an allocation included in the budget resolution, pursuant to section 427(b) of S. Con. Res. 13.

Any questions may be directed to Ellen Balis or Gail Millar at 226–7200.

BUDGET AGGREGATES
[On-budget amounts, in millions of dollars]

	Fiscal Year 2009	Fiscal Year 2010	Fiscal Years 2010–2014
Current Aggregates: ¹			
Budget Authority	3,668,601	2,882,149	n.a.
Outlays	3,357,164	3,002,606	n.a.
Revenues	1,532,579	1,653,728	10,500,149
H.R. 3326 (Department of Defense Appropriations):

JOB CREATION THEORIES

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Missouri (Mr. AKIN) is recognized for 60 minutes as the designee of the minority leader.

Mr. AKIN. Mr. Speaker, it's a treat to be able to join you and my col-

leagues and fellow Americans that might possibly be tuned in. This is a bit like the last day of school. We think the voting is done for this year, and yet the work is not done. In fact, America, among other things, is suffering from a considerably high level of unemployment. And that was going to be the topic for this evening.

I want to talk a little bit about employment, spending and the different theories that people have as to how jobs are created. And there are some theories out there that don't work very well, and there are some that do work well. And history tells us the difference between the two.

I thought what I might do this evening would be to start with something which, in a way, may seem remedial. It should seem fairly basic because most Americans have plenty of common sense. And I think that it's important, though, to start at the basic level and start defining your terms as we talk about the problem of unemployment.

Now, there are certain series of things, I have identified six—there may be other ways economists might look at it differently—but there are six things that are job killers. To start with, we need to understand where jobs come from. Jobs come from businesses. What sort of businesses? Well, if you take a look at businesses that have 500 employees or less, those businesses employ about 90 percent of the Americans that have jobs in the private sector. Five hundred or less employees, those, many people would say, are small businesses.

Well, what are the things that these small businesses need in order to create these jobs, 90 percent of the jobs in America? Well, the first thing is that there are certain things that are killers of jobs. The first is economic uncertainty. Let's talk about that for just a minute. Economic uncertainty. Put yourself in charge of a business. Say you have 100 employees and you're manufacturing some product, and you just really don't know what's going to happen with the economy. And so there is a level of uncertainty. Maybe political things are going on which increase your level of uncertainty. You don't know whether or not perhaps we are going to go into some kind of economic slump.

And so what are you going to do if you are a president of a small business? Well, what you're going to do is, in the State of Missouri, they call it hunkering down. You say, I'm not going to take a lot of risks; I'm going to prepare for some sort of an economic storm, or at least be prepared that I'm not too extended. I don't want to take a lot of risk when there is economic uncertainty.

And what sort of risks might those be? The risk might be to add a wing on your building, to buy a new machine, to start a new process, to patent a new invention and decide to try to produce it and sell it on a market. All of those things create jobs. But you're not liable to take a high-risk position if there's a high level of economic uncertainty. So economic uncertainty is a job killer.

The next thing is consumption reduction. That's a fancy word for saying you got a business slowdown. People aren't buying as much stuff. Everybody is worried. People are having a hard time economically. They are not spending as much money. People aren't making investments, and so your business is going along with all the other

businesses around you, when you are in a time when there is a recession going on, it's an economic uncertainty. It's a form of economic uncertainty, I suppose, and that is you're thinking, hey, it used to be last year we had orders for 100 widgets. But this year, it looks like we are only getting orders for 50. So you're not going to be thinking about getting a machine that will make widgets more efficiently. You're not going to be thinking about making investments in adding to the building so you can increase production because you're expecting that you're going to sell less this year than you did because of the fact that there is a slowdown in the economy. So a slowdown in the economy tends to affect businesses and therefore affects jobs. Pretty much common sense, I think.

And then excessive taxation. How does that hurt jobs? Well, here is the deal. You're, again, the president of a business. Maybe you have 100 employees. And you find out, all of a sudden, that your taxes are really going up. Now, if you have a lot of taxes, that means you don't have very much choice, you're going to have to pay those taxes. What is the tax going to be paid with? Well, it's going to be paid with the money from your company, from the profits and the proceeds of the company that you have.

And, hopefully, you have 100 employees, you're paying them, you're selling product, and you're selling product for more than it costs you, and so you're making some profits, and you're pocketing those profits. But now you understand that there's going to be a whole lot of taxation coming down the pike.

So one of the things that taxation is going to do is take money away from the guy that owns the business. And when you do that, he doesn't have the money to spend on adding additions to the building or perhaps taking a risk on introducing new products or maybe even inventing some different ways of doing things. And so the taxation takes the place of investment that would normally be made in the company. When that investment is made, that usually results in hiring more people. But the hiring more people isn't going to happen if you have excessive taxation.

In fact, we have found historically that if you drive the business owners with enough taxation, you can not only stop job creation; you can stop the whole business and bring it into bankruptcy and destroy the engine that creates jobs. So excessive taxation is a big factor in killing jobs.

Another thing is insufficient liquidity. Now, that sounds like a fancy thing. There's nothing too fancy about it. The fact is that businesses need money to run on, just like the engine in your car needs oil. And what happens is the business, let's say it's a machine shop, decides that they want to

buy a new piece of equipment. That new piece of equipment is going to cost them \$5 million. Well, you have got your machinists there in your company, but you don't have any \$5 million to buy this new piece of equipment; but you figured out that if you had that piece of equipment that in a matter of 2½ or 3 years, you could pay for the whole piece of equipment just by the kinds of products that you could make on it so you can say, hey, this is a great investment. I can pay this off relatively quickly, but I don't have that million, couple million, dollars to buy this new piece of equipment.

So what do you do? Well, you're going to have to go out and get a loan. And when you take a loan, you're going to pay interest on that loan. But then you get that piece of equipment in, and it's running just beautifully for you. You get all those orders, you make these parts, and pretty soon you pay off the piece of equipment.

How did that happen? It happened because you were able to borrow money, which people call liquidity, and you can borrow money and get that tool or whatever it was. When you did it, you hired a few people to run the new piece of equipment and, of course, you created jobs.

If you do not have that liquidity, if you can't borrow money that you need, then what happens? Well, then you can't buy the new pieces of equipment. And guess what? You're killing jobs or the potential for creating jobs.

Another thing is excessive government spending. Oh, now wait a minute. Now, how can the government spending affect jobs in America? Well, it turns out that there is an effect indeed. And what it is is when the government spends a lot of money, it has to get that money from somewhere. Guess where the money comes from? The private sector. Where does the money come from? From taxes. And so as the government tries to collect more and more money to appease its appetite for spending, what happens is that affects liquidity, and it plays out as taxation. And so as the government does a whole lot of spending, you find that it tends to kill jobs.

Now, it may not appear to kill jobs in the short term. If the government does a whole lot of spending—let's just say the government decides to spend \$150 billion. We just decided to do that a few hours ago here on the floor, \$150 billion for "son of stimulus." This is stimulus Jr., mini-stimulus, \$150 billion stimulus, still real money to most people, and real money to the U.S. Government, although you wouldn't know it by the way we spend it. Today, by the way, we did a pretty good job of spending money. We spent about \$1.1 trillion today, but mini-stimulus was just \$150 billion, still a lot of money.

And that government spending, let's say you go out and hire a whole lot of

people. Well, wouldn't you create jobs, Congressman AKIN? Well, you would in a temporary sense. You could put some people on a government payroll. But what economists have found is that when you temporarily hire someone from the government, what you're doing is you're taking money out of the economy through this government spending.

In fact, what happens is for every one job you create in government, you're taking 2.2 jobs out of the private sector. So it's one of these things where it may seem like you're doing well. It's a little bit like drinking salt water. You're getting a drink, but the salt makes you even more thirsty than you were before. So it's kind of very much a losing proposition when you start to get into this excessive government spending.

And then the other thing, of course, is excessive government mandates and red tape. We have a picture here that my staffer found of some poor CEO buried in red tape, all kinds of memos, pieces of paper, and all kinds of regulations. I think that your common sense will show why this is a problem, because let's say particularly you're a small business. Well, you have a certain number of employees. Those employees, you have them working right away, making product that you can sell because you have a clean, lean and efficient process. And you don't have very many people that are management people, just a few people to try to keep an eye and organize things and get some orders in the door.

And all of a sudden, somebody from the government knocks on your door, knock knock knock, and says, hey, you didn't fill out such and such form. And somebody else knocks or calls and says, you didn't fill out this form. You didn't fill out this form. Did you do this? Have you applied for this? Did you get this? And pretty soon, you have all kinds of employees. And what do they produce? They produce paperwork. Paperwork for whom? For the government.

And so if you get more and more red tape and excessive mandates, obviously that is one of the things where you may seem like you're creating jobs; but in effect, you're making the business less efficient so it cannot grow and really put those good producing jobs on to the payroll.

□ 2000

In a sense, those are like excessive government spending because they're really government jobs that in fact tend to get rid of the actual productive private.

So all of these things, all of these conditions kill jobs. So if the Federal Government wants to create jobs—first of all, we have to understand something: The Federal Government can't create jobs. The whole concept of stim-

ulus is a false assumption. The only thing the Federal Government can do is create the conditions so the people in the private sector can create the jobs. We can create an environment that is helpful in producing jobs, but the Federal Government, when it tries to hire people, all that does is take jobs away from the private sector. So all of these things are job killers.

So let's go in a more positive light and say, well, what do you do to create jobs? Well, just the reverse of these things, and that will tend to create jobs. In fact, you might even have some trouble in a couple of areas, but you're doing very well in some other areas, and you could create some jobs.

This whole bit about the problem with unemployment in America is not really that complicated when you understand that the jobs come largely from these 500-employee and smaller size companies, and that they're created by the fact that those companies and the owner of those companies have enough money they can invest in their company and can do the new processes, innovation and the ideas that Americans are so great in doing. That's what makes the economy strong, and that's what makes jobs.

Now, we have here a cartoon. We have the President here speaking to a small businessman, and the President is saying here, Now, give me one good reason why you're not hiring? And what do we have coming into the china shop? Well, we have three big bulls: One is the health care referendum; there is cap-and-trade, or cap-and-tax; and then another is a war tax. Well, the point here in a cartoon form, obviously the bulls are not going to have a good influence on the china shop. And the President doesn't seem to get what's going on with the businessman. He's not looking too excited about a good reason for why you're not hiring with these guys coming in the door.

Now, let's take this back to what we were just talking about, health care reform. Health care reform was going to introduce probably, at a minimum, \$1 trillion worth of spending, or close to it. So what happens if the government does a whole lot of spending? Well, they're going to do a whole lot of taxing. Guess who is going to be taxed with several different types of taxes to pay for socialized medicine? Well, it was going to be the small businessman.

So now what have you done relative to our chart here when you have the Senate—and the House has already passed this \$1 trillion socialized medicine bill that has all these mandates on small business—what have you done in terms of jobs when you pass this socialized medicine? Well, first of all, you are creating economic uncertainty, because the bill hasn't passed. We don't quite know what's going to happen. So there is uncertainty. There is also the slowdown in the economy, which of

course is not helped by a tremendous level of spending and debt.

Excessive taxation. Of course the taxation in the socialized medicine bill is going to fall very heavily on these small business owners. If you take their money away and force them to provide all this health care, they're going to have an incentive, one, to get rid of employees, because they can't afford them anymore because the health care is so expensive for them. So they're going to figure out ways to get rid of employees, not hire them. And what they're going to do, because of the excessive taxation, is they're not going to be investing in new equipment. So it's going to be a job killer. That was what one of these bulls is.

And then cap-and-trade, or cap-and-tax here, bull number two. That, of course, is the large tax that was going to be part of the solution to global warming. And we're going to talk about that a little bit too, but that also had a very, very large tax associated with it. Not only did it have a very big tax to increase the cost of energy, it had a very large tax in terms of red tape. In fact, I suppose that the red tape and the amount of additional Federal authority to regulate anything in the energy area, including even how individual American citizens' houses are built—that is, building codes at the Federal level, building codes regulating how you build your house and whether it has the proper carbon footprint or green footprint all in this bill with not only the largest tax in history, but also a great deal of red tape.

These are all things that hurt jobs. And so should we be surprised that we're getting a high level of unemployment? We should not be surprised. We are breaking all the basic laws.

Here is the first stimulus bill. We were told last spring—late spring and early summer—that we needed to pass a \$787 billion stimulus bill. And what was the idea of the stimulus bill? The idea of the stimulus bill was that government is going to spend a whole lot of money, and by spending money, the economy is going to be better. Now, that entire premise is suspect. If the economy was going to be better by us spending money, we would have one of the most robust, healthy economies in the whole world. We wouldn't have any unemployment. We would be going gangbusters if Federal spending was the thing that was going to make the economy good.

But most people with a little common sense, if your family budget is in trouble, the thing you're going to do is not run down to the local store with your credit card and stack up a whole lot of debt and spend like mad—unless you're a little bit nutty or had too much to drink.

But anyway, we were told that the thing to do is we've got to pass this \$787 billion stimulus bill. And we were

told, if you don't pass it, do you know what's going to happen, America, and you, Congressmen, that are representing Americans? If you don't pass this stimulus bill, you may see unemployment go up to 8 percent if you don't pass this stimulus bill.

So this is the President's forecast of what's going to happen if we pass this stimulus bill right here. You see this is 8 percent unemployment, and he says we're going to keep it under 8 if you just get this \$787 billion into our hands to spend. Without the stimulus, he said, this is what's going to happen; if you don't pass the stimulus, it's going to do this:

First, the red line here is what has actually happened. Is this red line a surprise? No, it wasn't a surprise at all. I stood here on this floor 6 months ago with similar charts and said this stimulus isn't going to work. Is it because I'm very smart or brilliant? No, it's not at all. It's simply because I know a little bit about history. I know what will and I know what will not work.

If the Democrats had known something about history, they would have, at a minimum, learned something from a fellow Democrat. This Democrat's name was Henry Morgenthau. He was Franklin Roosevelt's Treasury Secretary, and he appeared before the House Ways and Means Committee, right here in Congress, in 1939. Now, we have some old people in Congress; not too many people probably remember Henry Morgenthau, but they could know something about history and about Franklin Delano Roosevelt. And here is what Henry Morgenthau said: After 8 years of spending money on this—it's called Keynesian economics. Henry Morgenthau was a close buddy and associate of little Lord Keynes—he was a strange little fellow, that British man—and came up with this idea that we could stimulate the economy by spending money. And so they went at it, hammer and tongs, stimulating away, spending lots of money.

At the end of 8 years, this is how well it works: Henry Morgenthau appears before the House Ways and Means Committee: We have tried spending money. We are spending more than we've ever spent before, and it does not work. That's pretty straightforward English, we've been spending money, more than we ever did before, and it doesn't work. I say, after 8 years of the administration, we have just as much unemployment as when we started, and an enormous debt to boot.

And so it's not rocket science to see that this idea of spending \$787 billion that we don't have, it's not rocket science for us to be able to stand here 6 months ago and say, hey, we hope it works, but it's not going to work. It has never worked in history before; it's a lousy solution, it's going to make the problem worse. We said all of those things. Dozens of people stood on this

floor and said those things. And it's not because they're so smart, it's just because we understand the basics of what it takes to make jobs. And the thing that kills jobs is too much government spending.

Now, I will say about the stimulus bill that we put in place, it would have made Henry Morgenthau very uncomfortable, because it wasn't even traditional, old-fashioned stimulus. Old-fashioned stimulus is like making highways or building hydroelectric plants or hard job creation. This thing was more an expansion of wealth here. It was giving money so that organizations like ACORN could apply for community organizing, and a lot of things that really were never going to create jobs in the first place, or if they were, they were government jobs. And those things, the result has been, look, we've got unemployment; by the time you get into the latter part of this year, up in excess of 10 percent, not 8 percent, but 10 percent unemployment. And that's not a big surprise.

And so today, what did we do? We passed mini-stimulus, little brother to big brother stimulus. This was only, instead of \$787 billion, \$150 billion today. And did we learn anything from our experience? No, nothing at all, apparently. I think it was Einstein who said that if you repeat the same thing over and over again expecting a different result, you may just be crazy. And that's what we have done today. We came up with a junior stimulus bill, and we passed it on this floor. And the people who voted for it were the Democrats. They were a little reluctant in voting for it because it didn't work very well the first time when they did the stimulus, and they're not so confident that it's going to work again.

So, what are we looking at in terms of Obama-Pelosi spending? Well, you've got the second half of the Wall Street bailout here, \$350 billion. Then you've got this economic stimulus thing that has not worked, that we said it wouldn't work, it doesn't work, it will never work, and yet they spent \$787 billion—well, they haven't spent it all, they're just slopping it into other government programs. And then you've got the SCHIP, and then the appropriations, another \$410 billion over there. IMF bailout—that chart is wrong, it's probably about \$110 billion.

And then the House got really excited about doing some really serious spending, and they passed this cap-and-tax, which is that global warming bill. And that was—let me see what the number on that is here, get the chart turned around—that was \$846 billion. The reason on this chart that that's a little hazy is because the Senators weren't brilliant enough to go along with this \$800 billion cap-and-tax or cap-and-trade bill. Now, this is going to extend a huge government net over the energy business, and it was probably

worse in terms of red tape and government than it was in terms of its tax.

Now, the ironic thing is that I'm an engineer. And the thing about this bill that's particularly frustrating is that it doesn't appear that there is a consistency between the stated purpose and what the bill does. Let's assume for a minute that global warming is an imminent threat, it's something that we need to spend billions of dollars on that sometimes people don't call it global warming anymore because it isn't clear that the planet is warming, and so they call it "climate change."

But anyway, the theory runs along the lines that there are these various organic kinds of pollutants, particularly CO₂, carbon dioxide, that's the bubbles in soda pop. And the theory runs that if mankind makes enough of this CO₂—which we make by burning carbon or burning coal or burning gasoline or diesel, or whatever, we make CO₂. And if we make enough of this, what happens is the CO₂ then reacts with other kinds of effects, particularly water vapor and clouds in the atmosphere, and they amplify the effect of the CO₂, and the sun warms it up, and the climate gets hot and melts down. That's the general idea.

Now, let's just assume for a moment that that were true, and that it were a bad thing for us to make CO₂—I don't believe that that's entirely true, some of that is true, but a lot of it's not. But let's just say, for instance, that we really did believe CO₂ is a big problem and we needed to spend billions of dollars.

Do we need to give the Federal Government all this regulatory authority over building codes, how you put a wing on your house and all this kind of stuff? The answer is of course it's not necessary at all. Let's say that instead what we wanted to do was to reduce the CO₂ in America, reduce the CO₂ by the amount of all of the passenger cars that drive on the highways in America. Let's say that's our objective. Just to start with, we're worried about CO₂, we want to basically make it so that it was the equivalent, from a generation of CO₂, of turning off all of the American passenger cars on our roads in America. That would be a pretty ambitious goal. If you were worried about CO₂, that would be a pretty good place to start maybe.

□ 2015

How would you possibly accomplish something like that?

Well, the fact is you could accomplish it relatively easily for much, much less money than what is here and with much less government regulation. What you would have to do would be to simply take the coal-fired plants that produce 20 percent of America's electrical output and replace them with nuclear plants. Currently, 20 percent of the electricity in America is produced

in nuclear plants. If we were to go from 20 to a little over 40 percent in nuclear generation, we would eliminate the CO₂ from effectively every passenger car in America. That is not that complicated, and the nuclear plants are pretty efficient. Over time, they would probably prove to be not much different in cost than the coal-fired plants are, but that is the question.

Is that really the objective—to get rid of CO₂ or is it that we just want more taxes and government control? I've become a little cynical because the engineering solution to this problem is not where the legislation went in the House.

Then, of course, we've got this other thing here. It's a little bit of a side-track.

The bottom line is, if you make energy cost expensive and if you tax people a whole lot for energy, what is that going to do to jobs? It's going to get rid of jobs. So everything we've been doing here—everything we are doing—is killing jobs, and we can't seem to understand why the small business can't make the jobs.

Now we go on to the government health care proposal passed here on this floor not so long ago. What is the price tag on that? Well, even with a little bit of financial hocus-pocus, it is still up there in terms of \$1 trillion. We spent \$1.1 trillion today, but some of it was for the appropriations for the defense of our country. To add to this big socialized medicine bill, to add \$1 trillion more on top of all of these other things, is going to bury our economy.

Well, now wait a minute, Congressman AKIN. Aren't you overstating your case? I mean you are a Republican, and it seems like you're bashing those Democrats for overspending. Under the Bush administration, didn't you spend too much money? Well, let's just take a look at that question.

The worst deficit of the Bush administration occurred in 2008 under the Pelosi Congress. That worst deficit was \$455 billion. Now, that was a bad deficit, \$455 billion. Maybe even a more effective number to ask is, What was that deficit as a percent of the gross domestic product of America? That's a way of looking at that number. That was about 3.1 percent, which is actually fairly common as you look back over a number of Presidents who did that kind of spending. Anyway, that was 2008 under a Pelosi Congress, Bush's worst spending—\$455 billion.

What happened this year? Under a Pelosi Congress and President Obama, instead of \$455 billion, it was \$1.4 trillion. That's more than three times more than Bush's biggest spending. I wasn't fond of his biggest spending, and people who know my voting record know I did not support some of the costly elements that were there. This year, we're three times over what we were with Bush—at \$1.4 trillion.

What does that do to our deficit as a percent of GDP? We go from 3.1 to 9.9 percent of our debt to GDP, which is, by the way, the highest level since World War II. So this track record here doesn't make a lot of sense—billions and trillions of dollars.

Well, what does this all mean? If you put it in context, what we're saying here is, this year, there was three times more spending than Bush's most aggressive spending. We're making Bush look like Ebenezer Scrooge with the level of spending this year.

What does that spending do? Of course it affects unemployment. It affects jobs because that spending has to come out of the pockets of American taxpayers. Some of those pockets—in fact, some of the deep pockets—are the people who own the businesses who can no longer do the innovation and make the improvements to create jobs. That is a very, very serious problem.

You have to say that this is a new era of irresponsibility, the national debt of the United States at \$16.17 trillion. So, in other words, have we been spending too much money? Yeah, we sure have, but this year has been a regular budget buster, and that is of serious, serious concern. Of course, in the long term, we have the concern with Medicare and Medicaid growing over time, absorbing more and more of the budget.

There is a certain level the American economy can sustain in taxes. If you raise the taxes higher, what happens is that the economy suffers so badly that you don't actually collect any more money from the government, and that overtaxing is pointed out by a guy by the name of Laffer. He had a thing called a Laffer curve. It's an interesting idea. You think, Well, look. We really want to spend all this money because it's really good to take care of global warming and to pay for everybody and to give them all free health care with a socialized health care system, and we've got to do this because this is all kinds of additional money that we're schlepping around and giving to different people. We've got the Wall Street bailout. We've got to pick winners and losers, and so we're going to be having to spend this Wall Street.

Then as people come back and pay back some of the Wall Street, now what we're going to do is turn that money around and give it to other businesses, so now the government is playing in the private business. If we'd had a President who'd fired the president of General Motors a number of years ago, that would have raised some eyebrows, indeed.

So, when we get done with all of this, the problem is that it is creating unemployment. It's a problem of jobs. It gets back to these things here, which are just awfully simple, but they're inflexible, immovable kinds of facts, and that is when you follow the policy that

we've been doing, which is, first of all, we're increasing red tape and government regulation; we're engaging in excessive government spending unlike anything that has ever happened before in our history; we have a problem—and I haven't talked about this—of insufficient liquidity. This is also a problem. We've got about a perfect storm going on for small businesses in America. Here is what has happened:

The Federal Reserve doesn't actually print money, but they call it "printed money." They've increased the liquidity in America, and they did that by a factor of 10 last year. In other words, if you look at a chart of the amount of M1 money supply, it runs along, up and down like a saw tooth, and all of a sudden, we get to last year and—boom. Excuse me. I think it was the end of last year—this year—and the thing jumps by a factor of 10. So the Federal Reserve created all of this money. Boom. It printed a whole lot of it, and that's available at a very low interest rate, and the big banks have access to that.

The question is: Does all of that liquidity get down to the small business man? Because if you could get that liquidity into the hands of the small business man and if you could knock his taxation back, all of a sudden, presto zingo, you've got the formula to get the economy back chugging and churning.

It's not the government that is going to fix the economy. It's American individuals. It's the free enterprise spirit of Americans. It's the people who love freedom, who have the ingenuity, who say there's a better way to do this. I think I could do it. I think I could build my own business, and I could make a living for my family this way. These people have the courage to take the risks, to put the equipment together, to put the systems together, to put the inventions together. America grows one dream at a time. They are the people who pull us out of recessions, and it is those people who we are hurting with excessive taxation.

As to this liquidity thing, the problem now is that the small businesses can't get their hands on money at a reasonable interest rate. Here is what happened. That liquidity that the big bank has trickles down to the little bank, and the little bank gets some of it. All of these Federal regulators are running around, and the bank is saying, Man, I am not going to loan money to any small business unless I know it's a slam dunk. They're going to pay me back because I'm already skating on a very thin edge. I've got a lot of assets that my bank owns that are not too strong, and I'm afraid they're going to shut me down and that my bank is going to go out of business, so I am not going to loan money very easily to just anybody who comes down the pike. When you do come down the pike and want to borrow money, I'll tell you

what: I'm going to charge you a pretty good interest rate on that money.

So what happens is the small business man is already intimidated because of the threats of all of these taxations that are coming along, and the economy has slowed down. He has got economic uncertainty. He has got a slowdown in the economy. He's getting excessive taxation. Now, I haven't even talked about all of the taxes he's facing.

First of all, the Bush tax cuts are expiring, so the death tax is coming back. The dividend tax, the capital gains tax, all of those are coming due because those tax things are expiring, and they're coming back, resetting at a higher rate.

So the small business man sees the death tax, capital gains, dividend taxes. Now he's seeing the other taxes we talked about, which are socialized medicine, energy taxes and cap-and-trade. What other things has he got coming? He has got these taxations coming. Now, with that, he's thinking, Oh, my goodness. I'm not too sure I really want to borrow anything.

Even if he does get the courage to borrow something because he has to, he'll go to the bank, and the bank will say, Ah. Before, I was giving you a couple percent interest on those loans. It was a 3-year, a 5-year loan for your business. Now I'm going to need to get a little more interest from you. I think about 4 or 5 or 6 percent is what I want now.

All of a sudden, the small business man, even if he qualifies and if he has a solid, strong business, it's going to be harder for him. These days, it's increasingly harder for him to get liquidity. So, aside from the taxation, excessive government spending, aside from the red tape and mandates, the economic uncertainty and the slowdown, now he's also getting hit with the problem of liquidity. This is fairly close to a perfect storm for small business. So guess what? We're not very surprised that unemployment has been going up.

Now, do we have any good news? It's always nice to have a little bit of good news somewhere. Until we fix these things or at least a number of them, you are not going to hear much about good news. People can say, Oh, the stock market is fine, and everything is going well. We've hit the bottom. Everybody looks at these things like they're cycles that repeat. It doesn't have to be a cycle. You know, FDR managed to take a recession and turn it into a Great Depression because he did the wrong things. We can follow in his footsteps, but we don't have to.

The point is we don't have to follow Keynesian economics. We don't have to do all of this tremendous level of spending and taxation. It's not necessary. It's not what the Republicans are proposing. We know it won't work, and we have learned from Morgenthau,

and we have learned from other people as well.

What is the solution? Well, actually, it's kind of interesting. One of the people who learned the solution was JFK, a Democrat. What he did was what? Well, he cut taxes. Oh, my goodness. A Democrat cutting taxes? Yeah, JFK actually did. We had a recession. He understood that businesses have to have some breathing room, so he cut taxes. Guess what? The economy improved.

Then Ronald Reagan comes along. Ronald Reagan had the same basic idea. He said, Hey, we've got a bad economy. How can we ever compete with the Soviet Union when our economy is all in trouble? So what did he do? He had a huge tax cut—two or three times what George Bush's tax cut was. Everybody called it trickle-down economics and made fun of Ronald Reagan for about a year or so until the economy turned around and took off like a horse, and it pulled us on ahead. He continued to spend money on defense. He bankrupted the Soviet Union. The Berlin Wall fell down, and the Western World was freed from the threat of an aggressive, Marxist/communist regime that was bent on taking over the free world. This is all because he understood these basic principles.

So who is it who has given us the model? JFK, Ronald Reagan, and also President Bush—the last President—all understood this principle. You've got to get off of the taxation and big government spending.

Here is the funny thing that is interesting. It was called sometimes "supply side economics." People made fun of it, but here is how it works, and you can see, in your own logic, how it would be. Let's say somebody appointed you to be king for the year and that your job was to raise money for your little government and your kingdom and that the only thing you could do was tax loaves of bread. People in your kingdom liked to eat bread. They bought loaves of bread, so you had the power to tax them on loaves of bread.

Well, you start thinking in your own mind, How would you do that? Well, you might say, first of all, Well, I could put a penny a loaf on the bread, and I could collect a certain amount of money. You could figure out how many loaves of bread are sold. At a penny apiece, you could figure out some revenue. Then you get to thinking, You know, I'll bet I could raise more money for my little kingdom if, instead, I put a \$10 tax on every loaf of bread. Then you'd think, Wow, that would be a whole lot except what would happen is people wouldn't buy as much bread, so I really wouldn't get as much tax as I first thought I would.

So, as you play with this back and forth in your mind, you come to the conclusion that there is an optimum point where, if you raise or lower the taxes, you will get less tax revenue.

Well, that's the thing that Ronald Reagan, JFK, and Bush II understood. They understood that, if you get off the taxes, the government can actually take in more money than they would have taken in if the taxes were higher. It sounds like making water run uphill, but it isn't. As you think about the loaf of bread, you think, Wait a minute. You can tax something so much that no one will buy it anymore, and you'll basically stall the economy.

□ 2030

What happened when Bush was faced with a recession when I first came to Congress in 2001, he was criticized roundly for this. After a little while—I guess it was about 2003—he got around to this, he reduced dividends, capital gains and death taxes. Now those things affect the guys that own these small businesses.

When he did that, almost immediately, what happened was government revenues went up even though the taxes, rate of taxation, went down. Well, how in the world could that be? It's this same principle. It was called the Laffer curve. It was first published, I think, by Art Laffer, an economist.

The solution to this doesn't mean that Americans have to sit around with no jobs and suffer tremendously with a lousy economy. The solution is available. The solution has been used time after time in American history. The thing that we are doing now has also been used to turn a recession into a depression.

What we have to do is stop spending too much money. It's not very complicated; the same thing you would do in your family budget. You can't say that you are fiscally responsible, criticize George Bush for creating all of these problems when his highest level of spending at 455 billion is less than one-third of what we have just spent in this year at \$1.4 trillion.

When we get the ratio of debt to gross domestic product higher than it's been since the Second World War, you know something is wrong, and it is not that complicated. This whole idea of employment and what makes jobs is very straightforward.

What I hear the Democrats frequently doing is beating on their drum. We are going to tax that old rich man. We are going to get the rich man. We are going to take his money away from him and give it all to other people.

Well, the only trouble with that is, the trouble with socialism is sooner or later you run out of other people's money. Guess who it is you are going to tax? If you say you are going to tax the rich man, some of those rich men are the guys that own these companies, the men and women, the entrepreneurs who own the companies. Many times the amount of profit that the company makes is like their profit. They plow it back into more jobs.

Now, if you tax those people out of their hides, guess what's going to happen. They don't have any money to reinvest in their company, and you kill jobs. You cannot separate the people that run the business and the jobs. They are not separable.

If you really want jobs, you have to have employers. You can't have employees with no employers.

If you tax the employers too much, then they can't have employees. It's not that very complicated. Yet what we hear constantly is all these fat cats, we are going to run the tax up on these well-to-do people.

Well, as it is today, you might be amused to know that 50 percent of Americans pay about 1 percent of the tax revenue in America. Fifty percent of Americans pay about 1 percent—I believe my numbers on that are pretty close to right. You could also say that a very, very large percent of taxes are paid by a very small percent of Americans.

Now, if you drive that too hard, what happens again is you squeeze the small business and the wheels come off the tracks. That's what we have been doing, and we have not been making the situation better.

It's not complicated. We can fix it, but we can't fix it with what we did today. Today the Democrats decided to increase the debt ceiling, another \$300 billion. They decided to spend money on the defense of our country, which I supported and voted for, but also another \$150 billion in this stimulus kind of thing which didn't work before, and we know it's not going to work again.

We are not using the right approach. We are not going back to the basics of how jobs are created. What we are doing is we are spending Americans' money. Not just our own money, not just our kids' money, our grandchildren's money at this kind of rate. We cannot afford these kinds of programs in the condition of our economy.

We can right the economy. There's things that can be done to fix it. There's a great deal that can be done with health care. Even if you believe in global warming, and it is a high priority to spend billions of dollars on it, even if you believe that, there are a whole lot of better solutions and a whole lot of government redtape and taxes.

You can move to the nuclear model, which is going to reduce CO₂ significantly. This economic stimulus, we saw how effective that was. That's the thing that we are claiming we are going to keep our unemployment below 8 percent, and here we are closer to 10.

Now, of course, the Wall Street bailout: this was a failed idea from the start. It was sold to the Congress that the entire American economy was going to collapse, that there was going to be sulfurous smoke billowing out of the earth. There are going to be hail

storms and brick bats falling from the sky if we didn't come up with \$700 million in unmarked bills, and we wanted it in a big hurry because we made a big public announcement, the stock market is watching you, Congress.

Congress obliged. I think it was a bad decision. They passed that stimulus bill. Now we have got politicians running around inside the private sector deciding on the salaries of private employees.

The recent bill that we passed here just last week gives the Federal Government the authority to regulate financial transactions and, at least in theory, could give them the power to determine the salary of a bank teller. Do we really think that that's a job that Congress and the Federal Government can do efficiently, is to determine the salary of people in private industry?

Is that what we really want our government doing? Do we trust our government to be telling us whether we can put an addition on our house and we have to prove that the carbon footprint of our house is just right to be able to allow us to put an addition on our house?

Do we need to have an energy taxed a whole lot more when the economy is in the condition it is now? Is this threat of global warming which—by the way, a whole series of emails and electronic files were released from the scientific university in England that is the center for collecting all the data on global warming, it found that these scientists had been fudging the data. What they found was, in fact, that they were very less than professional and had been doing everything they could to quash any article appearing in a journal that would question the absolute rigid science that global warming was an imminent disaster on this planet.

Well, when the evidence of the fact that the data had been doctored, that they had been intentionally trying to quash the opinions of dissenters, trying to say that it's settled science—it's nothing settled at all, what these emails revealed in East Anglia. But that was kind of dubious science all the way along.

The question is, is that as important as our dependence on foreign oil? I am not so sure that it is.

Even if it is, there's a solution to that which is replacing coal-fired, carbon-burning plants with nuclear plants. France has 80 percent nuclear generation. If we went to 40, we would, equivalent, get rid of the CO₂ from all of those passenger cars.

This is not the approach we have been taking. The whole wrong economics of what we have been doing is wrong. That's why people are feeling pain. They are feeling unemployment. That's why people can't make their mortgage payments. That's why people are having to move in with their par-

ents and all kinds of other sacrifices are being made.

That's a tragedy, because this is something that's not that complicated. It's something that—there are models that show us what we should be doing in government. The Republican Party has proposed all of the things that I am talking about in solutions, that is, in terms of health care, are we saying there isn't something that should be done? Of course there are things that should be done in health care.

If you have got a problem with the plumbing in the kitchen sink, it doesn't mean you remodel the entire kitchen. That's what the Democrats have proposed. In socialized medicine, the government could take over all of health care. You don't have to do that, but there are things that we can do to improve the situation and can build on what we have.

We have a very, very good health care system in terms of delivery. The pay-for piece of it is broken, and it's because about a third of Americans don't pay anything for their health care. No wonder that starts to create stress in the system.

There are things that we can do to improve the efficiency and the way our health care system works, but it doesn't mean scrap the whole thing and give it to the government. In each of these areas there are good proposals, ways to solve these problems.

When we are talking about jobs and employment, we have to remember what the basic principles are. The basic principles are those small businesses have to be healthy, and they are never healthy when we spend too much money, when we create too much redtape and when we tax too much and also when we don't get the right rules in terms of liquidity.

I heard on the floor here not so long ago, the Democrats saying that this entire recession is the fault of George Bush. Of course, he is the one that brought the hurricane—it's always convenient to find somebody to blame.

But what's to blame in this recession? What's to blame in terms of job losses? Well, it's these things here. Anybody who has ever run a small business, you can check these with anybody who has a friend, talk to somebody who runs a small business. Ask them: Is economic uncertainty a problem in terms of creating jobs? Oh, yes, yes. Slowdown in the economy? Yes, that makes me concerned. Excessive taxation? Oh, yes, you are going to tax me a whole lot.

We have got this thing called a death tax. The death tax, the way it works is when it goes back into effect in 2011 or 2012, let's say you have got a business, maybe it's a farm. You have got the thousand acres and Dad is running the farm. Dad dies and passes the farm on to his son.

The government says, well, your dad died so we are going to tax you. Well,

how come you are taxing? He already paid his taxes. Yes, we are going to tax him again. It's a double taxation, and we want 45 percent of the value of the farm.

The son says, well, that means I would have to sell half the land from a thousand acres and go to 500. I would have to get rid of half of my tractors and combines and other equipment. The farm really wouldn't work at 500 acres. It needs a full thousand acres. Sorry, Bub, you owe Uncle Sam the death tax.

What that does is what? It kills small business when you do that death tax. These are things that people know you just can't do this and expect to have a strong economy.

That's where we have been making some mistakes. Unfortunately this last year these mistakes have come home to roost.

You could say, well, this is Bush's mistake because he got the whole economy messed up in the first place.

Well, let's go back to that record. Let's go back to that conservative newspaper, the New York Times. On September 11, September 11, 2003, the New York Times reported, first of all, that President George Bush was worried about what was going on with Freddie and Fannie. Freddie and Fannie had apparently lost a few billion dollars, didn't know where they had put it.

That said, these financial institutions that were quasi-public, the implication was that the government would be in the bag if something went wrong with Freddie and Fannie.

He is quoted, September 11, 2003, in the New York Times saying that Congress needs to give him authority to regulate Freddie and Fannie more. In a matter of a year or two, we here in the House, it was a Republican House at that time, passed a bill to give the President authority to get into Freddie and Fannie's finances and to regulate them more because they were out of control.

The bill went to the Senate, as you can expect; but it was killed by the Democrats in a filibuster on the floor. It never saw the light of day. It was never passed.

So it was that Freddie and Fannie, failing, along with other parts of that real estate market, which was created by laws that we had made, saying that banks had to make loans to people who couldn't afford to pay them, and also this wild speculation that came from a very, very low interest rate and a lot of liquidity created by Greenspan, you put that all together and you get a bubble in the real estate market. The bubble pops and things come apart.

Now, you could try and blame that thing on Bush, but it really wouldn't be accurate to do that. He saw, at least in 2003, that we were in trouble and recognized we should do something about it.

It's easy to try to blame problems that are created by overspending and over-taxation on the Republicans, but the fact of the matter is this Congress has got 80 Democrats more than it does Republicans. This is not exactly what you call a Republican control of the Congress or the House.

Over in the Senate, the Democrats have a working 60-vote majority, so they could even break filibusters and pass what they want. They have had a year to work on this, and we can see what they have done.

We have seen what happened to their spending. We have seen all these different things they put money into. These ones that are foggy are the ones that are just done by the House. The Senate has not passed them.

We have seen what's happened to employment as a result of that excessive spending. It has not been good, and it's not been good for a reason.

We have, today, again, continued in the same policy. I think Americans are getting tired of it. I think they realize you can't blame it on someone else, that these are basic factors that people understand. It's businesses that create jobs; and if you tax the businesses too much, and if you have the wrong environment for the businesses, they are not going to be able to keep the economy going.

□ 2045

Ironically, something that suffers a great deal in a poor economy are governments. Governments depend on tax revenues for their revenues, and the States really take a beating because many of them have balanced budgets that they have to meet. So if you happen to be some poor governor in a State when you have a Congress like this that's spending money wildly and forgetting the basic principles of economics, you've got a lot of problems.

So this cartoon is as a lot of cartoons that have a certain amount of sense and humor to them. "Now give me one good reason why you're not hiring." Well, we've seen a whole lot of reasons why we're not hiring, and the trouble is that we have essentially exasperated every single one of these things, and that's why there are not jobs here.

So we're closing up here, then, on this segment on unemployment and on spending and what it is that creates it. There's nothing here that's very complicated. Like most things in life, if you understand the mechanics and how they work, they're not very difficult. We're doing some things that are wrong in terms of jobs. If we want to have jobs, we can do it. It's not the government that's going to create the jobs. It's you, my friends, the American people that will create the jobs. But we have to give you an economic environment that is conducive to creating jobs, and that does not mean a whole lot more money in spending,

such as our \$150 billion in stimulus II, "son of stimulus," if you want to call it that, the failed bill from last summer that didn't work. It does not include increasing the debt limit, as we did today, by \$300 billion. What it includes is the same basic principle that JFK, Ronald Reagan, and Bush used, which is getting the government off the backs of the people of the United States.

This is a sad situation. My father fought in World War II, and their mindset was, we're going to give of ourselves a whole lot so the next generation, our children, can have more than we did. Some of them didn't go to college, and they said we want our kids to go to college. We want to leave America a better place.

Is that the heritage of this day, that we want to leave America a worse place, that we want to leave our kids and our grandkids up to their ears in debt, having a less bright future than what we had? Can't we learn from the great generation that fought World War II that we want to leave America a better place?

I believe the American public will say we want to go back to leaving this a stronger, better, freer country than when we inherited it, and I think we will do that. But we will do that by changing these false premises and policies that are leading us down the primrose path.

I thank the Speaker for allowing me to talk on these very important questions, and I would say Merry Christmas, wonderful holidays to Americans. God bless you and goodnight.

THE IRAQ AND AFGHANISTAN WARS AND HEALTH CARE REFORM

The SPEAKER pro tempore (Mr. TONKO). Under the Speaker's announced policy of January 6, 2009, the gentleman from Florida (Mr. GRAYSON) is recognized for 60 minutes as the designee of the majority leader.

Mr. GRAYSON. Mr. Speaker, in some respects the policy regarding the wars in Iraq and Afghanistan comes down to the subject of leadership. And as I have said, leadership is sometimes simply a question of looking into the future, seeing what's inevitable, and doing what you need to do to make the future come faster. I think that's true in both the case of Iraq and the case of Afghanistan.

In the case of the Israelites in Egypt, Moses did not say to the pharaoh, Would you please let my people go starting 2 or 3 years from now? Instead what he said is "Let my people go" now.

We all know that sooner or later our troops will be withdrawn from Iraq. They will be withdrawn from Afghanistan. So the question is why not now?

Now, if you ask that question to the other side, the people who want to perpetuate these wars, the answer is always the same in one form or another.

That answer is, something bad is going to happen. But what that really means when you get down to it is that something bad might happen. Nobody knows for sure what might happen. They're speculating that something bad might happen. But you can be sure that if the war is perpetuated, something bad will happen. And that is the loss of American lives, the loss of foreign lives, the loss of our national treasure.

In the case of Iraq, \$3 trillion already and the amount grows every day. This in a country like ours with a total net worth accumulated over more than two centuries of \$50 trillion. We have taken 6 percent of what our great grandparents and our grandparents and our parents produced and left to us and everything that we've toiled to produce over the course of our lives and everything that our children have produced. We have taken 6 percent of all of that and dumped it into the sands of Mesopotamia and lost 4,000 American lives and countless Iraqi lives to boot. Now, this is what happened because we entered into this war, because we continue this war, because the war continues to this day.

We have an enemy in this war. The enemy is called al Qaeda; al Qaeda in Iraq, al Qaeda in Pakistan, wherever they might be, but that's the name they go by. But ask yourself, what could they have possibly done to inflict that on us? What could al Qaeda have done to make us lose \$3 trillion, 4,000 American lives, countless lives of other people? What could they have possibly done? They would have literally had to vaporize New England in order to inflict the same amount of economic damage on us to destroy 6 percent of our economy. It simply wasn't possible. It isn't possible. It never was possible.

And that's why the war was such a mistake to begin with. It was born in sin, it lives in sin, and in the end it will die in sin. It never should have started, and it never should be perpetuated because every day the war continues. Every single day is another day that we risk American lives, on many occasions we lose American lives, other people die, and again our national treasure is dissipated until in the end it will be gone.

As Senator KERRY once asked, famously, "How do you ask a man to be the last man to die in Vietnam?" That's a good question. How do we ask a man today to be the last man to die in Afghanistan? How do we ask an American soldier today to be the last American soldier to die in Iraq? There is no good answer to that question. There's no good answer to why we continue to perpetuate these wars knowing full well that they will end. And they'll end only one way.

Paul Simon once had a song called "50 Ways to Leave Your Lover." There actually are 50 Ways or more to start a war. That much is true.

Once the Europeans fought a war because a pirate cut off a man's ear, the War of Jenkin's Ear, and that plunged two different nations into war for years. At another time a murder was committed. A man was shot, one man, only one man. He happened to be Archduke Ferdinand, and an entire continent was plunged into war. That was the origin of World War I.

There are all sorts of ways to begin a war. There are all sorts of ways to perpetuate a war. The Hundred Years' War in Europe was fought for more than a hundred years, left two different countries, both England and France, absolutely penniless, as many wars often do, for the simple reason that it takes an awful lot of effort to build a school, almost no effort at all to blow it up. And the same thing is true of anything that you can create. So wars destroy, and very often they destroy the countries engaged in them.

In the case of America, when America starts a war, when America is involved in a war, we are so strong, we are so powerful that the only way to end a war is for us to end it. There is only one way to end the war that America is involved in, and that is for us to decide as a country enough is enough, we're done. We spend more on our defense than all other countries combined, and the result of that is that these decisions are made by us, often by the people in this room, often by the President. And it's up to us to decide when enough is enough, when enough people have died, when enough money has been lost, when the price in both blood and money is simply too high. I submit that we've reached that point in Iraq a long time ago. We reached that point in Afghanistan a long time ago.

In the case of Afghanistan, within 2 months after 9/11, we had expelled the Taliban Government from the capital. Within 3 months we had expelled al Qaeda from the country, and our enemies were no longer even in Afghanistan at that point. They were in Pakistan and they remain there today. It's not a secret. Everybody knows it. So the result of that is within 2 months or 3 months after 9/11, we had won our victory in Afghanistan, and at some later point even in Iraq I seem to remember our President standing on an aircraft carrier and behind him the giant sign "Mission Accomplished."

Yet both these wars go on and on and on for one reason, one reason only: It's because we Americans decide to perpetuate them. And we do so out of fear, out of the sense that something bad might happen, without realizing that something bad happens every single day that we are at war. So there may be 50 ways to start a war, but there's only one way to end it, and that's for us to end it and hopefully not too much longer from now.

I think the President missed an opportunity. He took office with a great

deal of goodwill on the part of not only my party, the Democratic Party, but also on the part of good people all around America who simply want better lives for themselves. Let's not squander that opportunity. We all deserve a direction that we regard as the right direction. There are too many people in this country even today who think we're going in the wrong direction. In Iraq the wrong direction is simply the same direction. The same thing is true in Afghanistan. The wrong direction is the same direction. We voted for change. We deserve change. That's just as true with these foreign wars as it is with anything else.

We know that at some point in the future these wars will be over. And with regard to what the situation will be then, we will know that George Bush started these wars and I sincerely do hope, I sincerely do hope, that Barack Obama will end them, if not right now then as soon as possible.

Then at that point the poet Percy Bysshe Shelley will tell us what the circumstances are at that point, and I yield to Percy Bysshe Shelley for a moment or two. He described those circumstances in the poem "Ozymandias." This is what those circumstances will be like when these wars are over:

"I met a traveller from an antique land

Who said: Two vast and trunkless legs of stone

Stand in the desert. Near them on the sand,

Half sunk, a shattered visage lies, whose frown

And wrinkled lip, and sneer of cold command

Tell that its sculptor well those passions read

Which yet survive, stamped on these lifeless things,

The hand that mocked them and the heart that fed.

And on the pedestal these words appear:

'My name is George W. Bush, king of kings:

Look on my works, ye Mighty, and despair!'

Nothing beside remains. Round the decay

Of that colossal wreck, boundless and bare,

The lone and level sands stretch far away."

The lone and level sands will stretch far away when these wars are over, these monuments to the mistakes of our previous President. But in the end that's what it will be, simply a statue in the desert, pointless, endless, bare.

With regard to the issue of health care, we are now waiting for the Senate to act, this House having acted quite a while ago now.

□ 2100

And I have to wonder why. Why are we waiting so long? What facts are different today on this day in December

than were any different in November, or any different in October, any different in September, August, July? What can we do today that we could not have done then? I think the sad fact is, nothing. Nothing has really changed. The fundamental facts are the same. Americans are still denied care every single day on the basis of pre-existing conditions, on the basis of reaching lifetime caps. There are still millions upon millions of Americans who have no health care coverage. There's a million, who, every year, go bankrupt because of that. And there are thousands upon thousands who die every single month for the simple reason that they have no health care coverage. That's been true, not only for this month, not only for last month, but for year upon year.

And we Democrats in the House of Representatives, we took it upon ourselves, with the political capital that you, the American people had given to us, we took it upon ourselves to make that our priority once we had done what we could to steady the shaken economy. We delivered. We did what we needed to do. And we have waited and waited and waited for the Senate to do what it needs to do.

I pointed out here on this pedestal several weeks ago that the cost of delay is death. People die every single day, 121 of them, 122, every single day because they have no health care coverage in America. And I pointed out that there are people here in this Chamber who are dead set against health care reform, even at the cost of the lives of their own constituents. I gave their names. I gave their numbers for how many people would die in each of their districts on account of our not passing health care reform. Now I think it's time to do the same for the obstructionists in the Senate, those people who think that health care reform doesn't serve their own purposes, and they are, therefore, willing to deny it to their own constituents.

This is not a case of one State opting out. This is a case of Senators, en masse, deciding, one by one, that there will be no health care reform, not just for their States, but for all America. And so what I've done is I've created another list. This is a list of States and a list of those who die in that State, one by one, on account of there being no health care coverage, not once, but year after year after year. And now I propose to provide that list to you all. You'll be able to see it at our Web site later on today.

In the State of Alabama, the number is 541 deaths each year.

In the State of Alaska, 124 deaths each year.

In the State of Arizona, 1,185 deaths each year.

In the State of Connecticut, 326 deaths each year.

In my State of Florida, an astounding 3,542 deaths each year.

In Georgia, 1,640 deaths each year.

In Idaho, 217 deaths each year.

In Indiana, 727 deaths each year.

In Iowa, 272.

In Kansas, 329.

In Kentucky, 609.

In Louisiana, 800.

In the State of Maine, 123 deaths each year.

In Mississippi, 518 deaths.

In Missouri, 714 deaths.

In Nebraska, 216 deaths.

In Nevada, 450 deaths.

In New Hampshire, 132 deaths.

In North Carolina, 1,424 deaths.

In Ohio, 1,279 deaths.

In Oklahoma, 550 deaths.

In South Carolina, 693 deaths.

In South Dakota, 88 deaths.

In Tennessee, 883 deaths.

In the State of Texas, 5,857 deaths each year for lack of health coverage.

In Utah, 342 deaths.

In Wyoming, 69 deaths.

And on it goes.

And for those Senators who have shown some reluctance or some lack of interest in health care reform, I'm going to provide your names right now to go with your States.

In Alabama, I'm talking about JEFF SESSIONS and RICHARD SHELBY; in Alaska, LISA MURKOWSKI; in Arizona, JON KYL and JOHN MCCAIN; in Connecticut, JOSEPH LIEBERMAN; in Florida, GEORGE LEMIEUX; in Georgia, SAXBY CHAMBLISS and JOHNNY ISAKSON; in Idaho, MIKE CRAPO and JAMES RISCH; in Indiana, DICK LUGAR; in Iowa, CHUCK GRASSLEY; in Kansas, SAM BROWNBACK and PAT ROBERTS; in Kentucky, JIM BUNNING and MITCH MCCONNELL; in Louisiana, DAVID VITTER; in Maine, SUSAN COLLINS and OLYMPIA SNOWE; in Mississippi, THAD COCHRAN and ROGER WICKER; in Missouri, CHRISTOPHER BOND; in Nebraska, MIKE JOHANNES and BEN NELSON; in Nevada, JOHN ENSIGN; in New Hampshire, JUDD GREGG; in North Carolina, RICHARD BARR; in Ohio, GEORGE VOINOVICH; in Oklahoma, TOM COBURN and JAMES INHOFE; in South Carolina, JIM DEMINT and LINDSEY GRAHAM; in South Dakota, JOHN THUNE; in Tennessee, LAMAR ALEXANDER and BOB CORKER; in Texas, JOHN CORNYN and KAY BAILEY HUTCHISON; in Utah, ROBERT BENNETT and ORRIN HATCH; and in Wyoming, JOHN BARRASSO and MICHAEL ENZI.

Please remember these names. These are the people who have stalled health care in this country. These are the people who have watched when, day after day, month after month, people go broke, people remain sick and people even die because they have no health care in this country. And I want to assure each one of you who has done anything to obstruct health care reform in this country that people will remember. Maybe not the people who die, but the people who love them, the people whose names I read day after day at our Web site, NamesOfTheDead.com,

and the people whose stories I told day after day. These are people who are gone, but the names, the list grows every single day until we solve this problem. And then, in the end, when we do solve this problem—and it's inevitable. Every other industrial country in the entire world has health insurance for everyone. When we do join the ranks of those countries, people are going to remember who made that happen and show kindness and love to them. People are going to remember who blocked it, and they'll show undying hatred. People are going to remember.

And you'll remember, too. You'll remember that when the time came for you to do something for your fellow man, to stop the suffering, to stop the hurt, to stop the pain and to stop the dying, you did nothing, or you didn't do enough. You're going to remember that, and you're going to know that blood is on your hands.

May God have mercy on your soul.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair would remind the Member to refrain from engaging in personalities toward the Senate or its Members. Remarks in debate may include policy criticisms, but may not descend to personalities.

VACATING 5-MINUTE SPECIAL ORDER

The SPEAKER pro tempore. Without objection, the request for a 5-minute special order speech in favor of the gentleman from Florida (Mr. GRAYSON) is hereby vacated.

There was no objection.

THE RELIGIOUS HERITAGE OF THE UNITED STATES

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Texas (Mr. GOHMERT) is recognized for 60 minutes.

Mr. GOHMERT. Mr. Speaker, it's interesting following the gentleman from Florida. In the spirit of Christmas, it sounds like accusing previously Members of Congress and now Members of the Senate of basically being responsible for deaths. I can't help but address that in this respect—ignorance is a dangerous thing, and the fact is, if you will examine, Mr. Speaker, the statistics of those, for example, you take numbers I'm familiar with of women who find a localized tumor, of breast cancer, they have a 98 percent chance of success, of complete elimination of the cancer. That's in the United States with our health care.

If we go to what the gentleman from Florida is proposing, as we see in other countries like England, it's about 20 points less. In other words, the program the gentleman from Florida is

advocating would be responsible for killing one out of five women who find those type tumors. And you can run those statistics throughout health care.

So, despite what some have said—I know not intentionally trying to misrepresent, because I know the gentleman is an honorable man. As Shakespeare said, so are they all, all honorable men. But they're wrong about the facts. And the truth is, we have numerous proposals to reform health care and to provide health care for everyone. But one of the great misrepresentations that's been made this year in this House is that so-called health care reform is about health care reform. It is not. We've heard everyone from the President to lots of people on this side of the aisle say that yes, we want to insure 30 million more people. Well, the statistics tell us if they do their program, then they are going to be millions who lose their health care insurance. And even if you wanted to insure 30 million people, well, the statistics indicate those 30 million are in approximately 10 million households, and you can insure those 10 million households for potentially less than \$10,000. So for \$100 billion, you could insure all the people that they say they need to add to the health care insurance rolls for \$100 billion. And yet the estimates are anywhere from \$1.2 trillion to \$2.5 trillion as to what they're proposing will cost.

That makes it clear that the truth is their proposals are not about health care reform. They are about government control. And consistently, when you go through the statistics of the success rates with regard to different types of cancer, if you go to the programs being advocated, then people get on lists and they die waiting on those lists. People die waiting for the treatment, the therapy, the diagnostics that require lists in a socialized medicine setting.

But I want to get away from the partisan politics and the nasty allegations that have been made in here just prior to me speaking, and back and forth throughout this year, because this may well be the last hour that we have here in the House before we recess for Christmas and before we come back next year. So, instead of getting into all this rancor, I thought it would be good to help address an area that some people have just not had education about, and that this is the appropriate place, Mr. Speaker, to make sure that the record is correct, because we have so much wonderful history in this building, in this House.

For example, I hear people really concerned around this building, around the Supreme Court, across the way, around Capitol Hill here, about someone, my goodness, praying in public. Well, we begin every day we're in session here in the House and the Senate's in session with a prayer.

□ 2115

Many are ignorant from the place in which that tradition started, where it came. You have to go back to 1787, the Constitutional Convention.

The Constitutional Convention, people may recall, began in 1787 as a result of the failure of the Articles of Confederation. And for those that know history, they would know that the revolution was won in 1783. It was the Treaty of Paris in which England finally recognized the United States' right to exist as a Nation, and George Washington did something that had never been done in the history of mankind before or since then, and that is lead a revolutionary military, win the revolution, and then resign and go home when he could be Caesar, he could be king, emperor, whatever. That was not his goal. His goal, as he said, was to do his duty to God, basically, and his country, kind of like the Scout oath.

Anyway, here they are in Philadelphia, Independence Hall, 1787. It's June. Benjamin Franklin is 80 years old. Now, many people say, Well, we know he was a deist from history. That means he believed there was a creator out there but that he believed God, the creator, created things and then stood back and let everything happen and that he never interfered. Well, those who also know history know that there were times in his life when Benjamin Franklin sowed some wild seeds, and that included some in Europe and in England. But by the time of the Constitutional Convention, there in Independence Hall in Philadelphia, 1787, Benjamin Franklin was between 2 and 3 years away from meeting his judge, meeting his maker, and he knew that. He was as brilliant as ever, as witty, an amazing man, the genius that he was, and there he sits.

There is a picture right outside the House floor depicting that area in Independence Hall where they were meeting. Now, in the beautiful painting, the windows are open. Well, the windows were covered. It may have been by blankets instead of beautiful lined curtains depicted in the scene. But for nearly 5 weeks, they went without accomplishing much of anything. Finally, the 80-year-old Ben Franklin rose and was recognized by the President of the Constitutional Convention, George Washington. And we have these words because James Madison recorded them as secretary of that convention.

These are the exact words of Benjamin Franklin, June 28, 1787, in Philadelphia during the Constitutional Congress. Benjamin Franklin said: "Mr. President, the small progress we have made after 4 or 5 weeks' close attendance and continual reasonings with each other, our different sentiments on almost every question, several of the last producing as many noes as ayes, is, methinks, a melancholy proof of the imperfection of human understanding.

We, indeed, seem to feel our own want of political wisdom, since we've been running about in search of it. We have gone back to ancient history for models of government and examined the different forms of those republics which, having been formed with the seeds of their own dissolution, now no longer exist. And we have viewed modern states all around Europe but find none of their constitutions suitable to our circumstances.

"In this situation of this assembly groping, as it were, in the dark to find political truth, and scarce able to distinguish it when presented to us, how has it happened, sir, that we have not hitherto once thought of humbly applying to the Father of lights to illuminate our understanding? In the beginning contest with Great Britain, when we were sensible of danger, we had daily prayer in this room. Our prayers, sir, were heard and they were graciously answered. All of us who were engaged in the struggle must have observed frequent instances of a superintending providence in our favor. To that kind providence we owe this happy opportunity of consulting in peace on the means of establishing our future national felicity. And have we now forgotten that powerful friend? or do we imagine that we no longer need His assistance?"

Ben Franklin goes on and says: "I have lived, sir, a long time, and the longer I live, the more convincing proofs I see of this truth—that God governs in the affairs of men. And if a sparrow cannot fall to the ground without His notice, is it probable that an empire can rise without His aid? We have been assured, sir, in the sacred writings that, 'except the Lord build the House, they labor in vain that build it.' I firmly believe this; and I also believe that without His concurring aid, we shall succeed in this political building no better than the builders of Babel. We shall be divided by our little partial local interests; our projects will be confounded, and we, ourselves, shall become a reproach and a byword down to future age. And what is worse, mankind may hereafter this unfortunate instance despair of establishing governments by human wisdom and leave it to chance, war, and conquest.

"I therefore beg leave to move that, henceforth, prayers imploring the assistance of Heaven and its blessings on our deliberations be held in this assembly every morning before we proceed to business, and that one or more of the clergy of this city be requested to officiate in that service."

His motion was seconded, and then Ben Franklin's motion was adopted unanimously. And from that day to this day, we do not begin Congress in this body without a prayer to begin.

Now, for those who say Ben Franklin obviously was a deist who didn't believe, believed a God or creator created

things but never intervened, his own words seem to defy that. He begged and implored Congress to begin with prayer every day because, as he said, "Our prayers, sir, were heard, and they were graciously answered."

So, Mr. Speaker, also, here again, in the spirit of bipartisanship, in the spirit, for me, of Christmas that has been so historically observed in this Nation, we want to just go through and make sure people understand our heritage.

Now, the great thing about our Constitution, it does allow for freedom of religion and a freedom not to worship at all. That is because they're based on the teachings of Christ and his willingness to allow all men to make their own decisions for themselves, knowing, as he did, that one day, all people will meet their maker. But let's go back to the person that found the New World, as it was called. This was Christopher Columbus.

You don't find many history books which have these kinds of quotes in it. This is Christopher Columbus in his own hand, in his own journal. He said: "It was the Lord who put it into my mind (I could feel His hand upon me) the fact that it would be possible to sail from here to the Indies. All who heard of my project rejected it with laughter, ridiculing me. There is no question that the inspiration was from the Holy Spirit, because He comforted me with the rays of marvelous inspiration from the Holy Scriptures."

Now there are those today who say the real lesson of Columbus is that it's amazing what you can do, even when you don't know where you're going, you don't know where you are when you get there, so long as you get the government to pay for it. But I would submit that there was a creator, a creator as Christopher Columbus believed, who put this into his mind to sail west and discover this area so that the greatest nation in the history of mankind could arise.

Now if you go to the Pilgrims who came across, originally from the Netherlands to England and to America by way of stopping in England, this was 1620. Part of the Pilgrims' compact, these are their words, "In the name of God, Amen . . . Having undertaken for the glory of God, and advancement of the Christian faith, and the honor of our king and country, a voyage to plant the first colony in the northern parts of Virginia, do by these presents, solemnly and mutually in the presence of God and one another, covenant and combine ourselves together in a civil body politick." That was the Pilgrims on the Mayflower, November 11, 1620.

I have had people I have met from Harvard University who are not familiar with their history and the fact that Harvard University, September 26, 1642, this was part of their code. It was part of their handbook.

Harvard University: "Let every student be plainly instructed, and ear-

nestly pressed to consider well, the main end of his life and studies is to know God and Jesus Christ, which is eternal life, John 17:3; and therefore to lay Christ in the bottom, as the only foundation of all sound knowledge and learning. And seeing the Lord only giveth the wisdom, Let every one seriously set himself by prayer in secret to seek it of him, Proverbs 2:3." That's Harvard University at its founding back around the year 1642.

In George Washington's own personal prayer book, which he read from daily, this is one of the entries in that prayer book that was in Washington's possession when he passed away: "O most glorious God and Jesus Christ, I acknowledge and confess my faults in the weak and imperfect performance of the duties of this day. I called on Thee for pardon and forgiveness of sins, but so coldly and carelessly that my prayers are come my sin and stand in need of pardon. I have heard Thy holy word, but with such deadness of spirit that I have been an unprofitable and forgetful hearer . . . Let me live according to those holy rules which Thou hast this day, according to those holy rules which Thou hast this day prescribed in Thy holy word . . . Direct me to the true object, Jesus Christ, the way, the truth and life. Bless, O Lord, all the people of this land." That's George Washington's prayer book.

Here is a quote from Thomas Jefferson, as we know, who wrote basically the Declaration of Independence at the urging of John Adams, and it was Jefferson who was the third President after John Adams. Jefferson in 1782—and for those who visit Washington, this is inscribed inside the Jefferson Memorial.

Jefferson said: "Can the liberties of a nation be thought secure when we have removed their only firm basis, a conviction in the minds of people that their liberties are the gift of God?"

Jedidiah Morse, who is called the father of the American geography, also father of Samuel Morse—folks who know history know who that is. On April 25, 1799, Jedidiah Morse said: "Whenever the pillars of Christianity shall be overthrown, our present republican forms of government, and all the blessings which flow from them, must fall with them."

James Madison, the fourth President, March 4, 1815, in his Thanksgiving Day proclamation said: "No people ought to feel greater obligations to celebrate the goodness of the Great Disposer of events and of the destiny of nations than the people of the United States. His kind providence originally conducted them to one of the best portions of the dwelling place allotted for the great family of the human race. He protected and cherished them under all the difficulties and trials to which they were exposed in their early days. Under His fostering care, their habits, their

sentiments, and their pursuits prepared them for a transition in due time to a state of independence and self-government."

□ 2130

Then John Quincy Adams, who was the son of John Adams, John Quincy Adams was the sixth President. Some think he may have been the smartest President, but there's no way to know. He was a brilliant man, the youngest diplomat ever appointed in America when he was 11 years of age. He knew all the Founders. His father, John Adams, allowed him to accompany him to so many events and things. He knew the Founders. He knew the founding.

And John Quincy Adams in 1821 on July 4 said, "The highest glory of the American Revolution was this, it connected in one indissoluble bond the principles of the civil government with the principles of Christianity, wherefrom the day of the Declaration they, the American people, were bound by the laws of God which they all, and by the laws of the Gospel which they nearly all, acknowledged as the rules of their conduct."

Noah Webster, 1833, said: "The moral principles and precepts contained in the Scriptures ought to form the basis of all our civil constitutions and laws. All the miseries and evils which men suffer from, vice, crime, ambition, injustice, oppression, slavery and war, proceed from their despising or neglecting the precepts contained in the Bible."

Alexis de Tocqueville, 1835, said: "There is no country in the world where the Christian religion retains a greater influence over the souls of men than in America; and there can be no greater proof of its utility and of its conformity to human nature than that its influence is powerfully felt over the most enlightened and free Nation of the Earth."

Again, John Quincy Adams, he was defeated in 1828 for a second term by Andrew Jackson. Then in 1830, he believed it was God's call for him to run for Congress, run for the House of Representatives, after having been President. He was elected and served for 17 years in the House of Representatives, just down the hall in Statuary Hall. It was John Quincy Adams who was retained to represent the Africans who were aboard the *Armistad* in their case before the Supreme Court. Anthony Hopkins did a wonderful job of portraying John Quincy Adams in the movie "Armistad." I think in the movie his closing argument was around 10 to 12 minutes, whereas in real life it spilled into a third day.

John Quincy Adams, 1837, after he had been in the House 6 years, he said, "Is it not that the Declaration of Independence first organized the social compact on the Foundation of the Redeemer's mission upon Earth? That it

laid the cornerstone of human government upon the first precepts of Christianity?"

And all of these people believed. People in America will be able to worship the way they choose or do not choose because the Nation was founded upon Christian precepts that allowed that freedom as no other nation in the history of mankind.

Andrew Jackson, 1845, this was just a few weeks before his death, and of course, people that know Jackson know that he was quite a rounder and he had quite a life. But, again, as he was just a few weeks before his death, he knew he was going to meet his Maker. Andrew Jackson said these words: "Sir, I am in the hands of a merciful God. I have full confidence in His goodness and mercy. The Bible is true. I have tried to conform to its spirit as near as possible. Upon that sacred volume I rest my hope for eternal salvation, through the merits and blood of our blessed Lord and Savior, Jesus Christ." That was Andrew Jackson just a few weeks before his death, May 29, 1845.

Daniel Webster, considered the greatest orator probably of all times in this country, served in the House, served in the Senate, thought perhaps he might be President one day, but he urged a compromise which cost him the election. Whether he was right or wrong, he believed if we didn't have the Compromise of 1850 then the Nation was doomed, that there would be a civil war in 1850 from which the Nation may not survive.

So he did a very selfless thing and stood up and urged the Compromise of 1850, knowing that he would lose his base. But he believed it was to save the country. Daniel Webster said in 1852: "If we and our posterity shall be true to the Christian religion, if we and they shall live always in the fear of God and shall respect His Commandments, we may have the highest hopes of the future fortunes of our country. But if we and our prosperity neglect religious instruction and authority, violate the rules of eternal justice, trifle with the injunctions of morality, and recklessly destroy the political Constitution which holds us together, no man can tell how sudden a catastrophe may overwhelm us that shall bury all our glory in profound obscurity."

Daniel Webster, 1852.

Now the Senate Judiciary Committee in 1853 stated this as a committee: "We are a Christian people, not because the law demands it, nor to gain exclusive benefits or to avoid legal disabilities, but from choice and education; and in a land thus universally Christian what is to be expected, what desired, but that we shall pay due regard to Christianity?" Senate Judiciary Committee, January 19, 1853.

Abraham Lincoln, our 16th President, February 11, 1861, said this: "Unless the

great God who assisted Washington shall be with me and aid me, I must fail; but if the same Omniscient Mind and Mighty Arm that directed and protected him shall guide and support me, I shall not fail. Let us all pray that the God of our fathers may not forsake us now." Abraham Lincoln, February 11, 1861.

We can skip over to the President's inaugural address, 1865, again, Abraham Lincoln. He said: "Both" talking about both sides of the Civil War, the North and the South. He said: "Both read the same Bible and pray to the same God, and each invokes His aid against the other. The prayers of both could not be answered. That of neither has been answered fully. The Almighty has His own purposes. 'Woe unto the world because of offenses; for if it must needs be that offenses come, but woe to that man by whom the offense cometh.'"

Lincoln, in that same inaugural address, went on and said: "If we shall suppose that American slavery is one of those offenses which"—and he knew it was an offense. He knew it to his soul that slavery was an offense and that it would be difficult for God to ever bless America as long as slavery existed. And Christian people in this country did not treat their brothers and sisters as brothers and sisters. So Lincoln goes on in that address. And you can feel the analysis that he did as he went back and forth within himself trying to figure out how a just and mighty God could allow this type of injustice.

So Lincoln goes on and he says: "If we shall suppose that American slavery is one of those offenses which, in the Providence of God, must needs come, but which, having continued through His appointed time, He now wills to remove, and that He gives to both North and South this terrible war as the woe due to those by whom the offense came, shall we discern therein any departure from those divine attributes which the believers in a living God ascribe to Him?"

"Fondly do we hope, fervently do we pray, that this mighty scourge of war may speedily pass away. Yet, if God wills that it continue until all the wealth piled by the bondsman's 250 years of unrequited toil shall be sunk, and every drop of blood drawn with the lash shall be paid by another drawn with the sword, as was said 3,000 years ago, so it must still be said 'the judgments of the Lord are true and righteous altogether.'"

Lincoln went on: "With malice toward none, with charity for all, with firmness in the right as God gives us to see the right, let us strive on to finish the work we are in, to bind up the Nation's wounds, to care for him who shall have borne the battle and for his widow and his orphan, to do all which may achieve and cherish a just and

lasting peace among ourselves and with all Nations."

Abraham Lincoln, 1865.

Edward Everett, the Massachusetts Governor also served as U.S. Secretary of State, U.S. Senator, he spoke immediately before Lincoln's Gettysburg Address. He said this: "All the distinctive features and superiority of our Republican institutions"—and he wasn't talking about the Republican Party, he was talking about the Nation. This is considered a Republic. Senator Everett said the "superiority of our Republican institutions are derived from the teachings of Scripture."

William Seward was a U.S. Senator, a Governor of New York, Secretary of State under Lincoln. And it was interesting, Lincoln had such a diverse cabinet. Many of them didn't like each other, didn't like him, and yet he took all of that information together and made executive decisions.

William Seward said: "I know not how long a Republican Government can flourish among a great people who have not the Bible. But this I do know: that the existing government of this country never could have had existence but for the Bible. And, further, I do in my conscience believe that if at every decade of years a copy of the Bible could be found in every family in the land, its Republican institutions should be perpetuated."

1862, Andrew Johnson, he was Vice President, and he said: "Let us look forward to the time when we can take the Flag of our country and nail it below the cross, and there let it wave as it waved in the olden times, and let us gather around it and inscribe for our motto, 'Liberty and Union, one and inseparable, now and forever,' and exclaim: Christ first, our country next."

U.S. Grant, the 18th President, 1876, said this: "Hold fast to the Bible as the sheet-anchor of your liberties; write its precepts in your hearts and practice them in your lives. To the influence of this book we are indebted for all the progress made in true civilization and to this we must look as our guide in the future."

Now, Mr. Speaker, in reading these quotes, I think it is important for people to know I'm not trying to push my religion on anyone else. But I think it is imperative that we at least know where the Founders were, where the heart was of those who provided for this incredible government, the incredible Nation we have that I believe is the greatest in the history of mankind.

This was in the case of Church of the Holy Trinity v. the United States, in the opinion, February 29, 1892. The Supreme Court said: "Our laws and our institutions must necessarily be based upon and embody the teachings of the Redeemer of mankind. It is impossible that it should be otherwise and in this

sense and to this extent, our civilization and our institutions are emphatically Christian. This is a religious people. This is historically true. From the discovery of this continent to the present hour, there is a single voice making this affirmation. We find everywhere a clear recognition of the same truth. These and many other matters which might be noticed at a volume of unofficial declarations to the massive organic utterances that this is a Christian Nation." That was the Supreme Court in their opinion *Church of the Holy Trinity v. United States*, 1892.

Theodore Roosevelt, 1917, our 26th President, said: "In this actual world, a churchless community, a community where men have abandoned and scoffed at, or ignored their Christian duties, is a community on the rapid downgrade."

Warren G. Harding, our 29th President, 1920 said: "It is my conviction that the fundamental trouble with the people of the United States is that they have gotten too far away from the Almighty God."

Calvin Coolidge, our 30th President, 1923, said: "The foundations of our society and our government rest so much on the teachings of the Bible that it would be difficult to support them if faith in these teachings would cease to be practically universal in our country."

□ 2145

Franklin D. Roosevelt, October 6, 1935, said: We cannot read the history of our rise and development as a Nation without reckoning with the place the Bible has occupied in shaping the advances of the Republic. Where we have been the truest and most consistent in obeying its precepts we have attained the greatest measure of contentment and prosperity. Again, Franklin Roosevelt, 1935.

1943, President Hoover, in a joint statement with former First Ladies Mrs. Coolidge, Mrs. Roosevelt, Mrs. Taft, Mrs. Harrison and Mrs. Cleveland, gave this statement: The whole inspiration for our civilization springs from the teachings of Christ and the lessons of the prophets. To read the Bible for these fundamentals is a necessity of American life.

Harry Truman, our 33rd President, in 1952 said this: The basis of our Bill of Rights comes from the teachings we get from Exodus and St. Matthew, from Isaiah and St. Paul. I don't think we emphasize that enough these days. If we don't have a proper fundamental moral background, we will finally end up with a government which does not believe in rights for anyone but the State. Profound. That was Harry Truman, 1952.

Charles Malik, our ambassador to the United Nations from Lebanon and the president of the U.N. General Assembly in 1958, made this statement in 1958:

Whoever tries to conceive the American word without taking full account of the suffering and love and salvation of Christ is only dreaming. I know how embarrassing this matter is to politicians, bureaucrats, businessmen and cynics; but whatever these honored men think, the irrefutable truth is that the soul of America is at its best and highest, Christian. That was the U.N. ambassador and president of the U.N. General Assembly in 1958.

Now, Ronald Reagan, our 40th President, 1984, said: The frustrating thing is that those who are attacking religion claim they are doing it in the name of tolerance, freedom, and open-mindedness. Question: Isn't the real truth that they are intolerant of religion? They refuse to tolerate its importance in our lives. Ronald Reagan, 1984.

Now, I point out these quotes from our history. I could read volumes and volumes of quotes basically along the same lines, not trying to push Christian religion on anyone, but just so that people understand where we came from. It's incredible the amount of ignorance on the basis of this Nation, the foundation of this Nation.

Let me go to some of our Founders directly. Sam Adams. He was called, back at that time by those who knew and knew well, the "Father of the American Revolution." Samuel Adams was a signer of the Declaration of Independence. In the will of Samuel Adams he says this: I . . . recommend my soul to that Almighty Being who gave it, and my body I commit to the dust, relying upon the merits of Jesus Christ for a pardon of all my sins. That was the Father of the American Revolution, Samuel Adams.

In a letter written by Charles Carroll to Charles Wharton, Charles Carroll was a signer of the Declaration of Independence, one of the 56. He said: On the mercy of my Redeemer I rely for salvation and on His merits; not on the works I have done in obedience to His precepts.

William Cushing was the first Associate Justice appointed by George Washington to the Supreme Court. William Cushing in his will said: Sensible of my mortality, but being of sound mind, after recommending my soul to Almighty God through the merits of my Redeemer and my body to the Earth.

John Dickinson was also a signer of the Constitution. In his will he said: Rendering thanks to my Creator for my existence and station among His works, for my birth in a country enlightened by the Gospel and enjoying freedom, and for all His other kindnesses, to Him I resign myself, humbly confiding in His goodness and in His mercy through Jesus Christ for the events of eternity. Again, John Dickinson, signer of the Declaration of Independence.

John Hancock we know signed the Declaration larger than anyone else,

President of the Continental Congress in 1776 when the Declaration of Independence was signed and made public. In his will he said: I, John Hancock . . . being advanced in years and being of perfect mind and memory—thanks be given to God—therefore calling to mind the mortality of my body and knowing it is appointed for all men once to die (Hebrews 9:27), do make and ordain this my last will and testament . . . Principally and first of all, I give and recommend my soul into the hands of God that gave it, and my body I recommend to the Earth, nothing doubting but at the general resurrection I shall receive the same again by the mercy and power of God. Again, that was John Hancock.

Patrick Henry, the Governor of Virginia, a patriot, made that stirring speech that I gave on the radio in fifth grade, made this statement: This is all the inheritance I can give to my dear family—this was in his will—the religion of Christ can give them one which will make them rich indeed.

John Jay played such an important role in this Nation's founding and negotiations of treaties. I believe he helped negotiate the Treaty of Paris in 1783, and so many others, but he was also the first Chief Justice of the U.S. Supreme Court. In his will, Chief Justice John Jay said: Unto Him who is the author and giver of all good, I render sincere and humble thanks for His manifold and unmerited blessings, and especially for our redemption and salvation by His beloved son. He has been pleased to bless me with excellent parents, with a virtuous wife, and with worthy children. His protection has accompanied me through many eventful years, faithfully employed in the service of my country; His providence has not only conducted me to this tranquil situation, but also given me abundant reason to be contented and thankful. Blessed be His holy name. John Jay.

Daniel St. Thomas Jenifer was a signer of the Constitution. In his will he said: In the name of God, Amen. I, Daniel St. Thomas Jenifer . . . of disposing mind and memory, commend my soul to my blessed Redeemer.

Henry Knox, Revolutionary War general, extremely important to the success of the American Revolution, said in his will: First, I think it proper to express my unshaken opinion of the immortality of my soul or mind, and to dedicate and devote the same to the supreme head of the universe—to that great and tremendous Jehovah—who created the universal frame of nature, worlds, and systems in number infinite. To this awfully sublime Being do I resign my spirit with unlimited confidence of His mercy and protection.

John Langdon was a signer of the Constitution back in 1787. He also said: In the name of God, Amen. I, John Langdon, considering the uncertainty of life and that it is appointed unto all

men once to die—again, Hebrews 9:27—do make and ordain and publish this my last will and testament.

John Morton, signer of the Declaration of Independence, said in his will: With an awful reverence to the great Almighty God, Creator of all mankind, I, John Morton, being sick and weak in body but sound of mind and memory, thanks be given to Almighty God for the same, for all His mercies and favors, and considering the certainty of death and the uncertainty of the times thereof, do, for the settling of such temporal estate as it hath pleased God to bless me with in this life.

There are so many others, just one after another, vesting these same type things, signers of the Declaration of Independence, signers of the Constitution.

Jonathan Trumbull said this in his will: Principally and first of all, I bequeath my soul to God, the Creator and Giver thereof, and body to the Earth, nothing doubting but that I shall receive the same again at the General Resurrection through the power of Almighty God, believing and hoping for eternal life through the merits of my dear exalted Jesus Christ. That was Jonathan Trumble, who painted four of the paintings that are out here in our Rotunda.

One of the things that has run throughout this Nation, you go back to the Constitution, these were the Founders I've been quoting, those who were able to come together and have a Declaration of Independence, who sought, as Benjamin Franklin said, God's help in the revolution, and who sought him in the difficult, trying times after the Articles of Confederation were passed. And who they sought, as Benjamin Franklin pointed out in those great words I read, 1787, when afterwards they were finally able to come together with a constitution.

But as we know from our history, the Constitution was not afforded to all people as it should have been. They said, as these Founders I've read, that they were Christians, and yet as Christians they should have recognized that we could not expect God to bless America while we were treating our brothers and sisters by putting them in chains and bondage.

Martin Luther King came along after the Civil War. Abraham Lincoln, as I've read, made clear his beliefs in the Almighty and His grace and mercy and justice, and that's why he pushed for an end of slavery. But even still, it took Dr. Martin Luther King, Jr. and those who worked with him to bring about civil rights and an abdication of the supreme Constitution that we hold so dear to all people. It doesn't require that everyone receive equal things; it requires equal opportunity.

I would remind my friends that Martin Luther King, Jr. was an ordained Christian minister. He said in his letter

from Birmingham jail: But more basically, I am in Birmingham because injustice is here. Just as the prophets of the 8th century B.C. left their villages and carried their "thus saith the Lord" far beyond the boundaries of their home towns, and just as the Apostle Paul left his village of Tarsus and carried the Gospel of Jesus Christ to the four corners of the Greco-Roman world, so I am compelled to carry the gospel of freedom beyond my own home town. Like Paul, I must constantly respond to the Macedonian call for aid. That was in 1963. Profound words, Martin Luther King.

One of his quotes in 1963 from Birmingham jail: Whenever the early Christians entered the town, the people in power became disturbed and immediately sought to convict the Christians for being disturbers of the peace and outside agitators. But the Christians pressed on, and in the conviction that they were a colony of heaven called to obey God rather than man, small in number, they were big in commitment. They were too God-intoxicated to be astronomically intimidated. Powerful, powerful words, Martin Luther King.

Well, I think it's worth noting also, we have an original copy of the Treaty of Paris, 1783, located in the Department of State in a glass case. I didn't realize how that started until I saw that copy there, but it made sense once I saw it. In big bold letters at the top of the Treaty of Paris—this is the one that was negotiated in Paris in 1783 after surrendering at Yorktown to get England to sign onto a treaty indicating they would observe the United States' right to exist as an independent Nation.

It starts out in big block bold letters, "In the name of the most holy and undivided Trinity." When I first saw that I thought, I wonder why they would start like that. And then you realize, you're asking the nation of England to sign a treaty and pledging not to ever attack or fail to recognize its right to exist independently of England. What do you get them to swear under that is so important and so manifest that they would not dare go back on their word? Well, they decided at that time it was to start with the words, In the name of the most holy and undivided Trinity.

Those who are familiar with the War of 1812, 1814, we're up here on Jenkins Hill, where the Capitol was built, and the British proceeded across burning every public building, proceeded to the Capitol, set fire down the hall in Statuary Hall, what was then the House of Representatives, went down and set fire to the Senate Inn, and went to the White House, set fire there. The White House was terribly damaged inside.

□ 2200

The Capitol, by all rights, with the intensity of the fire and with the muni-

tions that were spread to make the fire get more hot, should have collapsed and fallen in on itself, but it didn't because a rain came and put out the fire.

By the way, the next day, there was such a huge, straight-line wind. Some thought it was tornadic, but most believed it was a straight-line wind. It was so intense that it blew their canons off their mounts. Some credit the wind with killing soldiers.

"As the British troops were preparing to leave, a conversation was noted between the British admiral and a Washington lady regarding the storm. The admiral exclaimed, 'Great God, Madam! Is this the kind of storm to which you are accustomed in this infernal country?'"

"The lady answered, 'No, sir. This is a special interposition of Providence to drive our enemies from our city.'" The weather drove them out. The American soldiers were not able to.

A little history about the White House nativity scene: It's Italian—made in Naples around the time of the United States War for Independence, the late 1700s. It has been on exhibit in the East Room of the White House during the holiday season since 1967. In 1999, a new tableau was made for the nativity scene. The design of the new display was inspired by historical Neapolitan presepios, which is the Italian term for "Christ," from the Baroque period, which incorporated architectural elements found in the 1700s.

That is a little bit about the nativity scene. There has been a lot said about that recently.

As far as the history of the White House Christmas tree, in 1889, the tradition of placing an indoor decorated tree in the White House began on Christmas morning during the Presidency of Benjamin Harrison. It was in 1895 that First Lady Frances Cleveland created a technology savvy tree when she hung electric lights on the White House tree, which was introduced into the White House in 1891.

There is just so much history with our Founding Fathers.

Franklin D. Roosevelt, December 24—obviously Christmas Eve—1934, said, "This is the second year that I have joined with you on this happy occasion. Then, as now, with millions of others, we celebrate the happy observance of Christmas."

"The year toward which we looked then with anticipation and hope has passed," Roosevelt goes on. "We have seen fulfilled many things that a year ago were only hopes. Our human life thus goes on from anticipation and hope to fulfillment. This year again, we are entitled to new hopes and new anticipations."

He goes on and he says, "Just across the street is the house he occupied 100 years ago, the house the people of the country have built for their Presidents. From its windows, I see this monument

to this man of courage." He is talking about Washington. "It is an inspiration to me as it should be to all Americans.

"And so let us make the spirit of Christmas of 1934 that of courage and unity. It is the way to greater happiness and well-being. That is, I believe, an important part of what the Maker of Christmas would have it mean.

"In this sense," Roosevelt says, "the scriptures admonish us to be strong and of good courage, to fear not, to dwell together in unity."

He said, "I wish you one and all, here and everywhere, a very, very Merry Christmas." Franklin Roosevelt.

I have a number of other speeches that he gave on Christmas. Time will not allow me to read all of those.

I will go to 1962, John F. Kennedy, when he said: "Ladies and gentlemen, Secretary Udall, members of the clergy: With the lighting of this tree, which is an old ceremony in Washington and one which has been among the most important responsibilities of a good many Presidents of the United States, we initiate, in a formal way, the Christmas season.

"We mark the festival of Christmas, which is the most sacred and hopeful day in our civilization. For nearly 2,000 years, the message of Christmas, the message of peace and goodwill towards all men, has been the guiding star of our endeavors.

"This morning, I had a meeting at the White House, which included some of our representatives from far countries in Africa and Asia. They were returning to their posts for the Christmas holidays. Talking with them afterwards, I was struck by the fact that, in the far-off continents, Muslims, Hindus, Buddhists, as well as Christians, pause from their labors on the 25th day of December to celebrate the birthday of the Prince of Peace.

"There could be no more striking proof that Christmas is truly the universal holiday of all men. It is the day when all of us dedicate our thoughts to others, when all are reminded that mercy and compassion are the enduring virtues, when all show by small deeds and large and by acts that it is more blessed to give than to receive."

He goes on to talk about the Christmas spirit.

As my time grows short here, I want to finish with a speech Ronald Reagan gave, his Christmas message in 1988.

He said: "The themes of Christmas and of coming home for the holidays have long been intertwined in song and story. There is a profound irony and lesson in this because Christmas celebrates the coming of a Savior who was born without a home.

"There was no room at the inn for the Holy Family. Weary of travel, a young Mary, close to childbirth, and her carpenter husband, Joseph, found but the rude shelter of a stable. There was born the King of Kings, the Prince

of Peace—an event on which all history would turn.

"Jesus would again be without a home, and more than once—on the flight to Egypt and during His public ministry when He said, 'The foxes have holes, and the birds of the air have nests, but the Son of man hath nowhere to lay his head.'"

Ronald Reagan goes on. "From His very infancy on, our Redeemer was reminding us that, from then on, we would never lack a home in Him. Like the shepherds to whom the angel of the Lord appeared on the first Christmas Day, we could always say, 'Let us now go even unto Bethlehem and see this thing which is come to pass, which the Lord hath made known unto us.'

"As we come home with gladness to family and friends this Christmas, let us also remember our neighbors who cannot go home themselves. Our compassion and concern this Christmas and all year long will mean much to the hospitalized, the homeless, the convalescent, the orphaned—and will surely lead us on our way to the joy and peace of Bethlehem and the Christ Child who bids us come. For it is only in finding and living the eternal meaning of the Nativity that we can be truly happy, truly at peace, truly home.

"Merry Christmas, and God bless you." Ronald Reagan.

Mr. Speaker, with that wish from Reagan, I do now hereby move that we adjourn.

BILLS AND JOINT RESOLUTIONS APPROVED BY THE PRESIDENT

The President notified the Clerk of the House that on the following dates he had approved and signed bills and joint resolutions of the following titles:

August 7, 2009:

H.R. 2245. An Act to authorize the President, in conjunction with the 40th anniversary of the historic and first lunar landing by humans in 1969, to award gold medals on behalf of the United States Congress to Neil A. Armstrong, the first human to walk on the moon; Edwin E. Hon. BARNEY FRANK, Chairman, Dec. 7, 2009.

EXECUTIVE COMMUNICATIONS,
ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5120. A letter from the Deputy Secretary, Department of Defense, transmitting authorization of 12 officers to wear the authorized insignia of the grade of major general, pursuant to 10 U.S.C. 777; to the Committee on Armed Services.

5121. A letter from the Secretary, Securities and Exchange Commission, transmitting the Commission's final rule — Amendments to Rules For Nationally Recognized Statistical Rating Organizations [Release No. 34-61050; File No. S7-04-09] (RIN: 3235-AK14) received November 30, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

5122. A letter from the Assistant General Counsel for Legislation, Regulation and Energy Efficiency, Department of Energy, transmitting the Department's "Major" final rule — Loan Guarantees for Projects That Employ Innovative Technologies (RIN: 1901-AB27) received December 9, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

5123. A letter from the Secretary, Department of Health and Human Services, transmitting the annual financial report to Congress required by the Medical Device User Fee and Modernization Act of 2002 (MDUFMA), covering FY 2008; to the Committee on Energy and Commerce.

5124. A letter from the Deputy Assistant Secretary for Export Administration, Department of Commerce, transmitting the Department's final rule — Wassenaar Arrangement 2008 Plenary Agreements Implementation: Categories 1, 2, 3, 4, 5 Parts I and II, 6, 7, 8, and 9 of the Commerce Control List, Definitions, Reports [Docket No.: 0908041218-91220-01] (RIN: 0694 AE58) received December 2, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Foreign Affairs.

5125. A letter from the Secretary, Department of Veterans Affairs, transmitting the Inspector General's semiannual report to Congress for the reporting period April 1, 2009 through September 30, 2009, pursuant to 5 U.S.C. app. (Insp. Gen. Act) section 5(b); to the Committee on Oversight and Government Reform.

5126. A letter from the Secretary, Department of Education, transmitting the fifty-ninth Semiannual Report to Congress on Audit Follow-Up, covering the period April 1, 2009 through September 30, 2009, pursuant to 5 U.S.C. app. (Insp. Gen. Act) section 5(b); to the Committee on Oversight and Government Reform.

5127. A letter from the Federal Co-Chair, Appalachian Regional Commission, transmitting the Commission's semiannual report from the office of the Inspector General for the period April 1, 2009 through September 30, 2009, pursuant to Section 5(b) of the Inspector General Act of 1978; to the Committee on Oversight and Government Reform.

5128. A letter from the Chairman, Broadcasting Board of Governors, transmitting the semiannual report on the activities of the Office of Inspector General for the period from April 1, 2009 to September 30, 2009, pursuant to 5 U.S.C. app. (Insp. Gen. Act), section 5(b); to the Committee on Oversight and Government Reform.

5129. A letter from the Acting Chief Executive Officer, Corporation for National and Community Service, transmitting the Inspector General's semiannual report to Congress for the reporting period April 1, 2009 through September 30, 2009; to the Committee on Oversight and Government Reform.

5130. A letter from the Associate General Counsel for General Law, Department of Homeland Security, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5131. A letter from the Secretary, Department of Labor, transmitting the Board's

semiannual report from the office of the Inspector General for the period April 1, 2009 through September 30, 2009, pursuant to Section 5(b) of the Inspector General Act of 1978; to the Committee on Oversight and Government Reform.

5132. A letter from the Acting Director, Office of Communications and Legislative Affairs, Equal Employment Opportunity Commission, transmitting the Commission's Fiscal Year 2009 Performance and Accountability Report; to the Committee on Oversight and Government Reform.

5133. A letter from the Chairman, Federal Communications Commission, transmitting Commission's Fiscal Year 2009 Agency Financial Report; to the Committee on Oversight and Government Reform.

5134. A letter from the Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; Federal Acquisition Circular 2005-37; Introduction [Docket: FAR 2009-0001, Sequence 8] received October 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

5135. A letter from the Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; FAR Case 2008-035; Registry of Disaster Response Contractors [FAC 2005-37; FAR Case 2008-035; Item I; Docket 2009-0033, Sequence 1] (RIN: 9000-AL30) received October 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

5136. A letter from the Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; FAR Case 2007-008, Limiting Length of Noncompetitive Contracts in "Unusual and Compelling Urgency" Circumstances [FAC 2005-37; FAR Case 2007-008; Item II; Docket 2007-0001, Sequence 14] (RIN: 9000-AK90) received October 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

5137. A letter from the Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; FAR Case 2008-026, GAO Access to Contractor Employees [FAC 2005-37; FAR Case 2008-026; Item III; Docket 2009-0013, Sequence 1] (RIN: 9000-AL25) received October 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

5138. A letter from the Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; FAR Case 2008-034, Use of Commercial Services Item Authority [FAC 2005-37; FAR Case 2008-034; Item IV; Docket 2009-0035, Sequence 1] (RIN: 9000-AL44) received October 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

5139. A letter from the Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; FAR Case 2008-0031, Limitations on Pass-Through Charges [FAC 2005-37; FAR Case 2008-031; Item V; Docket 2009-0034, Sequence 1] (RIN: 9000-AL27) received October 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

5140. A letter from the Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; FAR Case 2008-008, Award Fee Language Revision [FAC 2005-37; FAR Case 2008-008; Item VI; Docket 2009-0036, Sequence 1] (RIN: 9000-AL42) received October 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

5141. A letter from the Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; FAR Case 2009-003, National Response Framework [FAC 2005-37; FAR Case 2009-003; Item VII; Docket 2009-0037; Sequence 1] (RIN: 9000-AL37) received October 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

5142. A letter from the Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; Technical Amendments [FAC 2005-37; Item VIII; Docket 2009-0009; Sequence 5] received October 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

5143. A letter from the Senior Procurement Executive, General Services Administration, transmitting the Administration's final rule — Federal Acquisition Regulation; Federal Acquisition Circular 2005-37; Small Entity Compliance Guide [Docket: FAR 2009-0002, Sequence 8] received October 16, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

5144. A letter from the Acting Deputy Director, International Broadcasting Bureau, transmitting Federal Information Security Management Act (FISMA) Report; to the Committee on Oversight and Government Reform.

DISCHARGE PETITIONS— ADDITIONS OR DELETIONS

The following Members added their names to the following discharge petition:

Petition 5 by Mrs. BLACKBURN on H.R. 391: Randy Neugebauer, Devin Nunes, Michael R. Turner, Charles W. Boustany, Jr., Lamar Smith, John L. Duncan, Jr., Joseph R. Pitts, Tom McClintock, Ken Calvert, Jerry Lewis, Elton Gallegly, Judy Biggert, Trent Franks, Kevin McCarthy, Candice S. Miller, Walter B. Jones, Gus M. Bilirakis, Jo Ann Emerson, Thomas E. Petri, Roy Blunt, John Fleming, and Don Young.

The following Member added his name to the following discharge petition:

Petition 8 by Mr. NUNES on H.R. 3105: Roy Blunt.

EXTENSIONS OF REMARKS**SENATE COMMITTEE MEETINGS**

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference.

This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this infor-

mation, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, December 17, 2009 may be found in the Daily Digest of today's RECORD.

● This “bullet” symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

SENATE—Thursday, December 17, 2009

The Senate met at 10 a.m. and was called to order by the Honorable KIRSTEN E. GILLIBRAND, a Senator from the State of New York.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

O God, from whom all noble desires and all good counsels do proceed, crown the deliberations of our lawmakers with spacious thinking and with sympathy for all humanity. As they face perplexing questions, quicken in them every noble impulse, transforming their work into a throne of service. Lord, shower them with Your blessings, enabling them to see and experience evidences of Your love. May their consistent communication with You radiate in their faces, be expressed in their character, and be exuded in positive joy. Sanctify this day of labor with the benediction of Your approval. We pray in Your great Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable KIRSTEN E. GILLIBRAND led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, December 17, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable KIRSTEN E. GILLIBRAND, a Senator from the State of New York, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mrs. GILLIBRAND thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Madam President, following leader remarks, the Senate will resume consideration of the motion to concur with respect to H.R. 3326, the Defense Appropriations Act. The first hour will be equally divided and controlled between the two leaders or their designees. The Republicans will control the first 30 minutes and the majority will control the next 30 minutes. I filed cloture on the motion to concur. That vote will occur sometime in the next 10 or 12 hours.

PASSAGE OF CRITICAL LEGISLATION

Mr. REID. Madam President, we are going to finish this health care bill before we leave for the holidays.

For nearly an entire year, we have reached out to the other side, offered Republicans a seat at the table, tried to negotiate in good faith—nearly a whole year. Now we are closer than ever to fixing a badly broken system and doing more to make sure every American can afford to live a healthier life than this country has done in decades.

The Republicans have made their point. Through obstruction manuals, admissions that they believe stalling is good for electoral politics, and gambits like the one we saw yesterday; that is, forcing the full, hours-long reading of an amendment they did not like, and then complaining when that amendment they did not like was withdrawn, they have made their point to the American people. They have made it perfectly clear they have no interest in cooperating or legislating.

But the families and businesses who are suffering, hurting, and dying every single day have no time for these kinds of games. That is why we are going to finish health care whether the other side cooperates or not.

But health care is not the only critical issue this body faces. It is not the only critical issue to this country or before this body. Right now we have to complete a bill that supports the fighting men and women of this country, whether they are in Iraq, Afghanistan, Korea, Japan—all those many bases where tens of thousands of people are stationed. It is as simple as that.

Here are some of the good things in the bill that is now before the Senate, the message from the House. It funds more than \$100 billion for operations, maintenance, and military personnel requirements for the wars in Iraq and Afghanistan. Part of that money will also support preparations to continue

withdrawal from Iraq. There is more than \$23 billion for the equipment used by our servicemembers in Iraq and Afghanistan to do their jobs and stay safe. There is more than \$150 billion to train our troops and prepare them for battle. There is more than \$30 billion for the health care of our servicemembers, their families, and their children. It also gives our brave and valiant troops a pay raise of 3.4 percent this year.

This is not a partisan issue. Yesterday, this bill passed the House 395 to 34. More than 90 percent of Democrats voted for this bill. More than 90 percent of Republicans in the House of Representatives voted for this bill. That is because they know to our fighting men and women—these brave Americans half a world away, a lot of them—who wage two wars on our behalf, it is immaterial whether the leaders who will give them all the resources they need to succeed are progressives or conservatives. Surely, our troops who are on deployment after deployment after deployment spend more time counting the days until they can see their loved ones again than they do counting the political points scored by either side. They do not care most of the time, Madam President. They just do their jobs.

The House proved as much yesterday. The Senate should do the same today. We received this bill yesterday at 2 p.m. Are we going to wait until tomorrow to pass it? This simply is not right. Let's give our troops what they need to succeed, and do it now. Then let's get back to giving all Americans what they need to stay healthy.

These two bills—these two pieces of legislation—are about life and death. Our responsibility is too great to waste time playing political games.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

HEALTH CARE REFORM

Mr. MCCONNELL. Madam President, Senators on both sides acknowledge that the health care bill we are considering is among the most significant pieces of legislation any of us will ever consider—I think, I would argue, the most significant piece of legislation certainly in my time here. So it stands to reason we would devote significant time and attention to it.

Indeed, some would argue we should spend more time and attention on this

bill than most—if not every—previous bills we have considered.

The majority, obviously, disagrees. Why? Because this bill has become a political nightmare—a literal political nightmare to them—as evidenced by more and more public opinion polls, including the Wall Street Journal/NBC poll out this morning. They know Americans are overwhelmingly opposed to it, so they want to get it over with as quickly as possible.

Americans are already outraged at the fact that Democratic leaders took their eyes off the ball, rushing the process on a partisan line that makes the situation even worse.

Americans were told the purpose of reform was to reduce the cost of health care. Instead, Democratic leaders produced a \$2.5 trillion, 2,074-page monstrosity that vastly expands government, raises taxes, raises premiums, and wrecks Medicare. And they want to rush this bill through by Christmas? They want to rush this bill through by Christmas that does all of these destructive things. One of the most significant, far-reaching pieces of legislation in U.S. history, and they want to rush it.

Here is the most outrageous part. At the end of this rush, they want us to vote on a bill that no one outside the majority leader's conference room has seen yet. No one has seen it. That is right. The final bill we vote on is not even the one we have had on the floor of the Senate. It is the deal Democratic leaders have been trying to work out in private. That is what they intend to bring to the Senate floor and force a vote on before Christmas.

So this entire process is essentially a charade. But let's just compare the process so far with previous legislation for a little perspective.

Here is a snapshot of what we have done and where we stand on this bill.

The majority leader intends to bring this debate to a close as early as this weekend—4 days from now—on this \$2.5 trillion mistake. No American who has not been invited into the majority leader's conference room knows what will be in the bill.

The bill has been the pending business of the Senate since last November—less than 4 weeks ago—but we have actually only started the amendment process 2 weeks ago—just 2 weeks ago on the amendment process.

We have had 21 amendments and motions—less than 2 a day.

So let's look at how the Senate has dealt with previous legislation, arguably of lesser consequence than this one.

No Child Left Behind in 2001: 21 session days over 7 weeks, 44 rollcall votes, 157 amendments offered.

The 9/11 Commission/Homeland Security Act in 2002: 19 session days over 7 weeks, 20 rollcall votes, 30 amendments offered.

The Energy bill in 2002: 21 session days over 8 weeks, 36 rollcall votes, 158 amendments offered.

Now, Madam President, this is not an energy bill. This is an attempt by the majority to take over one-sixth of the U.S. economy—to vastly expand the reach and role of government into the health care decisions of every single American—and they want it to be done after one substantive amendment—one large, substantive amendment. This is absolutely inexcusable.

I think Senator SNOWE put it best on Tuesday. This is what she had to say Tuesday of this week. "Given the enormity and complexity," Senator SNOWE said, "I don't see anything magical about the Christmas deadline if this bill is going to become law in 2014."

And I think Senator SNOWE's comments on a lack of bipartisanship at the outset of this debate are also right on point. Here is what Senator SNOWE said in November of this year—late November:

I am truly disappointed we are commencing our historic debate on one of the most significant and pressing domestic issues of our time with a process that has forestalled our ability to arrive at broader agreement on some of the most crucial elements of health care reform. The bottom line is, the most consequential health care legislation in the history of our country and the reordering of \$33 trillion in health care spending over the coming decade shouldn't be determined by one vote-margin strategies—surely—

Surely—
we can and must do better.

Well, Senator SNOWE is entirely correct.

The only conceivable justification for rushing this bill is the overwhelming—overwhelming—opposition of the American people. Democrats know the longer Americans see this bill, the less they like it.

Here is the latest from Pew; it came out just yesterday. A majority—58 percent—of those who have heard a lot about the bill oppose it, while only 32 percent favor it.

There is no justification for this blind rush, except a political one, and that is not good enough for the American people, and that is not justification for forcing the Senate to vote on a bill that none of us have seen.

Americans already oppose the bill. The process is just as bad. It is completely reckless and completely irresponsible.

Madam President, I yield the floor.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2010

The ACTING PRESIDENT pro tempore. Under the previous order, the

Senate will resume consideration of the House message with respect to H.R. 3326, which the clerk will report.

The legislative clerk read as follows:

House message to accompany H.R. 3326, a bill making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes.

Pending:

Reid motion to concur in the amendment of the House to the amendment of the Senate to the bill.

Reid motion to concur in the amendment of the House to the amendment of the Senate with amendment No. 3248 (to the House amendment to the Senate amendment), to change the enactment date.

Reid motion to refer the amendment of the House to the Committee on Appropriations, with instructions, Reid amendment No. 3249, to provide for a study.

Reid amendment No. 3252 (to Reid amendment No. 3248), to change the enactment date.

Reid amendment No. 3250 (to amendment No. 3249), of a perfecting nature.

Reid amendment No. 3251 (to amendment No. 3250), of a perfecting nature.

The ACTING PRESIDENT pro tempore. Under the previous order, Senators are permitted to speak for up to 10 minutes each, with the first hour equally divided and controlled between the two leaders or their designees, with the Republicans controlling the first half and the majority controlling the second half.

The Senator from Arizona is recognized.

Mr. MCCAIN. Madam President, I ask unanimous consent that the Senator from Tennessee lead a colloquy including the Senator from Oklahoma, the Senator from Wyoming, myself, and the Senator from Kentucky.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ALEXANDER. Madam President, I thank the Senator from Arizona.

I was thinking as I listened to the Republican leader, I wonder if the Senator noticed the comments of the Governor of California on Monday. Governor Schwarzenegger said on "Good Morning America" that he supports the idea of overhauling health care, but: "the last thing we need," said Governor Schwarzenegger, "is another \$3 billion in spending when we already have a \$20 million deficit."

He was referring to one of the unintended consequences of this bill, which is big State costs for Medicaid being shifted to the States—unfunded mandates.

So here is Governor Schwarzenegger's advice, following up on the comments of the leader: "So I would say be very careful to the Federal Government."

This is from the Governor of California:

Before you go to bed with all this, let's rethink it. There is no rush from one second to the next. Let's take another week or two. Let's come up with the right package.

I wonder if the Senator saw it.

Mr. MCCAIN. I thank the Senator from Tennessee who also understands this issue as well as or better than anyone, having been a Governor and recognizing the problems the Governors face.

If I could step back a second, Governor Schwarzenegger is a very astute observer of the political scene in California. May I point out to my colleagues, in this morning's Wall Street Journal: "Democrats' Blues Grow Deeper in New Poll," and then: "Support for Health Overhaul Wanes."

There is some remarkable information concerning the mood and views of the American people, following on a Washington Post ABC News poll out yesterday that says 51 percent of Americans say they oppose the proposed changes to the system; 44 percent approve.

Thanks to the efforts of so many people, including our leadership, we have turned American public opinion because we have been informing them of the consequences of passage of this legislation.

Let me quote from the Wall Street Journal article:

More Americans now believe it is better to keep the current health system than to pass President Barack Obama's plan, according to a new Wall Street Journal-NBC News poll. Findings mark a shift from the fall when the overhaul enjoyed the edge over the status quo. According to the poll, 44 percent of Americans said it is better to pass no plan at all compared with 41 percent who said it is better to pass the plan.

What they are saying is: Don't do this government takeover; don't increase taxes; don't increase spending; don't increase the costs. It is a remarkable shift, thanks to informing the American people.

Could I mention a couple of other points made in this poll in the Wall Street Journal. In September, 45 percent of Americans said they wanted the plan passed; 39 percent wanted to "keep the current system." In December, in polling out today, only 41 percent of the American people want it passed, and 44 percent say keep the current system.

Then, of course, we have another interesting statistic:

Trust that the government will do what is right: 21 percent say always or most of the time; 46 percent say only some of the time; and 32 percent of the American people say almost never.

Of course, the anger and disapproval of this health care plan right now is the centerpiece of Americans' dissatisfaction of the way we do business.

Let me say finally, because my colleagues wish to speak, we don't have a bill. We don't have a bill. Here we have been debating all this time and we do not have legislation. This was one of the bills we were presented with, but we know that significant changes are being made behind closed doors. We

don't have a CBO estimate of the cost, do we? We understand they keep sending estimates over to CBO and it comes back and so they send them back, which probably is why last week the Senator from Illinois, the No. 2 ranking Democrat, said to me, I don't know what is in the bill either. I have the exact quote:

I would say to the Senator from Arizona that I am in the dark almost as much as he is, and I am in the leadership.

That is an interesting commentary.

Of course, the issue of the protection of the rights of the unborn is still unclear. That is a big issue for a lot of Americans. It is a big issue with me, and I know it is a big issue with my colleagues.

So here we are back, off of the bill itself, and apparently we are going to have some kind of vote on Christmas Eve or something such as that.

What the American people are saying now is, when they say keep the status quo, they are saying: Stop. Go back to the beginning. Sit down on a bipartisan basis and let's get this done, but let's get it done right.

Americans know that Medicare is going broke. Americans know that costs are rising too quickly, but Americans want us to do this right and not in a partisan fashion and not with a bill that costs too much, taxes too much, and deprives people of their benefits.

Mr. ALEXANDER. Madam President, I thank the Senator from Arizona for his comments. We have two physicians in the Senate, Dr. COBURN from Oklahoma and Dr. BARRASSO from Wyoming. I wonder if they would bear with me for a minute or two to reflect on something the majority leader said—minority leader said—I hope he is the majority leader before too long—and the Senator from Arizona.

The minority leader, the Republican leader, talked about a historic mistake. There has been a lot of talk around here about making history on health care. The problem is there are many different kinds of history, as the Republican leader has pointed out. It seems our friends on the other side are absolutely determined to pursue a political kamikaze mission toward a historic mistake which will be disastrous for them in the elections of 2010, but much more important, for the country.

I did a little research on historic mistakes. We have made them before in the United States. Maybe we would be wise to take Governor Schwarzenegger's advice and slow down and stop and learn from our history rather than try to top our previous historic mistakes, such as the Smoot-Hawley tariff. That sounded pretty good at the time in 1930 when the idea was to buy American, but most historians agree it was a mistake and it contributed to the Depression.

There was the Alien and Sedition Act of 1798. It sounded good at the time. We

were going to keep the foreigners in our midst—they were mostly French then—from saying bad things about the government, but it offended all of our traditions about free speech.

In 1969 Congress enacted the "millionaires' tax," they called it, to try to catch 155 Americans who weren't paying any tax. That turned out to be a historic mistake, because last year it caught 28 million American taxpayers until we had to rush to change it.

Just a couple more. There was the Catastrophic Coverage Act of 1988. That was well named, but it turned out to be a catastrophe, a congressional catastrophe. The idea was to help seniors deal with illness-related financial losses, but seniors didn't like paying for it. They surrounded the chairman of the Ways and Means Committee in Chicago and now the leader of that group is a Member of Congress.

Then there was a luxury tax on boats over \$100,000, another historic mistake, because it raised about half the taxes it was supposed to and it nearly sank the boating industry and it put 7,600 people out of jobs.

I ask my friends from Oklahoma and Wyoming—it is going to be a lot harder for Congress, if they try to fix the health care system all at once, to come back and repeal it than it was to repeal a boat tax. Do my colleagues think we ought to take the time to avoid another historic mistake?

Mr. COBURN. Well, I would answer my colleague from Tennessee. As a practicing physician, what I see as the historic mistake is we are going to allow the Federal Government to decide what care you are going to get. We are going to compromise the loyalty of your physician so that no longer is he or she going to be a 100-percent advocate for you, he or she is going to be an advocate for the government and what the government says. Because in this bill—even the one that is going to come—there are three different programs that put government bureaucracy in charge of what you can and cannot have. It doesn't consider your personal health, your past history, or your family history; they are going to say here is what you can and cannot do. That is called rationing. That is in the bill. That is coming. That is a historic mistake because it ruins the best health care system in the world in the name of trying to fix a smaller problem in terms of access, and it ignores the real problem.

The real problem is health care in this country costs too much. We all know this bill doesn't drive down costs, it increases costs. So your premiums go up, your costs go up, your care is going to go down because the government is going to tell you what you have to have.

I think that is a historic mistake and we have not addressed that. I wonder what my colleague from Wyoming thinks.

Mr. BARRASSO. Madam President, I agree completely. As a practicing physician taking care of people in Wyoming for 25 years, I have great concerns about this bill, what we know for sure is in it, which is \$500 billion of cuts in Medicare to our patients who depend on Medicare, and that is a system that we know is going broke. That is why there is a front-page story in one of the Wyoming papers: "Doctors Shortage Will Worsen." It is going to be harder on rural communities and others around the country if this goes through, and we know that because the folks who have looked at the parts of the bill we have seen have said that one-fifth of the hospitals in this country will be—if they are able to keep their doors open—operating at a significant loss 10 years from now. That is not the best future for health care in our country.

I had a telephone townhall meeting. People from all around the State of Wyoming were calling in and asking me questions, and they asked: What is in the bill? What is coming to the Senate?

We don't know yet. We haven't seen it.

They said: Well, when you find out, come home and let's have some more townhall meetings so we can have some input.

That is what we ought to do as a Senate. We ought to know what is in the bill and then let us go home and share it with our friends so they know. Because right now what the American people have seen of this bill, the 2,000-page bill, they rightly believe this will increase the cost of their own personal care.

Mr. COBURN. Madam President, if my colleague would yield, yesterday I asked the chairman of the Finance Committee to agree to a unanimous consent request that, in fact, for at least 72 hours the American people would get to see this bill; the Members of the Senate would get to see this bill; that there be a complete CBO score so we can have an understanding. He denied that request.

That comes back to transparency. The American people expect us to know exactly what we are voting on. They expect us to have read what we are voting on. His explanation was: I can't guarantee that. It presumes a certain level of perception on my part, an understanding of delving into the minds of the Senators that they could actually understand. What does understand mean? That is the kind of gibberish the American people absolutely don't want. They want us to know what we are voting on when we get ready to vote on this bill.

Mr. MCCAIN. Madam President, isn't that a violation of the commitment that was made that for 72 hours any legislation would be online, not just for us to see but for all Americans to see?

Could I ask the Senator from Kentucky, the Republican leader: Is it not the perception now that this bill is probably going to be pushed through? Through various parliamentary procedures, the majority will try to force a final vote on this legislation, no matter what, before we leave? Isn't that in contradiction to what the majority of the American people are saying, that they want us to do nothing? Is this a responsible way to govern, to have the Senate in round the clock, 24 hours, people on the floor, quorum calls and all this kind of stuff; and there would also be no amendments allowed at that time for us to at least address some of the issues of this bill that begins cutting Medicare by \$500 billion, increases taxes by \$500 billion on January 1, and in 4 years begins spending \$2.5 trillion? Is this a process the American people are reacting to in a negative fashion, obviously, by polling data?

By the way, I ask unanimous consent that the Wall Street Journal article entitled "Democrats' Blues Grow Deeper in New Poll" and "Support for Health Overhaul Wanes" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Dec. 17, 2009]

DEMOCRATS' BLUES GROW DEEPER IN NEW POLL

(By Peter Wallsten)

WASHINGTON.—Less than a year after Inauguration Day, support for the Democratic Party continues to slump, amid a difficult economy and a wave of public discontent, according to a new Wall Street Journal/NBC News poll.

The findings underscored how dramatically the political landscape has changed during the Obama administration's first year. In January, despite the recession and financial crisis, voters expressed optimism about the future, the new president enjoyed soaring approval ratings, and congressional leaders promised to swiftly pass his ambitious agenda.

In December's survey, for the first time, less than half of Americans approved of the job President Barack Obama was doing, marking a steeper first-year fall for this president than his recent predecessors.

Also for the first time this year, the electorate was split when asked which party it wanted to see in charge after the 2010 elections. For months, a clear plurality favored Democratic control.

The survey suggests that public discontent with Mr. Obama and his party is being driven by an unusually grim view of the country's status and future prospects.

A majority of Americans believe the U.S. is in decline. And a plurality now say the U.S. will be surpassed by China in 20 years as the top power.

Democrats' problems seem in part linked to their ambitious health-care plan, billed as the signature achievement of Mr. Obama's first year. Now, for the first time, more people said they would prefer Congress did nothing on health care than who wanted to see the overhaul enacted.

"For Democrats, the red flags are flying at full mast," said Democratic pollster Peter

Hart, who conducted the survey with Republican pollster Bill McInturff. "What we don't know for certain is: Have we reached a bottoming-out point?"

The biggest worry for Democrats is that the findings could set the stage for gains by Republican candidates in next year's elections. Support from independents for the president and his party continues to dwindle. In addition, voters intending to back Republicans expressed far more interest in the 2010 races than those planning to vote for Democrats, illustrating how disappointment on the left over attempts by party leaders to compromise on health care and other issues is damping enthusiasm among core party voters.

But public displeasure with Democrats wasn't translating directly into warmth for Republicans. Twenty-eight percent of voters expressed positive feelings about the GOP—a number that has remained constant through the Democrats' decline over the summer and fall. Only 5% said their feelings toward the Republicans were "very positive."

And in one arena, Afghanistan, Mr. Obama appeared to have some success in winning support for his planned troop surge. Liberals remain largely opposed to the strategy, but in fewer numbers compared with before Mr. Obama made his case in a speech at West Point. Overall, by 44% to 41%, a plurality believe his strategy is the right approach.

Still, the survey paints a decidedly gloomy picture for Democrats, who appear to be bearing the brunt of public unease as unemployment has risen from 7.6% to 10% since Mr. Obama took office. Just 35% of voters said they felt positively about the Democratic Party, a 14-point slide since February. Ten percent felt "very positive."

"Overall, it's just a depressing time right now," said Mike Ashmore, 23 years old, of Lansdale, Pa., an independent who supported Mr. Obama last year but now complained about the president's lack of action on jobs.

Julie Edwards, 52, an aircraft technician for Boeing Co. in Mesa, Ariz., said she voted Democratic in the past two elections but wasn't sure how she would vote next time. She wondered why Wall Street firms were bailed out when average Americans needed help. "We can bail out Wall Street, but everybody else has to suffer in spades for it," she said.

Democratic leaders, while bracing for losses next year, have argued that unlike the 1994 elections, in which Republicans gained 54 seats and took the House majority, Democrats would survive 2010 in part because they are taking steps to avoid that possibility. Republicans must gain 41 seats to take control.

House Speaker Nancy Pelosi said Wednesday that Democrats "fully intend to be in the majority" after November 2010, and she was now shifting to "campaign mode" to help candidates. Party officials are leaning on a number of longtime colleagues to fight for their seats rather than retire.

The Journal/NBC survey found Ms. Pelosi's presence on the campaign trail could do more harm than good. Fifty-two percent said they would be less likely to vote for a candidate who agreed with the speaker almost all the time, compared with 42% who felt that way about candidates siding with Republican leaders.

For Mr. Obama, who has relied on his personal popularity to retain the clout he needs to enact his legislative agenda, the survey pointed to troubling signs.

A majority for the first time disapproved of his handling of the economy. And the

public's personal affection for the president, a consistent strong suit, has begun to fray. Fifty percent now feel positive about him, six points lower than in October and an 18-point drop since his early weeks in office.

Democrats' troubles can be attributed in part to changing feelings among some core supporters. A third of voters 34 and under, a group that turned out heavily for Democrats last year, feel negative toward the Democratic Party. And just 38% of Hispanics feel positive, down sharply from 60% in February.

The survey, which was conducted Dec. 11-14, has a margin of error of 3.1 percentage points.

[From the Wall Street Journal, Dec. 17, 2009]

SUPPORT FOR HEALTH OVERHAUL WANES

(By Janet Adamy)

The public is turning against an overhaul of the health-care system, complicating Democrats' effort to pass a sweeping bill in the Senate.

More Americans now believe it is better to keep the current health system than to pass President Barack Obama's plan, according to a new Wall Street Journal/NBC News poll. The findings mark a shift from the fall, when the overhaul enjoyed a slight edge over the status quo. They could make it more difficult to get wavering lawmakers on board as the Senate prepares to vote on the measure as soon as next week. Some Democrats expect support will rebound if they can pass a bill quickly and start selling it.

According to the poll, 44% of Americans said it is better to pass no plan at all, compared with 41% of Americans who said it's better to pass the plan. In early October, 45% of respondents preferred passing a bill, while 39% preferred passing no bill. Uninsured people were among those who have grown less supportive of the plan.

In seeking support for his top domestic priority, Mr. Obama has said the status quo wasn't acceptable because insurance premiums were rising sharply and government insurance programs were headed toward insolvency. Republicans have argued that many Americans could be worse off, particularly the elderly, because the legislation contained hundreds of billions of dollars in cuts to health-care providers through Medicare. The legislation would extend health-insurance coverage to at least 30 million more Americans by widening the Medicaid federal-state insurance program for the poor and providing subsidies to lower earners to help them buy coverage.

The idea of creating a government-run health-insurance option still enjoys considerable support. Democrats dropped the idea from the Senate version of the health bill. When asked what they thought of removing the public option, 45% of respondents said that wasn't acceptable, while 42% called it acceptable.

Respondents also favored letting people buy into Medicare starting at age 55, another idea Democrats abandoned to win the support of centrists needed to pass the bill in the Senate.

Democrats "clearly have irritated their own base in a way that has dropped their enthusiasm for their own plan," said Bill McInturf, a Republican pollster who conducted the Wall Street Journal/NBC News poll with Democratic pollster Peter Hart.

In September, 81% of liberal Democrats thought the health plan was a good idea, and 6% thought it was a bad idea. In the most recent survey, 66% of liberal Democrats called it a good idea, while 13% called it a bad idea.

House Speaker Nancy Pelosi suggested the decline in support for the health legislation was due to "mischaracterization" by opponents. She predicted views would turn around when the House and Senate coalesced around a single bill and the president began selling it to the public. "It's very hard to merchandise health care until you have a bill," she said.

Mr. McCONNELL. Madam President, I say to my friend from Arizona, with reference to the issue of the process, it has been a bit of a charade—in fact, a whole charade. We have been out here for 2 weeks on the amendment process. We have had 21 votes, many of them have been side-by-sides, in order to cover the majority against the potential downside of voting to cut Medicare and voting to raise taxes.

But there is no serious effort to engage in any kind of genuine amendment process, such as the Senator from Arizona and I have been involved in here for quite a while. Then the bill, which we are actually only allowed to have about two votes a day on, is not the real bill. The real bill—we know the core of it, but there are a lot of things around the edges being slipped in and slipped out, and they want to jam the public before Christmas, as the Senator from Arizona indicated.

How arrogant is that? They think: We know better than you, we know better than the Republicans, and we know better than the public. Why don't all of you—the Republicans and the public—sit down and shut up and leave it to us and we will take care of it before Christmas.

Mr. ALEXANDER. I say to the Republican leader and the Senator from Kentucky, I believe there is another bit of history being made. This process is historic in its arrogance. This isn't very hard to understand. The proposal is to take 17 percent of our economy, affecting 300 million Americans, and nothing could be more personal, as the Republican leader has said, than our health care.

But now we don't have the bill. We do not have the bill. It is being written in secret in another room. If there is any part of this debate that went through to every single household in America, I believe it was when the Finance Committee voted down a motion—the Democrats voted down a motion that the bill should be on the Web for 72 hours so that the American people could see the text, know what it costs, and know how it affects them.

Eight Democratic Senators wrote the Democratic leader and said they want to insist that they know what the text is, and that they have the official score from the Congressional Budget Office, and that they have it for 72 hours before we move to vote.

We don't have the bill. We don't have the official score from the CBO. Seventy-two hours is three more days, and even though eight Democratic Senators and all the Republican Senators

said we want to know what it costs, know what it is, and how it affects us, they want to run it through before Christmas.

Mr. MCCAIN. May I mention to my colleague that maybe the reason why they don't want it to be online for 72 hours is because when they examined what we have—on page 324 in this bill is an \$8 billion tax on individuals who have nongovernment approved plans. On page 348 is a \$28 billion tax on businesses that cannot afford to offer insurance to their employees. On page 1979: Raises an almost \$150 billion tax on many middle-class workers using so-called Cadillac health insurance plans. Page 1997: Will cost families and individuals an additional \$5 billion by prohibiting the use of savings set aside for health care expenses through health savings accounts. Page 2010: Will make the cost of lifesaving medicine more expensive by taxing pharmaceutical research firms an additional \$22 billion. The list goes on and on, including on page 2040: Increasing Medicare payroll taxes by \$53.8 billion.

That may be a reason why it is going to be difficult for them to win passage of this after 72 hours of examining this bill.

Mr. McCONNELL. It makes this bill, in addition to all of the other problems, a job killer. With unemployment at 10 percent, there is a big tax increase on a variety of different Americans, as Senator McCain pointed out, in addition to all of its other problems—substantive problems, process problems. It is a job killer in the middle of a very difficult recession.

Mr. COBURN. I say to my colleagues that one of the things President Obama said he wanted to have was transparency. There has been no transparency in the process. That is why at least if there is not going to be transparency in the process, we ought to at least have it transparent to the American people for 72 hours. This is a quote from the chairman of the Finance Committee:

I think it is impossible to certify that any Senator will fully understand.

We are going to have a 2,000-plus page bill, and the chairman of the Finance Committee says he thinks it is going to be impossible to certify that any Senator will fully understand this bill. That is the best reason I know not to pass this bill, because if we don't understand it, you can bet the American people aren't going to understand it.

Mr. MCCAIN. When more Americans begin to understand it, they don't want it. That is thanks to the efforts made all over this country to educate the American people about what the impact of the bill will be.

Mr. BARRASSO. Following along what the Senators are saying, that is why the support of the American people for the bill is at an all-time low. It is at the lowest level of support ever.

According to this NBC poll, fewer than one out of three Americans support this bill. They don't know all that is in it, but they don't like what they see so far, because they believe, in overwhelming numbers, that the cost of their own care will go up, that this will add to the deficit, it will hurt the economy, and their health care would actually be better if we pass nothing.

So why would the American people support a bill that is going to cost them more personally and when their health care will get worse? That is not the value the American people have ever wanted.

That is what I hear from patients at home, and it is what I hear on telephone town meetings. That is what we are hearing in all of our States. This is what the American people continue to say: Do not pass this bill.

As our leader said, we do need health care reform, and Dr. COBURN certainly knows that. But it is not this reform that we need.

Mr. ALEXANDER. We come to the floor every day and point out the problems with the bill. We don't have a bill now, we can't read it, and we don't know how much it costs or how much it affects the American people. It raises taxes and premiums. It will increase the debt, because it doesn't include things such as the physicians Medicare reimbursement. It cuts Medicare by \$1 trillion over 10 years once it is fully implemented.

We point out what we think should be done. My colleagues have talked about it many times. Instead of wheeling in another 2,000-page bill, we should focus on the goal of reducing costs, and we should take several steps toward doing that. The Senator from Arizona talks about one of those things, which is reducing the number of junk lawsuits against doctors. I don't think that is in the bill, unless it is secretly being added in the back room today.

Mr. MCCAIN. Well, I don't think that is being added today. Again, I also point out that Americans are now against passage of this legislation. But in that polling data, it is very interesting, also, the majority of seniors, by much larger numbers—the actual beneficiaries of Medicare—are turning against it, and the intensity of Americans against it—which is harder to gauge in a poll—is incredible.

If the responses that our efforts are getting are anything close to indicative of the mood of the American people, and the intensity of it, it is probably as great as I have ever seen in the years that I have had the privilege of serving in the Congress of the United States.

This polling data says more Americans now believe it is better to keep the current health system than to pass President Obama's plan. That is a message being sent, and the intensity is higher than any I have ever observed in

my years of service. I thank them for that.

There is a chance that we can stop this, and we start in January. We would be willing to come back and sit down and negotiate, with the C-SPAN cameras on—as the President said or committed he would do as a candidate. We would sit down together here, at the White House, or anywhere, and we can fix this system that we all know needs fixing.

As the Senator from Oklahoma said, it is the cost that has to be addressed, not the quality.

Mr. COBURN. I want to bring up an example. We are going to see this time and time again if the bill goes through. We had the U.S. Preventive Health Task Force put out a recommendation on breast cancer screening through mammography on the basis of cost. They said it is not cost effective to screen women under 50 with mammograms, because you have to screen 1,900 before you find 1 breast cancer. On cost, they are right; but over 50, you have to screen 1,470.

So what we had was a decision made on cost, not on quality, not on patients, but based on cost. We fixed that as part of an amendment to this bill. We actually fixed that. There are three different agencies within this bill that are going to do the same thing. Every time they make a ruling based on cost, not on clinical outcomes and what is best for patients, are we going to fix it? No. We are transferring the care of the American patient to three bureaucracies within the Federal Government, and they are going to decide what you have to do. If you think about it, this week the wife of a Member of this body was diagnosed with breast cancer. She was diagnosed through a mammogram. Under that task force's recommendation, she would not have gotten that mammogram.

Mr. MCCAIN. I ask the Senator from Oklahoma, would that aspect of this bill come to light if it hadn't been for the recommendation that was made by another similarly acting policymaking body? In other words, that is what triggered the investigation of what was in this bill, which would have had exactly the same effect. So if we hadn't had that information of a recommendation by another government policymaking bureaucracy, we would not have known about this until the bill would have taken effect.

Mr. COBURN. So there is no transparency. What we do know is that we are going to have three organizations, the Medicare Advisory Commission, the Cost Comparative Effectiveness Panel, and the U.S. Preventive Health Task Force that will tell everybody in America what they are going to receive.

Mr. MCCAIN. This example wouldn't have been known if it hadn't been for the actions of the bureaucracy. Doesn't

that bring into question what else is buried in this 2,000-page piece of legislation?

Mr. COBURN. What are the unintended consequences of this that they don't know? What we do know is there are 70 new Government programs that will require over 20,000 new Federal employees, and there are 1,690 different times when the Secretary of HHS will write rules and regulations about your health care in America—the Secretary, not your doctor; your doctor isn't going to write the regulations. The Secretary of HHS is going to write the rules.

Mr. MCCAIN. Let me point out again that we don't know what the CBO estimate is, because we know the majority leader keeps bouncing proposals back and forth to CBO. That is why we haven't had CBO information now for many days. But there is the Commission for Medicare and Medicaid, which clearly points out that this legislation would increase taxes dramatically, increase costs dramatically, decrease care, and it would have the effect of forcing people not only out of the system, but even if they are in the Medicare system, they would not have physicians to provide the care, because more and more physicians would fail to treat Medicare patients.

Mr. COBURN. So we go back to the 72 hours. We are going to get a new bill, but we will not have the opportunity to amend it. We are not going to be able to read it and study it, nor are the American people. What do you think the outcome of that will be?

Mr. MCCAIN. I think we know what the outcome will be. We will either be able to reflect the feelings and intense feelings of the majority of the American people about this legislation and say let's go back to square one and all commit to a bipartisan approach to this issue or we will see jammed through on Christmas Eve legislation that will have the most far-reaching effects and devastating effects, I think, not only on our ability to provide much-needed medical care to all of our citizens, but also an impact that would be devastating on the debt and deficit, upon which we have laid an unconscionable burden already.

We have two choices—to go back to the beginning and enact many reforms we can agree on—and there are many we could agree on immediately on a bipartisan basis; as the Senator from Tennessee pointed out, there has never been a fundamental reform made in modern history that was not bipartisan—or we are going to see jammed through, over the objections of a majority of Americans, legislation that they have never seen, read, or understand.

That is the choice we have. That is what it is boiling down to. I think that, frankly, the American people should be heard, not a majority over on the other side.

Mr. BARRASSO. The American people are saying: Don't cut my Medicare, don't raise my taxes, don't make things worse than they are right now, and this bill cuts Medicare, raises taxes, and for people depending on a health care system in this country this makes things worse.

Mr. MCCAIN. By the way, could I mention, if you live long enough, all things can happen. I now find myself in complete agreement with Dr. Howard Dean, who says we should stop this bill in its tracks; we should go back to the beginning and have an overall bipartisan agreement. Dr. Dean, I am with you.

The PRESIDING OFFICER (Mr. BENNET). The Senator's time has expired.

The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I ask unanimous consent that I may speak up to 20 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, I have sought recognition to comment about the Patient Protection and Affordable Care Act. It has been an extraordinary legislative process with a good bit of the calendar year 2009 taken up with very intensive work to try to pass health care reform. At the moment, there is still some doubt as to what will happen with the bill. The Congressional Budget Office has not yet submitted a report on the so-called managers' package.

There are still some concerns being expressed by some Senators. I can understand the frustration that some have had as we have moved away from a public option. I have been an advocate of a robust public option and think it ought to be part of the legislation.

The public option is what it says. It is an option. There have been efforts made to demagog the issue by saying it is a takeover by the Federal Government. It is not. The private insurance industry remains in the field, and this is one option.

As President Obama has put it, it is an option to try to keep the private insurance companies honest. We have seen, in the past several months, very large increases in premiums for small business. The reports have been that those increases in premiums have come from Wall Street pressure on the insurance companies to try to increase their profits before there is legislation. The public option would be a forceful factor dealing there.

When the objections were raised to the public option and in an effort to find 60 votes—it is difficult when you have no help at all from the Republican side of the aisle, illustrated by the performance just put on with their prepared colloquy—it is not easy to find everyone in agreement. Then there was an effort to move to expand Medicare. I think that is a fallback position that would have been very helpful.

There are some who are contending that people who are disappointed with the lack of a public option and disappointed from the retreat of expanding Medicare say we ought to start over and begin again. I can understand that frustration.

My own view, after thinking it through very carefully, is we ought to proceed and do as much as we can this year, realizing that some of the tough legislative achievements take a period of time to accomplish. But the Civil Rights Act of 1957 was necessary, although it did not go as far as people would have liked then, to get the Civil Rights Act of 1964. Again, it did not go as far as people would have liked, but we did find the Voting Rights Act of 1965. We have to find times when we have to build incrementally on these matters.

I have been in the Senate following the elections of 1980, and I have seen matters take a very substantial period of time. While it is not on the subject, we were trying to provide more than 100,000 jobs in Pennsylvania by deepening the channel. The authorization came in 1983. It took until 1992 to get the Corps of Engineers to agree on funding. Now it has \$77 million. We are still in court, but it is going to move forward. I do not expect health care legislation to take that kind of a long term, but it is a matter which does take some time.

It is my hope we will yet improve this bill. It is my hope that when the bill goes to conference, we will find a way, perhaps, even to bring back the public option in a refined sense. The public option is in the House bill.

One Republican Senator has stated opposition on the ground that there has not been time enough to review the bill. It is complicated. I think there has been time enough to review the bill. But I respect the view of the Senator on the other side of the aisle. When the bill goes to conference, that Senator will have an opportunity to review the bill further. That Senator has shown some inclination to support the bill, having voted it out of the Finance Committee.

Another Republican Senator has commented that the bill has been very greatly improved, not sufficiently for the taste of that Senator, but perhaps we will find a way to improve the bill. We still do have a bicameral legislature. We do have the House of Representatives which has the public option.

Comments were made about the fall of the expansion of Medicare on the ground it was considered in too brief a period of time, not enough time to digest it, not enough time to think through. We will have, in the month of January, some time to consider that further, and in conference we may well find we are able to improve the bill. We cannot get to conference unless we pass the bill out of the Senate.

I was asked yesterday how will I respond to my constituents if we have the bill which has had so much taken from it. I said: A more relevant question or an equally relevant question is how will I respond to my 12 million constituents in Pennsylvania if we go home with nothing. If we have 80 percent accomplished, then that is a starting achievement.

It may well be it will take the campaign in 2010. If this Congress will not pass a bill with a robust public option, it could well be a campaign issue.

I believe my colleagues on the other side of the aisle may well be misreading the American people. I believe the American people do want health reform. It does take time for the American people to understand the ramifications of it. But this may well be a campaign issue in 2010. The 112th Congress may have a different view as to how we ought to proceed.

During the month of August, when I was making the rounds of town meetings in Pennsylvania, in accordance with my habit to cover almost every county almost every year, when I got to the first town meeting, the second Tuesday in August, the first week we were in recess, I found instead of the customary 85 or 100 people, more than 1,000 people and 3 national television sound trucks—CNN, MSNBC, and FOX. There were a lot of vituperative statements. One man approached me apoplectic and said the Lord was going to stand before me. I think he got mixed up. I think he meant to say I was going to stand before the Lord. Senators are reputed to have power but not quite that much power. I think the public tenor is considerably more favorable to health care insurance today than it was then. After the 2010 election, it may be substantially more favorable.

We have to move ahead with building blocks, and we do have a chance to improve the bill in conference.

I point to the provisions of the bill as to what we have. We have very significant insurance reforms. We have eliminating discrimination based on pre-existing conditions. We have new health insurance exchanges. We have an elimination of a cap. We cover many of the uninsured, expanding to some 33 million additional people. We have substantial more small business assistance, preventive care, increased health workforce. We have improvements in the health delivery system. We have fiscal responsibility that this bill will not add to the deficit but will, in fact, reduce the deficit in the first decade by some \$120 billion and in the second decade by some \$650 billion.

We have a provision I have pressed in earlier legislation, S. 914, to provide for transformational medicine.

During my tenure as chairman of the Appropriations Subcommittee on Health and Human Services, I took the lead, with the concurrence of Senator

HARKIN, who was then in the minority, to increase NIH funding from \$12 billion to \$30 billion and then in the stimulus package to add \$10 billion more. There has been a gap on what we call transformational medicine, going from the so-called bench in the laboratory to the bedside. While I have not seen the final version of the managers' packet, I am informed that provision will be a part of the bill.

We have very important measures for preventive care, for annual exams, which will cut off many chronic illnesses which are so debilitating and so expensive.

I have pressed an amendment, which is pending, to have mandatory jail sentences for at least 6 months for someone convicted of \$100,000 or more of Medicare or Medicaid fraud. Jail sentences are a real deterrent. The experience I had as Philadelphia's DA showed me that when you have a fine, that is added onto the cost of doing business and is passed on to the consumers.

I ask unanimous consent to have printed in the RECORD a statement of the provisions which I briefly summarized which are very favorable in this bill and a statement of testimony at a Criminal Justice Subcommittee to show the value of deterrence.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PROVISIONS IN THE PATIENT PROTECTION AND
AFFORDABLE CARE ACT
GENERAL INSURANCE REFORMS

Insurance companies will be barred from discriminating based on pre-existing conditions, health status, and gender.

New health insurance Exchanges will make coverage affordable and accessible for individuals and small businesses.

UNINSURED

With a reported 47 million people without health insurance the status quo is not acceptable. Additionally, there are millions more Americans who are underinsured, with health insurance that is inadequate to cover their needs.

In 2007, 1,206,115 Pennsylvanians under age 65 were uninsured for the entire year, which is 11.3 percent of the under 65 population.

The analysis found that the legislation would extend coverage to 33 million more Americans, bringing the percentage of Americans with health insurance to 93%.

The bill covers 10% more Americans with only a 0.7 percent increase in spending—a change of only 0.1% of GDP in 2019.

SMALL BUSINESS ASSISTANCE

In the current health insurance market small business are at a distinct disadvantage in providing health insurance to their employees. In a recent study it was found that 58 percent of small employers do not offer health insurance, with nearly 50 percent stating that they can't afford it.

The Patient Protection and Affordable Care Act address health insurance problems facing small businesses by providing more health plan choices, fairness in the marketplace and improving affordability with tax credits.

PREVENTATIVE CARE

The Patient Protection and Affordable Care Act will eliminate co-pays and

deductibles for recommended preventive care, provide individuals with the information they need to make healthy decisions, improve education on disease prevention and public health, and invest in a national prevention and public health strategy.

INCREASE HEALTH WORKFORCE

Currently, 65 million Americans live in communities where they cannot easily access a primary care provider, and an additional 16,500 practitioners are required to meet their needs. The Patient Protection and Affordable Care Act will address shortages in primary care and other areas of practice by making necessary investments in our nation's health care workforce.

IMPROVEMENTS IN THE HEALTH DELIVERY
SYSTEM

The legislation we are considering will establish an Independent Medicare Advisory Board to present Congress with proposals to reduce cost growth and improve quality for Medicare beneficiaries. In years when Medicare costs are projected to be unsustainable, Board proposals will take effect unless an alternative is adopted by Congress. This type of reform is necessary to ensure the financial future of Medicare.

Preventable hospital readmissions diminish quality and efficiency in the health care system. Nearly 20 percent of Medicare patients who are discharged from the hospital are readmitted within 30 days. The Medicare Payment Advisory Commission (MedPAC) estimates that Medicare spent \$12 billion on potentially preventable hospital readmissions in 2005, which would be more than \$15 billion today.

The bill also begins the payment system reform of bundling Medicare provider payments as a lump sum fee—instead of paying a fee for each service—encourages care coordination and streamlining. It removes the incentive to generate additional services for added reimbursement.

FISCAL RESPONSIBILITY

The legislation is fully paid for and reduces the deficit in the next ten years and beyond.

The revenue provisions in the bill focus on paying for reform within the health care system.

THE COST OF INACTION

In 2000, family health insurance purchased through an employer cost \$6,438 and consumed 13 percent of median family income. In 2008, the same family health insurance cost \$12,680, a 97 percent increase over the 2000 cost, consuming approximately 21 percent of median family income. In 2016, the same insurance is projected to cost \$24,291, nearly double the 2008 cost, which will consume 45 percent of projected median family income.

Let's kind of go back to (inaudible). Can you—each one of you, starting with Mr. Perkins, talk about kind of what's the—the impact of criminal prosecutions and prison time versus civil actions and fines.

KEVIN PERKINS, Assistant Director, FBI: Yes, Senator. The—it's really a combination of both. We, obviously, are very successful in the health care fraud side, where we have civil remedies that we utilize each day in our investigations there. But again, I'm a—I'm a very strong proponent of criminal prosecutions that involve serious jail sentences for white-collar criminals. That is a huge deterrent.

I've seen it over the years, and I—I know—I know that, from my own personal experience, going and interviewing individuals who

are—who—white-collar criminals who have been—or are doing jail time, going and talking to them on various occasions—it's—it's a huge deterrent. It's—it's something that we have to have, going forward, to make this work.

KAUFMAN: Mr. Khuzami.

ROBERT KHUZAMI, Director, Securities and Exchange Commissions Division of Enforcement: (Inaudible), yes, but there's—there's no deterrent that's a substitute for jail time. I miss the cooperation tools, and I—I miss the sentencing guidelines even more. But there is a very significant role for the civil regulators as well, simply because: Because of the standard of proof of beyond a reasonable doubt and the necessity of convincing 12 jurors of the—of the guilt of someone, the criminal authorities, by definition, cannot and should not capture the whole field of wrongdoing.

And so what you'll often see is criminal authorities focused on the core wrongdoers, and we may cast a wider net—because we have a lower standard of proof—cast a wider net amongst those involved in the wrongdoing as well. And in particular, there's lots of wrongdoing that goes on that doesn't rise to the level of criminal intent, all sorts of activity across regulated broker-dealers and investment advisors and others where, if you can at least make it unprofitable—so that they have to give back the money they wrongfully got, pay a penalty, perhaps suffer time out or lose their license—that, too, has a significant impact.

KAUFMAN: Mr. Breuer.

LANNY BREUER, Assistant Attorney General: Senator, obviously, as Rob (ph) says: A comprehensive approach is essential. Civil remedies are essential. But I've had many years in the private practice, and I've had many years when I represented individuals, and I can tell you, Senator: In a white-collar case—I've been in the conference room with my clients—there is nothing—there is nothing like an individual—who feels as if he or she has been sort of the center of their community, is well-respected and has had a comfortable life—realizing that they're facing jail time. The terror in their eyes is like nothing else, and there's simply no deterrent like it.

KAUFMAN: You know, I think I know the answer to this, but I think it'd be good to be on the record, and starting with you, Mr. Breuer. Why don't—why haven't we seen more, you know, board room prosecutions?

Mr. SPECTER. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 7 minutes remaining.

Mr. SPECTER. I thank the Chair.

Mr. President, there is another very important aspect, in my opinion, of the Senate enacting legislation on this bill; that is, we were sent to Washington to govern. What we have seen in the recent past has been staggering partisan politics. Partisan politics became a blood sport in Washington, DC. It is a blood sport on the floor of the Senate. It pervades the entire town.

The point from the Republican side of the aisle has been very clear; that is, to make this President Obama's Waterloo, to make this "break President Obama."

I saw the ramifications when we took up the stimulus package earlier this year. There were only three Republicans—Senator SNOWE, Senator COLLINS, and myself—who would even talk

to the Democrats. There was a determination to look ahead to the 2012 elections on the Presidency even before the ink was dry on the oath of office taken by President Obama on January 20. This was the second week of February, the week of February 6, as I recall, just a couple weeks, and already the plans were for the next election.

As I reviewed the matter, it seemed to me we were on the brink of going into a 1929 Depression. The 1929 Depression was very hard on the Specter family, living in Wichita, KS, at the time. Both of my parents were immigrants. In the mid-1930s, the family moved from Wichita to Philadelphia to live with my father's sister. That is what happened in the Depression—you moved in with relatives because there were no jobs.

I sided with supporting the stimulus package and played a key role in having that enacted. And the political consequences on a personal level are not something to be discussed on this floor at this time, but the conduct of partisanship on the stimulus package is directly relevant to what we are doing here today, and that is that we are being stonewalled.

I think it is harder for a Republican to stand up on health care reform and join the Democrats today than it was in January and in February when three of us did so. And if I were on the other side of the aisle today, I would be supporting health care reform. I would be supporting, and perhaps, if I were on the other side of the aisle today, I could bring somebody with me. I don't know. That is entirely speculative.

Without revealing any more of the confidence which went on inside of the Republican caucus, when I talk about a Republican Senator's statement that this should be the Waterloo of President Obama and this should break him, those are matters in the public record. But the pressure over there in the Republican caucus is absolutely intense, and we were sent here to govern.

In the Democratic caucus—and the Presiding Officer, the distinguished Senator from Colorado, was there on Monday evening—when my turn came to speak, I said: I have two sentences. And may the record show a smile on the face of the Presiding Officer. I said: I have two sentences. One sentence is, the bill is a great deal better than the current system, and the second sentence is, we should not let obstructionism prevent us from governing. And that is why I crossed the aisle to make the 60th vote. I was very surprised to see in the public record—been in the newspapers—that everybody stood up and applauded, and I read in one of the Hill newspapers today that you could hear the applause down the corridor. So they knew what was going on. Well, that is the role, it seems to me, of a Senator. We are facing a situation where, if defeated, it will have a

significant impact on the tenure of President Obama.

We had a meeting on Tuesday—2 days ago—in the Executive Office Building, and it was a rather remarkable setting. There was a large rectangular table, and in the center on each side—one side was President Obama, the other side was Vice President BIDEN, and almost all of the 60 Senators were present. I think Senator BYRD couldn't be there because of his ailment, but I believe everybody else was present. During the course of that session, the President expressed himself—and this has also been publicized—that if action was not taken now, it would discourage anyone from the foreseeable future—any President—from undertaking health care reform if now, with both Houses and 60 Members of the Democratic Party, you can't get it through the Senate and get it conferenced and get it enacted.

Some of those who were most vocal in favor of the public option urged those in the caucus who disagreed to reconsider their position, and I would renew that request that they reconsider their position. The people who would classify themselves as most progressive in the Democratic caucus have swallowed hard and have announced publicly that they would support this bill even though it doesn't have a robust public option, doesn't have the Medicare expansion. And that may shift yet.

It is fair and accurate to say there are more pressing problems confronting the United States today than at any time in our history, and we have to finish health care next year to move ahead to jobs. We have the issues of global warming and climate control, and we have the problems with the Mideast peace process and the difficulties in Iran and North Korea and Afghanistan. We need a strong President, and we need a Congress which has the courage to act and the tenacity and willingness to confront tough problems. We need to show the American people that it is not all gridlock here, that it is not all desperate, desolate partisan politics.

So my vote will be in favor of the bill. Although I am, frankly, disappointed and I share the frustration expressed by many people who say go back and start again, this is a significant step forward. We have a great chance to improve it in conference, and beyond that there will be another Congress. And with the analogy of civil rights legislation, we can get the public option and get greater public involvement for the benefit of the American people.

I thank the Chair, and I yield the floor.

Mr. President, in the absence of any other Senator seeking recognition, I ask unanimous consent to speak up to 3 minutes on another subject.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMERICANS HELD BY IRAN

Mr. SPECTER. Mr. President, there has been wide publicity given to three young Americans who were taken into custody by Iran and the recent reports that they are going to be tried in an Iranian court. Senator CASEY and I, in the Senate, introduced a resolution urging the Iranians to release those three young Americans—Congresswoman ALLYSON SCHWARTZ, on the House side, did so in the past—and it is my hope Iran will change its view.

I was talking to the Syrian Ambassador yesterday, who advised me that when the five British citizens were taken into custody by Iran, the Government of Great Britain made a request of the Syrian Government to use their good offices to secure the release of the five British citizens. That request was made via Syria, and they were released.

I have written to and contacted the State Department since that meeting yesterday afternoon to find out what is the status of U.S. activity because if we have not asked the Syrians for help, my view is that we should. It would be my hope that with the very difficult problems facing the United States in Iran, that Iran would relinquish the custody of those three young Americans and release them to their family and friends, especially at this time of the year.

I have been an advocate of dialog with Iran for years. I have tried to go to Iran since 1989, when the Iran-Iraq war ended. Senator SHELBY and I got to Iraq and met Saddam Hussein, but as yet we have not had an interparliamentary exchange, which I have sought for a long time with the Iranians.

It would be my hope that Iran, for humanitarian reasons, would release these people and that we would exercise our best efforts—the U.S. Government working through Syria or whatever other channel we can find—to secure their release.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURBIN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KIRK). Without objection, it is so ordered.

Mr. DURBIN. Mr. President, before the Senate now is an issue of funding our military, the Department of Defense appropriations bill. This is a bill that is critically important because it provides the funding our men and women in uniform now risking their lives while we meet in the safety of our businesses and offices and homes in America, it funds their needs to make

sure they will be safe to perform their missions effectively and come home. Without fail, every year this bill comes before the Senate and is a consensus bipartisan bill.

Regardless of our debates over foreign policy, we all want the men and women in uniform to know we stand behind them. As a consequence, this bill usually passes with an overwhelming number. I asked how this bill fared in the House of Representatives when it was considered yesterday. The vote was 395 to 34. There were 164 Republicans who voted yes on this bill. It was clearly an overwhelmingly positive bipartisan vote. There is no reason it would not be the same in the Senate.

But there is a problem. The problem is this: Tomorrow the funding for our troops runs out. It is the end of our continuing resolution in funding. We are not going to leave them high and dry, but we are going to leave them uncertain if we don't act decisively and quickly. Why would we do this to them?

Military families across America, as we go into the holiday season, I am sure, are saddened by the absence of their loved ones who may be in Iraq or Afghanistan, saddened by a separation from children and other loved ones they would like to avoid in their lifetime but they have offered it up for this great country. With this kind of uncertainty and sadness and emotion, why would we be uncertain when it comes to funding our troops?

Here is where we are: We offered this yesterday. We said: Let's vote for it. Let's vote for our troops and get this behind us so the Department of Defense appropriations bill was clear.

The other side of the aisle said: No. We want you to go through all of the hurdles that you have to go through under the procedures of the Senate for the most controversial bills. We want you to file a cloture motion which would put an end to a filibuster. We want you to fill the tree with amendments so that this bill isn't assaulted.

Believe me, the terminology would lose most people, including many Senators, but the bottom line is this: Instead of just doing what we know needs to be done and what should be done, Republicans have insisted we delay this process for at least 2 days.

Why? Why would we want to delay funding our troops in the middle of a war? Why would we want to say to our troops that the military pay raise they were counting on so their families can get by back home, and for those stationed in the United States, make sure that they have what they need, why would we say to them that we are going to raise a question as to whether we are going to put \$29.2 billion into the defense health program, the health program for our military members and their families?

Why would the Republicans insist on delaying a vote for \$472 million for

family advocacy programs for military families who are separated, many of whom are going through extraordinary stress because of the separation? Why would they want to delay a pay raise for the military? Why would they want to delay \$154 billion for equipment and training for our military?

I don't understand it. It would seem to me that we ought to come together by noon today and say: Let's do this. Let's not waste another minute in terms of helping our troops and showing them we stand behind them. But, no, the decision has been made on the other side of the aisle that we are going to delay this matter until tomorrow.

They say in politics, for every decision there is a real reason and a good reason. There may be some good reason they are giving on the other side of the aisle for delaying funding our troops, but the real reason is their hope that they can stop health care reform in the Senate. That is what is behind this. The lengths to which those on the other side of the aisle will go was demonstrated yesterday.

We had a defining moment when the leadership on the Senate Republican side insisted, through Senator COBURN of Oklahoma, that an 800-page amendment be read by the clerk. It is the right of a Senator to ask for that. It is an archaic right because people don't sit here hanging on every word to understand an amendment. That never happens. It didn't happen yesterday. But the clerk started reading.

Almost 2 hours into it, it was pretty clear that it would take 10 hours to finish this 800-page amendment, despite the best efforts of the clerk's office. Why did the Senate Republican leadership want to take 10 hours out of a day for something that was meaningless—the reading, word by word, line by line, page by page, of an 800-page amendment? To stop debate on health care reform.

During that period, no one could debate it. No one could amend it. The Republicans have conceded that they are finished with the debate and amendment phase of health care reform. They have decided now that the only thing they could possibly do is to delay everything the Senate can consider in the hopes that maybe we get tangled up with our desire personally to be home with our families during the holidays and would not do our duty here.

They are wrong. We are determined to do this. We are determined because health care reform for this country is so absolutely essential. The Presiding Officer has an awesome assignment, succeeding the late Senator Ted Kennedy whom he counted as a close friend and served as a member of his staff.

In our cloakroom is a cover of Time magazine where Senator Kennedy is looking out with that smile on his face saying: We are almost there. It was an

article he wrote before he died about health care reform. He, more than any person in the Senate, had the authority to speak to it. Senator KIRK told us in a meeting of our caucus the other day that it was 40 years ago when Senator Kennedy took to the floor as a young man and talked about the priority of health care reform. Forty years, when you think about it, 40 years of waiting for this moment to vote on health care reform. If he were here today—and I wish to God he were—he would be back there at that desk—that was Kennedy's spot—thundering in this Senate Chamber about this historic opportunity and how if it costs us Christmas Eve or costs us Christmas Day or even more, we cannot let down the people of this country.

I see the polls. This complicated issue of health care reform has a lot of people confused and even worried. They have heard some of the wild charges on the other side. At one point they were arguing about death panels; that ultimately the government was going to decide whether people would live or die. That was one of the cruelest distortions in this debate.

The actual issue was raised by Senator JOHNNY ISAKSON, who is a Republican of Georgia, whom I thought raised a serious and important consideration and one that all of us, though we might not want to, should reflect on. He said every person under Medicare ought to have a compensated, paid-for visit to a doctor if they want, voluntarily, to talk about end-of-life treatment. There is hardly a family in America who doesn't contemplate that possibility, doesn't have a husband say to a wife: Honey, I don't want any of that extraordinary stuff. Don't keep me on life support.

What Senator ISAKSON wanted to do was to give Medicare patients an opportunity to sit down with a doctor and say: What instruction should I leave? If this is what I believe, whom should I tell? That was a humane, thoughtful amendment. But the critics of health care reform twisted and distorted it into a death panel that was going to tell Grannie: We are going to pull the plug.

Sad. It was sad, when Senator ISAKSON offered such a good-faith amendment, to have it distorted. It is no wonder if the critics of health care reform would go to those extremes to try to defeat this bill, why other extreme things have been said about it. If you listened on the floor of the Senate over the last several weeks while we have debated health care reform and listened to the speeches from the other side of the aisle, you would believe that this bill is going to destroy Medicare. Many Republican Senators who historically did not support Medicare and wanted to privatize Medicare are now its most fervent champions. You might question their sincerity. We don't do

that in the Senate because we don't question motives of people. But I will question their accuracy.

This bill, which is over 2,000 pages, knows the future of Medicare is important to all of us. If we do nothing today, Medicare will go broke in 8 years. We would not be bringing in enough money from payroll taxes to pay the Medicare services we promised in 8 years. That is a fact. But this bill is going to change it. This bill will add 10 years of solvency to Medicare. I wish it were more, but it is a step in the right direction to say to those receiving Medicare and those about to go into Medicare: This important program will be there when you need it; 10 years of added solvency in Medicare; Medicare on sound financial footing for 10 more years because of this bill.

There is something else it does. At the end of our conference between the House and Senate on health care reform, we are going to take care of a problem in Medicare. It is a serious problem. When we passed the Medicare prescription drug program, there wasn't enough money to fund it. They created this strange situation where if you were seriously ill under Medicare and receiving medication, this Medicare Part D plan would pay for prescription drugs up to a certain limit and then stop.

In the midst of a new calendar year, some could find several months into that year that Medicare Part D was not paying for any more prescription drugs. You would be responsible personally to pay for them. After you had paid a certain amount of money, the Part D coverage would kick in again. It was known euphemistically as the doughnut hole, that gap in coverage in Medicare Part D. When this is over, this health care reform is going to fill that gap, close that doughnut hole, give to 45 million Americans under Medicare the peace of mind of knowing that their prescription drugs will be paid for and they will not find themselves exhausting savings or going without it when it comes to basic medication.

That is why this bill is important. That is why some of the things that have been said in the debate are so misleading.

There is something else this bill does which we ought to take pride in as Senators. Most civilized and developed countries in the world have a health care system that protects their people. We are the only developed country on Earth where a person can die because they don't have health insurance. We are the only one.

You might say: Senator DURBIN, aren't you getting a little carried away? Well, 45,000 people a year do. Let me give you an illustration: What if you had a \$5,000 copay on your health insurance and you didn't have \$5,000 and the doctor says: I am a little bit

worried about some of the things you tell me, Senator. I think you need a colonoscopy.

That is something I can understand because my mother had colon cancer. I am very careful about this. I have a history in my family.

But if you had a policy that said the first \$5,000 you have to pay for and went out and asked how much a colonoscopy cost, you would find in many places it is \$3,000. There have been cases—a man from Illinois wrote me. He said: I didn't have the \$3,000 so I skipped the colonoscopy.

Without health insurance, without coverage, without enough money to pay for that basic test, this individual is running the risk of developing a serious cancer that could claim his life or at least cost a fortune to take care of. That is what inadequate health insurance does to you. That is what no health insurance does to you.

At the end of the day, this bill will say, for the first time in the history of this great Nation, 94 percent of the people will have health insurance. Thirty million people today who have no health insurance will have it when it is over. Fifteen million will go into Medicaid because they are in low-income categories.

I met one of those people when I was back in my home State of Illinois. Her name is Judie. She works at a motel in Marion, IL. She is a hostess in the morning for their free continental breakfast—a sweet lady with a big smile on her face, in her early sixties.

She came up to me and said: Senator, I am not sure this health care reform is good for me.

I said: Judie, do you have health insurance?

She said: No, I've never had health insurance, and I'm a few years away from Medicare.

I said: If you don't mind telling me, how much money do you make?

She said: Well, they've cut our hours here at the motel because of the economy. I work about 30 hours a week now, and I make about \$8 an hour. And she said: There isn't a person here you're looking at, working on this motel staff, who has health insurance.

I said: So does that mean your income each year is about \$12,000?

She said: Well, I guess. It's the only job I have. I get by on it.

I cannot imagine how.

She said: I get by on it.

I checked into it, and I saw her the next morning before I checked out, and I said: Judie, under this bill we have, because you make less than \$14,000 a year as an individual, you will qualify for Medicaid. For the first time in your life, you will have health insurance under an Illinois State Medicaid Program that you won't have to pay for because you are in a low-income category.

Well, she said: That's great because I have diabetes.

Think about that: age 60, no health insurance, low income, no doctor regularly available to her.

And she said: And I've had a few lumps I would like to get checked out too.

I thought: This poor lady. She is a classic illustration of what we are talking about in this bill. She is not lazy. She is a hard-working person. She gets up every day at the crack of dawn to be there to make sure people feel right at home at that motel, and she has no health insurance.

Ninety-four percent of the people in this country will have health insurance—people like Judie, who, for the first time in her life, will have health insurance. Is that worth something? Is it worth something in America for us to take pride in the fact that we are expanding the peace of mind which some of us take for granted of having health insurance coverage?

I think it is worth a lot. I think it is important for us and the critics to step up and acknowledge they have never come forward with a single proposal to deal with that issue—not one. We have never heard from the Republican side of the aisle how they would cover 94 percent of the people in America. They have never put together a comprehensive health insurance plan. They have never talked about submitting it to the Congressional Budget Office to make sure it does as promised, as we have.

They come to the floor with criticisms of what we are trying to do. It is their right as Senators to do that. But it is also our right to ask them the basic question: Does the fact that you do not have a Republican health care reform bill mean that you like the current system, that you do not want to change it? That is one conclusion.

The other conclusion is: This is hard work. Writing a bill that does this takes a lot of time and effort, and they have not put in that hard work. So they come emptyhanded to the floor with good speeches and good graphs and good press releases, but without good amendments to take care of the basic problems.

There is one other element in this health care reform bill too. How many times have you met somebody in your family or at work or through a friend who told you about a battle they had with a health insurance company when somebody got sick in their family? I have run into it a lot. A few years back, when I was a Congressman, in Springfield, they had a unique program where the Sangamon County State Medical Society would invite Members of Congress to accompany doctors on their rounds in a hospital.

The first time I was invited to do that, I called back and said: You've got to be wrong. You don't want me walking into a patient's room where you are talking about their private health situation.

They said: No, no, we ask permission. And it is interesting, people are bored in the hospital, and they are amused by politicians. So would you please come?

So I accompanied a doctor on his rounds. He was examining a nice lady in my hometown of Springfield, IL, who was suffering from vertigo, who had come to the hospital, and as a result of an x-ray, they discovered she had a tumor—a brain tumor—that needed to be removed. She lived by herself. She was falling down at home. He wanted to operate on her on Monday. This was a Friday. He wanted to keep her in the hospital because he was afraid if she went home she might fall, hurt herself, and he wanted her ready for surgery on Monday.

But before he could say to her: Be prepared to stay over the weekend, he had to call her health insurance company. I stood next to this doctor at the nurses station in St. John's Hospital in Springfield, IL, as this doctor was arguing with a clerk at a health insurance company somewhere in a distant location about why this woman needed to stay in the hospital, and the clerk was saying: No, we are not going to pay for it. Send her home. Bring her back on Monday for the surgery.

He said: I'm not going to do that.

The clerk said: Well, we're not paying for it.

He hung up the phone and turned to me and said: She's staying in the hospital. We'll fight this out later on.

Fight it out—those battles, those fights take place every day across America.

I have told the story on the floor here about a friend of mine—a great friend of mine—whom I have known since he was a young man. He is a baseball coach at Southern Illinois University. His name is Danny Callahan. Danny has been battling cancer for years. Danny is a young guy. He has a young family and a good wife, and he is a terrific guy from a great family. He has been battling cancer—chemo, radiation, even surgery, removing part of his jaw and trying to stop this advance of cancer.

His oncologist came up with a drug that is working. It is called Avastin. This drug is experimental. It works on some cancers. It is certified to work on them. But they found it works on others in an off-label application. The oncologist wrote to the health insurance company and said: This is working. We have stopped the spread of his cancer. We want to keep using this drug. And they said: No. It costs \$12,000 a month, and we won't pay for it.

What is he going to do? You do not make a fortune as a baseball coach at Southern Illinois University. His family pitched in, borrowed some money to cover a month of treatment. He is going to have a trial in St. Louis at Barnes Hospital, connected with Washington University there. He is trying

his best to keep this going, but he is battling this insurance company that said no.

This bill gives people whom I have described a fighting chance. It gives them a chance to fight against the discriminatory, wrong decisions of health insurance companies. Is that worth anything? Is it worth it? I have yet to see an amendment from the other side of the aisle that does this.

We used to call this a Patients' Bill of Rights, and it used to be a bipartisan issue. Senator JOHN MCCAIN joined with Senator Kennedy and the two of them worked on this, saying that patients in America should have the right to fight insurance companies that turn them down because of preexisting conditions, that turn them down because the cost of care is so high, that turn them down because they have lost their job or turn them down because their child reaches the age of 24. This bill provides protections for those people.

So when people say: I heard Governor Dean—I like him; Howard is a friend of mine; former Governor of Vermont; former head of the Democratic National Committee—wrote a big article in the Washington Post this morning and said: Vote against this bill. It is not everything I want it to be.

Well, Governor Dean, it is not everything I want it to be either. But how could we in good conscience explain to 30 million Americans who would have health insurance for the first time in their life—such as Judie down in Marion, IL—“Judie, I am sorry, we won't be able to get you health insurance this time around. We couldn't get everything we wanted.” That is not a very compelling argument, from my point of view.

How do we say to people who want to have a fighting chance against insurance companies that say no—and will have the legal right to do that—“I am sorry, you are just going to have to continue to do your best fighting these clerks at health insurance companies who say no because this bill does not have everything in it that we want.”

You learn in this business of life and politics that concessions and compromise are critical parts of achieving a goal. Within the Democratic Caucus there are conservative and liberal or progressive members, and we have to find that sweet spot, that middle ground, where they come together. I think we have, and I am sorry we do not have any Republican support for this.

It is a fact, though, we have spent an entire year debating health care reform on Capitol Hill, and the sum total of Republican support for health care reform by vote comes down to two. One Republican Congressman from the State of Louisiana voted for the House bill, and one Republican Senator, Ms. SNOWE of Maine, voted for a version of

health care reform in the Senate Finance Committee. Not a single vote beyond those two in support of health care reform.

In fact, some take great pride in the fact that they are never going to vote for health care reform until it comes down exactly as they want it. We have invited them into conversation. In fact, my friend, the Senator from Iowa, who is on the floor here today, was part of a conversation with Senator BAUCUS and four other Members of the Senate that went on, I am told, for weeks, if not months, in an effort to find bipartisan, common ground, and they could not. I am sorry they did not. It would have been a better day if we had a real bipartisan effort before us. But I thank the Senator from Iowa for his genuine heartfelt efforts in trying.

But we come here today without a Republican alternative to health care reform. We come here today facing the reality that if we fail this time, we will not address health care reform, I am afraid, in my political lifetime or in the lifetime of many people following this debate. It took 16 years since President Clinton last offered an effort to try. If we wait another 16 or 20 years, I cannot imagine what is going to happen.

We know what is going to happen to health insurance premiums. Ten years ago, for a family of four, the average cost of their family health insurance premium was \$6,000 a year—\$500 a month. Pretty steep, right? The average cost today, for a family of four, for their family health insurance premium: \$12,000 a year. It has doubled in a 10-year period of time, and it is going up so fast that it will double in the next 7 or 8 years to \$24,000 a year.

Imagine working and earning \$2,000 a month just to pay for your health insurance premium. That is it. Imagine how meager that coverage is going to be because each year you know what happens. The cost goes up and coverage goes down. What will it be 10 years from now? If you talk to people who are negotiating for contracts, such as labor unions, all they talk about is health insurance. They do not talk about wage increases. They talk about health insurance. Those are the issues that break down the negotiations and end up in work stoppages and strikes, it has become that contentious and that difficult.

Are we going to accept that? Is that the best we can do in America? I do not think so. Are we going to accept a strategy which says: We are going to slow down the business of the Senate to a crawl, or stop it, as they tried yesterday, in an effort to defeat even having a vote on health care reform?

Don't we owe the people of this country, at the end of this debate, a vote on health care reform? Shouldn't it be in a timely fashion?

Shouldn't we first pass this bill that funds our troops that is sitting on the

floor here that passed the House 395 to 34? Why would we delay that funding of our troops in the midst of a war? Why don't we do that today before we break for lunch and say to our troops: "We took care of you."

I might add, in here there is a provision that extends unemployment benefits. Is there any doubt on the other side of the aisle that they will vote to extend unemployment benefits in the midst of a recession? The last vote we had was 97 to 0 on the floor of the Senate to extend unemployment benefits, and that was a few weeks back. I assume Republican Senators feel as Democratic Senators do, that in the midst of a recession, in the midst of the holiday season, we owe it to these families to try to help them out.

How could we in good conscience go home and celebrate Christmas or Hanukkah or whatever our holiday might be and say we want to be in the comfort and love of our families, to sit and have a glorious Christmas morning before the tree, and enjoy the blessings of this great Nation and the blessings of life, and then turn down the unemployed when it comes to their benefits? We could not do that in good conscience.

Why don't we do that today? Why do we wait until tomorrow? Why don't we say: Regardless of what your strategy is on health care reform, let's not shortchange the troops. Let's not leave them with any uncertainty. Let's not leave those unemployed with uncertainty as to whether they are going to get benefits they come to expect and deserve. I hope we can.

Mr. President, I ask unanimous consent to have printed in the RECORD a recent article published in the New York Times relating to the trauma of joblessness in the United States.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 14, 2009]
 POLL REVEALS TRAUMA OF JOBLESSNESS IN U.S.

(By Michael Luo and Megan Thee-Brenan)

More than half of the nation's unemployed workers have borrowed money from friends or relatives since losing their jobs. An equal number have cut back on doctor visits or medical treatments because they are out of work.

Almost half have suffered from depression or anxiety. About 4 in 10 parents have noticed behavioral changes in their children that they attribute to their difficulties in finding work.

Joblessness has wreaked financial and emotional havoc on the lives of many of those out of work, according to a New York Times/CBS News poll of unemployed adults, causing major life changes, mental health issues and trouble maintaining even basic necessities.

The results of the poll, which surveyed 708 unemployed adults from Dec. 5 to Dec. 10 and has a margin of sampling error of plus or minus four percentage points, help to lay bare the depth of the trauma experienced by

millions across the country who are out of work as the jobless rate hovers at 10 percent and, in particular, as the ranks of the long-term unemployed soar.

Roughly half of the respondents described the recession as a hardship that had caused fundamental changes in their lives. Generally, those who have been out of work longer reported experiencing more acute financial and emotional effects.

"I lost my job in March, and from there on, everything went downhill," said Vicky Newton, 38, of Mount Pleasant, Mich., a single mother who had been a customer-service representative in an insurance agency.

"After struggling and struggling and not being able to pay my house payments or my other bills, I finally sucked up my pride," she said in an interview after the poll was conducted. "I got food stamps just to help feed my daughter."

Over the summer, she abandoned her home in Flint, Mich., after she started receiving foreclosure notices. She now lives 90 minutes away, in a rental house owned by her father.

With unemployment driving foreclosures nationwide, a quarter of those polled said they had either lost their home or been threatened with foreclosure or eviction for not paying their mortgage or rent. About a quarter, like Ms. Newton, have received food stamps. More than half said they had cut back on both luxuries and necessities in their spending. Seven in 10 rated their family's financial situation as fairly bad or very bad.

But the impact on their lives was not limited to the difficulty in paying bills. Almost half said unemployment had led to more conflicts or arguments with family members and friends; 55 percent have suffered from insomnia.

"Everything gets touched," said Colleen Klemm, 51, of North Lake, Wis., who lost her job as a manager at a landscaping company last November. "All your relationships are touched by it. You're never your normal happy-go-lucky person. Your countenance, your self-esteem goes. You think, 'I'm not employable.'"

A quarter of those who experienced anxiety or depression said they had gone to see a mental health professional. Women were significantly more likely than men to acknowledge emotional issues.

Tammy Linville, 29, of Louisville, Ky., said she lost her job as a clerical worker for the Census Bureau a year and a half ago. She began seeing a therapist for depression every week through Medicaid but recently has not been able to go because her car broke down and she cannot afford to fix it.

Her partner works at the Ford plant in the area, but his schedule has been sporadic. They have two small children and at this point, she said, they are "saving quarters for diapers."

"Every time I think about money, I shut down because there is none," Ms. Linville said. "I get major panic attacks. I just don't know what we're going to do."

Nearly half of the adults surveyed admitted to feeling embarrassed or ashamed most of the time or sometimes as a result of being out of work. Perhaps unsurprisingly, given the traditional image of men as breadwinners, men were significantly more likely than women to report feeling ashamed most of the time.

There was a pervasive sense from the poll that the American dream had been upended for many. Nearly half of those polled said they felt in danger of falling out of their social class, with those out of work six months

or more feeling especially vulnerable. Working-class respondents felt at risk in the greatest numbers.

Nearly half of respondents said they did not have health insurance, with the vast majority citing job loss as a reason, a notable finding given the tug of war in Congress over a health care overhaul. The poll offered a glimpse of the potential ripple effect of having no coverage. More than half characterized the cost of basic medical care as a hardship.

Many in the ranks of the unemployed appear to be rethinking their career and life choices. Just over 40 percent said they had moved or considered moving to another part of the state or country where there were more jobs. More than two-thirds of respondents had considered changing their career or field, and 44 percent of those surveyed had pursued job retraining or other educational opportunities.

Joe Whitlow, 31, of Nashville, worked as a mechanic until a repair shop he was running with a friend finally petered out in August. He had contemplated going back to school before, but the potential loss in income always deterred him. Now he is enrolled at a local community college, planning to study accounting.

"When everything went bad, not that I didn't have a choice, but it made the choice easier," Mr. Whitlow said.

The poll also shed light on the formal and informal safety nets that the jobless have relied upon. More than half said they were receiving or had received unemployment benefits. But 61 percent of those receiving benefits said the amount was not enough to cover basic necessities.

Meanwhile, a fifth said they had received food from a nonprofit organization or religious institution. Among those with a working spouse, half said their spouse had taken on additional hours or another job to help make ends meet.

Even those who have stayed employed have not escaped the recession's bite. According to a New York Times/CBS News nationwide poll conducted at the same time as the poll of unemployed adults, about 3 in 10 people said that in the past year, as a result of bad economic conditions, their pay had been cut.

In terms of casting blame for the high unemployment rate, 26 percent of unemployed adults cited former President George W. Bush; 12 percent pointed the finger at banks; 8 percent highlighted jobs going overseas and the same number blamed politicians. Only 3 percent blamed President Obama.

Those out of work were split, however, on the president's handling of job creation, with 47 percent expressing approval and 44 percent disapproval.

Unemployed Americans are divided over what the future holds for the job market: 39 percent anticipate improvement, 36 percent expect it will stay the same, and 22 percent say it will get worse.

Mr. DURBIN. Mr. President, I am going to close by saying that for those who wonder if it makes any difference whether we move forward on the issue of helping the unemployed, they should read this article I have put in the RECORD. People across this country are not only worried about getting a job and taking care of their families, it has reached a point where it is dramatic. Some of them are making critical life decisions, spending their savings, with no health insurance to cover themselves or their kids.

I will ask the Republicans, who will follow me: Please, regardless of how long you want to talk today, agree with us that we should move quickly to fund our troops, send the money for those members of the military and their families to give them peace of mind we stand behind them. Do not make them part of any political delay and strategy that leaves uncertainty. Let's do it today. Let's not wait until the money runs out tomorrow.

Let's fund our unemployment benefits too. Let's give these families, who through no fault of their own are out of work, the peace of mind of knowing that as we go home for Christmas, they will at least have a Christmas which has, even if it is small, an unemployment check.

The PRESIDING OFFICER (Mr. BURRIS). The Senator from Iowa is recognized.

Mr. GRASSLEY. Mr. President, I ask unanimous consent to speak as in morning business for 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

BIODIESEL TAX CREDIT

Mr. GRASSLEY. Mr. President, I rise on the issue of jobs and 10 percent unemployment and to tell my fellow Senators what we can do to preserve maybe 25,000 jobs in an industry that, by the end of the month, will be otherwise shut down because Congress is not taking action. The main point of my remarks is, if we don't extend the biodiesel tax credit by the end of the month, these jobs will be lost.

My point is 23,000 jobs will be lost. In fact, right now, on December 17, companies are making plans to shut down these operations by the end of the year.

Everybody knows our unemployment rate is 10 percent. Everybody knows the President has spent a great deal of time, over the last 2 or 3 weeks, talking about creating jobs and getting us out of the recession. But we have to remember that for those without work, this is not just a recession, it is a depression.

We all agree we should take whatever action is necessary to jump-start our economy and get people back to work. President Obama and Vice President BIDEN have been talking for months about the need to create green jobs. Well, green jobs, purple jobs, whatever kind of jobs, jobs are jobs. I don't object to the creation of green jobs. In fact, what I am talking about is some of these green jobs.

President Obama has held three public events in recent days to highlight his concern about the economy and the need to create jobs. Yesterday, the administration apparently announced billions more in tax credits for renewable energy and energy conservation efforts. I will bet when I look at that list I am going to support most of those because I believe a national energy policy involves capturing whatever we can of

petroleum and fossil fuels we have available for a short period of time because we are never going to get rid of them in the short term. We need conservation, and we need renewable and alternative energy. Those three things make a comprehensive energy program. Obviously, if I am for that comprehensive energy program, I am for renewable energy and alternative energy.

It seems as if nearly everyone, in fact, in the administration is touting the benefits of green jobs and a clean energy economy and I am doing that right now myself. It is astonishing, though, with all this talk about green jobs and clean energy that this Congress right now seems to be heading for the holidays while thousands of green energy workers will receive pink slips and furloughs.

On December 31 of this year, the current biodiesel tax credit will expire. The biodiesel tax credit provides a \$1-per-gallon credit for biodiesel made from soybean oil and yellow grease and animal fats. The tax credit is essential in maintaining the competitiveness of this clean-burning, domestically produced green fuel and the jobs that are connected with it.

The tax credit exists for a common-sense reason and something we have been using for a long period of time: to offset the higher cost of producing biodiesel—or I could just as well insert the word “ethanol”—compared to petroleum diesel. Without the tax credit, petroleum marketers will be unwilling to purchase the more expensive biodiesel and demand will vanish. From this standpoint of the tax credit, I hope everybody remembers that whether it is wind, ethanol, solar, biodiesel, biomass, or geothermal, it takes tax credits to get these programs off the ground. Right now, wind energy is a big industry in my State, not only from the production standpoint but from the standpoint of manufacturing of components because, in 1992, I got a wind energy tax credit passed; otherwise, we would not have wind energy and everybody touts wind energy today. It is a little bit like the very infant biodiesel industry we have. One might not think biofuels are an infant industry because ethanol has been around for 30 years, but biodiesel is about where ethanol was 30 years ago. So we want to help move this industry along so eventually it can stand on its own legs. That is the motive behind all these tax credits, to get an infant industry started and then they stand on their own.

In 2008, getting back to the jobs in this industry, biodiesel supported 51,000 green jobs. Because of the downturn in the economy and the credit crisis, the biodiesel industry has already shed 29,000 green jobs. So now what about the rest of those jobs? That is what my remarks are all about, and that is what getting the tax credit renewed before

the end of the year is all about. Because the industry is currently operating at just around 15 percent of capacity. Without an extension of the tax credit, all U.S. biodiesel production will grind to a halt. Plants will be shuttered and workers will be let go.

No one should be surprised by the upcoming expiration of this tax credit. It was extended most recently in October 2008. So we have known for 14 months; hence, nobody should be surprised that it would need to be extended by the end of this year.

The Senate has been in session nearly continuously for months. Earlier this year, Senator CANTWELL and I introduced a bill to extend the tax credit for 5 years and change it to a production tax credit. There is no excuse for inaction on this credit. The Democratic leadership is content to leave without doing the necessary work on extenders, believing they can extend the tax provisions retroactively sometime early next year. Retroactivity does work a lot of times on tax extenders that are not extended at the end of the year and extended to be made retroactive. But retroactivity in the case of the biodiesel market doesn't help bring it from grinding to a halt on January 1, 2010, because without the incentive, the biodiesel will cost much more than petroleum diesel.

While the House and Senate dither, thousands will lose their jobs, but demand for dirty, imported petroleum diesel, however, will continue. Investments in the domestic renewable fuels industry will lose value and possibly disappear—quite to the contrary of what I said in my remarks of yesterday, the President announcing various tax credits. So this one has been on the books. All it has to be is reauthorized.

It is too bad that among all the talk of green jobs and the clean energy economy, Congress is unable to pass a simple extension of an existing tax credit. Once again, the actions of the majority do not match their words. For all the talk, they will have failed all those in the biodiesel industry working today to reduce our dependence upon foreign oil if we leave without extending this critical tax credit before the end of the year.

I yield the floor.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. CORNYN. Mr. President, we have conferred with the other side of the aisle, and I think we have reached an agreement. I ask unanimous consent to be allowed to speak for up to 10 minutes, and then I believe two Senators from the other side of the aisle would like to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CORNYN. Mr. President, it just shows we can do some things in a bipartisan way around here still, albeit small things.

We are talking about the Defense appropriations bill. I think it is important to point out that the majority leader has waited until the very last minute to bring up this very important bill, which I am sure will pass by a large majority, but it was 2 months ago that the fiscal year ended. The majority leader has now left us here 8 days before Christmas with a lot on our plate, a lot yet to do, and, of course, threatening to keep Congress here through Christmas—certainly up to Christmas. I would not say we are happy to be here, but this is a great responsibility. These are important issues, and none of us is going to shy away from dealing with these issues, albeit 8 days before Christmas.

It is also appropriate to talk about Christmas because this bill not only funds our troops, it is a Christmas tree on which Members of Congress have hung nice shiny little ornaments, provisions that have nothing to do with funding our troops and the Defense appropriations bill. As a matter of fact, this bill would actually create new entitlement spending programs—that is what some of these little shiny ornaments are—rather than fix the ones we have. It is significant. We are talking about our troops. At the same time, we are talking more generally about health care, because under Federal law TRICARE, which handles the reimbursement rates for health care for our troops and their families, is required under Federal law to follow Medicare reimbursement rates.

We know that under the underlying health care bill we will be considering up until Christmas, it looks like there are actually going to be \$500 billion in cuts to Medicare. The concern is, if access to care is jeopardized for Medicare beneficiaries, which we know it will be for at least some—particularly Medicare Advantage beneficiaries—then cuts to TRICARE reimbursement rates could follow.

We also know this bill includes a 2-month bandaid for the Medicare reimbursement rate for doctors, the so-called doc fix. This is the sustainable growth rate formula which has never worked since Congress passed it in 1997. It shows Congress makes assumptions—this one back in 1997—that we are going to cut Medicare, and in this particular instance Medicare reimbursement rates for doctors and that somehow that will not have a negative impact on people's ability to find a doctor who will see them.

I know in Travis County in Austin, TX, at last report, only 17 percent of doctors will see a new Medicare patient, and it is even worse for Medicaid, which pays less than Medicare. So we know the cuts the underlying health care bill will make to Medicare are going to have a negative impact on access to care for many of our seniors, and because TRICARE rates are linked

to Medicare rates under Federal law, they could well jeopardize our troops' and their dependents' access to care as well.

This experience we have had since 1997 under the Balanced Budget Act with the sustainable growth rate which, unless Congress acts, will actually cut reimbursement rates for doctors by 23 percent—and this bill provides a 2-month—a 2-month—fix—these assumptions have never worked. Yet this health care bill, at least the 2,074-page version—we have yet to see the Reid substitute, which will appear, I am sure, miraculously sometime around Saturday as the majority leader tries to cram this bill through before Christmas—we know it contains or will contain many other assumptions, such as this SGR formula that will prove unenforceable and will never work. Yet those will be used by the Congressional Budget Office to provide a cost estimate or score which may meet the demands of politics today but which will bear no relationship whatsoever to the ultimate costs. And the American people understand that. They understand the budget gimmicks of having a 10-year program and not implementing it until year 4 but starting the taxes to pay for it on day one. They understand that, and that is why they don't trust the Congress to be honest and transparent when it comes to spending their money—because of their unfortunate experience.

I also want to focus on other promises the President has made about health care reform which bear on the process by which health care reform and these bills are being considered—unfortunately, ways in which the Reid bill breaks those promises. This is one we have talked about before, but I think it bears repeating because the American people want us to read the bills before we vote on them. They want to be able to read the bills and to have them posted on the Internet so they can understand how this legislation will impact them and their families.

Here is what the President said:

I'm going to have all the negotiations [the health care negotiations] around a big table. We'll have negotiations televised on C-SPAN, so that people can see who is making arguments on behalf of their constituents and who is making arguments on behalf of the drug companies or the insurance companies.

I see one of our colleagues on the floor, who is a chief proponent of an amendment that had to do with drug pricing. We all know it is the worst-kept secret in Washington, DC, that the drug companies have cut a special deal behind closed doors—not around a big round table on C-SPAN but behind closed doors—and many of us don't know the exact terms of this deal. We do know that while the big drug companies may be protected, the American people are not at the table while spe-

cial interests are cutting deals that have not yet fully come to the light of day. I think this is a tragedy. There is no reason the President's promise cannot be kept, other than to try to run something by Congress and the American people before they have had a full opportunity to read it and understand what is in it.

This is exactly the kind of cynical act that breeds public skepticism about Congress and their elected representatives. We are elected by the people in our States to use our best judgment on their behalf, listen to them, and ask: What do you think about this? Tell me, as your elected representative, how do you think I should vote on these important issues? If we hide the substance of these cooked-up deals behind closed doors from the American people, no wonder the congressional approval rating is so low. Unfortunately, promises such as this which are broken by the Reid bill do nothing but breed skepticism or cynicism on behalf of the American people.

The Washington Post reported last October that the first Reid bill was written in secret and "behind closed doors." That is the 2,074-page bill we have seen stacked up on our tables. That bill, with sleight of hand, will be swept off the table and a new one will miraculously appear sometime on Saturday. That is the bill we are going to be asked to pass by Christmas—again, without anybody knowing what exactly is in it.

Of course, there is speculation among the press corps and the political class in Washington as to whether the majority leader will be able to get 60 votes on a bill. People are saying: Yes, I think he will get 60 votes. Others say: No, he is missing a few votes; he is not quite there yet. And we are talking about a bill most of us haven't even seen. How in the world can anybody tell their constituents they are for the bill or against the bill before they have had a chance to read it? It is mind-boggling. Yet we know these closed-door meetings are still going on—8 days before Christmas—to work on perhaps a new 2,000-page Reid bill.

I know some of our colleagues were irritated with our colleague from Oklahoma, who asked that the Sanders amendment be read before we actually considered it. Only in Washington, DC, would people be mad about knowing what is in a bill or an amendment before we are asked to vote on it. The American people want to know. They are being excluded, as are many of the rest of us who don't get to know what is being cooked up behind closed doors.

We know these private meetings continue. The President has had meetings with our Democratic colleagues from which Republicans have been excluded. We don't know what kinds of agreements or discussions were occurring behind those closed doors. Certainly, no C-SPAN cameras were allowed.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. CORNYN. I ask unanimous consent for 2 more minutes.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. CORNYN. Mr. President, we need to have every single Senator look at what is in these bills before we are asked to vote on them.

Let me close on one last issue. The President has also said:

First, I will not sign a plan that adds one dime to our deficits—either now or in the future. Period.

Unfortunately, because of this cynical attitude of Washington and of the political class in Washington toward the public generally, 74 percent of voters said they don't believe that. Seventy-four percent of voters, including 82 percent of Independents, are saying: We don't believe the President of the United States when he says the bill will not add one dime to the deficit.

One reason they might think that is because of what this Reid bill—at least the 2,000-page variety—says. The Chief Actuary for CMS says that pledge is "unrealistic and doubtful." David Broder, one of the deans of the Washington press corps, said:

These bills, as they stand now, are budget-busters.

I don't know what it is going to take before Congress wakes up and listens to our constituents and the American people. I guess it is going to take another election in 2010 or in 2012 where the American people get to hold us accountable because in the end the American people will get the kind of Congress they want and the kind of Congress they deserve. I hope it will be the kind of Congress that embraces the transparency pledges the President has made and, in reality, lets the American people know what we are doing here and asks whether they approve.

Mr. President, I thank the Chair and yield the floor.

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

Mr. DORGAN. Mr. President, it is interesting to listen to the discussion on the floor of the Senate. We hear a lot about what is wrong these days. For a moment, let me say that there is a lot right in this country as well.

We are in a deep economic recession. I understand that. This is the deepest recession we have seen since the Great Depression. It is a difficult circumstance. But this country has been in tough circumstances before. The American people are a resilient bunch; they pull themselves up and move forward.

I understand the angst and the concern across this country. I understand the debate in the Chamber about what is wrong. I would be the first to say I don't think either political party is a great bargain sometimes. Both of them have their faults.

I think of that Ogden Nash poem that goes like this:

He drinks because she [scolds],
He thinks she [scolds] because he drinks,
She thinks while neither will admit what's
[really] true that he's a [drunk] and she's a
shrew.

Both political parties, it seems to me, have faults, but both political parties have also contributed to the well-being of this country.

When I hear people say nothing works in America—I answered phones at the front desk yesterday for a while to hear from callers calling in about various things. I heard it on many occasions because a lot of people on the radio and on TV are saying nothing works in America and there is nothing the Federal Government has ever done that works.

The Internet—what a wonderful invention in the life of our planet. Yes, that was created by the Federal Government. Going way back, we brought electricity to America's farms and unleashed a barrage of productivity in American agriculture. When you drive around with a locator on the dashboard of your car, that is a GPS satellite—that is the government as well. The Interstate Highway System that connects America—when you drive down big roads that are connecting all of America, that is the Interstate Highway System, suggested by President Dwight D. Eisenhower. What a remarkable thing.

I also think of the story I read a while back about those two little creatures that are crawling around the planet Mars, one called Spirit and one called Opportunity. Five years ago, our country sent both of them to land on the surface of Mars. They landed 1 week apart. They are dune buggy-sized mechanical creatures on the surface of Mars. We sent them up by a rocket. They landed encased in a shroud, and they bounced and the shroud opened up and these dune buggy-sized vehicles began driving on the surface of Mars. They were expected to last 90 days. Five years later, Spirit and Opportunity have been driving on the surface of Mars collecting samples. One of them—I believe Spirit—had an arm that looked as if it was arthritic, so it was hanging at an angle, almost like a salute. The wheel broke, and so they were dragging the wheel and creating a trench. The arm reached back, and the scientist—it takes 9 minutes to send up a signal—the scientist had the arm reach back and dig into the trench so they could get better samples on the surface of Mars. These dune buggies were running on the surface of Mars. Yes, that is the Federal Government and all the contractors.

When somebody said to me that the Federal Government has never done anything right, I said: If you ever get to the Moon, just check the boot prints. They are not Chinese or Rus-

sian; they are made by an American astronaut—the one who planted the American flag there.

There is plenty wrong in this country, to be sure, but there is a lot right about this country.

About 9 years ago, at the start of this decade, our country had a budget surplus. Poor Alan Greenspan, the Chairman of the Federal Reserve Board, wasn't able to sleep. He was worried that we were going to pay down the debt too quickly. I assured him he ought to go to sleep peacefully because that is not a problem.

President Bush came to town and said: We are going to do very big tax cuts because it is estimated that we are going to have very big surpluses. I was one on the floor who said maybe we ought not do that. Let's be a little conservative. These surpluses don't exist for the next 10 years yet. They existed that year for the first time in a long time in the year 2000—a budget surplus. President Bush said: No, we are going to begin very large tax cuts right now in anticipation of these surpluses in the future. Some of us said: Be careful. The wealthiest Americans got very large tax cuts, especially.

Almost immediately, this country went into a recession, and 6 months after that, this country was hit with 9/11, an unbelievable terrorist attack. Almost immediately, we went into the country of Afghanistan to go after Osama bin Laden. Then, very quickly, we invaded Iraq. We were at war for the rest of the decade without paying for one penny of it. Not a penny was paid for those wars or the increased funding to deal with terrorist attacks.

Some of us went to the floor of the Senate and said: Let's begin to try to pay for some of this. Why should we send our men and women to war and decide we won't ask anybody to pay for it? They thought we will just have the kids and grandkids pay the cost. The President said: If you add this to the bill to pay for it, I will veto the bill. So here we are.

Then we see, at exactly the same time, regulators coming to town boasting that they were willing to be willfully blind and they would not look or see and they would not care. We had a bunch of big high fliers create unbelievably exotic financial industries, such as credit default swaps and liars loans for mortgages, and they steered this country right into a ditch while the people at the top were making a lot of money, causing economic havoc the likes of which we have not seen since the 1930s. Our revenue at the Federal Government dropped \$400 billion because of the deep recession. Expenditures for unemployment, food stamps, and so on, which are caused to go up during recessions, increased substantially, and we have very serious economic problems. There is no question about that. I can recite the problems as

well as anybody. But let's also, from time to time, recite the strength of this country. It requires leadership from all of us to put this country back on track. I am convinced we can. I am convinced we will do that. We need a little cooperation here and there. There is not much these days. But I am convinced all of us want the same thing for this great country, and perhaps we can come together even if we have different views of how to get to that common destination. I am convinced one of these days we will make some progress and put America first.

I wished to come today to talk about something that is happening half way around the world in Copenhagen. That is the issue of climate change and energy. Even as leaders around the world gather in Copenhagen to talk about climate change, I wish to talk about the energy legislation that addresses the issue of climate change. The energy legislation that was passed by the Senate Energy and Natural Resources Committee earlier this year is a real energy policy that also protects the planet by reducing greenhouse gas emissions.

We are not going to reduce greenhouse gas emissions because somebody signs a paper. We have a lot of environmental laws. Mexico is a good example. They have a lot of environmental laws on the books. They are just not enforced. Signing a paper is not going to mean much unless you have an agreement that makes sense for the planet and an agreement that is enforced and an agreement that is agreed to by virtually all the countries that are emitting a great deal of carbon.

I will tell you what will make a big difference; that is, for the Congress to pass the Senate Energy legislation, which truly does move us in the direction of addressing climate change.

That energy policy, by the way, is not some secretive policy. This past June we passed an energy bill out of the Senate Energy and Natural Resources Committee that does all the things I think we need to—or virtually all the things—address the issue of climate change and a lower carbon future. But it was not brought to the floor of the Senate or the House of Representatives because we are told energy legislation must be married or merged with climate change. I do not agree with that. We are going to have wasted a year, in my judgment, in which we could have debated the energy legislation on the floor of the Senate, and passed it into law by the signature of the President. This energy legislation maximizes the use of renewable energy, such as the building of the interstate transmission capability that would allow us to maximize renewable energy. The energy legislation would also establish a renewable electricity standard, the first one in the history of this country. The energy legislation would

also retrofit buildings to make them more energy efficient, which would increase energy savings. I also offered an amendment to this legislation, that would also give us the ability to reduce our dependence on foreign oil by opening oil and gas production in the eastern Gulf of Mexico.

All these issues are in an energy bill that passed the Senate Energy and Natural Resources Committee on a bipartisan vote. Yet the benefits to this country from those energy policies that make a lot of sense, will not be available during this year, because those who are pushing for climate change legislation here say you have to do energy and climate change together.

I say this: I hope when we turn the corner and start a new year, that an energy bill that is bipartisan—Mr. President, I had indicated I wished to take 20 minutes today. I ask consent for the 10 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DORGAN. Mr. President, the legislation that exists and is ready, in my judgment, could be signed by the President and already moving this country down the road. The deliverable for the President to go to Copenhagen could have been: Look what we have done in energy policy; we have taken the significant step in the right direction. Yet we are told that energy legislation has to move with climate change legislation.

I am not opposed to a lower carbon future. I am not opposed to trying to do something on climate change legislation. I have indicated I am not supportive of the trade piece of cap and trade. I have no interest in consigning to Wall Street the opportunity to have a \$1 trillion carbon securities market that they could trade on Monday and Tuesday, and then they can tell us on Wednesday and Thursday how much we are going to pay for our energy. I have no interest in creating a carbon securities market.

There are a lot of things we can do, especially an energy policy at the front end—and I hope early next year—we will advance this country's energy security, No. 1, and advance this country's movement toward a lower carbon future.

I wish to put up a couple charts as I describe this. We must reduce our dependence on foreign energy, especially foreign oil. Seventy percent of the oil we use comes from off our shores. We sink straws in the planet and suck oil out. We suck out 85 million barrels a day, and one-fourth has to come to this country because of our appetite for oil.

You know what, when 70 percent of it comes from other countries—many that do not like us very much—that means we have an energy security problem. This Energy bill I have described, that has been out of the Energy Committee since June, and was

passed on a bipartisan vote, reduces our dependence on foreign oil, increases domestic production, establishes a renewable electricity standard, and creates a transmission super-highway. By the way, in the last 9 years, we have laid 11,000 miles of natural gas pipeline in this country—11,000 miles. Do you know how many miles we have laid of high-voltage transmission lines interstate? Mr. President, 668. On this bill, I worked on the transmission piece with Senator JEFF BINGAMAN and others and we solved the issue of transmission.

We can get about the business of building an interstate highway of transmission lines so you can produce electricity where the Sun shines and the wind blows, put it on a wire and move it to where it is needed in the load centers.

This is not rocket science. This is rather simple. We already passed a bipartisan bill out of committee to do this. Electrification and diversification of our vehicle fleet is in the bill. The legislation also enhances energy efficiency in a wide range of areas, it expands clean energy technology, and the training of an energy workforce for tomorrow.

Every one of us gets up in the morning and the first thing we do is flick a switch and all of a sudden there is light. Then many decide to plug in a coffee maker or turn on the stove, turn on the radio, turn on the television set, get in the car, put in a key, the engine turns on—all of this is because of energy, and that is before you get to work. No one even thinks about the role energy plays in our life. That is why it is important for us to understand we have a very serious energy security issue in this country. No. 2, we have a serious issue of the need to construct new kinds of energy and also to use the existing energy differently or produce energy differently and reduce carbon emissions.

I chair the committee that funds most of our energy projects. I chair the Senate Energy and Water Appropriations Subcommittee. It funds the energy and water issues, obviously. There is a lot going on, for example, that I think is so exciting that can unlock our opportunity to continue to use coal. Some say you cannot use coal. Of course, you can. Our science and our technology can clearly decarbonize the use of coal, which is our most abundant resource. Why would we not want to use coal in the future?

There are unbelievable things going on. Dr. Craig Venter, a scientist not far from here, is working on this issue: developing synthetic microbes that underground would turn coal into methane. These microbes would consume the coal and turn it into methane. Pretty interesting to me.

There is a guy in California who has an idea, a patented idea I don't know if

it works, but they insist it is the silver bullet. He takes the entire flue gas from a coal plant and he mineralizes it through some patented process he has. It does not separate CO₂. It mineralizes all of it and turns it into a product that is harder than concrete and more valuable than concrete and produces, as a result, the cost of carbon at almost near zero. Maybe that is the silver bullet. I don't know. There are dozens of examples like it that are very exciting and very interesting.

I started algae research after it had been discontinued for 15 years—single-cell pond scum, that green scum on the pond out on the farm—algae. You take the CO₂ that is released from a coal plant, feed it to an algae farm and grow algae. It increases its bulk in hours. Then you can harvest the algae and produce diesel fuel. Get rid of the CO₂ and produce a fuel. That is called value added. That is called beneficial use of carbon.

There are others now—Dr. Craig Venter is involved in this, along with Exxon—who have projects in which they create algae that excretes lipids directly. Instead of harvesting algae and destroying it for the purpose of acquiring a diesel fuel, it excretes lipids directly which, with very little manipulation, is a fuel.

One of the scientists with the Sandia National Laboratory talked about the development of a solar heat engine in which you put CO₂ on one side and water on the other and you fracture the molecules and thermochemically recombine them and you have methanol—water, CO₂, develop a fuel.

All these ideas are opportunities for us to continue to use coal and at the same time reduce our greenhouse gas emissions.

My point is, I think we ought to be doing a lot of everything with respect to producing a better energy future for this country and with respect to reducing the carbon in our future. I am not somebody who is a naysayer about climate change at all. I expect to be a part of discussions about how to reduce carbon in our future. But I do believe it will be a profound mistake if we do not advance the very policies we have the opportunity to advance in the Congress, in the Senate, the very policies that move us in the direction of reducing carbon and making us more energy secure.

To date, what we have had is all this breathlessness about you have to do a climate change bill right now and you cannot take up energy legislation until you take up climate change legislation. You know what, I do not agree.

I hope that high on the list of the agenda next year for this Congress is to say: We have a serious energy security problem and we have a serious issue with respect to carbon. Let's deal with both. If anybody believes this country can continue to have a 70-percent ad-

diction for oil from foreign countries, they are dreaming. That is not something that will be sustainable in the long term. It undermines this country's economy to have that kind of addiction to foreign oil.

So how do we address this issue and fix it? We address it with thoughtful policies inside this country—to increase efficiency, increase conservation, increase production, and increase production in the right way that protects our planet. All these things are possible.

I guess I have spoken six or eight times on the Senate floor about these issues, not that anybody is listening so much I guess. But it is all health care all the time right now. Health care is not unimportant. I happen to think among the first things on the agenda is, A, financial reform which restores confidence. That was important because a bunch of high fliers steered this country into the ditch. We have to make sure people think that will not happen again; then, second, restarting the economic engine and putting people to work—jobs; third, dealing with energy which has to do with the very security of virtually everything we do to create jobs in this country. All these are important issues.

My hope is, when the calendar turns and January comes, we will have the opportunity to grab and seize the progress that was made in the Senate Energy and Natural Resources Committee, now nearly 6 months ago, to do the right thing for this country and to do the right thing to address climate change at the same time.

I yield the floor.

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mrs. MURRAY. Mr. President, I come to the floor on behalf of over 10,000 constituents from my home State of Washington who have sent me letters and e-mails over the past 6 months to tell me their stories and their struggles with our health care system.

I come to the floor on behalf of the thousands who do not have the time or who do not have the resources to write to me and ask for help but who are struggling as well.

I come to the floor on behalf of small business owners, parents, senior citizens, and people with preexisting conditions, people with insurance whose premiums are skyrocketing, and people without insurance who spend their nights praying they do not have an accident or fall ill.

These people are all worried about keeping their jobs or making a mortgage payment and for whom the cost of getting sick today or being dropped from their health care plan or opening their mail to see another premium increase is too much to bear. Those are the people who deserve a real debate and a real plan, not distortions or silly distractions, such as conversations

about how many pages are in this health care bill. What is more important than the number of pages in this health care bill is the help within those pages for businesses and families across this country.

I have watched, day after day, as our colleagues on the other side of the aisle have come down to this floor. They have made outrageous claims. They have handed out reams of paper and stacked copies of the Senate bill on top of copies of the House bill to try and turn a serious debate into a sideshow. But if my colleagues on the other side want to focus on pages, fine, let's focus on pages.

Beside me is a photo of a woman named Doreen Kelsey. In front of Doreen is a stack of papers. Those are hundreds upon hundreds of pages of forms and rejection letters and appeals and denials from her insurance company. These are pages that have taken hours and hours to fill out and that have stood between Doreen's husband and the care he desperately needed.

I met Doreen at a roundtable I hosted in August in Spokane, WA, in my State. Doreen told me she is self-employed and isn't able to purchase her own health insurance because she has a preexisting condition. Now, luckily, she and her family have health insurance coverage through her husband Tony's employer. She told me she and Tony thought their family had good insurance coverage. But when he asked for a colonoscopy, they soon discovered the lengths to which insurance companies will go to deny, to delay, and to dispute the care families such as the Kelseys assumed were included in their coverage.

Their insurance carrier told them before they would pay for this preventive care, it would have to be approved by a primary care physician. After being delayed for more than a month because of that requirement—and this whole stack of papers here—the colonoscopy ultimately confirmed their fears, and he was diagnosed with stage 4 colon cancer. With that diagnosis in hand, the Kelseys were determined to beat this terrible disease together, but rather than focusing on fighting cancer they were forced to fight their insurance company.

Doreen told me although they had faithfully paid their premiums throughout their entire working lives, now that Tony desperately needed life-saving treatment, he was in a constant struggle of paperwork with his insurance company to pay for even routine care. They weren't asking for anything new, they weren't asking for anything experimental, they were just asking for the care that a lifetime of paid premiums should have entitled them to.

The Kelseys assumed what most Americans do when they are paying for good health insurance. They assumed that while their insurance was expensive, it would be there for them when

they needed it. Well, Doreen and her family, like many other American families and businesses, have come to find out that in our current health care insurance system, stability is sometimes nothing more than an illusion.

With each procedure and each battle, the Kelseys faced a new fight—more paperwork stacked on more paperwork, another appeal and another appeal. At one point, Doreen told me she had to appeal all the way to the State insurance regulator just to get a corrected explanation of benefits form—paperwork—from her insurance company. She told me they had to borrow thousands of dollars to pay doctors while their claims were tied up in what seemed like an endless appeal process—paperwork.

The Kelseys' insurance now costs more than their mortgage, and they are constantly worried that Tony's employer will drop that coverage. But, thankfully, she told me Tony is working hard and successfully battling his cancer. In the meantime, Doreen has successfully been battling her insurance company. But this isn't how our system should work. When we pass the Senate's health care reform bill we are debating, it will not be.

Let me tell everyone—and the Kelseys—how our bill will help them. First of all, our bill ends insurance company discrimination for pre-existing conditions, so Doreen will be able to purchase insurance on her own and not have to rely on her husband's employer. Doreen would also have access to a number of different plans through an exchange that we are setting up where insurance companies, for the first time, would have to compete for her business. Our plan would inject competition into the insurance market, and we know that will lower costs and give families such as Doreen's more choices.

Our plan also makes it illegal for insurance companies to drop people when they get sick, so Doreen and Tony wouldn't have to worry about losing their coverage at the moment they need it the most. Since we know that preventive care is critical to saving lives and saving money on health care costs in the long term, our bill ensures free preventive services under all insurance plans.

Our plan invests in prevention and in public health to encourage innovations in health care that prevent illness and disease before they require more costly treatment. It would have allowed Tony to get a colonoscopy when he first needed it so he could get his treatment started sooner.

Mr. President, we also know families deserve the security and stability of knowing that if they or their loved one do get sick, they will not be forced into bankruptcy to pay for the cost. Our bill restricts the arbitrary limits that insurance companies currently place on

the amount of coverage families receive. It caps the total amount that insurance companies can make people pay out of pocket on copays and deductibles. And it eliminates the lifetime limits insurance companies can impose on coverage.

In addition to putting in place those important consumer protections that would help people such as Doreen and Tony, it will give families the stability and security they deserve and lower the cost of care so Americans such as Tony and Doreen would not have coverage that costs as much or more than their mortgage. We do that by putting in place premium rate reviews to track increases and crack down on excessive insurance company overhead costs.

When our bill passes—and I am confident it will, despite the delay and the delay and the delay that we are seeing on the other side of the aisle—insurance companies will no longer be able to hike up Doreen's premiums to pay for a bureaucracy they will then put to work battling her claims.

We also provide sliding scale premium tax credits—tax credits—for families who still can't afford coverage, which would help 450,000 people in my home State of Washington get the coverage they need.

Mr. President, the bill before us today—which some of my colleagues have sitting on their desks and they bring out here on a daily basis to show us the pages—will help families such as the Kelseys. That is what is within the pages of the bill they keep throwing at us. So I think, rather than talking about the number of pages in the bill, our colleagues on the other side of the aisle might actually want to talk about what is in the bill because right now, instead of debating the merits of bringing down costs or protecting families from losing the coverage when they get sick, our colleagues are actually spending time complaining this bill has too many pages.

I ask the Presiding Officer and my colleagues on the other side of the aisle to take a look at this photo of Doreen sitting next to hundreds and hundreds of pages of correspondence and appeals and fights with her insurance company. These are the pages we ought to be talking about. These are the pages that impact people's lives, and the Kelseys are the people we ought to be talking about.

So when my colleagues come down here and complain about the number of pages in our health reform bill—those pages that will help our families and businesses lower costs—I want them to think about the number of pages right here in front of Doreen. These are pages that have caused the Kelseys unimaginable heartache, and these are the pages that have come between them and the health care they paid for.

These are the numbers we ought to be focusing on—the 14,000 people who

are losing coverage every day. These are the numbers we ought to be focusing on—the 51 million people who have no insurance. Those are the numbers we ought to be focusing on, not the number of pages in the bill.

Mr. President, we have to end the politics, end the delay and the partisanship. We need to end this obstruction because that is what the Kelseys faced every day, delay and obstruction. They are facing it again on the floor of the Senate. It is time for us to come together on this important bill and bring our businesses and our families the insurance reform they have been asking for. I hope that is what Americans will remember at the end of the day, that the pages in this bill are going to change their lives so they don't have to fight their insurance companies again.

Mr. President, we are here today in the Senate—nobody on the floor, just me talking about what we ought to be doing, and you in the Chair, waiting. Why? Because we have a Defense appropriations bill in front of the Senate. It is a Defense appropriations bill that needs to be passed by the end of this year. It needs to be passed so we can get back on the floor and pass our health care reform bill.

Some people on the other side of the aisle have decided that delaying this Defense bill will somehow help them delay this from ever being passed—the health care bill that would help Doreen and her family. Well, Mr. President, it isn't just about making a political point. What we are doing is having our soldiers—who are serving on the ground in Iraq, in Afghanistan, around the globe and here in our country—wonder what they are going to get for Christmas—a delay from the Senate?

The bill in front of us provides a 3.4-percent military pay increase. This is an All-Volunteer Force we have out there working for us. Many of them are away from their families this Christmas. They do not want to hear that the Senate is delaying passing this important bill that will give them the security they need because of political obstruction in order to delay a health care bill.

This Defense bill is critically important. It has very important support for our military and their families. It has passed through this Senate before, and we are ready now to make the final trip to the White House, which needs to be done, by the way, by tomorrow. So I hope our colleagues will not continue to delay. I hope they will allow us to move to final passage on this bill so our men and women who are serving us in the military and around the globe know there is a Senate who is working for them.

I have heard some of them on the other side complain that some things were added to the Senate Defense bill—that also need to be done by the end of

the year, besides the Defense bill—such as making sure our families, whose benefits are running out for unemployment, or COBRA for health care insurance, get a 2-month extension. So should our Christmas present to them be: Sorry, you aren't going to get your small little help as we end this year. We want to keep that going for another 3 months during one of the worst economic times we have seen. So, of course, we put it in this bill.

Because of the obstruction on the other side, we can't get it through in a timely fashion. It has to be done by the end of this year. We are doing the right thing for our families. We are doing the right thing for our military by putting it in this bill and getting it done and to the President so we can finish our work.

Mr. President, these are all critical issues. We are all tired. We have been here day after day after day. It is time to get this done. Let me tell you why. Because Doreen and her husband are facing piles and piles of paperwork to care for her husband. They are fighting their insurance company. And all we have to do is put these bills in front of us, get them done, and provide some relief for America. I hope that is what we focus on, Mr. President. I hope we stop the deny and delay and obstruction that the Kelseys have had to fight with their insurance company. Let's move these bills and go home to our families for Christmas.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. UDALL of New Mexico). The Senator from Illinois is recognized.

Mr. BURRIS. Mr. President, I also would like to make a few comments on the issue that is pending before this body and which has been debated and debated and debated, discussed and discussed and discussed. It is time to bring it to a meaningful and final conclusion.

As I address this Chamber today, we stand on the cusp of history. For many years, we have known that the American health care system is badly broken. Now, after nearly a century of debate, after 100 years of delay and false starts, this body is on the verge of laying the issue of health reform to a rest.

This bill represents the culmination of decades of hard work. Its course has been shaped by 11 Presidents and countless Members of the House and Senate. It has taken a long and winding path to reach this point. This legislation is a product of compromise and consensus, of give and take on both sides. It is not perfect; by no means is it perfect. But here we stand.

We have come further than any Congress in history on this issue. We have worked hard to craft a measure that can accomplish the goals of reform without alienating those whose support we need to pass this bill. Without a commitment to certain ideals, this bill

would be empty and ineffective. But without a willingness to work together and achieve compromise, this bill can never become a political reality.

As responsible legislators, this is the fine line we must always walk. It is never easy. I applaud my colleagues for the fine work they have done at every step along the way. Still, not everyone is satisfied, so the work goes on. It is the genius of our Founding Fathers and the rules of this body that allow one Senator to keep debate alive so we can work, debate, write, rewrite legislation together. One Senator can do that under the rules of this body.

Some have suggested that we kill this legislation and start over. They suggest that we stop and come up with something new. They say without perfection we should give up on reform altogether.

I have spoken on the Senate floor, Mr. President. You know what my position has been. But giving up on this issue is not an option. So as my colleagues and I continue to move forward from here, I would like to make one thing very clear. After 100 years of debate, we have come too far and worked too hard to turn back now. Too many Americans are counting on us to make a decision on their behalf. They need it now. They don't need it tomorrow or next week or next month or next year or never—they need it now. Killing the bill would ignore those who look to us for help in their time of crisis. We cannot abandon them at this time. Leaving tens of millions of people without any health coverage at all is also unacceptable.

To all those who believe we should kill this bill I would say this: I understand their frustration, the impulse to say enough is enough. But our vote in this body on this bill is not the end of a path for this sweeping legislation, only a door to the next step of conference.

I have not yet seen the details of the legislation. I have not yet seen the CBO score. I have not yet seen the provisions that will earn my vote; namely, cost containment, competition, and accountability. It is only through keeping this legislation alive that we can continue our work to make this a more perfect document. I say we must continue to work on this document we have before us. We cannot kill this legislation and start over. We must keep working through this legislation, keeping it alive so we can continue—continue—to make this document what we want it to be. That is what we must do.

I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KAUFMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KAUFMAN. Mr. President, I speak today about the need for urgent action on the Defense appropriations bill. I shouldn't have to speak about urgent action on the Defense appropriations bill because this is the one area that is so important to the country and on which we should always operate as quickly as we can. I urge my colleagues on the other side of the aisle to stop their attempts to derail the health care bill and allow the Defense appropriations bill to move forward.

As always, I respect that my colleagues have different views. We have different views on all kinds of issues. We have all kinds of substantive differences. I am one of the people in this body who believe there are basic differences, and a lot of them are not political, they are about basic differences that separate us from being Democrats and Republicans. We can disagree on tactics and on principles, but I know my colleagues on the other side of the aisle support our troops, and the support of our troops should never be a partisan issue.

This bill funds more than \$100 billion for operations, maintenance requirements, and military personnel requirements for our armed action in Afghanistan and Iraq. It provides more than \$23 billion for equipment critical for protecting the brave men and women in uniform—and they are brave men and women and they deserve this. I know the other side of the aisle agrees with that. That is why we should move ahead on this bill. It funds more than \$150 billion for the training of our troops, critical to our success. It is incumbent upon the Congress to ensure that our troops in Afghanistan, Iraq, and throughout the world have the resources they need to be safe, secure, and effective in the war zone.

This bill has been operated and worked on by both parties. It puts our troops first, with the necessary equipment and improved benefits for the military and their families. This isn't just about our troops; this is about the brave men and women who remain at home, the families who need the benefits—again, issues I know my colleagues on the other side of the aisle agree with. They deserve our support and they deserve it now.

In addition to providing a 3.4-percent pay increase for our troops, it also improves military health care and research, including for the very important psychological health, which is especially important, given the startling rates of post-traumatic stress disorder. Everybody knows we must train and equip our troops, our men and women going into battle, but it is equally important—and everyone agrees with this, too—it is equally important to care for the troops and their families after they return home. That is what this bill does.

This bill is necessary, as it demonstrates solidarity with the troops and gratitude for the sacrifices they make on our behalf. It is an investment in our military, in our security, and in our future. That is why our House colleagues overwhelmingly agreed to it yesterday by a vote of 395 to 34 and why we must end these partisan delays to move this bill forward.

It is critical we pass the bill, and there is no good reason why our troops and military families should have to wait—especially in this holiday season—while the other side of the aisle is playing politics.

I support conducting a real debate on Afghanistan with a host of other military issues, but the current debate is not about substance, it is about politics. Our troops should come first and they deserve better. We should pass this bill without delay to give the military and their families the funding they need to do their jobs and to protect our Nation.

Thank you. I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. WEBB). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KAUFMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KAUFMAN. Mr. President, I ask unanimous consent to speak as in morning business for 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

HEALTH CARE FRAUD

Mr. KAUFMAN. Mr. President, I rise to discuss health care fraud. Earlier this month, I introduced, along with Senators LEAHY, SPECTER, KOHL, SCHUMER, and KLOBUCHAR, an amendment that will protect our increased national investment in the health of Americans by improving fraud enforcement. Everyone believes in fraud enforcement, and this amendment does that.

It is no secret fraud represents one of the fastest growing and most costly forms of crime in America today. In no small part, our current economic crisis can be linked to financial fraud, starting with unchecked mortgage fraud generated by loan originators, through securities fraud that hastened the eventual market crash and maximized its impact on Main Street and average American investors.

In response, this body passed the Fraud Enforcement Recovery Act, FERA, which directed critical resources and tools to antifraud efforts.

FERA was passed in response to an unprecedented financial crisis, but Americans should expect Congress to do more than simply react to crises after their most destructive impacts

have already been felt. We owe it to our constituents to identify and address problems when they arise so we can prevent disaster rather than just trying to figure out how to clean up after it happens.

In undertaking comprehensive health care reform, we must be proactive in combating health care fraud and abuse.

It is hard to believe, but each year criminals drain between \$72 billion and \$220 billion—that is billion dollars—between \$72 billion and \$220 billion from private and public health care plans through fraud, increasing the costs of medical care and health insurance and undermining public trust in our health care system. We not only lose the money, we lose the trust people have for the system that the system works.

We pay these costs as taxpayers and through higher health insurance premiums. This amendment will provide needed tools to reduce those costs through effective investigation, prosecution, and punishment of health care fraud.

It is pretty clear that as we take steps to increase the number of Americans who are covered by health insurance and to improve the health care system for everyone, we must also ensure that law enforcement has the tools it needs to stop health care fraud.

The Finance and HELP Committees, as well as leadership, have worked long and hard to find ways to fight fraud and bend the cost curve down. They have done a great job. However, there is more work to be done, and this amendment is an important additional step.

This amendment makes straightforward but critical improvements to the Federal Sentencing Guidelines, to health care fraud statutes, and to forfeiture, money laundering, and obstruction statutes, all of which would strengthen prosecutors' ability to combat health care fraud.

First, this amendment directs a significant increase in the Federal Sentencing Guidelines for large-scale health care fraud offenses.

It is really kind of strange, but despite the enormous losses in many health care fraud cases, analysis from the U.S. Sentencing Commission suggests that health care fraud offenders often receive shorter sentences than other white-collar offenders in cases with similar loss amounts. So people basically feel you can do health care fraud and get away with it and you will not pay a major price. According to statements from cooperating health care fraud defendants, many criminals are drawn to health care fraud because of this low risk-to-reward ratio.

As we have an incredible expansion of health care that will go forward, with more funds, we know criminals out there think this is easy. They think: I can go out and commit fraud. It is a very complex process, but I commit the

fraud. My chances of getting caught are not that great, but even more, I have an added bonus that, if I get caught, I will not get much of a penalty.

That is why we need to ensure these offenders are punished not only commensurate with the costs they impose upon our health care system but also at a level that will offer a real deterrence. These folks believe they can engage in health care fraud and even if they get caught they will not have much of a penalty. Our amendment directs changes in the sentencing guidelines that, as a practical matter, amount to between 20 and 50 percent for health care crooks stealing over \$1 million.

In addition, the amendment updates the definition of "health care fraud offense" in the Federal Criminal Code to include violations of the antikickback statute, the Food, Drug, and Cosmetic Act, and certain provisions of ERISA.

These changes will allow the full range of law enforcement tools to be used against all health care fraud.

The amendment also provides the Department of Justice with subpoena authority for investigations conducted pursuant to the Civil Rights for Institutionalized Persons Act, also known as CRIPA.

It is hard to believe, but under current law the Department of Justice must rely upon the cooperation of the nursing homes, mental health institutions, facilities for persons with disabilities, and residential schools for children with disabilities that are the targets of CRIPA investigations. You can figure out that in most cases these targets will cooperate, but sometimes they may not. The current lack of subpoena authority puts vulnerable victims at needless risk.

Finally, the amendment corrects an apparent drafting error by providing that obstruction of criminal investigations involving administrative subpoenas under HIPPA—the Health Insurance Portability and Accountability Act of 1996—should be treated in the same manner as obstruction of criminal investigations involving grand jury subpoenas.

As we consider and debate meaningful health care reform, we must ensure criminals who engage in health care fraud, and those who think about doing so, understand two things: If they engage in health care fraud, they are going to be faced with swift prosecution by more prosecutors and more folks who enforce the law, and when they are found guilty, they will face substantial punishment.

These commonsense provisions should be a central part of health care reform. I urge my colleagues to support this amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mrs. HUTCHISON. Mr. President, I ask unanimous consent to speak as in morning business for up to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

HEALTH CARE REFORM

Mrs. HUTCHISON. Mr. President, I rise today to speak about the health care bill that is pending. The Department of Defense bill is also pending. It is the business we have on the floor today. I have no doubt that at the appropriate time there will be a vote in support of funding our troops. I know that that may come on Saturday after the time for debate has run out.

I want to talk about the health care issue because it is the reason we have been here for really most of the last month—voting every Friday, Saturday, and Sunday—is to talk about the health care bill, debate the health care bill, ensure the American people know what is in this health care bill, and ensure people start looking at the effect it is going to have on their businesses and their families. I can't think of anything we have ever voted on in this body since I have been here that will affect people's lives in such a personal way.

I have tried to look at what is good in the bill, and then I look at what I don't like in the bill, and I have to say the scale is very heavily tilted toward what I don't like.

In fact, I had a tele-townhall meeting, which is a new capability we have to talk to people. It is a wonderful way to be able to reach out in your State to people who are interested in asking questions and actually call them and let them ask their question. At all times during the tele-townhall I had last night, there were over 6,000 people who were in and out of that tele-townhall meeting. I was very pleased because every single question was a real question, a real person. One man who called is on kidney dialysis treatments. He has very high drug costs and high expenses. Then we had people on Medicare asking how the cuts in Medicare would affect their treatment and their care. Then we had small businesspeople who are scared to death of having more burdens, more taxes, and more mandates on their small businesses. Some were almost screaming into the phone: But don't people realize how hard it is to make ends meet right now for small business? Don't you all realize we are trying to stay afloat while we are in one of the worst recessions of our lifetime?

Of course, I assured them I do understand that. That is why I am trying to amend this bill, trying to change it, trying to encourage my colleagues on the other side of the aisle that we should really start over and try to have a health care reform bill that does three basic things.

We want a bill that actually lowers the cost of health care. Right now, the

bill before us will increase the cost of health care. The cost of the bill that is before us today, if you start with when the bill takes effect, which is 2014, and you go 10 years out, you are looking at \$2.5 trillion in costs.

We have a debt of \$12 trillion in America right now. Those numbers are staggering. We used to be worried about \$12 billion, \$15 billion, and \$100 billion; now we are talking about trillions of dollars. We are talking about \$12 trillion in debt right now. The idea that we would put \$2.5 trillion more in this health care bill, which mandates taxes, to offset some of it, to businesses, employers, and families, is unthinkable. It is unthinkable in good times, but in the bad times we have now, it is absolutely unthinkable. Here we are now talking about this bill that will increase the debt and increase taxes and mandates.

In talking with the people of Texas, I did a little poll on the tele-townhall. I said: Register in, punch 1 for yes, 2 for no, and 3 for undecided. I asked: Do you support the bill that is before us today? If you say yes, press 1; no, press 2. Eighty-one percent instantly started registering against this bill.

I was listening to my colleague, Senator BARRASSO of Wyoming. He also had a tele-townhall meeting for Wyoming. Many Senators are doing this now. He had a couple of thousand people on the call. Ninety-three percent who registered on the poll were against this bill. My colleague from Nebraska, Senator JOHANNIS, said the polls in Nebraska are overwhelmingly against this bill.

People are listening to the debate, reading the newspapers, getting every bit of information they can, listening to the tele-townhall conference calls, they are asking their questions, and in unprecedented numbers they are registering their interest and their overwhelming rejection of this bill.

I talked about what is in this bill and what we could have. Instead of \$100 billion in new taxes, which would start next month, we could step back and say we are not going to put new taxes on businesses and families and companies before the bill even takes effect. In fact, Senator THUNE and I had a motion that was rejected on the floor. It was tabled yesterday afternoon. It would have done exactly that. Very simply, if the bill is going to pass, at least don't start the taxes until there is some program available that is as a result of the bill. It is very simple and clear. That was our motion, and it was tabled, with only 41 Senators saying yes, so we lost the motion.

It is of great concern to us that the tax increases in this bill start next month—we will have over \$100 billion in new taxes starting next month—and that the 40-percent excise tax on premium health care coverage policies takes effect in 2013 but the bill doesn't take effect until 2014.

That is the bill we are debating today, which an overwhelming number of American people are rejecting. They don't want taxes, mandates, and they don't want the government to step between them and their doctors. They want the physician-patient relationship that is the hallmark of American health care. It is what makes us different from most other countries in the world—that we don't have government standing in the way and most of our private plans don't say: No, you can't have this treatment because you are too old or you are not fit enough, or having the government say: Here is who is qualified for this procedure. That is not the health care we have known in America.

We are for health care reform that lowers the cost of health care in our country, and more people will have affordable options. There is a part of this bill that could provide that. It doesn't mean a government takeover. We don't need a government takeover. That is why you have all the taxes and mandates, because it will cost so much that taxes and mandates are the way the majority is putting forward to pay for this expensive government takeover.

Why not have the health care exchange without all the mandates so there would be a free market on the exchange with no cost that would allow people to have choices? The insurance companies would come forward and there would be high-deductible plans for people who wanted high-deductible plans, and there would be low-deductible plans that would be more expensive, but some people would prefer to have that. You could make your choices among the plans that would be put on an exchange that would be open, transparent, and competitive. You would have bigger risk pools and, therefore, lower premiums would be the result.

Talking about what Republicans wish to see in health care reform and asking the majority if we could stop going through every weekend with one vote on Friday, one vote on Saturday, one vote on Sunday so that we are not able to do anything with our families during this holiday season, instead why don't we step back and say we will come back after Christmas or whenever the majority wishes to come back and say: Let's sit down in a bipartisan way, and let's have three principles in a health care reform bill. No. 1, we would lower the cost with the exchange, bigger risk pools, lower costs. No. 2, how about tax credits for every individual or family who would buy their own policies because they don't have access through an employer or if they are going to go on this exchange that would not cost anything, they would be able to have a tax credit to buy their own health care coverage. That would increase the number of people insured in our country, much larger than we

are looking at today with a big government-run plan, which is said to increase the number of insured 31 million, but leave 24 million uninsured. We could get 31 million with the free market working.

No. 3, what about medical malpractice reform? We could take \$54 billion out of the cost of health care by having frivolous lawsuits curbed with some kind of reasonable limits on damages or attorneys fees that would allow people to get some compensation for a transgression, but not something that is going to raise the cost of premiums so high for doctors and hospitals that they have to order more medical tests and that raises the cost of health care across the board.

Those would be the principles we could support. Let's start again after Christmastime and do a rational proposal that the American people would accept.

The PRESIDING OFFICER. The Senator's time has expired.

Mrs. HUTCHISON. I yield the floor.

The PRESIDING OFFICER. The Senator from Florida.

Mr. NELSON of Florida. Mr. President, is it any wonder that people are responding negatively when asked, Do you support health care, when they have been bombarded with millions of dollars of TV advertisements that are not telling what this health care bill does?

Is it any wonder when they hear comments such as this health care bill will not save the American consuming public on their health insurance premiums? What does it do?

Can you believe that it is not going to allow insurance companies to cancel your policies?

Can you believe that it is not going to let an insurance company come up with some kind of fictitious excuse that you have had a skin rash and, therefore, you have a preexisting condition and they are not going to insure you?

Can you believe that it is going to bring in 31 million new people who are going to have health insurance who did not have health insurance before, and that all the rest of us paid for when they showed up at the emergency room?

Can you believe that this health care bill is going to bring down the cost of Medicare over the course of time and is going to save Medicare instead of Medicare running out of funds in about 6 or 7 years?

Can you believe that by creating a health insurance exchange for the private marketplace for private health insurance companies to compete for that available exchange of people who want to buy health insurance there, it is going to bring down their health insurance premiums from what they would otherwise pay?

You probably say it is hard for me to believe that because of all the negative

I have heard. But that is exactly what the experts tell us this bill is going to do. And, oh, by the way, it is going to do one more thing. Over 10 years, this bill is going to reduce the deficit by \$130 billion. Can you believe that? Not if you have been listening to all the stuff that has been thrown around about how bad the bill is. But that is the tactic. That is the tactic of "in your face," "oh, ain't it awful." It is time the real story gets out.

You know what will happen? When this bill is passed and it is finally signed into law by the President, then the real story is going to get out and people will know. In the meantime, I wish that in the Senate we could have closed the doughnut hole. The doughnut hole is the gap in coverage for Medicare recipients where they have to continue to pay premiums for Medicare but they receive no drug coverage whatsoever.

Under current law, a Medicare beneficiary will pay up to \$310 for their drugs, which is the deductible, and then they pay 25 percent of their drugs up until they have paid out a total out of their pocket of \$940. Above that, they hit the dread doughnut hole and they continue to pay premiums, but they receive no help from Medicare for their drugs all the way up to a much higher level. There are 3.5 million people who hit that dread doughnut hole.

Each year, because of the formulas, the doughnut hole grows bigger and it is compounded by higher and rising drug prices. We have seen that the pharmaceutical industry has raised their prices 9 percent. These out-of-control increases in prescription costs are hurting our folks and especially seniors on fixed incomes.

It is no secret that I wanted to fill the doughnut hole. It is not going to happen. But what is going to happen when this gets into conference with the House of Representatives—in fact, there has been a commitment by the majority leader, there has been a commitment and a statement by AARP, which has a significant interest in this legislation, there was a pledge on this floor by Senators REID, BAUCUS, and DODD to close the doughnut hole. I suspect that what has happened is, they have gotten the agreement of the pharmaceutical industry to help them close that doughnut hole once we get into the conference committee with the House of Representatives.

But first, we have to get the bill out of here. That means we have to stand up and push back all of this nonsense and misinformation that is coming about this bill.

What does it do, to recapitulate. It lowers the cost of Medicare over time. It gives a reduction of the Federal deficit. It allows insurance for people who do not have it to be available and affordable and they cannot cancel or use some flimsy excuse to cancel. It will

utilize the private marketplace in which to make this happen. This is an American story, and it is going to be an American success story.

Mr. President, I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CORNYN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BEGICH). Without objection, it is so ordered.

Mr. CORNYN. Mr. President, as I contemplate the task ahead of us between now and Christmas to consider this huge change—some might say radical change—in our health care system, I am reminded of an oath that doctors take called the Hippocratic oath, which basically is, first, do no harm. In other words, you don't want to kill the patient when you are trying to cure them of cancer. You don't want to disable a patient, make their condition actually worse than trying to help them. I think it would be advisable if Congress took a Hippocratic oath, and nowhere is that more appropriate than when talking about health care.

We ought to make sure whatever we do, we don't make things worse. Yet the underlying health care bill, the Reid bill, makes things worse. I will talk about that in detail.

We all agree health care reform is needed. Some of us have different ideas about what reform should look like. We know health care premiums have more than doubled in the last 10 years for American families and that health care costs typically rise at two or three times the rate of wage growth. We also know this is all unsustainable. We can't keep doing what we are doing. Republicans and Democrats agree on the nature of the problem. The question is, What is the cure? What are we going to do to make it better? Are we, perhaps, due to inadvertence or unintended consequences, actually going to make things worse than they are now?

The Reid bill, the health care bill that will be considered along with a substitute that has been negotiated behind closed doors and which we haven't seen, the basic Reid bill would actually increase premiums by \$2,100 for American families purchasing insurance on their own.

I would like to recall the words of President Obama as he was describing his bill. He said:

I have made a solemn pledge that I will sign a universal health care bill into law by the end of my first term as president that will cover every American and cut the cost of a typical family's premium by up to \$2,500.

Yet this bill breaks President Obama's pledge because for an average American family buying their insurance on their own, it would raise their

premiums by \$2,100. According to the CBO and the Joint Committee on Taxation, all of the new taxes—the tax on health benefits, if you have so-called Cadillac plans. I had three firefighters from Texas in my office 2 days who said: Please don't let them tax our health care plans. We have negotiated those in lieu of wage increases. We accepted lower wages because we wanted a better health care plan. Now you are going to tax our health care plan. That is just not right.

We know those taxes on medical devices, on health insurance, whatever they may be—on prescription drugs—eventually will find their way back to the consumer. It is sheer fantasy to think these companies are just going to absorb those taxes and those cuts and they would not have an impact on the price to the consumer. That is why rather than bending the cost curve down, making health care more affordable, this will actually make it worse.

A new independent study by Oliver Wyman found that the Reid bill would actually increase insurance premiums for people with insurance. Again, I thought the purpose of health care reform was to bring costs down through managed care, medical homes, accountable care organizations, delivery reform, medical liability reform, parity of tax treatment, increased competition across State lines. Those are the kinds of things this bill does not do which would actually have some hope of bending the cost curve down for the average American family.

This study by Oliver Wyman found that the Reid bill would actually make people's insurance premiums go up. This study said premiums would go up by 54 percent—in my State of Texas, by 61 percent—for Americans purchasing health insurance on their own. In other words, it is not employer provided. They would have to go out in the marketplace, if you are a small business man or woman, and buy insurance or if you are an individual buying health insurance, this will make your premiums go up by 61 percent in Texas and 54 percent across the Nation. So an average family of four in Houston would see their premiums more than double to \$1,352 a month.

Is that the kind of health care reform we thought we were signing on to when we engaged in this debate? It certainly isn't what I call health reform. This is not what my constituents in Texas call health reform, to double the premiums for an average family of four in Houston. That just makes things worse. Premiums could go up 20 percent higher for small businesses struggling to provide benefits for their employees.

The worst part about this is that these kinds of so-called reforms have been tried before. They failed miserably. For example, in New Jersey and New York, both tried the kinds of mandates, community ratings, guaranteed

issue—these other things that sound a little arcane but which have had the impact of skyrocketing premiums in those States and causing insurance companies to leave the market. Rather than bearing these financial and regulatory burdens, many of them say: We are out of here—leaving people with less choice and higher premiums.

Then there is the Medicaid-Medicare cost shift. For example, Medicare pays about 80 percent of what private insurance does to a doctor or a hospital, Medicaid even less. So these providers have to make it up somewhere else. What they end up doing is charging more to people with insurance. That is what the cost shift is all about. According to one study, that cost shift means higher premiums of about \$1,800 a year for the average family. About half of that comes from Medicaid alone. Yet the Reid bill includes the biggest expansion of Medicaid since the program was created in 1965. And lest we forget, Medicaid is a joint Federal-State program. By expanding the coverage of Medicaid, we are basically imposing an unfunded mandate on the States.

In my State, a State of 24 million people, this Medicaid expansion will result in a \$20 billion unfunded mandate imposed on State taxpayers that the Federal Government is not going to help them out with, \$20 billion over 10 years.

The American people intuitively know all of this. A new Washington Post-ABC poll came out this week that found that most Americans, 53 percent, believe Washington's health care bill will actually increase their costs. Small businesses know this is true. According to a letter I received from the National Federation of Independent Business:

The Patient Protection and Affordable Care Act, which is short on savings and long on costs, is the wrong reform at the wrong time and will increase health care costs and the cost of doing business.

Why in the world would we impose additional costs on small businesses at the same time we are trying to get small businesses to create jobs to try to get our economy to come back? We know that small businesses are the engine of job creation. Now we are just going to impose more costs, more higher premiums on them. What is that going to do? That will discourage them from keeping employees they have in a tough economy and perhaps not hiring new people, when we want to do everything we can to bring down the 10 percent unemployment rate.

In Houston, TX, according to one small business owner:

The proposed health care bill is going to have a negative impact on my business because the cost of employee health insurance will go up. I don't believe what some are saying that the costs will go down. This bill does not make economic commonsense.

One thing about common sense is, as you find out the older you get, it is not

too common. This bill simply defies the explanation that some have given to it that it will actually make things better rather than worse. My constituents, small business owners, everyone understands that the pressures put on premiums and costs is going to make things worse.

Here is a chart that shows that from the time this bill is passed until 2016, we will see a huge increase in premiums for businesses and individuals as well—large businesses, small businesses, individuals. Americans know this is going to make an unsustainable status quo even worse. Yet the President and the majority—

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CORNYN. I ask unanimous consent for an additional 2 minutes.

The PRESIDING OFFICER. In my capacity as a Senator from Alaska, I object.

Mr. CORNYN. I thank the Senator for his courtesy.

The PRESIDING OFFICER. The Senator from Texas.

Mr. CORNYN. Mr. President, I ask unanimous consent to speak for an additional 5 minutes.

The PRESIDING OFFICER. In my capacity as a Senator from Alaska, I object.

Mr. CORNYN. Mr. President, may I inquire of the Chair, is it the intent of the Presiding Officer to prevent any Senator from speaking on the floor on this important bill? I am looking around. I don't see any other Senator waiting to speak. I simply would like an explanation of the Chair's ruling.

The PRESIDING OFFICER. I release my objection.

Mr. CORNYN. Mr. President, the Congressional Budget Office has said—this, of course, is the nonpartisan office which is tasked with the job of scoring or determining the cost of these bills before us—the CBO has opined that the Reid bill will result in 90 percent of Americans seeing the same unsustainable premium increases as they currently do year after year or, in some cases, even higher. If we are going to spend \$2.5 trillion over 10 years, if we are going to cut Medicare by half a trillion dollars, if we are going to raise taxes by another half a trillion just to have no impact for 90 percent of Americans and for the others to actually see premiums go up, it strikes me that this is a solution in search of a problem.

The problem is, we know the premiums are too high, costs are too high, and we need a better answer than is being proposed by the Reid bill.

The Congressional Budget Office estimates that families who get their health care through small businesses or large employers will see their premiums go up under this bill. The new ideas we have seen offered by our friends on the other side are designed

to score political points but are not aimed at solving problems.

For example, one of our colleagues, the Senator from Arkansas, offered an amendment to cap compensation for insurance executives and argued that it would actually lower premiums somehow miraculously. We asked the Congressional Budget Office whether that would have any impact on premiums. It said the impact would be negligible. So what is the point?

We have heard a lot about repealing the antitrust exemption for health insurers. The CBO said while that may be a feel-good sort of provision, that it would actually make premiums higher and make things worse.

The CBO concluded that by enacting the legislation, it would have no significant impact on the premiums that private insurers would charge for health insurance. They also noted that to the extent insurers would become subjected to additional litigation, their costs and their premiums charged to consumers might increase.

We have also heard from some of our colleagues about their cost containment ideas, a group of Democratic Senators who offered an amendment. I think it does have some good ideas in it, but it only saves \$200 million, not an insignificant amount of money, but in a \$2.5 trillion bill?

So the bottom line is, this bill spends \$2.5 trillion to increase premiums or, at best, maintain the status quo. That is not health care reform. We should reject this bill and start over with a step-by-step approach that will actually solve the problems confronting the American people.

We should not accept, no matter what the crush is before the Christmas holidays—these last 8 days of this year—we should not accept a bill that cuts $\frac{1}{2}$ trillion from Medicare, which cuts benefits from Medicare Advantage beneficiaries—one-half million of whom live in Texas; there are 11 million total—we should not accept a bill that raises premiums for many Americans, and we should not accept a bill that puts crushing new taxes on small businesses when unemployment is at 10 percent.

I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROCKEFELLER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROCKEFELLER. Mr. President, I rise with my colleagues, Senator LIEBERMAN and Senator WHITEHOUSE—who are on their way to the Chamber—to discuss an amendment to strengthen and improve the independent Medicare advisory board included in the underlying bill.

I firmly believe creating an independent authority to help Congress make informed decisions about reimbursing Medicare, getting away from a fee-for-service system, and making it based upon the cost which is incurred—but also the quality which now has to be required: evidence-based outcomes—that is the direction Medicare, all of health care, has to go.

These are not just cost decisions but quality decisions. I think it is critical to sustaining our program and the promise we made to millions of seniors that we would do right by them and still keep Medicare affordable, keep the trust fund solvent. It is meant to go broke in 2017. That does not help hospitals, doctors, Medicare beneficiaries, or anybody else. So we have to keep that in mind as we talk about this issue.

I applaud Leader REID for his bold leadership in including this advisory board in his underlying bill. It is a very strong step forward.

In their May report this year, the Medicare trustees determined, if we do nothing, the Medicare trust fund will basically go insolvent in 2017. In health care terms, that is like next February.

It is abundantly clear if we fail to put Medicare on a path of fiscal sustainability, this incredible program—and the security it means for seniors in my State of West Virginia and in the Presiding Officer's State of Alaska and people everywhere; and the disabled, who are, unfortunately, often forgotten—it will be in tremendous danger. We cannot allow that to happen.

So what does this amendment do? If we are serious about protecting Medicare's future, we have to be serious how we handle Medicare, how we allocate it, and use it as a reimbursement and quality tool. So this amendment includes a number of changes to do exactly that.

The most important change: This amendment eliminates a significant loophole in the underlying bill; that is, it eliminates the carve-out which was created by some for hospitals and other providers. I repeat, it eliminates the carve-out.

The carve-out now comprises about 60 percent of all Medicare. So it is a sham. It has to go or else Medicare is in deep trouble. I wish to talk about this a little bit.

We protect the board's integrity. In fact, we give the board integrity and we give them authority. Congress, right now, has the sole authority to change Medicare's cost curve. Yet as the ranks of lobbyists grow and prey upon Members of the House and Senate—it is amazing the relationship between how the cost of Medicare grows and their activities.

Let's be quite honest about it. This is not a politic thing to say, but it is the truth. Probably about 12 percent of the Congress understands health care down

to the wee depth that is needed to be able to decide on the reimbursement procedures, the quality outcomes procedures, which we use to reimburse Medicare providers. This means we have made a lot of mistakes, the cost of Medicare has gone out of control, and we provide Medicare reimbursement unevenly and unfairly. People complain when they should not; do not complain when they should.

You have to understand, Medicare is such a powerful force it drives prices and it drives policies in health care for years and years to come all across the span of health care. It is the elephant in the room.

Power represents an opportunity. Medicare's force and clout can also be harnessed in a direction to improve our health care system, improve efficiency. That is why I am adamantly opposed to the carve-out for hospitals and other providers because it weaves special-interest treatment into the very fabric of a board created to remove them from the process.

MedPAC was created by a Republican Congress in 1997. It, in theory, decides how Medicare reimbursement is going to be updated on an annual basis. The fact is, it has no power to do any such thing. That has to be changed.

Is this a significant change? Yes, it is. Is it just like people changing their lives in various ways all across America because they are facing situations which they have not faced before? People do not have work; people have anxiety over all kinds of subjects; they have anxiety over health care, and they should have anxiety over health care because, particularly if you are a senior, the Medicare trust fund is running out on us.

So the only way you can do that, in my judgment, is to get away from fee for service; that is, you provide the service, and whatever it is, I will pay you the fee. It is simple. It is what we have used. It is what has gotten us in trouble because we do not insist upon experts making these decisions and on demanding evidence-based outcomes in the way hospitals, doctors, and others are reimbursed under Medicare. Medicare is taxpayers' money. It is not a frivolous matter.

As was the intent of my original policy, it is time to change the equation and put expert evidence and advice at the forefront of health care decision-making. It is time to take the special interests out of the process and create an independent, politically insulated entity with its sole job to be to protect Medicare's long-term quality and solvency. I am sure many will come and object to that, saying we should do that in Congress, but I repeat: Is Congress qualified? Does it have the knowledge to the depth that it can

make a decision on how much providers should be reimbursed? My answer is some do, most don't and, therefore, the cost of Medicare keeps rising and the system is more endangered.

I have no doubt that a strong independent Medicare advisory board would be a powerful cornerstone for meaningful health reform in all of the right directions, but if we want the board to succeed, it needs the tools for both Medicare reform and genuine private sector cost containment.

Congress cannot do this on its own. We have proven ourselves incapable of making efficient, consistent decisions about Medicare's future, which now amounts to a crisis. We cannot continue standing in the way of progress. I urge my colleagues to join me in support of this truly transformative policy.

I simply repeat: If we are going to make it in health care, if we are going to make it in Medicare, if we are going to preserve the trust fund, we have to change the way we do business. People may not like that. People will complain about it. People will complain if we do nothing. People will complain if we do everything. People complain. That is the nature of it. That doesn't matter. What matters is that we do the right thing; that we bend the cost curve by making accurate decisions; that we are tough in our decision-making; and that is what this board—and Congress will have a chance to review it but cannot override it except by a very substantial vote—and that is what the Medicare advisory board is all about. It is the answer to Medicare's future, in this Senator's judgment.

The security this policy provides for our seniors is too important. We need to fight for them, always. We need to protect them. We need to protect the solvency of the trust fund, and we need to make sure seniors are getting the best possible care. The day has ended when people can submit a bill and say: I did this and, therefore, pay me that. That is our system now. It is the wrong system. It has gotten us into trouble. It is not good for health care, and it is very bad for the solvency of the trust fund.

I see my distinguished colleague Senator LIEBERMAN has arrived. He and I have been working on this for some time together, I am proud to say.

I thank the Chair. I say to my colleagues the full text of the amendment, No. 3240, is printed in the RECORD of Tuesday, December 15.

The PRESIDING OFFICER (Mr. FRANKEN). The Senator from Connecticut is recognized.

Mr. LIEBERMAN. I thank the Chair.

Mr. President, I am honored to stand and speak on behalf of this amendment which I have filed with Senator ROCKEFELLER and Senator WHITEHOUSE, and I thank them for their leadership.

I wish to speak for a few moments about it. It is not a noncontroversial

amendment, but I think it redeems one of the two central promises or goals of this bill. The fact is that a lot of the current health care reform debate in fact is focused on issues that are not central to two big goals that I think most of us share, which are, first, to expand the number of people who have health insurance coverage in our country; secondly, to lower the costs, because the costs continue to go up way beyond the rate of general inflation in our country, and that has a very burdensome effect on millions of individuals, families, businesses, our government—indeed, our entire economy.

This amendment focuses on the second of those two big shared goals, which is containing the increases in health care costs. It has become a mantra around here—but it is never bad to repeat a mantra—which is that national health expenditures in our country are now well over \$2 trillion. It is hard to imagine that amount of money, but let me try to get inside it.

We spend twice as much per person on health care as the average developed country in the world, but I am afraid we are not receiving as a country the best value for our health care spending. The fact is that the United States provides some of the best health care in the world, but we don't provide it to all of our people and we don't provide it efficiently. Medicare and Medicaid account for over 20 percent of the Federal budget and over 27 percent of national health expenditures. These two programs are expected to rise to equal 20 percent or one-fifth of our gross domestic product by 2050.

Here is the animating, motivating fact that brings Senator ROCKEFELLER, Senator WHITEHOUSE, and me together to file this amendment: The Medicare trust fund, which provides Medicare benefits to approximately 37 million senior Americans that they depend on, that they have depended on in a way that has helped to extend their lives as average life expectancy goes up, the Medicare trust fund is expected to be insolvent, out of money, bankrupt, by 2017—unable to pay the bills by 2017. That is 8 years from now. It is to prevent that unacceptable result that my colleagues and I come forth to file this amendment to make sure that by then—we have done a lot of things, but one of them is to make the delivery of health care more efficient, the delivery of health care to seniors through Medicare more efficient, so they can look forward with confidence to having Medicare coverage throughout the rest of their lives.

As we all know, it is not just the ones on Medicare now; the baby boomers are coming of age to get on Medicare, and that will add enormously to its responsibilities.

I would say that Senators REID, BAUCUS, DODD, and HARKIN did a superb job, a very good job, with the Patient

Protection and Affordable Care Act, the underlying bill, to reduce health care spending and particularly to do so while expanding coverage for 30 million more Americans, which is the second great goal that I believe we all share. While these numbers are encouraging, Senators Rockefeller, Whitehouse, and I think we can and should do more, and that is the cost containment numbers.

My colleagues introduced earlier this year the MedPAC Reform Act, which created an independent authority, a separate nonpartisan body, to make critical health care cost decisions or make recommendations about them. In the current Senate health care reform bill, their idea appears centrally as the independent Medicare advisory board. It will bring together a panel of experts whose mission it will be to extend the solvency of the Medicare trust fund by seeking out new efficiencies, new cost containments, and improving the quality of care delivered by Medicare in the private sector. The board will have the authority to make recommendations to the President and Congress to reduce Medicare spending in particular ways. Those recommendations will be fast tracked through Congress with strict requirements for the committees of jurisdiction to review them, report the recommendations to the full Congress, and then be subject, those recommendations, to limited floor debate, limited by the underlying legislation. If Congress does not pass the advisory board's recommendations or adopt other proposals that produce an equivalent amount of savings, the Secretary of Health and Human Services will be required to implement the board's original recommendations.

As Senator ROCKEFELLER said—this is the second time today I have said this—earlier today the Homeland Security Governmental Affairs Committee held a hearing on efforts to establish a commission to begin to turn around the exploding national debt we have. Part of the reason we do that and part of the reason this independent board outside of Congress is being created is that we haven't proven ourselves capable of controlling costs because we find it a lot easier to say yes to people, for good reasons, for humane reasons, but don't find it so easy to pay for the resulting costs of our affirmative answers to their requests.

The CBO has estimated that the advisory board in the current bill will save \$23 billion in the next 10 years. The Obama administration and dozens of respected economists have said that the creation of this board is instrumental in lowering costs and literally saving Medicare from bankruptcy. The amendment I have filed with Senators ROCKEFELLER and WHITEHOUSE, I am convinced—certainly our intention is to make this independent board stronger so it will result in larger savings and contain more costs over the long run.

There are six provisions in the amendment that I want to denote, describe briefly. First, this amendment will extend the board's authority to cover hospitals and hospices; sensitive, I know, but the board must have the authority to consider the entire breadth of Medicare expenditures in making its recommendations to Congress to maximize savings for the government, for taxpayers and, most of all, for the beneficiaries of Medicare so the program is still there to help them.

Second, our amendment makes it easier for the board to make recommendations in the years beyond 2019 than the underlying bill does so that it can continue to monitor Medicare over the longer term and ensure its long-term solvency. We want those on Medicare now, and those coming on Medicare, to be able to depend on it over the course of their lives.

Third, this amendment will raise the amount of savings the board must meet in years where Medicare growth exceeds the target growth rate set in the law, in the proposal.

Fourth, we move up the time of implementation of the board's recommendations by 2 months to minimize, frankly, the influence of interest groups who will be in the normal course of the process fighting to stop these cost-effective recommendations.

Fifth, the amendment allows the board to offer recommendations in years where the Medicare growth rate does not outpace the target growth rate. The goal of this provision is to be clear that the purpose of the board is not just to contain costs beyond a certain standard but also to search out constantly for inefficiencies, for waste, for the expenditure of Medicare dollars that is not actually benefiting Medicare recipients.

Finally, our amendment clarifies that the purpose of the board is not just to contain costs within Medicare but to look more broadly at health care spending outside of these publicly supported programs. That is very significant. It will provide an opportunity for broad savings in health care and health insurance for pretty much everybody in our country.

I am proud to join today with my friends, Senators ROCKEFELLER and WHITEHOUSE, to announce the filing of our amendment. These six provisions will make this advisory board stronger and reduce costs.

While we disagree on some aspects of health care reform, I hope we can agree across party lines that health care spending is out of control, and that we can contain it in a way that doesn't threaten access or benefits. We must preserve and extend Medicare for future generations, and we must ensure that the new private market we are creating in health care reform is one where health care quality and efficiency justifies the cost.

The PRESIDING OFFICER. The Senator has spoken for 10 minutes.

Mr. LIEBERMAN. I wonder if I could ask unanimous consent for an additional moment.

The PRESIDING OFFICER. In my capacity as a Senator from Minnesota, I object.

Mr. LIEBERMAN. Really. OK. I won't take it personally.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. MCCAIN. Mr. President, I ask unanimous consent that the Senator from Rhode Island be recognized for 10 minutes followed by the Senator from Michigan, the distinguished chairman of the Armed Services Committee who will be speaking on the bill, and that I be recognized to follow him.

The PRESIDING OFFICER. Is there objection?

Mr. LEVIN. No objection. I assume that is for 10 minutes each?

The PRESIDING OFFICER. Is that for 10 minutes each?

Mr. MCCAIN. Yes. I have been around here 20-some years. It is the first time I have ever seen a Member denied an extra minute or two to finish his remarks. I must say that I don't know what is happening here in this body, but I think it is wrong.

It is fine with me that it be 10 minutes.

I will tell you, I have never seen a Member denied an extra minute or so, as the Chair just did.

Mr. LEVIN. If the Senator will yield, I don't object to the unanimous consent request on that condition. I think the same occurred earlier this afternoon for reasons that have to do with trying to get this bill going.

Mr. MCCAIN. I haven't seen it before. I don't like it, and I think it harms the comity of the Senate not to allow a Member at least a minute. I am sure the time is urgent, but I doubt if it is that urgent.

I renew my unanimous consent that the Senator from Rhode Island be recognized for 10 minutes, the Senator from Michigan for 10 minutes, and then that I be recognized for 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Rhode Island is recognized.

Mr. WHITEHOUSE. Mr. President, I know the Senators have been waiting longer than I have. It is a personal courtesy from them to me to allow me to join Senator ROCKEFELLER and Senator LIEBERMAN as a cosponsor and have our remarks follow in series. I am grateful to both of them.

I am here to speak in support of the amendment offered by Senators ROCKEFELLER, LIEBERMAN, and myself, which would strengthen the provisions of the reform bill creating a nonpartisan group of experts to put the brakes on out-of-control medical spending.

One of the first things we can count on in terms of this amendment being one to protect Medicare beneficiaries is that the prime sponsor is Senator ROCKEFELLER, a man who has dedicated his career since long before I was here—even during his days in West Virginia—to looking out for seniors and for the disabled and, since he has been in the Senate, looking out for Medicare. That is a credential that deserves great respect with respect to this amendment.

One of the most persistent concerns in this health care debate is, of course, cost control. I have spoken many times on the floor about the overriding importance of cost containment for the future of health care and especially the need for innovative delivery system reforms, which can be driven by the way you pay providers.

Our Republican attackers complain that Democrats on the bill are just doing more of our usual taxing and spending and that we won't impose any discipline on the system. Mr. President, as somebody who has worked for years on health care delivery system reform, I can tell you that is simply not true. This bill undertakes the most comprehensive redesign of our chaotic, wasteful system ever attempted.

One leading health economist and expert in cost containment, MIT professor Jonathan Gruber, recently wrote of the Senate Democrats' efforts in this bill that he couldn't "think of a thing to try that they didn't try. They really made the best effort anyone has ever made. Everything is in here. . . . You couldn't have done better than they are doing."

Many critics talk about cost control as if it were just a matter of political will, that Congress can come here and cut costs by flipping a switch. Well, that may be true if you want to cut benefits for the elderly and disabled or if you want to throw the elderly and disabled off of coverage or if you want to pay doctors even less for treating Medicare patients. But those would be brutal, callous cuts that would create human misery and suffering. Better to tackle the waste in the system, the \$700 billion annually in excess costs found by President Obama's Council of Economic Advisers—a number that may actually be as high as over \$1 trillion every year, according to the Lewin Group and to George Bush's former Secretary of the Treasury, Paul O'Neill.

By this method, you save money by improving the quality and efficiency of care; by tackling the multiple sources of waste and inefficiency in the system; by improving quality and access to care and giving doctors, hospitals, employers, and employees all the correct financial incentives to adopt healthy, cost-saving, efficient practices. The complexity of getting those incentives right, aligned with top-flight health

care, versus the power of the interest groups that are involved, has historically paralyzed Congress.

History teaches that the significant national dialog and debate we are now having about health care is a momentary exception rather than the general rule. It is possible this debate will usher in a sustained period of focus on health reform, but the steepening fall of our health care system toward catastrophe should counsel us to protect against that congressional institutional paralysis.

This independent, nonpartisan board of experts to help control costs in a way that is smart, humane, and not all politics, is important. The independent Medicare advisory board will force Congress to act by issuing recommendations to reduce cost and increase efficiency that will automatically go into effect if Congress does what we so often do around here—nothing. If Congress can agree to different ideas, it can change the board's recommendations, but we still have to reduce Medicare costs by a minimum savings target. In other words, the board will force Congress to engage thoughtfully and for the public good on the most important fiscal and health issue our Nation faces.

Senator ROCKEFELLER's amendment strengthens this board in several important ways: It expands the circumstances in which the board's recommendations go into effect when Congress does nothing. It raises the maximum level of savings that the board's recommendations must achieve. It ensures all providers of health care services, including large hospitals, are equally responsible for bringing down Medicare costs. It empowers the board to issue recommendations for improving Medicare over the long term, even in years where spending is under control.

My colleagues on the other side of the aisle have depicted the board as a frightening, Orwellian, all-powerful dictator that will cut Medicare benefits. Hogwash. The bill specifically prohibits the board from doing anything to increase premiums, ration care, restrict benefits, or modify eligibility.

The facts no longer seem to matter to our friends on the other side. They have called this group the "rationing commission." If you look at page 1004, lines 3 and 4, it says this:

The proposal shall not include any recommendation to ration health care.

You are entitled to your own opinion—and we all have one—but not your own facts.

It is actually that kind of demagoguery about Medicare that proves the case for creating the board. Thoughtful, smart, technically expert people under congressional oversight but protected from these partisan spasms of congressional vitriol, passion, and folly will make careful and

consistent decisions for all of our benefits, without diminishing the power of the American people and their elected representatives, so that we can preserve and protect Medicare.

I urge my colleagues to support Senator ROCKEFELLER's amendment, in which Senator LIEBERMAN and I have so proudly joined him.

I yield the floor with my thanks to the Senator from Michigan for being so gracious in allowing me to join my colleagues in sequence on the bill.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. LEVIN. Mr. President, I wish to speak for the few minutes we have this afternoon in support of the appropriations bill that is before us, the Defense appropriations bill.

Senator MCCAIN and I and other members of the Armed Services Committee have spent a lot of time each year authorizing important programs to support our troops, protect our troops, and support their families in a whole host of ways. Hopefully, it will authorize funds that can help us succeed in Afghanistan and Iraq. That bill is now law, and in front of us is an appropriations bill that contains most of those same provisions—not all but most of the same provisions.

It is critically important that this appropriations bill be passed. There are differences in this body and between this body and the House of Representatives about the policies that are involved in the war in Afghanistan and the war in Iraq. That is normal. That is the way it should be. We can have democratic debates inside this great democracy of ours. We don't have to agree, and we don't on many of the policies involved in these two war efforts. Where I believe this body is unanimous is that we are determined to support our troops when they are in the field regardless of whether we agree with the particular strategy they are supporting or whether we happen to have supported their mission.

It has been the tradition of the Congress, once a decision has been democratically arrived at to send troops to the field, that we support those troops. This appropriations bill has critically important provisions in it to support our troops. I believe there is unanimity and consensus in this body on those provisions. I will focus on a few of those provisions.

We have added significant funds. One example is the so-called Mine Resistant Ambush Protected Vehicles or MRAP. These are life-and-death matters we are talking about. These vehicles are a perfect example of that. The faster we can get the advanced MRAPs to the field in Afghanistan, the more we can get to the field in Afghanistan, the fewer Americans are going to be killed in Afghanistan. So we have funds in here—more than actually were requested—to send over 6,600 new MRAP

vehicles, all-terrain vehicles that can function better there than the ones we sent to Iraq. These all-terrain vehicles have been designed and developed in record time in order to get them to our troops. We should be acting in record time on this appropriations bill, and there are many reasons for that. Surely, getting more MRAPs more quickly into the field is one of those reasons.

We have an organization called the Joint IED Defeat Organization whose sole purpose and mission is to come up with the strategies and technologies to defeat these IEDs, these improvised explosive devices that are killing our troops. In order to defeat these devices or train our troops who are deployed there in how to identify and protect themselves against IEDs, we have \$1.8 billion in this appropriations bill for that organization. They have a laser mission to defeat the IEDs. We have to get this money to them.

This bill needs to be signed. The President has to sign it—and he will—so we can get these funds as quickly as possible to our troops. We need to adopt this appropriations bill.

We have pay raises and health programs in the bill. We add \$1.3 billion more than the President requested for the Defense Health Program. This covers shortfalls in private sector care, increases funds for medical research, including what is called TBI, which are the brain injuries, as well as PTSD, which has so afflicted our troops in these wars. We add additional funds for those programs. The quicker the bill is signed, the faster those funds get appropriated and spent, the better off our wounded warriors who suffer from TBI and from psychological health problems are going to be.

In Afghanistan now, one of the key issues is going to be whether we can get the Afghan troops trained quickly enough, supported quickly enough, given the equipment they need so they, hopefully earlier rather than later, can join with us, partner with us, and take responsibility for their own security. Regardless of people's differences over the policies and strategies in Afghanistan, I believe there is a consensus in this body—no matter what the vote ends up being on the bill, whether people vote for the bill or against the bill, I would think all of us believe we must quickly provide funds to train, support, and sustain the Afghan security forces. We want to fund that effort in this bill at \$6.6 billion.

Counternarcotics in Afghanistan. We all know the narcotics industry in Afghanistan is being used to support the Taliban. We want to continue efforts to train Afghan counternarcotics forces and support U.S. counternarcotics and interdiction activities in Afghanistan, so \$300 million in this bill is going to do that.

We have a fund called the Commander's Emergency Response Program or CERP. That fund has been

used to great advantage. This bill provides \$1.2 billion for that Commander's Emergency Response Program; \$1 billion of that is for that program in Afghanistan and \$200 million of the CERP program in Iraq. This represents about twice as much CERP funding for Afghanistan as we had in fiscal year 2009.

Those CERP funds are able to provide very quickly support and economic development village by village. Our commanders are able, without going through a whole lot of red tape, to make relatively small investments in things which make a difference, in terms of the security of our troops and the betterment of the lives of the Afghans. It has had a huge, positive impact in terms of the perception of the Afghan community about us, satisfying them that we are there for their benefit, not just for our benefit. We are not occupying Afghanistan. When we leave Afghanistan, we want to leave Afghanistan in better shape than we found it. The CERP funds are a major contribution to that goal.

One of the things we have authorized in the bill, which Senator MCCAIN and I and members of the Armed Services Committee have brought to this body, was adopted by this body, and signed into law, was the authorization to use those CERP funds to help reintegrate, where we can, Afghan Taliban fighters into Afghan society—those who will renounce violence against the Government of Afghanistan and make a commitment to participate in civilian life. We are able to actually have the funds that are so essential to make that program work. We do not yet have a program in place. That is being worked on as we speak. But these funds need to be available to support that program of reintegration of Afghans, those low-level Taliban people who are with the Taliban not for any ideological reason but because they get some pay from the Taliban. Not all the members of the Taliban fall into that category. But for the ones who do, this funding becomes critical.

Mr. President, I will only take a few minutes more, but I did want to highlight a few additional points that I believe my colleagues should know about.

The first area pertains to three initiatives that originated in the Defense authorization bill that relate to the continuing fight against al-Qaida and associated terrorist organizations.

The bill includes nearly all of the \$1.6 billion the administration requested for the coalition support fund, which is used to reimburse key partner nations, particularly Pakistan, for support provided to the United States in Operation Enduring Freedom and Overseas Contingency Operations.

It includes \$350 million in fiscal year 2010, the full amount authorized, for the train and equip program to build the capacity of foreign militaries to conduct counterterrorism operations

and support military or stabilization operations in which the U.S. participates. As clarified in the fiscal year 2010 NDAA, this authority can be used to build the capacity of ISAF coalition partners to prepare their training teams and special operations forces to be available for use in Afghanistan.

The bill also provides the full \$100 million authorized for the authority to transfer funds from DOD to the State Department to support State's security and stabilization assistance programs.

The other area pertains to missile defense.

The bill before us provides important funding for ballistic missile defense programs. It supports the decisions made by Secretary Gates and President Obama to restructure the missile defense program with a greater focus on regional missile defense against existing missile threats. These changes include the termination of the Multiple Kill Vehicle Program and the Kinetic Energy Interceptor Program, and cancel procurement of additional airborne laser aircraft. This defense appropriations act also supports the decision to cap deployment of the ground-based midcourse defense system at 30 operational ground-based interceptors in Alaska and California, rather than the 44 previously planned for deployment.

The bill supports funding for alternative missile defense systems in Europe, to defend against current and future Iranian ballistic missiles.

It also includes an additional \$57 million, above the budget request of \$169 million, to procure more standard Missile-3 interceptors for our Aegis ballistic missile defense system. This type of interceptor will be at the heart of the new missile defense plan for Europe. The amendment also provides the full \$1.1 billion requested for the terminal high altitude area defense, THAAD, system, which is another key element of our regional missile defense capabilities.

I believe my 10 minutes is up. I thank my good friend from Arizona, Senator MCCAIN, for allowing me to go first. The order of priority was that he go immediately after someone speaking on this side. But as always, his courtesy shines through to me, and I very much appreciate it.

I yield the floor.

THE PRESIDING OFFICER (Mrs. SHAHEEN). The Senator from Arizona is recognized.

Mr. MCCAIN. Madam President, I thank my friend from Michigan. I thank him for his leadership of the Armed Services Committee.

The train is about to leave the station on the last of the appropriations bills for 2010 and, unfortunately, nothing has changed. Everything is the same—earmarking, porkbarrel, excessive and unnecessary spending. Billions in wasteful earmarks again have found their way into this bill which could

otherwise be spent for the priorities that our men and women, our military leaders, as well as the Secretary of Defense, has asked for.

There is in this bill—here we go again: an appropriations bill loaded up with earmarks—a 523-page explanatory statement for 1,720 earmarks totaling \$4.3 billion. Let's do some simple math: \$4.3 billion in pork, \$2.5 billion in unauthorized and unrequested C-17s; \$500 million in unrequested and unwanted funding for the Joint Strike Fighter alternative engine; and a Presidential helicopter. That is \$7.3 billion that neither the military nor the Defense Department requested and does not need—\$7.3 billion.

Some people say that is not a lot of money. It is enough to keep the State of Arizona's budget requirements fulfilled for 10 months. States across America are facing great difficulties, as we know, and an additional \$7.3 billion would not be so bad.

I wish to say, again, this process of earmarking breeds corruption. That is why we have former Members of Congress in Federal prison. It was not inadequate disclosure requirements that led Duke Cunningham to violate his oath of office and take \$2.5 million in bribes in exchange for doling out \$70 million to \$80 million of the taxpayers' funds to a defense contractor. It was his ability to freely earmark taxpayer funds without question.

I wish to point out, again, the President pledged during the campaign he would work to eliminate earmarks. The President, last March, when we had an omnibus spending bill, said they would not do it anymore. In September, the President spoke in Phoenix, AZ, to the Veterans of Foreign Wars. In that speech, the President's words were quite compelling about waste and porkbarrel spending in Defense bills. In that speech, the President promised—promised—an end to "special interests and their exotic projects" and reaffirmed he was leading the charge to kill off programs such as the F-22, the second engine for the Joint Strike Fighter, and the outrageously expensive Presidential helicopter.

The President went on to say:

If a project doesn't support our troops, we will not fund it. If a system doesn't perform well, we will terminate it. And if Congress sends me a bill loaded with that kind of waste, I will veto it. We will do right by our troops and taxpayers.

Mr. President, I can tell you, the President of the United States, that meets your criteria with over \$7 billion of unnecessary, unwanted spending. Will the President veto this bill? Not a chance. Not a chance. But the American people are going to demand this obscene process stop. The American people are going to demand it be stopped, wasting \$7 billion of their tax dollars on wasteful and earmark spending. I am confident they are aware.

They are aware we are spending \$7.6 million to fund research in Montana on hypersonic wind tunnels, called MARIAH. This self-licking ice cream cone has been earmarked and unrequested since 1998. The Air Force lost interest in 2004, so the appropriators moved it to the Army. The Army has no requirement for this capability and published a report in 2005 stating their disinterest in the program. In summary, we spent \$70 million for some hypersonic wind tunnels nobody wants—\$70 million. Unless we demand and receive change, there will be more millions in it next year.

There is \$5 million going to the battleship USS *Missouri* Memorial Association; \$18.9 million for a center at the University of Massachusetts “dedicated to educating the general public, students, teachers, new Senators, and Senate staff about the role and importance of the Senate.” What does that have to do with defending this Nation? What does that have to do with providing the men and women who are risking their lives, as we speak, with the equipment they need? Madam President, \$18.9 million to educate the public about the importance of the Senate? Give me a break.

There is \$9.5 million going to the University of Hawaii for a program called the Panoramic Survey Telescope and Raid Response System. The list goes on and on. The Air Force is paying for this, and the Air Force will not be allowed to be getting much in return, since it will only be allowed to use the telescope 5 percent of the time. In other words, in dollar figures, the Air Force pays \$10 million to the university and receives \$500,000 in return.

What is more, the Air Force has not, in the 9-year life of this earmark, requested a single dollar for this program. Since 2001, the Air Force has been forced to spend more than \$75 million of its budget allocation on a program it does not want.

I ask unanimous consent to have printed in the RECORD these other porkbarrel earmark programs, such as \$1.2 million for the American Museum of Natural History Infectious Disease Research.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

\$7.6 million to fund research in Montana on hypersonic wind tunnels, called MARIAH. This self-licking ice cream cone has been with us, earmarked and unrequested, since 1998. The Air Force, leader in hypersonic testing and technology, lost interest in 2004, so appropriators moved the program to the Army. The Army has no official requirement for this capability and published a report in 2005 stating their disinterest in the program. To date, the Army has no plans to fund the MARIAH wind tunnel effort, as they have stated in their budget documents. But that hasn't kept Congress from pouring more than \$70 million into it, with no discernable return. One group has made out particularly well in the deal, however. Of course, I'm re-

ferring to lobbyists, including Gage LLC, whose CEO, coincidentally, had been a senior staffer to an appropriator from Montana.

\$5 million to the battleship USS *Missouri* Memorial Association. This is a private organization which owns and operates this battleship as a museum in Pearl Harbor. I am aware that the Association plans to put the *Missouri* in dry-dock and refurbish it, and also aware that it was not part of the donation agreement that the Defense Department would pay for required maintenance.

\$20 million for the National WWII Museum in New Orleans, to help pay for the construction of new facilities as part of a \$300 million expansion. This privately funded museum opened in 2000 and, through the help of the Louisiana delegation, has already received \$13 million in Department of Defense funds tacked into previous appropriations bills. This earmark has no benefit to the United States military and will be paid at the expense of equipment and training for our troops, something few WWII veterans would support.

\$14.8 million for five different earmarks pertaining to nano-tube research. Of the 1,720 earmarks in this bill, hundreds are for high-tech research or devices. I ask my colleagues whether they are capable of weighing the merits of specific technologies that they fund in this bill. The answer is they are not.

\$18.9 million for a center at the University of Massachusetts “dedicated to educating the general public, students, teachers, new Senators, and Senate staff about the role and importance of the Senate.” This center was neither requested in the President's budget nor authorized by Congress.

\$9.5 million to the University of Hawaii for a program called the Panoramic Survey Telescope and Raid Response System (Pan-STARRS). On the surface, this program seems like a reasonable need for the Air Force as a part of its Space Situational Awareness efforts. Unfortunately, the Air Force won't be getting much return on this investment, since it will only be allowed to use the telescope 5 percent of the time. In dollar figures, the Air Force pays \$10 million to the University and receives \$500,000 in return. What's more, the Air Force has not, in the nine-year life of this earmark, requested a single dollar for this program. So, since 2001, the Air Force has been forced to spend more than \$75 million of its budget allocation on a program it doesn't want—but might be able to use—only to be denied use 95% of the time.

\$500,000 for the Brown Tree Snake Program.

\$1.8 million to renovate and upgrade the Historical Fort Hamilton Community Club in the New York City area.

\$1.6 million to study human genetics at the Maine Institute for Human Genetics and Health in Brewer, Maine.

\$3.5 million for a Micro-algae Biofuel Project in Hawaii.

\$5 million for the Presidio Heritage Center, a museum, in San Francisco.

\$1.6 million for the Center for Space Entrepreneurship.

\$2 million for National Initiatives for Applications of Multifunctional Materials.

\$1.6 million for a Virtual Business Accelerator for the Silicon Prairie.

\$7.8 million to develop key technologies needed for long term operations in “near space” conditions for the Orion High Altitude Long Endurance Risk Reduction Effort, Aurora Flight Sciences in Columbus, Mississippi.

\$2.4 million for Fusion Goggle System.

\$800,000 for “Advanced Tactical Laser Flashlight” in Wyandotte, MI.

\$2 million for Cedars-Sinai Medical Center's Operating Room of the Future, Los Angeles, California.

\$4.8 million for New Vaccines to Fight Respiratory Disease and Central Nervous Disorders at the Iowa State University.

\$720,000 to survey epidemiologic health for the University of Iowa.

\$3 million for the New Jersey Technology Center.

\$1.2 million for American Museum of Natural History Infectious Disease Research.

\$1.6 million for Army Plant Vaccine Development Program.

\$1.4 million for Flight/Hangar Deck Cleaner.

\$4 million for the Hampton University Proton Cancer Treatment Initiative.

\$10 million for the Hawaii Technology Development Venture.

\$3.9 million for Intelligent Decision Exploration.

\$12 million for Laser Phalanx.

\$2.4 million for Marine Mammal Awareness Alert and Response Systems.

\$2 million for a Marine Mammal Detection System.

\$2.3 million for Marine Species.

\$1.2 million for the Maritime Directed Energy Test and Evaluation Center.

\$3.2 million for a National Functional Genomics Center Collaborating Site.

\$2.4 million for NAVAIR High Fidelity Oceanographic Library.

\$2 million for Non Traditional Ballistic Fiber and Fabric Weaving Application for Force Protection.

\$4 million for Smart Instrument Development for the Magdalena Ridge Observatory.

\$2 million for underwater imaging and Communications Using Lasers.

\$800,000 for Unmanned Undersea Vehicle Submerged Long Range Positioning.

\$2.4 million for an Unmanned Vehicle Sensor Optimization Technologies Program.

\$8 million to study oceans at the Center for Excellence for Research in Ocean Sciences.

\$2 million for an Advanced Laboratory for Information Integration in Hawaii.

\$2 million for PaintShield for Protecting People from Microbial Threats.

\$3.2 million for Playas Training and Research Center.

\$1.2 million for Progressive Research for Sustainable Manufacturing.

\$1.6 million for Protective Self-Decontaminating Surfaces.

\$1.5 million for the Institute for the “Advancement of Bloodless Medicine” for the Englewood Hospital in Englewood, New Jersey.

\$1.2 million for the Model for Green Laboratories and Clean Rooms Project.

\$1.6 million for the Maine Center for Toxicology and Environmental Health at the University of Southern Maine in Portland, Maine.

\$6 million to study the molecular signatures in tumors for the National Functional Genomics Center.

\$1.6 million for Multi-Dose Closed Loop pH Monitoring System for Platelets at Blood Cell Storage Inc., Seattle, Washington.

\$4.8 million for the National Oncogenomics and Molecular Imaging Center in Detroit, Michigan.

\$800,000 for the Natural Gas Firetube Boiler Demonstration, Rock Island Arsenal, Illinois.

\$5.8 million for the Rock Island Arsenal Roof Replacement, Rock Island, Illinois.

\$800,000 for Near Infrared Spectroscopy Military Personnel Assessment at the University Community Hospital, Tampa, Florida.

\$4.2 million for the Nicholson Center for Surgical Advancement Medical Robotics and Simulation in Central Florida.

Mr. McCAIN. Madam President, the list goes on and on: \$2 million for the Cedars-Sinai Medical Center's operating room of the future in Los Angeles, CA. That is the second earmark I have seen. The other one is for irritable bowel syndrome. Now we have the operating room of the future. Remarkable.

There is \$2.3 million for marine species; \$2 million for a marine mammal detection system. There is a threat. Also, \$2.4 million for marine mammal awareness alert and response system. The list goes on and on.

I know my time is near to expire.

Here we are with a deficit of \$1.4 trillion for this year, a debt of over \$12 trillion, unemployment at 10 percent, 900,000 families lost their homes in 2008, and we are spending over \$7 billion on earmarks, porkbarrel projects the Department of Defense neither needed nor wants, and there are programs not fully funded because of this that are vital to defending the lives of the men and women who are serving in the military.

Again, this appropriations bill is a disgrace.

Madam President, I yield the floor.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Madam President, I rise to speak on something else, but I will say very quickly, I have listened to colleagues on the other side of the aisle lamenting where we are today. It has been 11 months since a new President was inaugurated and, obviously, everybody understands this is not a mess he created. The last 8 years of the stewardship of this country, where there was never one appropriations bill vetoed in that entire time, is an extraordinary story of public negligence and even malfeasance.

We are where we are. We are creating jobs. The economy is turning around. We had the least loss in the last 11 months. We are beginning to see those changes. We will ultimately have the strength in our economy to deal with this deficit.

TRIBUTE TO DAVID MCKEAN

Madam President, I rise for a different reason right now. It is a bitter-sweet privilege for me to speak about my friend and my counselor, David McKean, staff director of the Foreign Relations Committee, who is leaving the Senate at the end of this month to become the chief executive officer of the John F. Kennedy Library Foundation.

I have enjoyed the benefit of David's advice for almost 20 years now. He will be sorely missed. My only consolation is, this son of Massachusetts will again be able to vote for me.

He has been a part of my life in the Senate since 1987, when I was a fresh-

man and he was a younger and idealistic legislative assistant. Over the years, I have drawn significantly on his knowledge and his skills. He leaves the Senate now to continue in public life, but he leaves it a little bit older but still idealistic and young at heart.

When he came to our office, he had already made a mark. He had graduated magna cum laude from Harvard College and received a law degree from Duke University and a master's degree from the Fletcher School of Law and Diplomacy. He also taught English at the Waterford Kamhlaba School in Swaziland, Africa. But he was a crusading soul deeply interested in public policy, with a zeal for investigations and an instinct to hold Washington accountable. He was looking for a place to put all those interests to work in the Senate, and he found it.

But he also found something more, I might add—much more—that summer of 1987. There was a young Kellogg fellow from the University of Pennsylvania working in my office at that time. Her name was Kathleen Kaye. She was extraordinarily smart and committed. David did not fail to notice those qualities and a lot more. Their marriage and their three wonderful children, who I am pleased to say are with us right now, Shaw, Christian, and Kaye, are a tribute and more to the relationship they share.

David has devoted his career to public service. After 5 years of working in my office, he moved across the Capitol as chief of staff to another member of the Massachusetts delegation, Representative Joe Kennedy. He later became special counsel at the Commodity Futures Trading Commission before returning home to the Senate as deputy chief counsel at the Governmental Affairs Committee and staff director of the Permanent Subcommittee on Investigations.

I failed to mention that before going to the Permanent Subcommittee, he worked with my staff early in his career in helping to develop one of the great investigative efforts in the Senate in recent memory, which was the BCCI investigation. That wound up on the cover of Time magazine and was a seminal report—one of the best reports I have seen in the 26 years I have been here.

In 1999, I was lucky to entice him to come back to my office as chief of staff. It turned out to be his longest tenure in any of those public jobs so far. Earlier this year, when I became chairman of the Foreign Relations Committee, he became the staff director.

David is the ultimate team builder and a magnet for great talent, so he would be the first to tell you that his success did not come single-handedly. But it is clear David played the essential role in turning 2009 into a stellar year for the committee and for its new

chairman. Under his guidance, we conducted 125 hearings on topics ranging from Afghanistan to Zimbabwe. We secured passage of the Enhanced Partnership with Pakistan Act, and we won approval of legislation bringing far-reaching reform to our foreign assistance program. He has worked tirelessly with the committee members and the White House over the past year, and our record is a testament to his determination and skill. I think our committee has succeeded in going through the nominations of more people and passing them more rapidly to the floor than any other in the Senate, and I congratulate him for that effort.

Somehow, during his career of service, he has found time to indulge in his passion for history and scholarship. He is the author of a highly acclaimed biography of Tommy Corcoran, the ultimate Washington insider. He also wrote a biography of Clark Clifford, which was a New York Times "notable book of the year," and he is the co-author of "The Great Decision," which skillfully, and perhaps surprisingly, transformed the story behind the Supreme Court's landmark *Marbury v. Madison* case into what the Washington Post called "a political thriller."

As those of you in this body know, we are—all of us—really only as capable or competent as our staff. Over the years, I have depended on David McKean at every stage. He has been the consummate adviser—trustworthy, loyal, unafraid of speaking up when I was about to veer off in the wrong direction—which, clearly, was very seldom indeed. Never was he more valuable to me than in the immediate aftermath of the 2004 Presidential election. Forty-eight hours after an election night—and early morning and early afternoon—that didn't end up the way that I had hoped it might, I returned to the Senate for a vote. Back to work. I don't remember what the vote was about, but I do remember that David was there with a plan to get us through the day and the next 2 years. I will miss that wisdom and guidance.

Our loss is the Kennedy Library's gain. In some ways, I think something like the Kennedy Library is the perfect place for this man who is at heart a scholar and an intellectual. But the Kennedy Library is particularly well-suited to David because it is a place Jackie Kennedy hoped would help turn history into advocacy and activism, and I have no doubt David's vision and experience will help to ensure that the legacy of President Kennedy endures to inspire future generations.

Madam President, I want to close by simply saying that my colleagues and I are grateful for David's distinguished service. I will personally miss him very much. I wish him, Kathleen, and their children my very best as they return home to Massachusetts to start this

next special chapter in David's career in public service.

I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Ms. STABENOW. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. STABENOW. Madam President, I ask unanimous consent that at 5:30 p.m. today, the majority leader be recognized to make a motion to recess until 12:01 a.m.

Mr. SESSIONS. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. SESSIONS. Reserving the right to object, if I might, if the Senator would propose her request again.

Ms. STABENOW. Madam President, I ask unanimous consent that at 5:30 p.m. today, the majority leader be recognized to make a motion to recess until 12:01 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. STABENOW. Madam President, I rise to speak about the position we find ourselves in as we come to the end of the year. Despite the incredible successes we have had with the recovery act and equal pay and the Children's Health Insurance Program and so many other areas where we have been focused and working hard to make a difference, every step of the way, as with the current bill, we have been faced with stalling tactics, objections, and filibusters. Now with the very important Department of Defense funding bill, we are in a filibuster again. I had to make the motion I offered because we will have to come in at 1 o'clock in the morning and have a vote to stop a filibuster. That is what this is all about, filibustering a bill that has a pay raise in it for our troops, that has help for military families, that has the funding for the next year—we are in the middle of two wars—essential funding that is needed to support our military. As our Presiding Officer knows, having been a leader on this as well, we also have placed into this bill provisions that are incredibly important for families, extending unemployment insurance for families across the country who find themselves in a situation not of their making where their job has gone away or they have been laid off because the company can't continue to employ them, maybe because of rising health care costs, which is certainly part of the equation. People are finding themselves in a situation where due to nothing they have done other than be a good citizen, care for their kids and follow the rules, they are without employment. We have this year extended unemployment insurance—and I am so

grateful that President Obama has been willing to do this, has helped to lead this in the recovery act and then again as we ended a filibuster, a month-long filibuster in October, brought that to an end in November to extend unemployment insurance. We find ourselves again, because of the unemployment situation, even though we see it getting a little bit better, with a long way to go. We are moving in the right direction, but we have a long way to go. This bill would extend for 2 months unemployment insurance that is critical for families. It would also extend help with health insurance. We are debating the larger health reform bill to create a way for families to be able to afford insurance and for us to bring down costs over the long run for businesses and for families.

This bill in front of us that is being filibustered by the Republicans would extend help for health care, for health insurance, for COBRA payments—a program put in place that made a lot of sense. If you lose your job, you could pay on your own to continue the coverage. But it is incredibly expensive.

So recognizing that, and recognizing how tough it is when you lose your job and you are in a situation—it is either savings or unemployment insurance or both—and you are trying to make the mortgage payment and care for the kids and put food on the table and pay the electric bill and all of the other things, and then to add a several hundred or several thousand dollar payment for COBRA on top of that has not been realistic for families. So we have placed a 65-percent subsidy, to help families get through this tough time, for health insurance. We also have assistance for food for families who, right now, again, have never had to ask for help before in their lives but now have a situation where they cannot put adequate food on the table for their children.

This bill is very important, and what we have in front of us, unfortunately, is another filibuster, another objection—like we have seen all year—to stop us from moving forward to fund our military, to support our troops with a pay raise, to help military families, and then to do a number of other things that are critical to do in the short run until we get into the new year and are able to focus more broadly on these things.

As the Presiding Officer knows, this is not the first time this has happened. We have had from the party of no 98 different objections this year. This is a record, a world's record I think: 98 different times that we have seen them objecting, filibustering, having stalling tactics to moving forward on things that ought to be bipartisan.

These are not Democratic issues when somebody has lost their job or when a small business needs help or needs health insurance they can afford

or when a family finds themselves in a situation where they need to be able to have help to continue their health insurance or put food on the table. This is not a Democratic idea or a Republican idea, this is American.

We have Democrats, Republicans, Independents, people who do not have a party, people who are not active politically, people who vote, people who do not vote. They are losing their jobs. They expect us to get it. They expect us to have a sense of urgency around here.

The troops who are serving us right now, who are in tougher times than we will ever face, are not saying what matters is whether you are Democrat or Republican as to whether we fund the troops and fund the Department of Defense and give them a pay raise they have earned and need or to help their families. They are saying: Come on. Come together. Solve problems. Get things done.

But yet, over and over—and we find ourselves tonight where we are going to be stopping a filibuster at 1 o'clock in the morning on a bill to fund the Department of Defense, on a bill that would help families get through the holiday season, keep a roof over their head, pay their heating bills, and keep food on the table.

To dramatize this even more, it is stunning to think about the fact that out of the 40 weeks we have been in session this year—40 weeks—for 36 of those weeks, we have had filibusters or stalling tactics, objections to amendments or objections to bills being put on the floor. That means only 4 weeks out of the entire year we have been in a situation where the Republicans have not been saying no, have not been stalling on things that are incredibly important.

Even with all of this, by any objective measure, there has been more accomplished this year than in any other time since the Great Depression. We need to be accomplishing more and faster because people have a tremendous sense of urgency about what is happening in their lives right now. So we need to be acting. Think of what we could have gotten done. We have all the things that have gotten done and have been addressed. Think about what we could have gotten done if we did not have 36 weeks of filibusters that we had to deal with and objections we had to deal with.

I hope, as we are going through this new year, there will be a sense that it is time to get things together here and work for the common good and put people back to work and tackle their health care costs and make sure people can afford to have health insurance.

Let me close by sharing a story from Annette from Lake Orion, MI. She says:

After a successful 21-year journalism career, I was laid off in May when my newspaper closed. I will turn 60 in October and am

a 12-year survivor of breast cancer. My husband, who is 62, is on my health insurance.

Thankfully, the federal government is helping [us] pay for our COBRA, which would be more than \$800 a month.

Senator, we're not pleading poverty. But it's easy to see the dilemma of many Americans in our shoes: Risk going without health insurance, you risk bankruptcy if someone gets sick. Pay the current price, and watch your life savings, which were supposed to support you in [your] old age, dwindle down.

Don't listen to those screaming to maintain the status quo; it doesn't work for too many Americans.

We have story after story where people are facing an early retirement—not by choice—dipping into retirement savings to try to keep their health care going. Young people, old people need us to act now, and I am urging Congress to act now.

The PRESIDING OFFICER. The Senator's time has expired.

Ms. STABENOW. I thank the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. SESSIONS. Madam President, it is very distressing that Senator STABENOW could not finish her remarks and that other Senators such as Senator WHITEHOUSE and Senator LEVIN and Senator LIEBERMAN have been shorted of time. Why? Because, for some reason, the majority leader feels we should not go past 5:30 tonight.

This is a defense bill, and it is important. We need to be talking about the good things that are in it and the things that have been added to it that are not so good. I do not think working a few extra hours is going to hurt anybody.

I hear colleagues complain that they cannot work a weekend, they cannot work up to Christmas, they cannot work at night. Well, what about our men and women who are serving in Iraq and Afghanistan 7 days a week, 12 hours a day, Christmas and holidays? They are away from their families so I do not have any sympathy for any Member of the Senate who feels this is too hard for them. Also, I do not appreciate the fact that we are shut off from debate tonight to be able to talk about this issue that is before us. I see no reason for that to have to occur.

I object to the health care bill. The American people object to the health care bill—sixty-one percent say no. But we are supposed to now agree and go along with the majority? And if we do not, we are some sort of obstructionists? I do not think so. I believe I am representing my constituency. I believe I am representing the best interests of the United States of America. I do not believe this health care bill is part of that.

With regard to the armed services bill—I am a member of the Armed Services Committee, and I have been a Member for 12 years; I have been to Iraq six times and Afghanistan six times—I believe it is great we can give our soldiers a pay raise and support

them. A lot of things in the bill are good. There are some that are cut too much, but there are a lot of things that are good, and I wish to vote for the bill. But this defense bill has \$18 billion in unrelated spending items attached it: increased unemployment, COBRA, food stamps, and loan subsidies for businesses.

Two things strike me about this. First, these new expenditures are not paid for. They are not within the budget. They are above the budget. What does that mean? Well, the budget itself has us in deficit. So if it is not paid for in the budget resolution, every penny of this \$18 billion goes straight to the debt of the United States of America. We need to stop this.

Second, why did they put this kind of spending on the defense bill? Because they want to come down here and say: Anybody who is not willing to go along with this scheme to pad \$18 billion straight to the debt of the United States of America—anybody who objects does not love our soldiers.

That is wrong, and people are getting tired of that. This is how the debt of this country is surging out of control. This Congress is irresponsible in our spending. We have increased the debt the likes of which this Nation has never seen, and we are spending as if it is going out of style.

I would point out one matter here about the interest we pay on the debt. In 2008, the annual deficit was \$450 billion—at that time, the largest ever. This past year, the deficit for the fiscal year ending September 30 was \$1,400 billion, \$1.4 trillion. This puts us on the map, according to the Congressional Budget Office, to double the entire debt of America in 5 years, and triple it in 10. Unbelievable.

This is a kind of gimmick—attaching unpaid for, nonbudgeted items to the defense bill, then trying to force it through, so we cannot do anything about it. They snicker, I am sure, in their self-confident way that: We got 'em. If they object to the bill, we will say they don't love our soldiers, they don't support America's defense.

I am getting tired of it. I think the American people are getting tired of it. I saw a poll where the most popular party in America today is the tea party—more than Republicans or Democrats.

Somebody said: Well, \$18 billion, Sessions, that is not too much money. But it is done on bill after bill. This is not the only bill that has these kinds of gimmicks in it. Let me show you. I figured this out one day. I put together a chart here a little bit hastily: Baseline Increases: A Destructive Pattern.

When we increase funding in these bills above the budgeted amount and increase the debt, people like to think: Well, it is just \$18 billion. That is not much.

Look how that works when you do it over a period of ten years. So let's say

next year, we go over \$18 billion. This adds another \$18 billion to the national debt. Well, that is not so much. But wait, it is a lot. The State of Alabama's general fund budget is \$2 billion. Do not tell me \$18 billion in one bill, on top of this defense bill, is not a lot of money. It is a huge amount of money.

But it does not work that way. This \$18 billion tends to go into the baseline, so the next year, when they talk about increasing the budget, they pad it by another \$18 billion. It is not just \$18 billion the next year, you see. It is \$18 billion on top of what was pumped into the baseline the year before, and that totals out to \$36 billion. Then the next year, it is \$36 billion, plus \$18 billion more. And the next year, it is \$54 billion, plus \$18 billion more. The next year it is \$72 billion, plus \$18 billion. The next year, it is \$90 billion, plus \$18 billion. And the next years, it is \$108 billion, \$126 billion, \$144 billion, and \$162 billion if you pad the budget. And this bill is just 1 of 13 accounts: Defense. We have 13 different spending bills. How much is that? It is \$900 billion in additional deficits, just because of our inability, our unwillingness, to stay by the numbers that we voted on as our budget limit.

The budget itself, as presented by the President and passed by the Democratic majority, put us on a road to having \$1.4 trillion in deficit last year, and it looks as though this year we are going to have another \$1.4 trillion deficit. But just this one little gimmick, if it is replicated each year, can add almost \$1 trillion more to the debt of America over ten years. That is why we are concerned about it.

By the way, when we talk about the scheme that puts us on the road, according to the Congressional Budget Office, to tripling the debt of America by 2019, that does not include the health care bill. The health care bill has not passed. This outlook only includes the things that are in law now. So how much more would those figures be if the debt goes up?

I will point to one last thing about the overall financial status of this country: the interest we pay on that debt. This chart shows it.

Last year, this Nation paid \$170 billion in interest on the borrowings we have as a nation. In that 1 year it was \$170 billion. That is a lot of money. As I said, not counting the State education budget, for all the other matters of our State of 4.6 million people—which is almost one-fiftieth of the Nation's population, an average-sized State—our general fund is \$2 billion. However, \$170 billion is how much we paid in interest last year. According to the Congressional Budget Office, those numbers will increase to where in 2019, as a result of surging debt, \$799 billion will be added to our debt because of interest we must pay; \$799 billion just in

that 1 year. That is more than the whole defense budget. That is more than the whole U.S. discretionary budget from not too long ago. That is a huge amount of money. It is going to crowd out spending for schools, for highways, for health care, and for other projects.

I am very upset about it. We cannot continue. The President has said this is an unsustainable course. Every economist we talk to says it is an unsustainable course.

But how do we get there? We get there by taking a Defense bill and tacking on \$18 billion worth of unfunded spending. Every penny of that gets added to the debt.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SESSIONS. I thank the Chair.

I urge my colleagues to send this bill back and reform it so we can have a clean Defense bill. We need to take these unpaid matters out and make sure they are paid for.

I thank the Chair and yield the floor.

Mr. JOHNSON. Madam President, I rise today to recognize this incredible opportunity to dramatically improve the health of our Nation. Americans face out-of-control health care costs, great inequalities in access to care, eroding benefits, and the ever-increasing threat of losing their health insurance. While it is no easy task to fix a system that is both very complex and very troubled, we cannot fail to act.

I wish today to highlight the challenges faced by approximately 12 million Americans who buy health insurance in the individual market. Many farming and ranching families in South Dakota are forced to purchase from this market, where they all too often wind up underinsured with coverage that costs too much and provides too little.

South Dakotans have contacted me directly to report health insurance discrimination that results in increased premiums, refusal of coverage for necessary treatments, and denial of coverage. I have even heard complaints from people who work in the insurance industry, like Pam from Sioux Falls, SD. She shared with me the serious barriers people encounter when looking for health insurance on the individual market. "There are huge loopholes in the individual market. People who are not healthy cannot get insurance. We turn people away every day and they want to buy health insurance."

Insurance companies increase their profits by selling to individuals who will pay premiums but rarely use their benefits, and by avoiding individuals who have health issues. This cherry-picking leaves millions of Americans without access to affordable health insurance coverage. And when families go without health insurance, they receive less preventive care and often must undergo more costly medical

treatment when illness progresses undetected. This uncompensated care for the uninsured drives health care costs up for all of us.

Those who buy insurance on the individual market pay top dollar for very limited coverage. They will benefit immensely from health reform. The Patient Protection and Affordable Care Act will increase the insurance options in the individual market and address injurious insurance industry practices that limit access to care. Immediately after enactment, a new program will be created to provide affordable coverage to Americans with preexisting conditions until insurance industry reforms are fully implemented. The legislation will also form health insurance exchanges in every State through which those limited to the individual market will have access to affordable and meaningful coverage. The exchange will provide easy-to-understand information on various health insurance plans, help people find the right coverage to meet their needs, and provide tax credits to significantly reduce the cost of purchasing that coverage.

Pam says, "People who want to buy individual insurance should be able to, regardless of their health status." I couldn't agree more. The Patient Protection and Affordable Care Act will ensure that no American is denied coverage because of their medical history, and it will provide the security of meaningful, affordable health care coverage for all.

Mr. JOHNSON. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. First of all, Madam President, I apologize to everyone. I indicated to both the majority and the minority that we would be here at 5:30, but I had some things that came up, and I simply could not be here.

SERVICE MEMBERS HOME OWNERSHIP TAX ACT OF 2009—MOTION TO PROCEED

CLOTURE MOTION

Mr. REID. Madam President, I move to proceed to Calendar No. 175, H.R. 3590. I have a cloture motion that is at the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to Calendar No. 175, H.R. 3590, the legislative vehicle for the Patient Protection and Affordable Care Act.

Harry Reid, Christopher J. Dodd, Mark Udall, Patrick J. Leahy, Daniel K.

Akaka, Richard J. Durbin, Sherrod Brown, Jeanne Shaheen, John F. Kerry, Jack Reed, Tom Harkin, Sheldon Whitehouse, Kirsten E. Gillibrand, Jeff Merkley, Joseph I. Lieberman, Barbara Boxer, Debbie Stabenow.

Mr. REID. I now withdraw that motion.

NEED FOR JUSTICE IN NEPAL

Mr. LEAHY. Mr. President, I want to speak briefly about a matter that is of concern to the Congress and the Department of State, involving a heinous crime that occurred in Nepal and the need for justice.

Many people are familiar with the brutal murder of Maina Sunuwar in February 2004. At the young age of 15, she was arrested by Nepali soldiers and severely tortured to death at, of all places, the Birendra Peace Operations Training Center. After her murder, the army made it look as though she had been shot while trying to escape, and then buried her body at the center.

According to a United Nations report, in September 2005, after intense public and international pressure, three army officers were brought before a court martial and sentenced to a mere 6 months imprisonment for failing to follow proper procedures when disposing of Maina's body. In spite of many requests, the Nepal army refused to disclose the nature of the charges that led to this sentence, or provide copies of any documents relating to the court of inquiry or court martial. It also refused to cooperate with police investigations.

It is shocking that one of the officers accused in her murder, Major Niranjan Basnet, was permitted to participate in a United Nations peacekeeping mission in Chad. This speaks volumes about the inadequacy of vetting procedures of military personnel for such missions, which is a separate subject that I intend to take up with officials at the Department of State and United Nations.

To his credit, Prime Minister Madhav Kumar Nepal had Major Basnet returned from Chad, following the issuance of an arrest warrant and in response to public calls for his arrest. However, when he arrived back at the Katmandu airport the army took him under its control and apparently, despite initial promises and requests from the police and orders from the Prime Minister, has still not handed him over to the police.

This case represents a critical juncture for Nepal. In large measure, and as others have pointed out, Maina's death will decide whether a civilian, democratic government and the rule of law will determine Nepal's future, or it will remain dominated by the interests of the Nepal army.

Just a few days ago, President Obama signed into law the Consolidated Appropriations Act, 2010, which

includes a prohibition on assistance to the Nepal army unless it, among other things, is cooperating fully with investigations and prosecutions by civilian judicial authorities of violations of internationally recognized human rights. This provision applies squarely to Maina's case.

I urge the new Chief of the Army Staff, General Chhatraman Gurung, to seize this opportunity to demonstrate that the army is reforming, that it recognizes in a democracy its members are answerable to the civilian courts, and that it will no longer perpetuate the impunity that has undermined the rule of law in Nepal for far too long.

PAROLE GUIDELINES

Mr. LEAHY. Mr. President, I have long questioned the policy of detaining asylum seekers who present genuine claims for protection under our laws. Asylum seekers who express a fear of return to their country, and who can establish their identity and show that they are neither a flight risk nor a threat to the community, should be allowed to pursue a claim for relief in the United States free from custody. Yesterday, U.S. Immigration and Customs Enforcement, ICE, announced new guidelines for release of asylum seekers that override an unduly harsh policy implemented in 2007 by the Bush administration and that are a welcome step toward compliance with our obligations under the Refugee Convention.

Under current law, an asylum seeker who arrives at a port of entry and asks for refugee protection is given a brief interview to ascertain whether he or she has a credible fear of persecution in their home country. If the asylum seeker passes that interview, they are detained, pending a hearing on their claim before an immigration judge. That hearing may take place weeks or months after the asylum seeker arrives in the United States. Unless the asylum seeker can convince the Department of Homeland Security that they should be released, that asylum seeker can spend those weeks or months in immigration detention. This policy is an affront to our ideals as a nation that aspires to be a beacon of light to persecuted refugees.

In 1997, the Immigration and Naturalization Service developed guidelines to determine whether asylum seekers should be released from custody in "parole" status while their asylum claims were adjudicated. To obtain parole, asylum seekers were required to establish their identity, and show that they were neither a flight risk nor a threat to the community. These guidelines were properly calibrated to deter fraud in the asylum system and threats to our national security. They also ensured that those who met the criteria for parole should be released. The 1997 parole guidelines were imperfectly im-

plemented, but the policy contained in them was reasonable and appropriate.

For reasons that were never adequately explained, under the prior administration, ICE issued new parole guidelines that raised the bar for asylum seekers. In addition to the 1997 requirements, under the Bush policy, an asylum seeker had to demonstrate other factors, such as a serious medical condition, pregnancy, status as a minor, or that his or her release was in the "public interest." The term "public interest" was not defined in the 2007 guidelines and it is not clear how a detained asylum seeker could have met such a vague standard. Members of Congress and the bipartisan U.S. Commission on International Religious Freedom questioned the need for such a restrictive policy, especially when many asylum seekers have no criminal record and pose no risk to Americans.

The new parole policy generally hews to the 1997 parole guidelines, but contains an important improvement. Again, asylum seekers will be eligible for parole if they demonstrate a credible fear of return to their country of origin, establish identity, and show that they are neither a flight risk nor a threat to the community. For the first time, however, the government will conduct a parole review of each case in which the asylum seeker establishes a credible fear of return. Under both the 1997 and 2007 policies, an asylum seeker had to request a parole determination in writing. Many asylum seekers arrive on our shores with genuine claims for protection, but no English language skills and no legal counsel. For these asylum seekers, navigating our complex immigration system presents an enormous hurdle. It is a challenge for them to even comprehend that they may seek parole from detention. Therefore, an automatic parole review will assist many bona fide refugees in winning release from custody. Our commitment to fair and humane treatment of refugees demands no less. This new policy will also save taxpayer dollars spent to detain immigrants, including asylum seekers who are otherwise eligible for parole, at an average of \$100 per person, per day.

In 1996, when our asylum laws were rewritten to restrict access to protection for many who requested protection upon arrival, I fought hard to preserve our role as a nation that welcomes refugees. I offered an amendment to restore basic due process protections to the summary exclusion and expedited removal provisions proposed for asylum seekers. Former Senator Michael DeWine of Ohio cosponsored the amendment, which prevailed by only one vote. Since that time, I have worked to strengthen access to due process for asylum seekers and ensure that our government complies with its international treaty obligations under the Refugee Convention.

I commend President Obama and Secretary Napolitano for engaging in a serious review of our asylum policies and taking steps to bring us closer to full compliance with international law. With the thirtieth anniversary of the Refugee Act of 1980 approaching, I will continue to press for both legislative and administrative changes to the law that will protect refugees and asylum seekers from harm and provide them with safety and security in America.

RECOGNIZING THE BOY SCOUTS OF AMERICA

Mr. BROWNBACK. Mr. President, I rise today to honor one of the most distinguished and recognized organizations for young people in the United States, the Boy Scouts of America. Specifically, I want to recognize its tremendous efforts to uphold the principle of service to others.

Today, the Boy Scouts of America is the largest youth service organization with nearly 3 million members. Its teachings of citizenship, character development, and self-reliance are those which all Americans should strive to emulate in their daily lives. The programs give participants the opportunity to engage in a wide range of outdoor activities, education programs, and career-oriented programs in partnership with many community organizations. Boy Scouts of America celebrates 100 years of service on February 8, 2010, with the theme "Celebrating the Adventure, Continuing the Journey." This motto will serve its members as they continue teaching the necessary skills to many more generations to come.

I want to recognize the efforts of the Jayhawk Area Council in northeast Kansas. These members are planning for the next 100 years of Scouting through their "Building Tomorrow's Leaders" project. This is just one of many projects that will honor the spirit of service in communities of Scouts across the Nation.

Boy Scouts of America recognizes that young leaders are developed over time, and has expanded its programs to help young men and women up to 20 years of age through Venturing Crews, Explorer Posts, and the Learning for Life groups. These programs have been shown to be meaningful and to improve a Scout's likelihood for success as an adult and enhance the quality of life in the community where he resides. Boy Scouts of America has kept up with the evolving and changing needs of our Nation, by adding programs in areas such as environmental ethics and responsibility. President Dwight Eisenhower recognized the contributions of the Boy Scouts 56 years ago when he praised the organization, as it "yearly enriches our Nation, and contributes generously to the economic, physical and spiritual resources of the country."

Mr. President, the Boy Scouts of America have helped shape young people of America for the past 100 years. This achievement is one to be celebrated, and I hope many of my colleges will join me in wishing this organization the best for the next 100 years.

JOHN BRADEMAs CENTER FOR THE STUDY OF CONGRESS REPORT

Mr. KERRY. Mr. President, from the Marshall Plan to tsunami relief, America's arsenal has always been most powerful when we have marshaled not just the force of our arms but the power of our ideals. It is no secret that for 8 recent years, the United States seemed to have broken with some of our best tradition and time-honored values—and it set back our security to be so isolated in the world. I have said many times that even the most powerful Nation needs some friends on this planet. Now, 1 year into President Obama's administration, the time is right for a robust public diplomacy to advance our interests in the world and to enhance our national security. That is the conclusion of a new report from New York University's John Brademas Center for the Study of Congress.

The center, well known to the Senate for its research and recommendations for new perspectives on public policies, recommends in its report that international arts and cultural exchanges be incorporated more fully into the planning strategies of U.S. policymakers.

Mr. President, this is a timely and important study. I recommend it to the Senate and ask that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MOVING FORWARD: A RENEWED ROLE FOR AMERICAN ARTS AND ARTISTS IN THE GLOBAL AGE

The 2008 election of Barack Obama as the 44th President of the United States has offered an historic opportunity for the renewal of faith in the American political system and restoration of America's image around the world. In January 2009, the John Brademas Center of the NYU Wagner convened a group of experts to explore the public policy implications for American arts and culture of a renewed focus on U. S. public diplomacy and issued a call for an expansion of international arts and cultural exchanges in the service of this new direction. The following report is the result of their expert opinions and deliberations.

The mission of the John Brademas Center for the Study of Congress is to increase the understanding of Congress—its role in making policy and its powers, processes, and responsibilities. The Center's nonpartisan work reaches scholars, students, public servants, policy makers and the general public. The Center conducts research, sponsors student internships, organizes academic conferences and public symposia, and hosts policy addresses by Members of Congress. As a part of the New York University's Robert F. Wagner Graduate School of Public Service, the Center strives to help the next genera-

tion of public service leaders develop a deeper understanding of how and why Congress makes decisions. It is named for its founder, NYU President Emeritus John Brademas, who served in the U.S. House of Representatives for 22 years (1959–81).

The Robert F. Wagner Graduate School of Public Service of New York University is a leadership school of public policy, urban planning and non-profit management whose faculty members are widely recognized for reframing the way people understand and act on issues of public importance, and whose graduates are bold, well-prepared change makers who expertly navigate real-world complexity and produce results that matter.

This report has been prepared and edited by Michael F. DiNiscia and Thomas M. McIntyre of the John Brademas Center and Professor Ruth Ann Stewart of the Robert F. Wagner Graduate School, New York University.

EXECUTIVE SUMMARY

Over the past decade, studies have shown that public opinion in other countries—particularly in the Islamic world—has taken an increasingly unfavorable view of the government and foreign policy of the United States. Yet international opinion about the values and culture of the United States, as distinct from government policies, has remained more positive according to the most recent surveys conducted by the non-partisan Pew Global Attitudes Project even in Middle Eastern countries. The inclination to view the fundamental ideals of American society as positive provides a valuable opening for policymakers to utilize the arts and culture both to advance America's international interests and enhance the cultural experience of its citizens and their understanding of America's place in a rapidly changing world.

To these ends, this report recommends that international arts and cultural exchanges be integrated into the planning strategies of U.S. policymakers as a key element of public diplomacy. History has proven that a robust public diplomacy is essential to U.S. national security and the promotion of American interests around the globe. The arts community has observed firsthand the value of international artistic exchanges in promoting moderation and tolerance among widely diverse religious and cultural groups.

Recognizing the fiscal constraints imposed by the current economic downturn, the report advises policymakers and the arts community to first focus on new and better ways to utilize arts and cultural exchange initiatives that are currently underway in both the private and governmental sectors.

As responsibility for America's public diplomacy initiatives is shared among the White House, National Security Council, Department of State, Congress, National Endowment for the Arts (NEA), National Endowment for the Humanities (NEH), Institute of Museum and Library Services, and other Federal agencies, this report offers specific suggestions and recommendations for fostering greater interagency cooperation in the integration of arts and cultural exchanges into their respective strategies.

At the same time, American arts groups feel a responsibility for promoting an understanding of the vibrancy of arts and culture in our country that both animates our democracy and nourishes international exchanges and America's image. Thus, the report recommends a national conversation on the arts generally and their centrality to the quality of American life both home and abroad.

A NATIONAL CONVENING ON CULTURAL DIPLOMACY

We recommend that a National Convening on Cultural Diplomacy be held in Washington, DC to bring together policymakers and leaders in the arts community. Such a meeting would be a way of directly engaging artists, at a time of domestic and international difficulty, in the efforts to tell anew America's story and expand and to deepen our country's understanding of foreign societies and the value of cultural diplomacy to the security and quality of American life.

The Convening would attempt to engage the relevant agencies of the Federal Government to make arts and cultural exchanges a strategic part of U.S. public diplomacy. While the meeting could be best organized by one or more nonprofit organizations working in this field, it would benefit greatly from the support and collaboration of the U.S. Department of State as the lead Federal agency promoting international exchanges.

We believe that the meeting would be greatly enhanced by the inclusion of representatives from other countries who are leaders of international cultural initiatives.

We believe such a meeting, drawing together policy makers, artists, scholars and representatives of professional service organizations, foundations, and other nonprofit as well as for-profit groups involved in the arts, would provide an agenda for Congress and the Administration to build on current resources and programs to expand international arts and cultural exchanges—in both directions—in the service of America's national security and quality of life.

BUILDING DEEPER AND BROADER EXCHANGES

We believe it is critical that international arts and cultural exchanges be two-way, person-to-person endeavors in order to promote the human connection and that such connections be sustained over time and not just episodic events, as too often has been the case. As an example, we recommend that visual arts presentations include an educational component and performing arts master classes to strengthen the value of these face-to-face interactions.

We believe that given the appropriate level of funding and commitment long term, cultural diplomacy programs can demonstrate—using evidence-based evaluation—their success and effectiveness in promoting the best aspects of America's culture and democracy.

American culture is rich in its diversity and demographic make-up. Through the recruitment and exchange of outstanding representatives of all of America's many cultures, we can demonstrate the multicultural nature of American society at its best, presenting a vision of openness and freedom of expression to societies where such opportunities are often lacking. Similarly, we urge a public diplomacy policy that welcomes the cultures of others to our shores.

We believe that cultural exchanges must not only be two-way but also sensitive to local needs, practices, and aspirations in selecting the type of American art to promote in a given country or region. The Internet has opened up to the world the rich variety of art and artists the U.S. has to offer and we should seek to meet those expectations and interests including for popular culture and the nonconventional.

It would seem that a priority for arts and cultural exchanges would be with countries with which the United States has limited official relations as well as with countries where there is a low level of travel or interaction at the citizen level.

We think cultural exchanges that focus on restoration and preservation projects are especially productive as would be the exchange

of experts in the areas of performing arts administration, museum policies and techniques, etc. Technical assistance exchanges have a long history of helping other countries to celebrate their heritage and promote tolerance between nations while at the same time giving Americans opportunities to learn about other cultures.

In the past, cultural exchanges organized by the Federal Government have on occasion raised suspicions that artists had compromised their artistic integrity. We believe in the importance of government at all levels—federal, state and local—working with nonprofits and NGOs both at home and in foreign countries to avoid the appearance that cultural exchanges are contrived solely to serve U.S. foreign policy interests rather than the intended purpose of furthering mutual understanding. To that end, we urge that the international exchange process not be centralized in or overly coordinated at the national level but instead structured to draw in artists and arts groups directly at all levels.

RESEARCH

Policymakers need credible evidence to help them determine the merits and value of expanding international exchange programs. We believe that a National Convening on Cultural Diplomacy would provide the appropriate forum for assembling a body of expert testimony and current and directed research that would facilitate a clear and focused examination of potential outcomes.

We believe it would be beneficial to such deliberations if a comprehensive inventory and review were undertaken of current programs by federal, state, and local governments and private groups in the international arts and cultural exchange area.

We recommend that a State Dept Working Group on Cultural Diplomacy be charged with responsibility for coordinating the effort to collect, examine and evaluate relevant reports and data generated by both government and civil society organizations as supplemented and supported by the Congressional Research Service, private foundations, and scholarly research efforts sponsored by the National Endowment for the Arts (NEA), National Endowment for the Humanities (NEH), and Institute of Museum and Library Services (IMLS).

We believe that a particularly productive part of the research process would be the opportunity to document actual experiences and impacts of both past and on-going cultural exchanges, especially the person-to-person encounters that have well established track records for generating significant and measurable goodwill toward the United States.

We believe that verification of such successes would not only help substantiate the case for international art and cultural exchanges as an important part of public diplomacy but would also enable us to identify and evaluate best practices in the field.

It is our hope that private foundations would support the research process and, working in collaboration with the arts community, help to determine a series of metrics for not only evaluating international programs but the adequacy as well of resources and work opportunities for the American artists and institutions who would fuel such efforts.

We recommend that the State Department be encouraged to be an active participant in the ongoing efforts by such international organizations as UNESCO and World Monuments Fund to map the world's cultural infrastructure toward the protection of impor-

tant art objects, artistic forms, sites, and institutions located in disaster and conflict areas. The U.S. Defense Dept and Federal Emergency Management Agency might also be considered as a source of funding and assistance for such undertakings.

TECHNOLOGY & TECHNICAL ASSISTANCE

In recognition of the borderless nature of the Internet we urge that the latest and most advanced electronic social networking technology be utilized in cultural diplomacy programs.

We believe that stronger cultural exchanges would result from government moving beyond the older idea of technology as broadcasting medium to harness the new and most advanced social networking technologies that not only distribute message and art but also encourage civic engagement and social connectivity.

Given the effectiveness of the American public/private model, a National Convening on Cultural Diplomacy would explore opportunities to recommend to Government ways of working in association with private nonprofit and for-profit cultural organizations with popular social networking sites in order to expand the range of possibilities for sharing and exchanging cultural experiences.

We believe that the pairing of technology and culture would be especially efficacious through the dissemination of hardware and software (e.g., cell phones, wi-fi systems, low-cost computers, hand-crank radios, etc.) to more remote areas of the globe where cultural understanding and exchanges are especially needed.

We also recommend cultural exchanges involving scholars and experts in such specialties as performing arts management, conservation and preservation, museology, and curation, especially those with expertise in newer forms of media and technology. For example, we urge the expansion and integration into public diplomacy efforts of the Cultural Preservation Fund which currently sends conservators abroad to provide technical assistance and run education projects,

PUBLIC/PRIVATE PARTNERSHIP

We believe that the Government should encourage and promote two-way international exchanges, acting in a convening role to bring together private organizers and private funders, as the cost should not be fully assumed by American taxpayers.

We urge the State Department to consider ways in which it might utilize its administrative capacity and area expertise to explore possibilities for working with foundations and U.S. corporations to increase grants for international exchanges, as well as to investigate the potential of coordinated activity with the many arts and media industries engaged in the international marketplace of culture.

At the same time, we recognize the importance of members of the arts community keeping informed about policy changes and shifts in the national agenda. We believe that over time and in evolving ways, cultural exchanges could render service in partnership with government (as well as foundations and corporations) that would continue to enhance America's public diplomacy process.

We believe that through the export of a wide diversity of American arts and artists, and the import (and ready admission through the passage of the Arts Require Timely Service Act [H.R. 1785 and S. 1409]) of a broadly representative group of foreign arts and artists, America's best foreign and domestic cultural interests would be served.

LEADERSHIP AT THE FEDERAL LEVEL

We believe that the effectiveness of American public diplomacy would be advanced by the integration of cultural diplomacy into the policy-making process of the White House and the State Department.

We propose that a National Convening on Cultural Diplomacy incorporate into its agenda an examination of the recent call by various nongovernmental study groups concerned with Federal support of the arts generally for the creation of a full time White House post specifically charged with promoting the arts and culture as part of the Domestic Policy Council. Arts and cultural professionals agree that without a strong and healthy cultural sector at home (frequently characterized as cultural vibrancy), the U.S. would not have the rich pool of diverse talents in place and available when selecting art and artists to represent the nation at its best internationally.

We further recommend that a National Convening on Cultural Diplomacy be given the opportunity to propose the creation by the President of a position on the National Security Council (NSC) to oversee public diplomacy, including the coordination of relevant arts and cultural exchange efforts with the Domestic Policy Council, State Department, and the Federal cultural agencies.

We further recommend the National Convening agenda include a proposal for the creation of a Standing Committee to advise the Secretary of State on ways in which the State Department could begin to renew its diplomatic strength and expertise in the area of culture. Committee members would be persons in the arts world involved in both informal and formal international exchanges.

We would also recommend that a Special Envoy for Culture be appointed by the State Department to work on building relationships and partnerships with foreign governments and international bodies such as UNESCO, International Council of Museums, World Heritage Alliance, et al.

EXPANDING FEDERAL PROGRAMS

We believe that it is both timely and desirable to urge the creation of a new direction for public diplomacy through the expansion of Federal cultural programming.

We believe that key to this new direction is an expansion of the budgetary capacity of the State Department to increase the number of cultural affairs officers stationed at embassies and consulates and their capabilities for carrying out cultural programming as the ones most informed about what exchanges would be best coupled with which country.

We recommend that, in addition to increasing its personnel numbers, the State Department further enhance its ability to attract good people by creating parity in career advancement and status between cultural affairs officers and political officers.

We believe that the State Department would benefit as well from the creation of a Cultural Diplomacy Fellowship Program that would increase the flow of personnel through the cultural diplomacy system; rotate outside cultural experts through the Department; and enable State Department employees to go for further training at cultural institutions in the U.S. and abroad for fixed periods of time.

Additional recommendations that have been proposed for consideration by a National Convening on Cultural Policy include:

A publicity campaign coordinated by the State Dept., NEA, NEH, and IMLS to alert more U.S. and foreign artists and cultural institutions about the opportunities available for international cultural exchanges, including Fulbright fellowships.

Ways for the United States Agency for International Development (USAID) to support cultural programs that are consistent with their development goals (i.e., cultural preservation projects and arts and crafts programs).

Ways for the Peace Corps and AmeriCorps to develop cultural projects and recruit artists into both organizations.

Ways for the Commerce Department to promote cultural tourism that would direct Americans to cultural programs abroad and market cultural activities in the U.S. to foreign tourists.

Increase funding for arts and cultural exchanges in departments other than State and the Federal cultural agencies (e.g., Defense Department, Commerce Department, etc.) to encourage the sending of artists and technical assistance to localities deemed to be less developed and comfortable.

CONGRESSIONAL ACTION

We encourage the relevant committees in Congress, in particular the House and Senate Foreign Affairs Committees, to hold a series of public hearings on the proposals coming out of the National Convening on Cultural Diplomacy.

We believe that congressional hearings are key to the development of new and expanded legislation and programs in support of two-way cultural exchanges, for all the reasons and recommendations outlined above.

We offer the Arts and Artifacts Indemnity Act of 1975 for consideration by the Congress in its deliberations as a legislative model of the time proven success of international cooperation and cultural exchange.

We recommend the inclusion in such hearings of a broad representation of knowledgeable parties, especially representatives of state and local arts and humanities councils and agencies and of professional service organizations.

Finally, we again urge the reintroduction and passage by Congress of the Arts Require Timely Service Act [H.R. 1785 and S. 1409] as an essential component of cultural exchange and the enrichment and diversity of the cultural experience of the American public.

ADDITIONAL STATEMENTS

REMEMBERING SOL PRICE

• Mrs. BOXER. Mr. President, I am honored to remember Sol Price, who passed away on December 14, 2009, at the age of 93. Sol was a man of vision in business, charity, and community. I will remember his great accomplishments, but I will also remember him as a wonderful man and a dear friend.

A trendsetter in retail, Sol Price founded FedMart and the Price Club, which subsequently sparked the wholesale warehouse industry. He envisioned providing consumers with products at low prices while providing good wages and working conditions for his employees. When FedMart opened its first store in San Antonio, TX, in 1957, Sol Price paid double the minimum wage. He also succeeded getting a mortgage company to drop its requirement on separate restroom facilities for "Colored" and "Whites."

Sol Price was a leader in philanthropy and education. In 1991, after the

death of his grandson Aaron, he established the Price Fellows program for young people in San Diego County, with a mission to enrich their lives and encourage stewardship for their community. The 3-year program for high school students teaches them about business, cultural institutions, and government; it also encourages lasting relationship across different ethnic, religious, and economic backgrounds. This program has created a new generation of local leaders in government, business, and civic life.

In 2000, Sol and his wife Helen set up the San Diego Revitalization Corporation, which was later renamed Price Charities. The end goal is to improve the lives of the urban poor. Among his many commitments, Sol worked to revitalize City Heights, a neighborhood in the city of San Diego that was a poor, high-crime but diverse community. In partnership with the city of San Diego, he built low-income housing and commercial space for community organizations and attracted businesses that would not otherwise have located in City Heights.

Sol was a member of the board of trustees for the Urban Institute in Washington, DC, the board of directors for the Center on Budget and Policy Priorities, the Consumer Affairs Advisory Committee of the U.S. Securities and Exchange Commission, and the San Diego Financial Review Panel.

Born in the Bronx, NY, Sol Price grew up in San Diego. He graduated from San Diego State University in 1934 and earned a law degree in 1938 from the University of Southern California.

Sol will be dearly missed. There is no doubt that his spirit will live on, carried along by the people he helped, the neighborhoods he transformed, and the entrepreneurial path he blazed.

He is survived by two sons, Robert and Larry, five grandchildren, and four great-grandchildren. My heart goes out to the family during this time of grief. They are in our thoughts and in our prayers.●

REMEMBERING ORVAL ALLEN KELSO

• Mr. CRAPO. Mr. President, today I wish to ask my colleagues to join me in recognizing the accomplishments of Mr. Orval Allen Kelso.

Today, deeply engaged in a war on terror, thousands of American civilians are working and serving in harm's way. Like the brave men and women serving in uniform, these patriotic citizens risk their lives every day in an effort to rebuild a stronger future for the people of Iraq. However, they are not alone. American civilian contractors have been operating in combat theatres since as early as World War II, and I am here today to tell you about one of those.

Hailing from Emmett, ID, Orval Allen Kelso arrived on Wake Island in the North Pacific in June 1941, working as a powerplant operator for Morrison Knudsen. Mr. Kelso worked as a powerplant operator until December 1941, when he was captured and taken as a POW to Camp 18, Sesabo, Japan. While a POW at Camp 18, Orval helped build the Soto Dam that provides water to Sesabo city today. He, among several hundred civilian POWs, built this dam with hardly the right tools to work with, malnutrition, improper clothing, and daily physical and emotional abuse by their captors. Orval later died in Camp 18 on April 8, 1943, just days after his birthday. In 1949, his only child, Walter Richard "Dick" Kelso, reclaimed his father's remains, and brought him back to rest on U.S. soil at the National Memorial Cemetery of the Pacific in Honolulu, HI. I also note that although Mr. Kelson was a civilian during the time I have discussed, after his death, the Department of the Navy awarded him an E4 military status.

It is fitting that we honor Mr. Kelso for his sacrifice and also be reminded of the many others who were taken prisoner or who paid the ultimate sacrifice working in harm's way. We often forget about the nonmilitary Americans who gave their all for the freedoms we cherish in our great Nation. Let us help remedy that today by recognizing Mr. Kelso and the civilian POWs taken during World War II. They are an exemplary example of the selflessness displayed by Americans in an effort to bring peace and freedom to millions, and we thank them for their sacrifice.●

TRIBUTE TO RICHARD R. JENNINGS

• Mr. KERRY. Mr. President, I wish to congratulate Richard R. Jennings of Wilmington, MA, for the honor he received from the Smithsonian Institution at the American History Museum earlier this year. Mr. Jennings was recognized for his long service with the Railway Mail Service. The 85-year-old Mr. Jennings is one of the last survivors of one of the most important innovations in the history of mail service in the United States.

Mr. Jennings was honored as part of a postal service exhibit at the American History Museum last summer. In addition to the recognition he received, the Smithsonian also recorded Mr. Jennings's memories of his years as part of the Boston-to-Albany and the Boston-to-New York "mail by rail" routes—part of a network that was so important to U.S. mail service before the airlines took over much of the service.

The Railway Mail Service began in the mid-19th century but grew in importance as the railroads became dominant in transportation until the mid-

20th century. "Mail by rail" was quite successful—dramatically increasing the speed of delivery of mail, especially over long distances.

Mr. Jennings and his fellow Railway Mail Service clerks were considered the elite of the Postal Service's employees. And for good reason. Their jobs were exhausting and dangerous. They were required to sort 600 pieces of mail an hour in a speeding train that could wreck—and occasionally did. The potential for danger certainly added pressure to an already difficult job.

In addition to changing our postal system, the Railway Mail Service was the source of an expression well known in the United States. Empty mail sacks and sacks filled with damaged, misaddressed or otherwise unsortable mail were referred to as "bums." And before the trains would leave the stations along their routes, rail clerks would often shout "throw the bums out."

Mr. Jennings served this country in important ways, not only as a postman in the "mail by rail" network but also as a sergeant with the U.S. Army Medical Corps in Italy and North Africa during World War II. There, as much as with the "mail by rail" service, Mr. Jennings helped to "throw the bums out."

Mr. Jennings deserves our thanks for his unique and great service to our country. I congratulate him and his family and I share their pride in him and his important role in the history of our country's Postal Service.●

TRIBUTE TO DICK AND CHRISTINE MOODY

● Mr. KERRY. Mr. President, anyone who has served in our Armed Forces or who has had a loved one in uniform understands just how difficult the holiday season can be—separated from husbands, wives, fathers, mothers, daughters, and sons. It can be the loneliest time of the year. Dick and Christine Moody understand that better than most, and since 2003 they have worked tirelessly to make the holidays a little cheerier for the men and women who keep America safe. They have done it with Operation Troop Support, the organization they founded 6 years ago as a way to say thank to those serving in the military.

Since its founding, Operation Troop Support has sent more than 25,000 care packages to men and women in the military abroad. These packages are sent throughout the year, but during the holidays extra care is taken to see that the season is a little brighter for the troops. And it is for that reason that during this holiday season, I would like to recognize and commend Dick and Christine Moody for their efforts—efforts that have earned them national recognition and the accolades of the National Military Family Association,

the Employer Support to the Guard and Reserve, ESGR, and numerous State and local officials.

I also want to recognize the hundreds of volunteers who have contributed their time, energy and money to Operation Troop Support. The support the North Shore community has given the organization has been inspiring. Volunteers have spent countless hours boxing the care packages, and they have donated thousands of dollars to ship the packages to ensure that each soldier, marine, airman and sailor receives something during the holiday season.

I had the opportunity to meet with many of the Operation Troop Support volunteers while attending a St. Patrick's Day luncheon hosted by the organization last year. During the luncheon, I spoke with a soldier, Thomas Lanzoni, who had recently returned from Iraq. Inspired by the volunteers of Operation Troop Support, Sergeant Lanzoni walked across the Commonwealth of Massachusetts to raise money and awareness for the Moodys's organization.

Dick and Christine Moody understand the special burden placed on military families. Dick spent 23 years in the Air Force and retired as a lieutenant colonel. Additionally, the Moodys have a son and a daughter who have served abroad in the Air Force. The military has long been a part of their life. Consequently, Operation Troop Support not only supports the troops in the field but also hosts family support group meetings for the loved ones of servicemembers deployed or about to be deployed overseas.

I salute the Moodys and Operation Troop Support for their service and dedication to our country. Their gestures of gratitude have reached thousands of servicemembers, reminding each of them that we support them and their families while they are deployed and when they return.●

2009 NATIONAL BOARD CERTIFIED RHODE ISLAND TEACHERS

● Mr. REED. Mr. President, I commend the announcement yesterday that 44 Rhode Island teachers and nearly 9,000 teachers nationwide achieved National Board for Professional Teaching Standards certification this year.

The single most effective step we can take to raise student achievement and turn around struggling schools is to ensure that we improve the quality of our teachers. For years I have worked to improve what the Federal Government does to help train and develop teachers. Indeed, I have worked with National Board on nearly every piece of teacher quality legislation I have introduced in the Senate. The National Board has been instrumental in identifying effective teaching practices and infusing those practices throughout our Nations

schools. Their certification process is rigorous and includes multiple components that regularly assess and improve a teacher's ability to improve student learning. Since 1994, 82,000 teachers have been National Board certified, including 383 Rhode Island teachers.

Last week, the National Board announced an expansion of their certification process to include principals and other school leaders, recognizing the research that effective leadership is second only to classroom instruction among factors that influence student outcomes. I was pleased that this important expansion was made possible through Federal funding provided through the fiscal year 2009 Labor, Health, and Education appropriations bill.

I congratulate the Rhode Island teachers and teachers nationwide on their significant accomplishment and dedication to their professional development, and I look forward to continuing to work with the National Board to ensure that our children have the most effective teachers, principals, and school leaders.

I ask that the names of the Rhode Island teachers who achieved National Board certification this year be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

2009 RHODE ISLAND NATIONAL BOARD CERTIFIED TEACHERS

Rhonda Asprinio, Michelle Beaulieu, Karen Bessette, Catherine Boutin, Dawn Brooder, Alison Burke, Jaclyn Cambio, David Clegg, Leila Connolly, Suzanne Costa, Lilly Coustan, Cheryl Degnan, Stephanie Desmarais, Amy Devault, Jonathan Dune, Kerri Gendice, Michael Gendice, Andrea Hainey-Turcotte, Carolyn Higgins, Michaela Holmes, James Hovey, and David Kearsley.

TRIBUTE TO ANDREW SAMWICK

● Mrs. SHAHEEN. Mr. President, today I congratulate Professor Andrew Samwick for being recognized for his dedication to and his excellence in teaching. Professor Samwick is the winner of the 2009 New Hampshire Professor of the Year Award, one of the most prestigious awards for undergraduate teaching. Honorees are recognized for their influence in the lives and careers of their students.

Mr. Samwick has taught at Dartmouth College since 1994 and is a professor of economics and the director of the Nelson A. Rockefeller Center for Public Policy and Social Sciences. He

is a well-known expert on the economics of retirement and social security reform, and has testified several times before Congress and has served as chief economist on the staff of the President's Council of Economic Advisors. He is also a research associate at the National Bureau of Economic Research where he cochairs the Social Security Working Group.

Professor Samwick graduated *summa cum laude* from Harvard College and received a Ph.D. in economics from the Massachusetts Institute of Technology. He has won numerous prizes, grants, and fellowships for his work. His articles frequently appear in prestigious economics and finance journals and he often provides commentary and opinion for national public radio and national newspapers.

The U.S. Professors of the Year program acknowledges the most exceptional undergraduate instructors in the country—those who stand out in their teaching and positive influence on the lives and careers of their students. It is important that we recognize the critical work and contribution that our talented professors make in educating the next generation of young people. I am extremely proud that Professor Samwick has been honored by this prestigious distinction.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Neiman, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 10:03 a.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

S. 1472. An act to establish a section within the Criminal Division of the Department of Justice to enforce human rights laws, to make technical and conforming amendments to criminal and immigration laws pertaining to human rights violations, and for other purposes.

The enrolled bill was subsequently signed by the President *pro tempore* (Mr. BYRD).

At 10:38 a.m., a message from the House of Representatives, delivered by

Mrs. Cole, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1147. An act to implement the recommendations of the Federal Communications Commission report to the Congress regarding low-power FM service.

H.R. 3714. An act to amend the Foreign Assistance Act of 1961 to include in the Annual Country Reports on Human Rights Practices information about freedom of the press in foreign countries, and for other purposes.

H.R. 4194. An act to amend title 18, United States Code, to exempt qualifying law school students participating in legal clinics or externships from the application of the conflict of interest rules under section 205 of such title.

MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 3714. An act to amend the Foreign Assistance Act of 1961 to include in the Annual Country Reports on Human Rights Practices information about freedom of the press in foreign countries, and for other purposes; to the Committee on Foreign Relations.

H.R. 4194. An act to amend title 18, United States Code, to exempt qualifying law school students participating in legal clinics or externships from the application of the conflict of interest rules under section 205 of such title; to the Committee on the Judiciary.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, December 17, 2009, she had presented to the President of the United States the following enrolled bill:

S. 1472. An act to establish a section within the Criminal Division of the Department of Justice to enforce human rights laws, to make technical and conforming amendments to criminal and immigration laws pertaining to human rights violations, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LEAHY, from the Committee on the Judiciary:

Report to accompany S. 1490, a bill to prevent and mitigate identity theft, to ensure privacy, to provide notice of security breaches, and to enhance criminal penalties, law enforcement assistance, and other protections against security breaches, fraudulent access, and misuse of personally identifiable information (Rept. No. 111—110).

By Mr. LIEBERMAN, from the Committee on Homeland Security and Governmental Affairs, with an amendment in the nature of a substitute:

H.R. 730. A bill to strengthen efforts in the Department of Homeland Security to develop nuclear forensics capabilities to permit attribution of the source of nuclear material, and for other purposes.

By Mr. LIEBERMAN, from the Committee on Homeland Security and Governmental Affairs, without amendment:

H.R. 1817. A bill to designate the facility of the United States Postal Service located at 116 North West Street in Somerville, Tennessee, as the "John S. Wilder Post Office Building".

By Mr. LIEBERMAN, from the Committee on Homeland Security and Governmental Affairs, with amendments:

H.R. 2711. A bill to amend title 5, United States Code, to provide for the transportation of the dependents, remains, and effects of certain Federal employees who die while performing official duties or as a result of the performance of official duties.

By Mr. LIEBERMAN, from the Committee on Homeland Security and Governmental Affairs, without amendment:

H.R. 2877. A bill to designate the facility of the United States Postal Service located at 76 Brookside Avenue in Chester, New York, as the "1st Lieutenant Louis Allen Post Office".

H.R. 3072. A bill to designate the facility of the United States Postal Service located at 9810 Halls Ferry Road in St. Louis, Missouri, as the "Coach Jodie Bailey Post Office Building".

H.R. 3319. A bill to designate the facility of the United States Postal Service located at 440 South Gulling Street in Portola, California, as the "Army Specialist Jeremiah Paul McCleery Post Office Building".

H.R. 3539. A bill to designate the facility of the United States Postal Service located at 427 Harrison Avenue in Harrison, New Jersey, as the "Patricia D. McGinty-Juhl Post Office Building".

H.R. 3667. A bill to designate the facility of the United States Postal Service located at 16555 Springs Street in White Springs, Florida, as the "Clyde L. Hillhouse Post Office Building".

H.R. 3767. A bill to designate the facility of the United States Postal Service located at 170 North Main Street in Smithfield, Utah, as the "W. Hazen Hillyard Post Office Building".

H.R. 3788. A bill to designate the facility of the United States Postal Service located at 3900 Darrow Road in Stow, Ohio, as the "Corporal Joseph A. Tomci Post Office Building".

By Mr. LEAHY, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 678. A bill to reauthorize and improve the Juvenile Justice and Delinquency Prevention Act of 1974, and for other purposes.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of nominations were submitted:

By Mr. DODD for the Committee on Banking, Housing, and Urban Affairs.

*Eric L. Hirschhorn, of Maryland, to be Under Secretary of Commerce for Export Administration.

*Ben S. Bernanke, of New Jersey, to be Chairman of the Board of Governors of the Federal Reserve System for a term of four years.

*Marisa Lago, of New York, to be an Assistant Secretary of the Treasury.

*Steven L. Jacques, of Kansas, to be an Assistant Secretary of Housing and Urban Development.

By Mr. ROCKEFELLER for the Committee on Commerce, Science, and Transportation.

*Julie Simone Brill, of Vermont, to be a Federal Trade Commissioner for the term of seven years from September 26, 2009.

*Edith Ramirez, of California, to be a Federal Trade Commissioner for the term of seven years from September 26, 2008.

*Nicole Yvette Lamb-Hale, of Michigan, to be an Assistant Secretary of Commerce.

*Michael A. Khouri, of Kentucky, to be a Federal Maritime Commissioner for a term expiring June 30, 2011.

*David L. Strickland, of Georgia, to be Administrator of the National Highway Traffic Safety Administration.

*Coast Guard nomination of Rear Adm. (1h) Steven E. Day, to be Rear Admiral.

Mr. ROCKEFELLER. Mr. President, for the Committee on Commerce, Science, and Transportation I report favorably the following nomination lists which were printed in the RECORDS on the dates indicated, and ask unanimous consent, to save the expense of reprinting on the Executive Calendar that these nominations lie at the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

*Coast Guard nomination of Andrew G. Liske, to be Captain.

*Coast Guard nomination of Robert A. Moomaw, to be Lieutenant.

*National Oceanic and Atmospheric Administration nominations beginning with Keith E. Tucker and ending with Jason P.R. Wilson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on December 9, 2009.

By Mr. LEAHY for the Committee on the Judiciary.

Mark Anthony Martinez, of Nebraska, to be United States Marshal for the District of Nebraska for the term of four years.

Michael W. Cotter, of Montana, to be United States Attorney for the District of Montana for the term of four years.

Barbara L. McQuade, of Michigan, to be United States Attorney for the Eastern District of Michigan for the term of four years.

James L. Santelle, of Wisconsin, to be United States Attorney for the Eastern District of Wisconsin for the term of four years.

Christopher A. Crofts, of Wyoming, to be United States Attorney for the District of Wyoming for the term of four years.

*Nomination was reported with recommendation that it be confirmed subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

(Nominations without an asterisk were reported with the recommendation that they be confirmed.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. WYDEN:

S. 2895. A bill to restore forest landscapes, protect old growth forests, and manage national forests in the eastside forests of the State of Oregon, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. FRANKEN (for himself, Mr. HATCH, Mr. BENNET, Mr. BROWN, and Mr. CARPER):

S. 2896. A bill to recruit, support, and prepare principals to improve student academic

achievement at high-need schools; to the Committee on Health, Education, Labor, and Pensions.

By Mr. BENNET:

S. 2897. A bill to establish incentives to increase the energy efficiency of federally assisted housing; to the Committee on Banking, Housing, and Urban Affairs.

By Ms. LANDRIEU (for herself and Mr. ALEXANDER):

S. 2898. A bill to provide for child safety, care, and education continuity in the event of a presidentially declared disaster; to the Committee on Health, Education, Labor, and Pensions.

By Mrs. FEINSTEIN (for herself and Mr. MERKLEY):

S. 2899. A bill to amend the American Recovery and Reinvestment Act of 2009 and the Internal Revenue Code of 1986 to provide incentives for the development of solar energy; to the Committee on Finance.

By Mrs. GILLIBRAND:

S. 2900. A bill to establish a research, development, and technology demonstration program to improve the efficiency of gas turbines used in combined cycle and simple cycle power generation systems; to the Committee on Energy and Natural Resources.

By Ms. COLLINS (for herself, Mrs. MCCASKILL, and Mr. BENNETT):

S. 2901. A bill to improve the acquisition workforce through the establishment of an acquisition management fellows program, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

By Ms. COLLINS (for herself, Mrs. MCCASKILL, and Mr. BENNETT):

S. 2902. A bill to improve the Federal Acquisition Institute; to the Committee on Homeland Security and Governmental Affairs.

By Mr. BURR (for himself and Mr. ENZI):

S. 2903. A bill to amend the Child Care and Development Block Grant Act of 1990 to require criminal background check for child care providers; to the Committee on Health, Education, Labor, and Pensions.

By Mr. FRANKEN (for himself, Ms. SNOWE, Mr. KERRY, Mr. LAUTENBERG, Mr. FEINGOLD, Mr. MENENDEZ, Mr. DURBIN, Mrs. GILLIBRAND, Mrs. FEINSTEIN, Mrs. BOXER, Mrs. MCCASKILL, Mr. HARKIN, and Mr. SCHUMER):

S. 2904. A bill to amend title 10, United States Code, to require emergency contraception to be available at all military health care treatment facilities; to the Committee on Armed Services.

By Mr. INOUE:

S. 2905. A bill to amend the Internal Revenue Code of 1986 to repeal the reduction in the deductible portion of expenses for business meals and entertainment; to the Committee on Finance.

By Mr. FEINGOLD (for himself, Mr. MCCAIN, and Mr. LIEBERMAN):

S.J. Res. 23. A joint resolution disapproving the rule submitted by the Federal Election Commission with respect to travel on private aircraft by Federal candidates; to the Committee on Rules and Administration.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mrs. HAGAN (for herself and Mr. BURR):

S. Res. 377. A resolution congratulating the University of North Carolina Tar Heels for winning the 2009 National Collegiate Athletic Association Field Hockey National Championship; to the Committee on the Judiciary.

By Mrs. HAGAN (for herself and Mr. BURR):

S. Res. 378. A resolution congratulating the University of North Carolina Tar Heels for winning the 2009 National Collegiate Athletic Association Women's Soccer National Championship; to the Committee on the Judiciary.

By Mrs. GILLIBRAND:

S. Res. 379. A resolution to express the sense of the Senate regarding the protection of intellectual property rights for clean energy and environmental technology; to the Committee on Foreign Relations.

ADDITIONAL COSPONSORS

S. 604

At the request of Mr. SANDERS, the name of the Senator from Louisiana (Ms. LANDRIEU) was added as a cosponsor of S. 604, a bill to amend title 31, United States Code, to reform the manner in which the Board of Governors of the Federal Reserve System is audited by the Comptroller General of the United States and the manner in which such audits are reported, and for other purposes.

S. 619

At the request of Mrs. FEINSTEIN, the name of the Senator from Rhode Island (Mr. WHITEHOUSE) was added as a cosponsor of S. 619, a bill to amend the Federal Food, Drug, and Cosmetic Act to preserve the effectiveness of medically important antibiotics used in the treatment of human and animal diseases.

S. 841

At the request of Mr. KERRY, the name of the Senator from Louisiana (Ms. LANDRIEU) was added as a cosponsor of S. 841, a bill to direct the Secretary of Transportation to study and establish a motor vehicle safety standard that provides for a means of alerting blind and other pedestrians of motor vehicle operation.

S. 1067

At the request of Mr. FEINGOLD, the name of the Senator from Hawaii (Mr. INOUE) was added as a cosponsor of S. 1067, a bill to support stabilization and lasting peace in northern Uganda and areas affected by the Lord's Resistance Army through development of a regional strategy to support multilateral efforts to successfully protect civilians and eliminate the threat posed by the Lord's Resistance Army and to authorize funds for humanitarian relief and reconstruction, reconciliation, and transitional justice, and for other purposes.

S. 1183

At the request of Mr. DURBIN, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 1183, a bill to authorize the Secretary of Agriculture to provide assistance to the Government of Haiti to end

within 5 years the deforestation in Haiti and restore within 30 years the extent of tropical forest cover in existence in Haiti in 1990, and for other purposes.

S. 1197

At the request of Mr. VOINOVICH, the name of the Senator from Vermont (Mr. SANDERS) was added as a cosponsor of S. 1197, a bill to establish a grant program for automated external defibrillators in elementary and secondary schools.

S. 1255

At the request of Mr. SCHUMER, the name of the Senator from New York (Mrs. GILLIBRAND) was added as a cosponsor of S. 1255, a bill to amend the Magnuson—Stevens Fishery Conservation and Management Act to extend the authorized time period for rebuilding of certain overfished fisheries, and for other purposes.

S. 1345

At the request of Mr. REED, the name of the Senator from Illinois (Mr. DURBIN) was added as a cosponsor of S. 1345, a bill to aid and support pediatric involvement in reading and education.

S. 1492

At the request of Ms. MIKULSKI, the name of the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 1492, a bill to amend the Public Health Service Act to fund breakthroughs in Alzheimer's disease research while providing more help to caregivers and increasing public education about prevention.

S. 1589

At the request of Ms. CANTWELL, the name of the Senator from Nebraska (Mr. JOHANNES) was added as a cosponsor of S. 1589, a bill to amend the Internal Revenue Code of 1986 to modify the incentives for the production of biodiesel.

S. 1739

At the request of Mr. DODD, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 1739, a bill to promote freedom of the press around the world.

S. 1938

At the request of Mr. NELSON of Florida, his name was added as a cosponsor of S. 1938, a bill to establish a program to reduce injuries and deaths caused by cellphone use and texting while driving.

S. 2831

At the request of Mr. REED, the name of the Senator from Ohio (Mr. BROWN) was added as a cosponsor of S. 2831, a bill to provide for additional emergency unemployment compensation and to keep Americans working, and for other purposes.

S. 2833

At the request of Mr. REED, the name of the Senator from Michigan (Ms. STABENOW) was added as a cosponsor of S. 2833, a bill to provide adjusted Fed-

eral medical assistance percentage rates during a transitional assistance period.

S. 2853

At the request of Mr. GREGG, the name of the Senator from Maine (Ms. COLLINS) was added as a cosponsor of S. 2853, a bill to establish a Bipartisan Task Force for Responsible Fiscal Action, to assure the long-term fiscal stability and economic security of the Federal Government of the United States, and to expand future prosperity growth for all Americans.

S. 2854

At the request of Mr. KOHL, the names of the Senator from Michigan (Ms. STABENOW) and the Senator from Missouri (Mrs. McCASKILL) were added as cosponsors of S. 2854, a bill to amend the Internal Revenue Code of 1986 to extend and modify the credit for new qualified hybrid motor vehicles, and for other purposes.

S. 2874

At the request of Ms. LANDRIEU, the name of the Senator from Louisiana (Mr. VITTER) was added as a cosponsor of S. 2874, a bill to designate the facility of the United States Postal Service located at 2000 Louisiana Avenue in New Orleans, Louisiana, as the "Ray Rondono, Sr. Post Office Building".

S. 2886

At the request of Ms. CANTWELL, the names of the Senator from Vermont (Mr. SANDERS) and the Senator from California (Mrs. BOXER) were added as cosponsors of S. 2886, a bill to prohibit certain affiliations (between commercial banking and investment banking companies), and for other purposes.

S. RES. 316

At the request of Mr. MENENDEZ, the name of the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. Res. 316, a resolution calling upon the President to ensure that the foreign policy of the United States reflects appropriate understanding and sensitivity concerning issues related to human rights, ethnic cleansing, and genocide documented in the United States record relating to the Armenian Genocide, and for other purposes.

AMENDMENT NO. 2790

At the request of Mr. CASEY, the name of the Senator from Illinois (Mr. BURRIS) was added as a cosponsor of amendment No. 2790 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2845

At the request of Mr. SANDERS, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of amendment No. 2845 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in

the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2846

At the request of Mr. SANDERS, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of amendment No. 2846 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2847

At the request of Mr. SANDERS, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of amendment No. 2847 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2848

At the request of Mr. SANDERS, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of amendment No. 2848 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2849

At the request of Mr. SANDERS, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of amendment No. 2849 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2871

At the request of Mr. BROWN, the name of the Senator from Illinois (Mr. DURBIN) was added as a cosponsor of amendment No. 2871 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2883

At the request of Ms. STABENOW, the name of the Senator from North Carolina (Mrs. HAGAN) was added as a cosponsor of amendment No. 2883 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2909

At the request of Mr. NELSON of Florida, the names of the Senator from Oregon (Mr. WYDEN) and the Senator

from New Jersey (Mr. LAUTENBERG) were added as cosponsors of amendment No. 2909 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2978

At the request of Mr. BEGICH, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of amendment No. 2978 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2995

At the request of Mr. SCHUMER, the name of the Senator from Ohio (Mr. BROWN) was added as a cosponsor of amendment No. 2995 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3037

At the request of Mr. JOHNSON, the name of the Senator from Pennsylvania (Mr. CASEY) was added as a cosponsor of amendment No. 3037 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3076

At the request of Mr. DURBIN, the name of the Senator from New York (Mrs. GILLIBRAND) was added as a cosponsor of amendment No. 3076 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3088

At the request of Ms. COLLINS, the name of the Senator from Michigan (Ms. STABENOW) was added as a cosponsor of amendment No. 3088 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3112

At the request of Ms. CANTWELL, the name of the Senator from Virginia (Mr. WARNER) was added as a cosponsor of amendment No. 3112 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to mod-

ify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3114

AMENDMENT NO. 3240

At the request of Mr. ROCKEFELLER, the name of the Senator from Virginia (Mr. WARNER) was added as a cosponsor of amendment No. 3240 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WYDEN:

S. 2895. A bill to restore forest landscapes, protect old growth forests, and manage national forests in the eastside forests of the State of Oregon, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. WYDEN. Mr. President, I rise today to introduce critical forest legislation for my home State of Oregon.

For too many decades, Oregon has been at war with itself over the fate of one of our most abundant—and most threatened—resources, our forests.

Nowhere has the negative impact of this battle been greater than in Oregon's eastside forests.

Over-logging and disastrous fire suppression policies of the past gave way over time to excessive litigation and gridlock.

With each passing month, our inability to take action, our inability to address the needs of Oregon's declining forests means that they are growing more at risk of preventable fire and disease.

With each passing month and each attempted timber sale and threatened lawsuit, the relationship between the

environmental community and the timber industry has grown increasingly bitter.

Each side in these disputes has thoroughly armed itself politically enough to survive, but never enough to succeed.

The end result is that today, across Oregon's Federal forest landscape, we have around 9.5 million acres of choked, at-risk forest in desperate need of management, and millions of acres of old growth, species habitat, and watersheds face an uncertain future.

Unless something fundamental changes, that number and that peril will grow, not shrink, in coming years.

Today, good and decent people on both sides of these difficult issues have come together with me to craft legislation that will bring peace, jobs, and a healthier tomorrow to 8.3 million acres of Federal forest in eastern and central Oregon.

Today, for the first time in memory, timber executives are standing shoulder-to-shoulder with leaders of the Oregon environmental community to take shared responsibility for saving our endangered forests.

These folks have been a part of negotiations with my office for over 8 months, and have made difficult concessions in order to save our threatened Eastside forests.

Today in eastern Oregon we are down to only a small handful of surviving mills. Without far greater certainty of supply and an immediate increase in merchantable timber, more mills will close.

If that happens our Eastside forests will pay the price.

Without mills to process saw logs and other merchantable material from forest restoration projects, there will be no restoration of our Eastside forests.

The folks my office worked with to come to an agreement set aside their differences and found common ground that will prevent that from happening.

The legislation that we are rolling out today, the Oregon Eastside Forests Restoration, Old Growth Protection and Jobs Act of 2009, will provide an immediate supply of logs in the short term to jump-start restoration efforts and keep our timber mills alive.

Job One must be saving our remaining forest management infrastructure in central and eastern Oregon while preserving our old growth and watersheds.

Over the long term—in 3 years from its passage to be precise—this legislation will also provide the long-term certainty required to restore each of the six Eastside national forests, protect our most sensitive environmental assets, and restore countless jobs to rural communities.

I want to make clear that the road ahead is likely to see some challenges. Our coalition will be tested. But I have great faith that the decent people who

helped to put this bill together will honor the components of this agreement and will fight to preserve its many elements as we move through the process.

I also want to point out that none of our efforts will succeed unless Oregon Federal forests are also adequately funded to properly manage and restore these valuable Federal assets.

Together, we have entered a partnership that goes beyond the four corners of this legislation. Together, as a team, we will fight for the funding to put our people back to work and restore the health of our forests.

Together, we have demonstrated something that I think my colleagues here in the Senate will appreciate: working together on a difficult issue is not only possible, it yields far greater results than working apart.

Later today, and tomorrow, I will be sitting down with key members of the Obama administration and the timber industry so that the administration can better understand the peril and opportunity in Oregon's Eastside forests. This is a united front that has not been witnessed by a White House since the onset of the timber wars.

It is my hope we will learn to work together, we will develop real trust, and that we will use these new experiences to tackle the difficult issues that await us on the west side of the Cascades.

I also want to single out a few individuals who have endured thousands, of hours of difficult work and negotiations to reach this point: John Shelk, president of Ochoco Lumber; Andy Kerr; the American Forest Resource Council, represented by Heath Heikkila and Tom Partin, who spearheaded negotiations.

I also want to recognize others that joined me earlier today to rollout this legislation Tim Lillebo with Oregon Wild; Tom Insko with Boise Cascade; Mary Scurlock, with Pacific Rivers Council; Randi Spivak, with the National Center for Conservation Science and Policy; Ben Bendick with the Nature Conservancy; and Bob Irvin with Defenders of Wildlife.

I also want to recognize back in the State, their colleagues that could not join me earlier today; Rick Brown with Defenders of Wildlife, Joseph Vaile of Klamath Siskiyou Wildlands Center, Steve Pedry with Oregon Wild, and Michael Powelson with the Nature Conservancy, as well as the other members and mill owners of AFRC.

I want to thank my staff, Michele Miranda, Mary Gautreaux, and Josh Kardon, who gave their nights and weekends to get us to this point.

I am proud to introduce this legislation today, and I am going to keep working with all the folks in my State who are willing to talk in good faith about restoring our eastside forests.

By Mrs. FEINSTEIN (for herself and Mr. MERKLEY):

S. 2899. A bill to amend the American Recovery and Reinvestment Act of 2009 and the Internal Revenue Code of 1986 to provide incentives for the development of solar energy; to the Committee on Finance.

Mrs. FEINSTEIN. Mr. President, I rise to introduce the Renewable Energy Incentive Act of 2009, which is cosponsored by Senator JEFF MERKLEY.

This act would extend, expand, and improve existing tax incentives and grant programs for renewable energy, especially for solar energy.

Provisions of this act are widely supported by public power utilities, environmental groups, renewable energy companies, renewable energy industry associations, and labor unions.

These include, for example: the American Public Power Association; the Solar Energy Industries Association; the Los Angeles Department of Water and Power; the Northern California Power Agency; the Southern California Public Power Agency; the Large Public Power Council, LPPC; solar companies including Brightsource, Solyndra, Tesseract Solar, and Stirling Energy Systems and many others.

First, the bill would allow renewable energy companies to claim grants from the Treasury department, in lieu of renewable energy tax credits, through 2012 instead of 2010.

Second, it would permit public power utilities to claim these same Treasury Grants.

Third, it expands the solar investment tax credit to include manufacturing equipment and solar water heaters for commercial and community pools.

Finally, it establishes a new tax credit for solar companies who consolidate and develop disturbed private land instead of developing our more pristine public lands.

The most significant provision in this bill would extend the Treasury Grants Program established in the stimulus by two years, allowing renewable energy developers to continue claiming these grants.

Section 1603 of the American Recovery and Reinvestment Act established "payments in lieu of tax credits for specified energy property" in order to support renewable energy development.

The program allows renewable energy developers to take grants, or payments, from the Treasury department instead of claiming tax credits in order to help build projects that require a great deal of capital upfront.

The provision has reduced the impact of the financial crisis on renewable energy development.

Before the grants program was established, most renewable energy developers had to partner with profitable banks, or "tax equity partners," in order to take advantage of renewable energy tax incentives.

These big financial institutions would apply tax credits against their large profits, taking a cut for themselves along the way.

But in 2008, when financial sector profits sank, the \$8 billion "tax equity" market largely evaporated.

Renewable energy development ground to a halt because developers could not find tax equity partners.

Major players in the space, such as AIG and Lehman Brothers, disappeared. The banks that still had profits began demanding a much higher cut.

That's when Congress stepped in.

The stimulus created the Treasury Grants, which allow developers to claim their tax benefits directly, instead of partnering with profitable banks.

The U.S. wind industry installed 1,649 megawatts of new capacity in the third quarter of this year alone, a boost from the previous two quarters and in excess of 2008 levels. Experts credit the Treasury grants program.

Solar is also getting back on track. For instance, SunEdison used a Treasury grant in lieu of tax credits to accelerate construction of an 18 megawatt photovoltaic array—one of the largest in the U.S.

The firm's CEO told the press: "That could not have been done without this program."

The Treasury program is also allowing renewable energy developers to attract significantly more debt backing for projects than would otherwise be possible, according to recent statements by the managing director of energy investments at J.P. Morgan Capital.

But the grants program is set to expire in 2010, far before most utility scale solar projects will begin construction or financial analysts predict tax equity markets will recover.

If the grant program is not extended, bank profits will again become the limiting factor on renewable energy development in the U.S., and that makes no sense.

That is why I propose to extend the program two years.

This legislation would also level the playing field between public power and for-profit companies by allowing public power utilities to receive Treasury Grants for renewable energy projects.

Public power utilities serve 45 million American consumers, but they are currently prohibited from receiving grants for their renewable energy development.

The basis for this prohibition is that public power utilities are tax exempt, non-profit corporations owned by local governments, who therefore have not been able to claim tax credits directly on their income tax returns.

But excluding public power from the grants program does not make sense.

Congress created the Treasury grants program specifically to assist firms

that lacked the ability to claim the full benefits of renewable energy tax incentives.

If we are going to allow for-profit companies to claim these direct grants, why would we exclude our non-profit public power utilities?

So leveling the playing field for public power is fair.

This provision is also necessary to protect our local community utility companies who want to deploy renewable energy.

The federal grants make building renewable energy projects cost effective for rate payers.

Because public power utilities lack access to these grants, they are now frequently establishing complex financial arrangements with private developers in order to build renewable energy projects that qualify for federal help.

This is in direct conflict with public power's historic, proven business model as a vertically integrated, non-profit.

It requires our cities and towns to negotiate unnecessarily complex deals with Wall Street.

Let me give you an example.

Turlock Irrigation District, TID, a public power utility in my state, decided to build a 137 megawatt wind farm in 2007.

They wanted to build and own.

But to make it cost effective, Turlock signed a contract to buy the power, but a tax equity partner would "own" the project and receive the benefit of the federal production tax credit.

The contract was extremely complex and costly, requiring the participation of an investment bank to find a tax equity partner, an equity group to be the tax equity partner, legal counsel for the equity group, experts to provide risk advice and engineering advice to the equity group; bond counsel to provide renewable asset specialists; an operator to run the plant for the equity group; and an asset manager, to advise the equity group on the performance of the operator.

After 2 years and millions of dollars spent trying to finalize this deal, Turlock learned that the supposedly profitable equity partner, American International Group, AIG, wasn't profitable at all.

AIG backed out and the entire deal collapsed.

After much analysis, Turlock Irrigation District decided to own and operate the wind farm, giving up on receiving any Federal support.

Larry Weis, the General Manager, explained in a letter to me:

The bottom line is that TID made a business decision to forego working with a private developer to develop a project, because the complexity of the deal and the dollars spent to arrange it meant that much of the value of the tax credit would go to the equity partners and not pass through to our consumers. Given the facts and the absence

of a comparable incentive for consumer-owned utilities, TID made the best choice it could under the circumstances, even though it means our customers will pay more.

This legislation is necessary to prevent other public power utilities from being forced to make this difficult, unnecessary choice.

Public power utilities deserve access to renewable energy incentives comparable to those awarded to the private sector, and this legislation will assure that happens.

This legislation also expands the solar investment tax credit to include manufacturing equipment and solar water heaters for commercial and community pools.

The bill would allow equipment that makes solar panels to qualify for the 30 percent solar investment tax credit.

Solar panel manufacturing is moving offshore, to Germany and Asia, where support is considerable.

This financial incentive could jumpstart solar manufacturing in this country, and could lead to thousands of new jobs, such as those being created at Solyndra's new factory in Fremont, CA. Or those proposed by Applied Materials at their proposed facility near Los Angeles.

The bill would allow commercial pool solar hot water heaters to qualify for the solar tax credit.

Approximately 189,000 commercial pools nationwide—at hotels/motels, health clubs, and schools—use fossil fuel or electricity to heat an estimated 27 billion gallons of water.

If the heating systems were replaced with solar hot water systems, there would be 1.23 million metric tonnes of carbon dioxide emissions avoided annually.

That is the equivalent of taking 237,000 cars off the road.

In California, which has 26 percent of all commercial pools in the U.S., this provision could significantly reduce pollution.

Finally, the legislation would establish a new tax credit for the purchase, consolidation, and use of multiple, 100 acre or less blocks of high solarity, disturbed private lands for solar development.

Solar developers have focused development proposals on pristine public land because it is very difficult, costly, and time intensive to consolidate large blocks of disturbed private land from many different owners.

This tax credit will financially reward those firms that are willing to go through the trouble of land consolidation, thereby making the increased burden of private lands development more appealing.

Over the last few years, the renewable energy industry has grown dramatically.

Last year the U.S. added more new capacity to produce renewable electricity than it did to produce electricity from natural gas.

A great deal of this growth can be attributed to our renewable energy tax policies.

This legislation, I believe, would continue this growth into the future.

By Ms. COLLINS (for herself, Mrs. MCCASKILL, and Mr. BENNETT):

S. 2901. A bill to improve the acquisition workforce through the establishment of an acquisition workforce fellows program, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

Ms. COLLINS. Mr. President, along with Senators MCCASKILL and BENNETT, I rise to introduce two bills that would lay a strong foundation to improve the Federal acquisition system.

The first bill, the Acquisition Workforce Improvement Act of 2009, would create a federal acquisition management fellows program to develop a new generation of acquisition leaders with government-wide perspective, skills, and experience.

The second bill, the Federal Acquisition Institute Improvement Act of 2009, would institute much-needed organizational clarity to enable the Federal Acquisition Institute, FAI, to fulfill its mission of facilitating career development and strategic human capital management for the federal acquisition workforce.

The federal acquisition system is under tremendous stress. Between fiscal years 2000 and 2008, acquisition spending by the Federal Government expanded by 163 percent, from \$205 billion to \$539 billion. The rising costs of military operations, natural disasters, homeland security precautions, and other vital programs will drive those expenditures to even higher levels in the years ahead.

This prodigious level of purchasing creates abundant opportunities for fraud, waste, and abuse. We have seen far too many outrageous failures in government contracting, such as unusable trailers for hurricane victims, shoddy construction of schools and clinics in Afghanistan, or the installation of showers in Iraq for our troops that pose electric-shock hazards. These and other failures demand strong steps to protect taxpayer dollars and deliver better acquisition outcomes.

As a long-time advocate for stronger competition, accountability, and transparency in government contracting, I recognize and appreciate the steps the administration has taken recently to improve Federal contracting. Many of these initiatives originated from legislation I co-authored with Senator LIEBERMAN during the last Congress.

But no matter how many laws we pass or OMB guidance documents are issued, the effectiveness of our Federal acquisition system depends on a vital human component—the acquisition workforce.

While contract spending has risen dramatically, the number of acquisition professionals who help plan, award, and oversee these contracts has been stagnant. With roughly half of the current acquisition workforce eligible to retire over the next decade, the difficulties of strengthening that workforce will become increasingly acute. A well-trained and well-resourced acquisition workforce is critical to keeping pace with increased Federal spending and much more complex procurements of services and goods.

The two pieces of legislation I am introducing today would help to address these important long-term problems that we must solve to make our acquisition system healthy again.

First, the Acquisition Workforce Improvement Act of 2009 would create a centrally-managed Government-wide Acquisition Management Fellows Program that combines both a Master's degree-level academic curriculum and on-the-job training in multiple federal agencies. By partnering with leading universities that have specialized government acquisition programs, the government can attract top-caliber students who are interested in pursuing both academic advancement and public service.

Compared to the several existing agency-specific intern programs, this government-wide program would provide a unique and much-needed skill set that we currently do not have in sufficient number, that is, acquisition professionals with multi-agency and multi-disciplinary training who can understand and manage government-wide acquisition needs and perspectives.

Considering that interagency acquisition now accounts for approximately 40 percent of the entire contract spending and that GAO has designated the management of interagency contracting a high-risk area since 2005, it is without question that we need to develop future acquisition leaders who can understand government-wide needs and perspectives.

Specifically, the program would include the following: one academic year of full-time, on-campus training followed by 2 years of on-the-job and part-time training toward a Masters or equivalent graduate degree in related fields; and a curriculum that would include rotational assignments at three or more executive agencies covering, among other issues, acquisition planning, cost-estimating, formation and post-award administration of “high risk” contract types, and interagency contracts.

Upon graduation, participants will have completed all required non-agency-specific training courses necessary for a basic contracting officer warrant.

In addition, participants would be required to enter into a service commitment appropriate in length to ensure

the Federal Government receives a proper return on its investment. The service commitment would be no less than one year for each year in the program, and would require reimbursement of funds for those who do not successfully complete the program or do not fulfill the minimum service requirements.

It is also important to note that this program would be less expensive than its current alternative. Typically, existing agency career intern programs like those run by DHS or GSA hire interns at GS-5, -7, or -9 level, which pays between \$33,000 and \$66,000, for Washington, DC area. These interns also receive benefits and free training during this internship period.

The proposed program would not pay salaries during the training, but unlike the other programs, would award a graduate degree. Based on market research, this alternative money-saving arrangement would be able to attract top-notch candidates with both public and academic interests.

Second, the Federal Acquisition Institute Improvement Act of 2009 would strengthen the Federal Acquisition Institute, FAI, whose key responsibilities are to promote career development and strategic human capital management for the entire civilian acquisition workforce.

In part due to the lack of organizational clarity and the disproportionate funding compared to its counterpart in the Department of Defense, the FAI has remained largely underutilized.

The proposed legislation would establish a clear line of responsibility and accountability for the Institute by requiring that the Federal Acquisition Institute, through its Board of Directors, directly reports to the Office of Federal Procurement Policy; the director of FAI be appointed by the OFPP Administrator and report directly to the Associate Administrator for Acquisition Workforce at OFPP.

All existing civilian agency training programs fall under the purview of FAI. This would ensure consistent training standards necessary to develop uniform core competencies; and the OFPP Administrator would be required to report annually to Congressional committees of jurisdiction projected budget needs and expense plans of FAI to fulfill its statutory mandate.

With respect to its core government-wide functions, FAI would be required to provide and keep current government-wide training standards and certification requirements including—ensuring effective agency implementation of government-wide training and certification standards; analyzing the curriculum to ascertain if all certification competencies are covered or if adjustments are necessary; developing career path information for certified professionals to encourage retention in

government positions; and coordinating with the Office of Personnel Management for human capital efforts.

The administration has identified acquisition workforce development as a pillar for improving acquisition practices and contract performance. While I fully agree with this goal, we need specific and concrete action to solve this problem. It is also important to remember that it took the better part of two decades for the acquisition workforce to reach its current state and that it will likely take a similar amount of time to rebuild.

My legislation would prompt the sustained effort necessary to rebuild the acquisition workforce. While this will take time and investment, I am confident this is a wise investment that will yield substantial returns. Just think about it, if our better-trained acquisition professionals can prevent one failed procurement, it can save the taxpayer hundreds of millions of dollars. If they can avoid overpaying one percent of our contract spending, it will save the taxpayer more than 5 billion each year. The numbers speak for themselves.

The Acquisition Workforce Improvement Act and the Federal Acquisition Institute Improvement Act are critically needed and both enjoy bipartisan support. I encourage my colleagues to support them.

By Mr. FRANKEN (for himself, Ms. SNOWE, Mr. KERRY, Mr. LAUTENBERG, Mr. FEINGOLD, Mr. MENENDEZ, Mr. DURBIN, Mrs. GILLIBRAND, Mrs. FEINSTEIN, Mrs. BOXER, Mrs. McCASKILL, Mr. HARKIN, and Mr. SCHUMER);

S. 2904. A bill to amend title 10, United States Code, to require emergency contraception to be available at all military health care treatment facilities; to the Committee on Armed Services.

Mr. FRANKEN. Mr. President, the Compassionate Care for Servicewomen Act, which I am introducing today with my friend and colleague, Senator SNOWE, is a straightforward but vital piece of legislation. It would ensure that servicewomen in our military have reliable and timely access to emergency contraception when they need it.

Emergency contraception, or Plan B as it is more commonly known under its brand name, is Food and Drug Administration-approved medication that prevents pregnancy. It is safe and, if taken shortly after pregnancy, highly effective. Since 2006, the FDA has approved it for over-the-counter sale. Currently, women 17 years old and older may purchase emergency contraception over the counter, while those younger require a prescription.

Emergency contraception is widely available at pharmacies throughout the U.S.

The problem this legislation is meant to address is that there's no guarantee that emergency contraception be available to our servicewomen in the military. The military health care system includes what is called a basic core formulary, which lists the medications that must be stocked at all Department of Defense medical facilities, including those overseas. Emergency contraception is not currently on the basic core formulary.

Consequently, emergency contraception is not systematically and reliably available at all medical military facilities. It is allowed to be stocked at such facilities, so it is available in some places. In that regard, the bill that Senator SNOWE and I are introducing today is not a dramatic departure from existing practice.

But there is no guarantee that a servicewoman will have access to it. Immediate accessibility is especially important in the case of emergency contraception because it is only effective if taken within a short window of time. Once a pregnancy is established, it doesn't work.

There is no good reason why servicewomen shouldn't have the same access to emergency contraception that civilians here in the U.S. have.

That is just what this legislation would do. It would guarantee that all military health care treatment facilities stock emergency contraception by placing that medication on the basic core formulary.

All servicewomen should be able to have access to emergency contraception in order to prevent unwanted pregnancy. The fact that more than 2,900 sexual assaults were reported last year in the military only heightens the need to ensure emergency contraception is always available.

This is legislation that has been endorsed by a wide range of organizations both in Minnesota and nationally.

I hope that my colleagues will join me in supporting this commonsense legislation. I thank Senator SNOWE for joining me in introducing this bill, and I thank all my colleagues who have signed on as cosponsors.

Mr. President, I ask unanimous consent that the text of the bill and a list of supporters be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2904

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Compassionate Care for Servicewomen Act".

SEC. 2. REQUIREMENT TO MAKE AVAILABLE EMERGENCY CONTRACEPTION AT ALL MILITARY HEALTH CARE TREATMENT FACILITIES.

Section 1074g(a) of title 10, United States Code, is amended by adding at the end the following new paragraph:

"(9)(A) Emergency contraception in drug form shall be included on the basic core formulary of the uniform formulary, notwithstanding any provision of law or regulation requiring that only drugs ordered or prescribed by a physician (or other authorized provider) may be included in the uniform formulary. Emergency contraception in other than drug form may also be included on the basic core formulary, notwithstanding any such provision.

"(B) Nothing in subparagraph (A) may be construed to require emergency contraception to be covered under the pharmacy benefits program.

"(C) Notwithstanding paragraph (4), prior authorization shall not be required for emergency contraception. Nothing in the preceding sentence may be construed as waiving any provision of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) or any other provision of law administered by the Food and Drug Administration, including rules and orders of such Administration in effect at any time under such Act or other provisions of law.

"(D) In this paragraph, the term 'emergency contraception' means a drug, drug regimen, or device that is—

"(i) approved by the Food and Drug Administration to prevent pregnancy; and

"(ii) used postcoitally."

By Mr. INOUE:

S. 2905. A bill to amend the Internal Revenue Code of 1986 to repeal the reduction in the deductible portion of expenses for business meals and entertainment; to the Committee on Finance.

Mr. INOUE. Mr. President, today I rise to introduce legislation to repeal the current 50 percent tax deduction for business meals and entertainment expenses, and to restore the tax deduction to 80 percent for all taxpayers. In 1986, the Congress reduced the allowable tax deduction for business meals and entertainment from 100 percent to 80 percent. In 1993, the Congress again reduced the deduction to 50 percent. Restoration of this deduction is essential to the livelihood of small and independent businesses as well as the food service, travel, tourism, and entertainment industries throughout the United States. These industries are being eco-

nomically harmed as a result of the 50 percent tax deduction.

At a time when the nation is getting back on a stronger economic footing, the legislation is particularly critical especially for the small businesses and self-employed individuals that depend so heavily on the business meal to conduct business. Small companies often use restaurants as "conference space" to conduct meetings or close deals. Meals are their best, and sometimes only, marketing tool. Certainly, an increase in the meal and entertainment deduction would have a significant impact on a small businesses bottom line. In addition, the effects on the overall economy would be significant.

Accompanying my statement is the National Restaurant Association's, NRA, State-by-State chart reflecting the estimated economic impact of increasing the business meal deductibility from 50 percent to 80 percent. The NRA estimates that an increase to 80 percent would increase business meal sales by \$6 billion and create an \$18 billion increase to the overall economy.

I urge my colleagues to join me in cosponsoring this important legislation.

Mr. President, I ask unanimous consent that the text of the bill and a State-by-State chart be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2905

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REPEAL OF REDUCTION IN BUSINESS MEALS AND ENTERTAINMENT TAX DEDUCTION.

(a) IN GENERAL.—Section 274(n)(1) of the Internal Revenue Code of 1986 (relating to only 50 percent of meal and entertainment expenses allowed as deduction) is amended by striking "50 percent" and inserting "80 percent".

(b) CONFORMING AMENDMENT.—Section 274(n) of the Internal Revenue Code of 1986 is amended by striking paragraph (3).

(c) CLERICAL AMENDMENT.—The heading for section 274(n) of the Internal Revenue Code of 1986 is amended by striking "ONLY 50 PERCENT" and inserting "PORTION".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 2009.

ESTIMATED IMPACT OF INCREASING BUSINESS MEAL DEDUCTIBILITY FROM 50% TO 80%

State	Increase in Business Meal Spending 50% to 80% Deductibility (in millions)	Total Economic Impact in the State (in millions)	Total Employment Impact in the State (number of jobs created)

By Mr. FEINGOLD (for himself, Mr. MCCAIN, and Mr. LIEBERMAN):

S.J. Res. 23. A joint resolution disapproving the rule submitted by the Federal Election Commission with respect to travel on private aircraft by Federal candidates; to the Committee on Rules and Administration.

Mr. FEINGOLD. Mr. President, the very first bill debated on the floor of the Senate after the 2006 elections was S. 1, the Honest Leadership and Open Government Act of 2007, HLOGA. About 9 months later, President Bush signed that bill into law as Public Law Number 110-81. It was the most sweeping ethics reform legislation since Watergate, and it passed both houses of Congress by a wide margin—the final votes were 411-8 in the House and 83-14 in the Senate.

The new law contained, among many other provisions, significant reforms to the lobbying disclosure laws, a tough new prohibition on gifts from lobbyists, improvements to the revolving door rules, and new restrictions on privately funded fact-finding trips. It also contained new rules on personal, official, and campaign travel on non-commercial aircraft, often known as “corporate jets.” Prior to HLOGA, members who flew on corporate jets, often accompanied by corporate lobbyists, were required to reimburse the owner of the aircraft only the amount that they would have paid to fly first class between the origin and destination of the flight. HLOGA provided that Senators and presidential candidates would have to reimburse such travel at the charter rate. House members were prohibited from flying on non-commercial aircraft altogether.

Because Senators travel in different capacities, HLOGA addressed the issue in separate sections. Section 544(c) of the bill amended the Senate Rules XXXV and XXXVIII to address official and personal travel by Senators. The House had already amended its rules at the very beginning of the year. Section 601 dealt with campaign travel for both House and Senate candidates by amending the Federal Election Campaign Act, “FECA”.

Both the House and the Senate have been living under these new rules for over two years. No House member has flown on a corporate jet, as far as we know. Senators, whether they were traveling in personal, official, or campaign capacity, and regardless of who was paying for the trip, have flown on them only if they were prepared to pay the charter rate for these trips. Presidential candidates in the last campaign abided by the new rules as well.

Because HLOGA made amendments to the FECA on this issue, the FEC started a rulemaking shortly after its enactment to implement the new provision. But at the end of 2007, just as the agency was poised to put new regu-

lations in place, the terms of several recess-appointed Commissioners expired. A stalemate ensued that left the agency without a quorum to do business until the summer of 2008. Once a full slate of Commissioners was in place, the agency deadlocked on issuing final regulations. The three new Republican commissioners refused to sign off on the rules that the Commission had been prepared to adopt in December 2007. The deadlock was resolved only a few weeks ago, when a Democratic Commissioner reluctantly agreed to go along with modifications that the Republicans proposed. See Statement of Chairman Steven T. Walther, Campaign Travel Regulations, Nov. 19, 2009. The new rule was published in the Federal Register on December 7, 2009. Federal Election Commission, Notice 2009-27, Campaign Travel, 74 Fed. Reg. 63951, Dec. 7, 2009.

I will put this as simply as I can. The new FEC rule relating to travel on non-commercial aircraft is an outrage. Rather than respecting the intent of Congress in HLOGA to address all travel on corporate jets by members of Congress and presidential candidates, the FEC has carved a loophole in the statute for travel by candidates on behalf of someone other than their own campaigns. No one in the House or the Senate contemplated this exception when the bill was passed. No one discussed it. No one considered it. The FEC just made it up. Now we in Congress have no choice but to take action to correct it if the FEC refuses to do so.

We cannot let a lawless agency undermine our effort to police ourselves, to end a practice that exposed Congress to public criticism and even ridicule. Some Senators and House members may have agreed to kick the corporate jet habit reluctantly, but they have learned to live with it. There is no need for the loophole the FEC has opened. It is contrary to the statutory language and to the legislative history. It must be closed.

So today, I will introduce, along with my colleagues from Arizona, Connecticut, and New York, Senators MCCAIN, LIEBERMAN, and SCHUMER, all of whom played a key role in the enactment of HLOGA, a resolution of disapproval under the Congressional Review Act. This resolution, if passed by the House and signed by the President, will send the FEC back to the drawing board. After a rebuke of this kind, one can only hope that the Commission will craft a regulation that does not so completely ignore the letter and spirit of the provision we passed in HLOGA.

Let me take a minute to explain what the FEC has done and what it must do to correct its error. The new regulation takes the position that the key fact in determining what rate must be paid for a corporate jet flight is not who is flying, but who is paying

for the flight. The explanation and justification, “E&J”, adopted by the commission states:

[W]hen a presidential, vice-presidential, or Senate candidate, or a representative of the candidate, is traveling on behalf of another political committee (such as a political party committee or Senate leadership PAC, rather than on behalf of the candidate's own authorized committee, the reimbursement for that travel is the responsibility of the political committee on whose behalf the travel occurs. If the political committee is other than an authorized committee or House candidate's leadership PAC, then the appropriate reimbursement rate for that political committee is set forth in new 11 CFR 100.93(c)(3), discussed below. In such cases, the presidential, vice-presidential, or Senate candidate or candidate's representative, is treated the same as any other person traveling on behalf of the political committee.

74 Fed. Reg. at 63955. That rate for such a trip, under an FEC regulation promulgated in 2003, is the first class rate unless regularly scheduled commercial air service is not available between the origin and the destination of the flight. The E&J also reiterates that leadership PACs of Senators and Presidential candidates can continue to pay the first class rate, even for the candidates themselves.

In addition, although House leadership PACs are prohibited from taking advantage of this loophole, the E&J makes clear that House candidates can do so if they are traveling on behalf of a political party committee or a Senate or presidential candidate, even though they are otherwise completely prohibited from traveling on a corporate jet. The loophole seems to apply to House members even if they are traveling on behalf of a corporate PAC.

In a recent article in the Capitol Hill newspaper Roll Call, FEC Commissioner Matthew Peterson attempted to explain the FEC's decision. He argues that the loophole is compelled by the statutory language, which is structured to prohibit an expenditure for any flight by a Senate candidate or the candidate's authorized committee unless the charter rate is paid for that flight. This interpretation ignores specific language in section 601 that requires payment of the charter rate by “the candidate, the authorized committee, or other political committee” and the lack of any language in the statute or the legislative history suggesting that Congress meant to leave open a way for Senators to travel on corporate jets without paying the charter rate.

Moreover, it ignores the clear intent of the two provisions of HLOGA concerning travel on private aircraft—to prohibit all corporate jet flights by Senators unless the charter rate is paid. There are literally more than a dozen statements by supporters of the bill that make this intent clear. The FEC chose to ignore the clear purpose of the bill in favor of a strained interpretation of the statutory language

that flies in the face of that purpose. That is unacceptable. The FEC's duty is to implement the statute as Congress intended it. Its job is to give guidance to candidates and others who want to follow the law, not to provide a roadmap for evading it.

For the convenience of my colleagues, my staff has collected statements from the floor debate on HLOGA that show beyond any doubt that the corporate jet provisions were intended to apply to all travel on corporate jets by Senators without regard to who is reimbursing the jet owner. One Senator said the following:

I understand that for many Members, these jets are an issue of convenience. They allow us to get home to our constituents, to our families, and to the events that are often necessary for our jobs. But in November, the American people told us very clearly they are tired of the influence special interest wields over the legislative process. The vast majority of Americans can't afford to buy cheap rides on corporate jets. They don't get to sit with us on 3-hour flights and talk about the heating bills they can't pay, or the health care costs that keep rising, or the taxes they can't afford, or their concerns about college tuition. They can't buy our attention, and they shouldn't have to. And the corporation lobbyists shouldn't be able to either. That is why we need to end this corporate jet perk if we are to pass real, meaningful ethics reform.

Cong. Rec. at S263, Jan. 9, 2007. The speaker of those words, which make plain that the intent of the provision was to completely eliminate subsidized travel on corporate jets, was then-Senator Barack Obama. This strongly suggests that the President of the United States will sign the resolution of disapproval once we pass it.

Notwithstanding my strong feelings about the part of the FEC rule I have just discussed, significant portions of the rule are unexceptional. The intent of this resolution of disapproval under the Congressional Review Act is solely to reverse the FEC's decision to open a loophole in the requirements for corporate jet travel by members of Congress and their staffs. So we do not intend to disable the FEC from putting out a new regulation, only from including a gaping loophole in it.

I note this because the Congressional Review Act only allows Congress to disapprove, and therefore make ineffective, an entire regulation. It states that the agency may not promulgate a rule that is "substantially the same" as the old one without new congressional authorization. I want to be clear that the loophole created by the FEC's recent rule is so significant that a rule that is otherwise identical to the entire campaign travel regulation, but that does not contain the loophole that this resolution is designed to disapprove, should not be considered to be "substantially the same" as the previous rule, even though other portions of that rule may be re-promulgated unchanged.

The Congressional Review Act has only once been successfully used to overturn an agency regulation. Thus, there is little experience to fall back on to determine the consequences for future agency action of a successful disapproval resolution. Morton Rosenberg, a long time analyst at the Congressional Research Service, includes the following useful analysis in his 2008 assessment of the CRA:

A review of the CRA's statutory scheme and structure, the contemporaneous congressional explanation of the legislative intent with respect to the provisions in question, the lessons learned from the experience of the March 2001 disapproval of the OSHA ergonomics rule, and the application of pertinent case law and statutory construction principles suggests that (1) It is doubtful that Congress intended that all disapproved rules would require statutory reauthorization before further agency action could take place. For example, it appears that Congress anticipated further rulemaking, without new authorization, where the statute in question established a deadline for promulgating implementing rules in a particular area. In such instances, the CRA extends the deadline for promulgation for one year from the date of disapproval. (2) A close reading of the statute, together with its contemporaneous congressional explication, arguably provides workable standards for agencies to reform disapproved regulations that are likely to be taken into account by reviewing courts. Those standards would require a reviewing court to assess both the nature of the rule-making authority vested in the agency that promulgated the disapproved rule and the specificity with which the Congress identified the objectionable portions of a rule during the floor debates on disapproval. An important factor in a judicial assessment may be the CRA's recognition of the continued efficacy of statutory deadlines for promulgating specified rules by extending such deadlines for one year after disapproval.

Congressional Research Service, Congressional Review of Agency Rule-making: An Update and Assessment of The Congressional Review Act after a Decade, RL30116, May 8, 2008, at 30. Rosenberg notes that the fact that Congress specifically provided in the CRA for a one year extension of any statutory deadline for a rule that has been overturned by the CRA shows that Congress did not intend to disable an agency from issuing regulations on the same topic. Indeed, a Joint Explanatory Statement by the principal sponsors of the CRA in the House and Senate states the following:

The authors intend the debate on any resolution of disapproval to focus on the law that authorized the rule and make the congressional intent clear regarding the agency's options or lack thereof after enactment of a joint resolution of disapproval. It will be the agency's responsibility in the first instance when promulgating the rule to determine the range of discretion afforded under the original law and whether the law authorizes the agency to issue a substantially different rule. Then, the agency must give effect to the resolution of disapproval.

Joint Explanatory Statement of House and Senate Sponsors, 142 Cong. Rec. E 571, at E 577, daily ed. April 19,

1996; 142 Cong. Rec. S 3683, at S 3686 daily ed. April 18, 1996. It is the intent of this resolution of disapproval to invalidate the loophole that the FEC created in the E&J, but not to disable the FEC from issuing a new rule that properly implements Congress's intent in passing HLOGA.

My displeasure with the actions of the FEC over the past 7 years is well known. The agency has repeatedly failed to properly implement provisions of the Bipartisan Campaign Reform Act, BCRA, leading to its regulations being overturned by the courts numerous times. Indeed, because of the agency's dismal record in the courts, some important BCRA regulations are still not in place 7½ years after BCRA's enactment. But the FEC's recent action on corporate jets may be its worst yet. Congress passed HLOGA with wide bipartisan support and clear intent. Because of the FEC's failure to issue rules promptly, members of Congress have been living under the terms of the statute alone with no misunderstanding of what it means. And yet, over two years after its enactment, the FEC has now created an unnecessary and wholly unjustified loophole in the statute. Congress must act to correct this egregious mistake.

I urge my colleagues to support this resolution of disapproval.

Mr. President, I ask unanimous consent that a collection of quotations concerning corporate jet provisions of HLOGA be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SELECTED STATEMENTS CONCERNING TRAVEL ON CORPORATE JETS FROM 2007 DEBATE ON HLOGA

Sen. Reid, 1/4/2007

Another critical aspect requiring reform is the ability of a Member to travel on a corporate jet and only pay the rate of a first class plane ticket. This bill requires Senators and their employees who use corporate or charter aircraft to pay the fair market value for that travel. While I appreciate that such a change is not popular with some of my colleagues, the time has come to fundamentally change the way we do things in this town. Much of the public views our ability to travel on corporate jets, often accompanied by lobbyists, while only reimbursing the first-class rate, as a huge loophole in the current gift rules. And they are right—it is. I have no doubt that the average American would love to fly around the country on very comfortable corporate-owned aircraft and only be charged the cost of a first-class ticket. It is a pretty good deal we have got going here. We need to face the fact that the time has come to end this Congressional perk. [Cong. Rec. S186]

Sen. Obama, 1/9/2007

The second area in which we need to go further is corporate jets. Myself and Senator Feingold introduced a comprehensive ethics bill that, among other things, would close the loopholes that allow for subsidized travel on corporate jets. Today, I am very pleased to see the majority leader has offered an amendment that would serve the same purpose. I fully support him in his effort.

Let me point out that I fully understand the appeal of corporate jets. Like many of my colleagues, I traveled a good deal recently from Illinois to Washington, from Chicago to downstate, from fundraisers to political events for candidates all across the country. I realize finding a commercial flight that gets you home in time to tuck in the kids at the end of a long day can be extremely difficult. This is simply an unfortunate reality that goes along with our jobs.

Yet we have to realize these corporate jets don't simply provide a welcome convenience for us; they provide undue access for the lobbyists and corporations that offer them. These companies don't just fly us around out of the goodness of their hearts. Most of the time we have lobbyists riding along with us so they can make their company's case for a particular bill or a particular vote.

It would be one thing if Congressmen and Senators paid the full rate for these flights, but we don't. We get a discount—a big discount. Right now a flight on a corporate jet usually costs us the equivalent of a first-class ticket on a commercial airplane. But if we paid the real price, the full charter rate would cost us thousands upon thousands of dollars more.

In a recent USA Today story about use of corporate jets, it was reported that over the course of 3 days in November 2005, BellSouth's jet carried six Senators and their wives to various Republican and Democratic fundraising events in the Southeast. If they had paid the full charter rate, it would have cost the Democratic and Republican campaign committees more than \$40,000. But because of the corporate jet perk, it only cost a little more than \$8,000.

There is going to be a lot of talk in the coming days about how important it is to ban free meals and fancy gifts, and I couldn't agree more, but if we are going to go ahead and call a \$50 lunch unethical, I can't see why we wouldn't do the same for the \$32,000 that BellSouth is offering in the form of airplane discounts. That is why I applaud Senator Reid on his amendment to require Members to pay the full charter rate for the use of corporate jets.

As I said, I understand that for many Members, these jets are an issue of convenience. They allow us to get home to our constituents, to our families, and to the events that are often necessary for our jobs. But in November, the American people told us very clearly they are tired of the influence special interest wields over the legislative process. The vast majority of Americans can't afford to buy cheap rides on corporate jets. They don't get to sit with us on 3-hour flights and talk about the heating bills they can't pay, or the health care costs that keep rising, or the taxes they can't afford, or their concerns about college tuition. They can't buy our attention, and they shouldn't have to. And the corporation lobbyists shouldn't be able to either. That is why we need to end this corporate jet perk if we are to pass real, meaningful ethics reform. [Cong. Rec. S263-4]

Sen. Feingold, 1/9/2007

When I introduced my lobbying reform bill back in July 2005, it included a provision addressing the abuse of Members flying on corporate jets. At that time, I have to say, it seemed like a fantasy that we would actually pass such a provision. I heard complaint after complaint about it, that we shouldn't do it.

Slowly but surely, many people have come around to where the public is: Corporate jet travel is a real abuse. Sure, it is convenient, but it is based on a fiction—that the fair

market value of such a trip is just the cost of a first class ticket. And when that fiction is applied to political travel, it creates a loophole in the ban on corporate contributions that we have had in this country for over a century. Any legislation on corporate jets must include campaign trips as well as official travel because one thing is for certain—the lobbyist for the company that provides the jet is likely to be on the flight, whether it is taking you to see a factory back home or a fundraiser for your campaign.

Our bill does that. It covers all of the possible uses of corporate jets, and amends all of the Senate rules needed to put in place a strong reform, and the Federal election laws as well. From now on, if you want to fly on a corporate jet, you will have to pay the charter rate. And these flights shouldn't be an opportunity for the lobbyist or CEO of the company that owns the jet to have several hours alone with a Senator. Our bill prohibits that as well. This is what the American people have been calling for. There are no loopholes or ambiguities here. Politicians flying on private planes for cheap will be a thing of the past if we can get this provision into the bill. Senator Reid's amendment includes a tough corporate jet provision. I am pleased to support that portion of the amendment. This is a big deal, and I commend the majority leader for taking this step. [Cong. Rec. S267]

Sen. Lieberman, 1/10/2007

I am also very pleased that the majority leader has included in this amendment that I referred to an additional amendment, a strong provision on the use of corporate jets. This is a controversial, difficult matter. It is an issue that Senators McCain, Feingold, Obama, and I wanted to pursue last year when we took this up essentially in its predecessor form, but we were unable to do so once cloture was reached on the bill because the amendment was determined to be non-germane.

Under current law this is the reality. When a Member of Congress or a candidate for Federal office uses a private plane instead of flying on a commercial airline, the ethics rules, as well as the Federal Election Commission rules, require a payment to the owner of the plane equivalent to a first-class commercial ticket. The current rules undervalue flights on noncommercial jets and provide, in effect, a way for corporations and individuals to give benefits to Members beyond the limits provided for in our campaign finance laws. The Reid amendment would eliminate that loophole by requiring that the reimbursement be based on the comparable charter rate for a plane. [Cong. Rec. S320]

Sen. Sanders, 1/16/2007

Members of Congress do not need free lunches from lobbyists. Members of Congress do not need free tickets to ball games. And they do not need huge discounts for flights on corporate jets. Congress does need transparency in earmarks and holds, and we do need a new policy regarding the revolving door by which a Member one year is writing a piece of legislation and the next year finds himself or herself working for the company that benefited from the legislation he or she wrote. In other words, we need to pass the strongest ethics reform bill possible. But in passing this legislation, we need to understand this is not the end of our work but, rather, it is just the beginning, and much more needs to be done. [Cong. Rec. S553]

Sen. Reid, 1/16/2007

Let me say a word about corporate jets. The State of Nevada is very large areawise.

The cities of Las Vegas and Reno are separated by about 450 miles. There is good travel between those two cities. But to get around the rest of the State is not easy. When you travel from Las Vegas to Reno, I again say it is easy. But then let's say you want to go to Elko. By Nevada standards, it is a pretty large city. Going on a commercial airplane, it is very, very, very difficult, and to go to Ely is next to impossible. These two cities, both important in their own right, have required on a number of occasions calling upon people you know who have an airplane to take us up there.

Under the old rules, you could pay first-class travel. An example of that is Senator Ensign and I, last August, had to go to Ely. It was extremely important. We were working on a piece of legislation that has since passed. We wanted to sit down in person and talk to the people in Ely about what we were doing.

For us to get there was very difficult. The time factor was significant. To drive up and back is 2 days, 1 day up, 1 day back. It was complicated by the fact that Senator Ensign had a longstanding engagement in Reno. To go from Ely to Reno—it is hard to get there. If you drive very fast, you can make it in 6 hours. So I called a friend of mine, Mike Ensign, Senator Ensign's father. This good man has done very well in the business world. He is a man with limited education but a great mind. He started out working in somewhat menial jobs in the gaming industry. He worked his way up. He became a dealer, a pit boss, a shift boss, and then Mike Ensign moved into the corporate world and became an executive and then ultimately started buying hotel properties himself and has done very well. He is the principal officer and owner of Mandalay Bay, a huge company. It is the second largest hotel-casino operator in the country. I called him and I said: Mike, with one of your airplanes, can you fly me and your son to Ely?

He is a wonderful man, just the greatest guy. He said: Sure, I will be happy to do that. And he did that. He is an example of the type of people we have called upon for these airplanes.

I tell this story. I have used these airplanes a lot because I live in Nevada and because of other duties I have here. The reason I tell the Mike Ensign story is because Mike Ensign doesn't want anything from me. There isn't a thing in the world I can give this man. He is famous, he is rich, he has a wonderful family. I can't do anything to help Mike Ensign. He did this because he is my friend.

Most every—I should not say most. For every airplane I fly on, of course I don't have the relationship with them that I have with Mike Ensign, but I want everyone who has allowed me to use their airplanes to know I am not in any way denigrating them. They have done this out of the goodness of their heart. I have never had anyone say: I will give you an airplane ride if you give me something, or, I have a piece of legislation pending, will you help me with that? That has never happened. I want all these people to know that I am certainly not in any way disparaging these good people who have allowed me and others to fly on their airplanes.

What I am saying, though, is that in this world in which we live, because of all the corruption that has taken place in the last few years here in America, that you not only have to do away with what is wrong but what appears to be wrong. I am confident I have never been influenced by anyone who

provided me with the courtesy of a private airplane, but I have come to the realization that this practice presents a major perception problem. It is a major perception problem because the American people have the right to insist that we do what seems right as well as what is right. Does it appear it is OK? For us to fly around in these airplanes doesn't appear to be the right thing, no matter how good-hearted these people are, just like Mike Ensign. So because a perception isn't right, this amendment is pending, and it means Senators should pay the full fare when they fly on someone's private airplane. [Cong. Rec. S548-9]

Sen. Levin, 1/25/2007

Strong travel restrictions are also an essential component of this bill. The new rules will ensure that Members traveling on corporate jets would have to reimburse at the charter rate, not as is now the case merely at the level of a first class commercial ticket. [Cong. Rec. S1185]

Sen. Reid, 6/26/2007

The American people responded at the polls last November with a clear message that they wanted a new direction, and we, the Democrats, responded by passing the most sweeping ethics and lobbying reform in a generation. We did it with the help of the minority. I do not say that lightly. But let's see what is in this bill. Let's review it for a bit to find out what this bill does.

It prohibits lobbyists and entities that hire lobbyists from giving gifts to lawmakers and their staffs. It prevents corporations and other entities that hire lobbyists from paying for trips for Members or staffs. And it prohibits lobbyists from participating in or paying for any such trips. It requires Senators to pay fair market value prices for charter flights, which put an end to the abuses of corporate travel.

Many people in this Chamber flew in corporate jets and paid first-class airfare. That did not corrupt any Members of Congress, but it was corrupting. It didn't look right, and therefore it is important it be stopped. And I hope it stopped. We need legislation to make sure it is stopped. [Cong. Rec. S8400]

Sen. Klobuchar, 7/31/2007

This ethics bill, as many outside groups have stated, is the most sweeping ethics reform we have seen since Watergate. It is about banning gifts and free meals. It is about not allowing people to take advantage of corporate jets. It is about bringing transparency to the earmark process. [Cong. Rec. S10401]

Sen. Obama, 8/2/2007

In January, I came back with Senator Feingold, and we set a high bar for reform. I am pleased to report that the bill before us today comes very close to what we proposed. By passing this bill, we will ban gifts and meals and end subsidized travel on corporate jets; we will close the revolving door between Pennsylvania Avenue and K Street; and we will make sure the American people can see all the pet projects lawmakers are trying to pass before they are actually voted on. [Cong. Rec. S10692]

Sen. Levin, 8/2/2007

Strong travel restrictions are also an essential component of this bill. The new rules will ensure that Members traveling on corporate jets would have to pay for them at the charter rate, not at the current level of a first class commercial ticket, which is but a fraction of the cost. [Cong. Rec. S10703]

Sen. Feinstein, 8/2/2007

Section 544 includes a separate provision relating to flights on private jets. This provi-

sion requires Senators to pay full market value—defined as charter rates—for flights on private jets, with an exception for jets owned by immediate family members (or non-public corporations in which the Senator or an immediate family member has an ownership interest).

In general, the changes made by section 544 go into effect 60 days after enactment, or the date that the Select Committee on Ethics issues the required guidelines under the rule, whichever is later. Until the new rules take effect, the existing rules for travel will remain in place. In light of the transition to the new rule relating to reimbursement for flights on private jets and the lack of experience in many offices in determining "charter rates," the Select Committee on Ethics may treat reimbursement at current rates as reimbursement at charter rates for a transition period not to exceed 60 days.

Section 601 amends the Federal Election Campaign Act to require that candidates, other than those running for a seat in the House of Representatives, pay the fair market value of airfare when using non-commercial jets to travel. Fair market value is to be determined by dividing the fair market value of the charter fare of the aircraft, by the number of candidates on the flight. This provision exempts aircraft owned or leased by candidates or candidates' immediate family members (or non-public corporations in which the Senator or his or her immediate family member has an ownership interest). The bill prohibits candidates for the House of Representatives from any campaign use of privately-owned, non-chartered jets.

Many candidates are not accustomed to determining charter rates. The FEC may, during a transition period of no more than 60 days, deem reimbursement at current rates to be charter rates while committees determine how to calculate charter rates. [Cong. Rec. S10713]

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 377—CONGRATULATING THE UNIVERSITY OF NORTH CAROLINA TAR HEELS FOR WINNING THE 2009 NATIONAL COLLEGIATE ATHLETIC ASSOCIATION FIELD HOCKEY NATIONAL CHAMPIONSHIP—

Mrs. HAGAN (for herself and Mr. BURR) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 377

Whereas on November 22, 2009, the University of North Carolina defeated the University of Maryland by a score of 3-2 to win the 2009 National Collegiate Athletic Association (NCAA) Field Hockey National Championship;

Whereas the University of North Carolina Tar Heels finished the season with an overall record of 20-2, and an Atlantic Coast Conference (ACC) regular season record of 4-1;

Whereas the University of North Carolina's Ilse Davids, Katelyn Falgowski, Danielle Forword, Jackie Kintzer, and Kelsey Kolojejchick were named to the 2009 All-ACC first team;

Whereas Kelsey Kolojejchick was named the ACC Rookie of the Year;

Whereas the Tar Heels entered the NCAA tournament ranked third, behind the only 2

teams to which they had lost during the regular season, the University of Virginia and the University of Maryland;

Whereas the Tar Heels defeated the University of Virginia by a score of 3-2 in the national semi-final game;

Whereas the defending national champion and top-ranked University of Maryland entered the NCAA championship game with an undefeated 23-0 record;

Whereas the University of North Carolina kept the University of Maryland scoreless during the first period, despite being outshot 8-1;

Whereas senior captain Danielle Forword lifted the Tar Heels to victory in the championship game on a game-winning goal with 11.7 seconds remaining;

Whereas the Tar Heels overcame a previous 4-1 loss during the regular season to the University of Maryland;

Whereas the University of North Carolina's Ilse Davids, Katelyn Falgowski, Danielle Forword, and Jackie Kintzer were named to the 2009 NCAA All-Tournament Team;

Whereas the University of North Carolina's Katelyn Falgowski, Jackie Kintzer, and Kelsey Kolojejchick were named first team All-Americans by the National Field Hockey Coaches Association;

Whereas Kelsey Kolojejchick became the first Tar Heel freshman to earn first-team All-America honors;

Whereas the University of North Carolina's Ilse Davids and Danielle Forword were named second team All-Americans, with Melanie Brill named to the third team;

Whereas 31 North Carolina players have earned first-team All-America honors on 43 occasions;

Whereas Coach Karen Shelton was named as the South Region Coach of the Year by the National Field Hockey Coaches Association; and,

Whereas the University of North Carolina made its 26th NCAA Tournament appearance and won the school's sixth NCAA field hockey championship; Now, therefore, be it

Resolved, That the Senate—

(1) congratulates the University of North Carolina on winning the 2009 National Collegiate Athletic Association Field Hockey National Championship;

(2) recognizes the achievement of the players, coaches, and students, as well as their dedication to excellence that helped propel the field hockey team to win the championship; and

(3) respectfully requests the Secretary of the Senate to transmit an enrolled copy of this resolution to—

(A) the chancellor of the University of North Carolina, H. Holden Thorp;

(B) the athletic director of the University of North Carolina, Dick Baddour; and

(C) the head coach of the University of North Carolina field hockey team, Karen Shelton.

SENATE RESOLUTION 378—CONGRATULATING THE UNIVERSITY OF NORTH CAROLINA TAR HEELS FOR WINNING THE 2009 NATIONAL COLLEGIATE ATHLETIC ASSOCIATION WOMEN'S SOCCER NATIONAL CHAMPIONSHIP—

Mrs. HAGAN (for herself and Mr. BURR) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 378

Whereas on December 6, 2009, the University of North Carolina defeated Stanford University by a score of 1-0 to win the 2009 National Collegiate Athletic Association (NCAA) Women's Soccer National Championship;

Whereas the Tar Heels finished the regular season third in the Atlantic Coast Conference (ACC) with a conference record of 7-3-0 and an overall record of 14-3-1;

Whereas the University of North Carolina's Whitney Engen was named ACC Defensive Player of the Year;

Whereas the University of North Carolina's Whitney Engen, Ashlyn Harris, and Tobin Heath were named to the 2009 All-ACC first team;

Whereas the University of North Carolina's Ali Hawkins and Jessica McDonald were named to the 2009 All-ACC second team;

Whereas the third-seeded Tar Heels won the 2009 ACC Women's Soccer Championship with a 3-0 victory over Florida State University, winning the 20th/ ACC Tournament Championship in the school's history;

Whereas the University of North Carolina's Casey Nogueira was named the Most Valuable Player of the 2009 ACC Championship;

Whereas the University of North Carolina's Casey Nogueira, Ashlyn Harris, Kristi Eveland, Whitney Engen, and Tobin Heath were each named to the 2009 ACC Women's Soccer All-Tournament Team;

Whereas Stanford University entered the National Championship game with an undefeated 25-0 record;

Whereas the University of North Carolina's Jessica McDonald scored the decisive goal in the third minute of the National Championship game on an assist from Casey Nogueira and Tobin Heath;

Whereas the Tar Heels withstood a furious second-half Stanford rally, with the University of North Carolina's goalkeeper Ashlyn Harris providing a key save to preserve the Tar Heels' victory;

Whereas Casey Nogueira was named the Most Valuable Player on Offense in the NCAA Women's College Cup for the second successive year;

Whereas Whitney Engen was named the Most Valuable Player on Defense in the NCAA Women's College Cup;

Whereas the University of North Carolina's Tobin Heath and Whitney Engen were named to the National Soccer Coaches Association of America All-America first team;

Whereas the University of North Carolina's 9 seniors completed their collegiate careers as the winningest senior class in the country, having won 3 National Championships and 4 ACC Tournament Championships with a combined overall record of 94-9-4;

Whereas the University of North Carolina's NCAA Tournament record stands at 106-7-1, and the University has won 93.4 percent of its NCAA Tournament competitions;

Whereas the University of North Carolina has participated in 23 of 28 NCAA Tournament Championship games played to date; and

Whereas the University of North Carolina has won 20 of the 28 NCAA Women's Soccer National Championships: Now, therefore, be it

Resolved, That the Senate—

(1) congratulates the University of North Carolina for winning the 2009 National Collegiate Athletic Association Women's Soccer National Championship;

(2) recognizes the achievement of the players, coaches, students, and staff of the University of North Carolina, whose persever-

ance and dedication to excellence helped propel the women's soccer team to win the championship; and

(3) respectfully requests the Secretary of the Senate to transmit an enrolled copy of this resolution to—

(A) the chancellor of the University of North Carolina, H. Holden Thorp;

(B) the athletic director of the University of North Carolina, Dick Baddour; and

(C) the head coach of the University of North Carolina women's soccer team, Anson Dorrance.

SENATE RESOLUTION 379—TO EXPRESS THE SENSE OF THE SENATE REGARDING THE PROTECTION OF INTELLECTUAL PROPERTY RIGHTS FOR CLEAN ENERGY AND ENVIRONMENTAL TECHNOLOGY

Mrs. GILLIBRAND submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 379

Whereas the development and deployment of innovative clean energy and environmental technology is critical to addressing global climate change;

Whereas intellectual property rights are a key driver of investment and research and development in, and facilitate global deployment of, clean energy and environmental technology;

Whereas efforts to weaken intellectual property rights for clean technology would undermine the environmental objectives of climate change negotiations by reducing incentives for investment, innovation, and clean energy and environmental technology deployment required to meet those objectives;

Whereas weakened intellectual property right protections relating to clean energy and environmental technology could pose a substantial competitive risk to United States businesses and United States workers and inhibit the creation of new green jobs and the transition to a green economy for the 21st century; and

Whereas climate action presents a significant opportunity for international cooperation on clean technology development and deployment, with substantial environmental and economic benefits for all countries.

Now, therefore, be it

Resolved, That it is the sense of the Senate that the President of the United States should pursue opportunities for international cooperation in technology deployment, and should act to ensure that any treaty or other accord resulting from negotiations of the United Nations Framework Convention on Climate Change, done at New York on May 9, 1992 (or a successor agreement) does not weaken or undermine international legal rules and obligations in effect as of the date of enactment of this Act relating to the protection and enforcement of intellectual property rights for energy and environmental technology, including—

(1) wind, solar, biomass, geothermal, hydro, landfill gas, natural gas, marine, trash combustion, fuel cell, hydrogen, micro-turbine, nuclear, clean coal, electric battery, alternative fuel, alternative refueling infrastructure, advanced vehicle, electric grid, and energy efficiency-related technologies; and

(2) any other technologies covered by such an agreement.

AMENDMENTS SUBMITTED AND PROPOSED

SA 3259. Mr. UDALL, of Colorado submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table.

SA 3260. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3261. Mrs. HAGAN submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3262. Mr. WHITEHOUSE submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3263. Mr. BAUCUS (for himself, Ms. SNOWE, Mr. CARPER, Mrs. LINCOLN, and Mr. BENNET) submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3264. Mr. WYDEN (for himself, Mr. BROWN, Mr. SPECTER, Mr. KOHL, and Ms. COLLINS) submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 3259. Mr. UDALL of Colorado submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 396, between lines 8 and 9, insert the following:

SEC. 1. STATE COURT INNOVATION PROJECT.

(a) GRANT.—

(1) IN GENERAL.—

(A) GRANT PROGRAM.—The Attorney General shall develop and implement a competitive grant program to improve the efficiency and lessen the costs and burdens of medical malpractice civil litigation for plaintiffs and defendants.

(B) ELEMENTS OF PROGRAM.—The grant program under subparagraph (A) shall be designed—

(i) to give State courts a mechanism for improving court rules and procedures, allowing parties to go to trial in more cost-effective ways and reducing the complexity and cost of litigation; and

(ii) to fund research and objective measurement, evaluation, and reporting of outcomes to identify innovative ways of promoting the resolution of medical malpractice cases in court or tried by jury in a more cost-effective and timely manner pursuant to clause (i).

(C) **ELIGIBLE ENTITY.**—To be eligible to receive a grant under subparagraph (A), an entity shall—

(i) be a nonprofit State court improvement organization that was incorporated or in existence before December 31, 2009, and which is experienced in developing State court improvement programs; and

(ii) submit to the Attorney General an application at such time, in such manner, and containing such information as the Attorney General may require.

(2) **USE OF FUNDS.**—A grant recipient under paragraph (1) shall use amounts awarded under the grant to conduct research and evaluations, develop rules and procedures designed to improve the efficiency and lessen the costs of medical malpractice litigation for plaintiffs and defendants, and to award subgrants to eligible entities to carry out activities—

(A) to conduct pilot projects;

(B) to increase the operating efficiency of State courts with respect to medical malpractice litigation;

(C) to conduct research to seek innovative ways to resolve medical malpractice litigation in State courts in a more cost-effective and timely manner; and

(D) to measure and report on outcomes with respect to activities funded under the subgrant.

(3) **ELIGIBLE SUBGRANT ENTITY.**—To be eligible to receive a subgrant under paragraph (2), an entity shall—

(A)(i) be a State or local governmental entity in a jurisdiction that permits jury trials for civil medical malpractice actions; or

(ii) be an academic institution; and

(B) submit an application at such time, in such manner, and containing such information as required by the recipient of the grant under paragraph (1), in accordance with any rules established by the Attorney General.

(4) **REPORTING.**—Not later than 2 years after receiving grant funds under this subsection, each grant recipient under paragraph (1) shall submit to the Attorney General a report that describes the activities conducted by the recipient under this section, including the activities of any subgrantees of such grant recipient under paragraph (2).

(b) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated \$10,000,000 to carry out this section.

SA 3260. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 522, between lines 2 and 3, insert the following:

SEC. 2603. PAYMENT FOR ILLEGAL UNAPPROVED DRUGS.

(a) **FINDINGS.**—Congress finds that each year, the Medicaid program under title XIX of the Social Security Act (42 U.S.C. 1396 et

seq.) pays millions of dollars in reimbursement for covered outpatient drugs that are not approved by the Food and Drug Administration under a new drug application under section 505(b) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(b)) or an abbreviated new drug application under section 505(j) of such Act, or that such drug is not subject such section 505 or section 512 due to the application of section 201(p) of such Act (21 U.S.C. 321(p)).

(b) **LISTING OF DRUGS AND DEVICES.**—Section 510 of the Food, Drug and Cosmetic Act (21 U.S.C. 360) is amended—

(1) in subsection (j)(1)(B)—

(A) in clause (i), by inserting “in the case of a drug, the authority under this Act that does not require such drug to be subject to section 505 and section 512,” after “labeling for such drug or device;” and

(B) in clause (ii), by inserting “, in the case of a drug, the authority under this Act that does not require such drug to be subject to section 505 and section 512,” after “for such drug or device;” and

(2) in subsection (f)—

(A) by striking “(f) The Secretary” and inserting the following:

“(f) **INSPECTION BY PUBLIC OF REGISTRATION.**—

“(1) **IN GENERAL.**—The Secretary”; and

(B) by adding at the end the following:

“(2) **LIST OF DRUGS THAT ARE NOT APPROVED UNDER SECTION 505 OR 512.**—Not later than January 1, 2011, the Secretary shall make available to the public on the Internet website of the Food and Drug Administration a list that includes, for each drug described in subsection (j)(1)(B)—

“(A) the drug;

“(B) the person who listed such drug; and

“(C) the authority under this Act that does not require such drug to be subject to section 505 and section 512, as provided by such person in such list.”.

(c) **PAYMENT FOR COVERED OUTPATIENT DRUGS.**—Section 1927 of the Social Security Act (42 U.S.C. 1396r-8) is amended by inserting at the end the following:

“(1) **CONDITION.**—Beginning January 1, 2011, no State shall make any payment under this section for any covered outpatient drug unless such State first verifies with the Food and Drug Administration that such covered outpatient drug has been approved by the Food and Drug Administration under a new drug application under section 505(b) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(b)) or an abbreviated new drug application under section 505(j) of such Act, or that such drug is not subject such section 505 or section 512 due to the application of section 201(p) of such Act (21 U.S.C. 321(p)). The Secretary shall have the authority to prescribe regulations to create an information sharing protocol to allow States to verify that a covered outpatient drug has been approved by the Food and Drug Administration.”.

SA 3261. Mrs. HAGAN submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 722, after line 20, insert the following:

SEC. 3016. CULTURE OF SAFETY HOSPITAL ACCOUNTABILITY STUDY AND DEMONSTRATION PROGRAM.

(a) **STUDY.**—

(1) **IN GENERAL.**—The Secretary shall conduct a study that—

(A) examines existing activities and programs in hospitals for quality assurance, patient safety, and performance improvement and provides an analysis regarding best practices with respect to such activities and programs; and

(B) identifies best practices that should be replicated in hospitals to improve patient safety and quality of care, consistent with the provisions included under the quality assessment and performance improvement program, as required under the conditions of participation for hospitals under Medicare.

(2) **REPORT.**—Not later than 2 years after the date of enactment of this Act, the Secretary shall prepare a report containing the results of the study conducted under paragraph (1). Such report shall be made available on the Internet website of the Centers for Medicare & Medicaid Services.

(b) **DEMONSTRATION PROGRAM.**—

(1) **IN GENERAL.**—The Secretary shall establish the Culture of Safety Hospital Accountability demonstration program to provide support for establishing partnerships and other cooperative approaches between hospitals, State health care agencies, and the Department of Health and Human Services to promote and implement the best practices identified under subsection (a), with the goal of improving the safety and quality of care provided to Medicare beneficiaries and enhance compliance with the conditions of participation for hospitals under Medicare.

(2) **DURATION.**—The demonstration program shall operate during a period of 3 years, beginning not later than 12 months after completion of the report described in subsection (a)(2).

(3) **SCOPE.**—

(A) **STATES.**—The Secretary shall select not less than 4 States, but not more than 6 States, to participate in the demonstration program.

(B) **HOSPITALS.**—The Secretary shall select not more than 24 hospitals, within the States selected under subparagraph (A), to participate in the demonstration program. The hospitals selected under this subparagraph shall satisfy criteria, as developed by the Secretary, indicating a need for substantial improvement in quality of care and patient safety.

(4) **APPLICATION.**—A State or hospital that desires to participate in the demonstration program shall submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require.

(5) **IMPLEMENTATION.**—

(A) **TECHNICAL ASSISTANCE.**—The Secretary shall provide participating hospitals with technical assistance in implementation of the best practices identified through the study under subsection (a).

(B) **HOSPITAL SURVEYORS.**—For each State participating in the demonstration program, the Secretary shall provide training to State surveyors that is designed to—

(i) enhance knowledge of the disciplines of patient safety, quality assessment, and performance improvement;

(ii) increase skill in evaluating compliance with quality assessment and performance improvement programs required under the conditions of participation for hospitals under Medicare; and

(iii) focus investigations of complaints regarding hospital care on the hospital's quality assessment and performance improvement program.

(6) **EVALUATION.**—For each State and hospital participating in the demonstration program, the Secretary shall evaluate the following:

(A) The level of implementation of the best practices identified under subsection (a) by the participating hospitals and whether adoption of such practices—

(i) improved quality and patient safety (including an analysis of changes in quality measures and other indicators of outcome and performance); and

(ii) resulted in a decrease in the seriousness or number of citations for deficiencies under the conditions of participation for hospitals under Medicare.

(B) The training provided to State surveyors and whether such training resulted in enhanced proficiency in evaluations of hospital quality assessment and performance improvement programs.

(7) **REPORT.**—Not later than 12 months after completion of the demonstration project, the Secretary shall submit to Congress a report containing an evaluation of the demonstration program, including—

(A) the findings of the evaluation under paragraph (6); and

(B) recommendations—

(i) in regard to whether the best practices identified under the demonstration program should be adopted by other hospitals, and how the Secretary can best promote adoption of such best practices;

(ii) in regard to whether the training for State surveyors developed under the demonstration program should be provided to all State surveyors; and

(iii) for such legislation and administrative action as the Secretary determines appropriate.

(8) **WAIVER AUTHORITY.**—The Secretary may waive such requirements under titles XI and XVIII of the Social Security Act as may be necessary to carry out the demonstration program.

(c) **FUNDING.**—For purposes of carrying out this section, the Secretary shall provide for the transfer from the Federal Hospital Insurance Trust Fund under section 1817 of the Social Security Act (42 U.S.C. 1395i) of \$25,000,000, to the Centers for Medicare & Medicaid Services Program Management Account for the period of fiscal years 2010 through 2017. Amounts transferred under the preceding sentence shall remain available until expended.

(d) **ALTERNATIVE REMEDIES.**—Section 1866(b) of the Social Security Act (42 U.S.C. 1395cc(b)) is amended by adding at the end the following new paragraph:

“(5)(A) The Secretary is authorized to promulgate regulations that establish enforcement remedies that are in addition to, or in lieu of, termination of an agreement under this section for hospitals or critical access hospitals for violations of health and safety requirements under this title. Such remedies may include directed plans of correction that are designed to—

“(i) ensure compliance with requirements under this title (including conditions of participation for hospitals or critical access hospitals);

“(ii) prevent recurrence of non-compliance with such requirements; and

“(iii) improve the internal structures and processes within the hospital or critical access hospital for provision of continuous quality and safety enhancement.

“(B) The regulations described under subparagraph (A) may be promulgated by the Secretary before, during, or after the evaluation described under section 3016(b)(6) of the Patient Protection and Affordable Care Act.”.

(e) **NON-APPLICATION OF PAPERWORK REDUCTION ACT.**—Chapter 35 of title 44, United States Code (commonly referred to as the ‘Paperwork Reduction Act of 1995’) shall not apply to this section.

(f) **DEFINITIONS.**—In this section:

(1) **DEMONSTRATION PROGRAM.**—The term “demonstration program” means the Culture of Safety Hospital Accountability demonstration program conducted under this section.

(2) **HOSPITAL.**—The term “hospital” means—

(A) an institution described under section 1861(e) of the Social Security Act (42 U.S.C. 1395x(e)); or

(B) a critical access hospital (as described under section 1861(mm)(1) of such Act (42 U.S.C. 1395x(mm)(1))).

(3) **MEDICARE.**—The term “Medicare” means the program established under title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.).

(4) **SECRETARY.**—The term “Secretary” means the Secretary of Health and Human Services.

SA 3262. Mr. WHITEHOUSE submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 796, between lines 5 and 6, insert the following:

SEC. 3028. VOLUNTARY ACCELERATED SHARED SAVINGS PROGRAM.

(a) **ESTABLISHMENT.**—

(1) **IN GENERAL.**—The Secretary of Health and Human Services (referred to in this section as the “Secretary”) shall establish the Voluntary Accelerated Shared Savings Program (referred to in this section as the “shared savings program”) under which health care providers that voluntarily report on quality measures, adopt quality-improving protocols or strategies, and achieve quality benchmarks are eligible for a shared savings payment.

(2) **DURATION.**—The shared savings program shall be conducted during the following periods:

(A) The hospital readmission reduction program, as described under subsection (d), shall—

(i) begin on such date as determined appropriate by the Secretary for implementation of the program, but not later than 6 months after the date of enactment of this Act; and

(ii) end not later than October 1, 2012.

(B) The hospital-acquired conditions reduction program, as described under subsection (e), shall—

(i) begin on such date as determined appropriate by the Secretary for implementation of the program, but not later than 6 months after the date of enactment of this Act; and

(ii) shall end not later than October 1, 2015.

(b) **ELIGIBILITY; PARTICIPATION REQUIREMENTS.**—

(1) **ELIGIBILITY.**—A hospital described in section 1866(q)(5)(C) of the Social Security

Act, as added by section 3025, shall be eligible to participate in the shared savings program.

(2) **APPLICATION.**—A provider seeking to participate in the shared savings program shall submit an application to the Secretary, in such manner and containing such information as the Secretary may require, that includes a detailed description of the methods through which the provider expects to—

(A) reduce readmissions or hospital-acquired condition rates, as applicable;

(B) reduce costs; and

(C) integrate and coordinate such quality improvement efforts with post-acute providers.

(3) **PARTICIPATION REQUIREMENTS.**—A participating provider shall be required to—

(A) report on quality measures (as determined by the Secretary under subsection (c));

(B) satisfy applicable benchmarks for such quality measures; and

(C) demonstrate savings (as described in subsection (f)).

(c) **QUALITY AND OTHER REPORTING REQUIREMENTS.**—

(1) **IN GENERAL.**—The Secretary shall determine appropriate measures to assess the quality of care furnished by participating providers, such as measures of—

(A) clinical processes and outcomes;

(B) patient and, where practicable, caregiver experience of care; and

(C) utilization rates.

(2) **INCORPORATION OF MEASURES.**—For purposes of the measures described under paragraph (1), the Secretary may incorporate measures established—

(A) under sections 1848(k) and 1886(b) of the Social Security Act; and

(B) pursuant to any provision of this Act or amendment made by this Act.

(3) **REPORTING REQUIREMENT.**—A participating provider shall submit data in a form and manner specified by the Secretary on measures the Secretary determines necessary for the participating provider to report in order to evaluate the quality of care furnished by such provider.

(4) **QUALITY PERFORMANCE STANDARDS.**—The Secretary shall establish quality performance standards to assess the quality of care furnished by participating providers. The Secretary shall seek to improve the quality of care furnished by participating providers over time by specifying higher standards, new measures, or both for purposes of assessing such quality of care.

(d) **HOSPITAL READMISSION REDUCTION PROGRAM.**—

(1) **HOSPITAL READMISSIONS RATE MEASURES.**—For purposes of establishing measures under subsection (c) for the hospital readmission reduction program, the Secretary shall include measures for readmission rates established under 1886(b) of the Social Security Act (42 U.S.C. 1395ww(b)).

(2) **BENCHMARK.**—The Secretary shall establish a benchmark for reduction in the readmission rate for a hospital that is adjusted for geographic area, patient population characteristics, and such other factors as determined appropriate by the Secretary. The Secretary may establish a higher benchmark for hospitals with an annual readmission rate that is above the mean nationwide readmission rate.

(3) **SHARED SAVINGS REQUIREMENTS.**—A participating provider shall be eligible for a shared savings payment under subsection (f) if such provider—

(A) achieves the applicable benchmark established by the Secretary under paragraph (2); and

(B) has an annual readmission rate that is below the risk adjusted expected readmissions rate as determined under section 1886(q)(4)(C)(i)(II) of the Social Security Act (as added by section 3025).

(4) **COMMUNITY-BASED ORGANIZATIONS.**—The Secretary may permit a community-based organization, as described in section 3026(b)(1)(B), to receive shared savings payments under the hospital readmission reduction program if such an organization—

(A) satisfies the requirements described under section 3026; and

(B) is associated with a subsection (d) hospital (as described in section 3026(b)(1)(A)) that would be eligible for a shared savings payment under this section.

(e) **HOSPITAL-ACQUIRED CONDITIONS REDUCTION PROGRAM.**—

(1) **HOSPITAL-ACQUIRED CONDITIONS RATE MEASURES.**—For purposes of establishing measures under subsection (c) for the hospital-acquired conditions program, the Secretary shall establish measures that accurately determine rates of hospital-acquired conditions (as defined in section 1886(p) of the Social Security Act, as added by section 3008).

(2) **REDUCTION IN HOSPITAL-ACQUIRED CONDITIONS BENCHMARK.**—The Secretary shall establish a benchmark for reduction in the hospital-acquired conditions rate for a participating provider that is adjusted for geographic area, patient population characteristics, and such other factors as determined appropriate by the Secretary. The Secretary may establish a higher benchmark for hospitals with an annual hospital-acquired conditions rate that is above the mean nationwide hospital-acquired conditions rate.

(3) **SHARED SAVINGS REQUIREMENTS.**—A participating provider shall be eligible for a shared savings payment under subsection (f) if such provider achieves the applicable benchmark established by the Secretary under paragraph (2).

(f) **SHARED SAVINGS PAYMENTS.**—

(1) **IN GENERAL.**—Under the shared savings program, payments shall continue to be made to participating providers under the original Medicare fee-for-service program under parts A and B in the same manner as they would otherwise be made except that a participating provider is eligible to receive payment for shared savings under paragraph (3) if—

(A) the provider meets quality performance standards established by the Secretary under subsection (c); and

(B) the provider meets the requirement under paragraph (2)(A).

(2) **SAVINGS REQUIREMENT AND BENCHMARK.**—

(A) **DETERMINING SAVINGS.**—Subject to subparagraph (C), in each year of the period under subsection (a)(2), a participating provider shall be eligible to receive payment for shared savings under paragraph (3) only if the estimated average per capita Medicare expenditures for such provider for Medicare fee-for-service beneficiaries for parts A and B services, adjusted for beneficiary characteristics, is at least the percent specified by the Secretary below the applicable benchmark under subparagraph (B).

(B) **ESTABLISH AND UPDATE BENCHMARK.**—The Secretary shall estimate a benchmark for each period under subsection (a)(2) for each participating provider using the most recent available 3 years of per-beneficiary expenditures for parts A and B services for Medicare fee-for-service beneficiaries served by the provider. Such benchmark shall be adjusted for beneficiary characteristics and

such other factors as the Secretary determines appropriate and updated by the projected absolute amount of growth in national per capita expenditures for parts A and B services under the original Medicare fee-for-service program, as estimated by the Secretary.

(C) **HIGHER BENCHMARK.**—For purposes of subparagraph (A), the Secretary may require a greater percentage in savings below the benchmark established under subparagraph (B) for a participating provider with an annual readmission or hospital-acquired conditions rate, as applicable, that is above the mean nationwide rate (as described in subsections (e)(2) and (f)(2)).

(3) **PAYMENTS FOR SHARED SAVINGS.**—Subject to performance with respect to the quality performance standards established by the Secretary under subsection (c), if a participating provider meets the requirements under paragraphs (1) and (2), a percent (as determined appropriate by the Secretary) of the difference between such estimated average per capita Medicare expenditures in a year, adjusted for beneficiary characteristics, for the provider and such benchmark for the provider may be paid to the provider as shared savings and the remainder of such difference shall be retained by the Medicare program under title XVIII of the Social Security Act. The Secretary shall establish limits on the total amount of shared savings that may be paid to a participating provider under this paragraph.

(g) **EARLY PARTICIPATION IN MEDICARE SHARED SAVINGS PROGRAM AND NATIONAL PILOT PROGRAM ON PAYMENT BUNDLING.**—

(1) **IN GENERAL.**—For purposes of section 1866D of the Social Security Act (as added by section 3023) and section 1899 of such Act (as added by section 3022), the Secretary may establish a program to provide for early participation payments under such sections to eligible providers or groups of providers.

(2) **ELIGIBILITY.**—

(A) **IN GENERAL.**—Providers eligible for the early participation program under this subsection shall include—

(i) providers described under section 1866D(a)(2)(G) of the Social Security Act; and

(ii) providers that meet the requirements in section 1899(b) of such Act.

(B) **WAIVER OF REQUIREMENTS.**—Subject to subparagraph (C), for purposes of the early participation program under this subsection, the Secretary may waive—

(i) any requirements under section 1899 of the Social Security Act, except that the Secretary shall not waive—

(I) the requirements under subsection (b) of such section (with the exception of subparagraphs (B) and (D) of subsection (b)(2)); or

(II) the provisions under subsection (d) of such section.

(ii) any requirements under section 1866D of the Social Security Act, provided that the proposal submitted by the provider (as described under subparagraph (C)) adequately provides for—

(I) a plan for quality improvement that is consistent with subsection (c)(4) of such section; and

(II) a valid payment methodology that is consistent with subsection (c)(3) of such section.

(C) **APPLICATION.**—Providers seeking to participate in the early participation program under this section shall submit a proposal, in such manner and containing such information as the Secretary may require, that includes, for purposes of determining applicable payments under this section, a methodology for calculation of savings or determination of bundled payments.

(3) **MEDICARE SHARED SAVINGS PROGRAM.**—For purposes of section 1899 of the Social Security Act, a provider seeking to participate in the early participation program under this section shall, as part of the proposal described under paragraph (2)(C), provide a detailed plan for quality improvement that is consistent with the goals described under subsections (a) and (b)(3) of section 1899 of the Social Security Act.

(4) **NATIONAL PILOT PROGRAM ON PAYMENT BUNDLING.**—For purposes of section 1866D of the Social Security Act, a provider seeking to participate in the early participation program under this section shall, as part of the proposal described under paragraph (2)(C), provide a detailed plan in regard to the methods by which such provider will satisfy the objectives described under subsection (a)(1) of section 1866D of the Social Security Act, which shall include—

(A) a bundled payment methodology;

(B) methods by which quality of care will be improved; and

(C) a description of the conditions and services that are to be covered through the bundled payment.

(5) **APPLICABLE PERIOD.**—Any payments made to providers pursuant to early participation program under this section shall cease upon establishment of the programs described under sections 1866D and 1899 of the Social Security Act, except to the extent that providers are determined to be eligible for, and continue to participate in, the programs established under such sections.

SA 3263. Mr. BAUCUS (for himself, Ms. SNOWE, Mr. CARPER, Mrs. LINCOLN, and Mr. BENNET) submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

TITLE —ALTERNATIVE TO MEDICAL TORT LITIGATION

SEC. —01. SHORT TITLE.

This title may be cited as the “Fair and Reliable Medical Justice Act”.

SEC. —02. PURPOSES.

The purposes of this title are—

(1) to restore fairness and reliability to the medical justice system by fostering alternatives to current medical tort litigation that promote disclosure of health care errors and provide prompt, fair, and reasonable compensation to patients who are injured by health care errors;

(2) to promote patient safety through disclosure of health care errors; and

(3) to support and assist States in developing such alternatives.

SEC. —03. STATE DEMONSTRATION PROGRAMS TO EVALUATE ALTERNATIVES TO CURRENT MEDICAL TORT LITIGATION.

Part P of title III of the Public Health Service Act (42 U.S.C. 280g et seq.), as amended by this Act, is further amended by adding at the end the following:

"SEC. 399V-2. STATE DEMONSTRATION PROGRAMS TO EVALUATE ALTERNATIVES TO CURRENT MEDICAL TORT LITIGATION.

"(a) IN GENERAL.—The Secretary is authorized to award demonstration grants to States for the development, implementation, and evaluation of alternatives to current tort litigation for resolving disputes over injuries allegedly caused by health care providers or health care organizations. In awarding such grants, the Secretary shall ensure the diversity of the alternatives so funded.

"(b) DURATION.—The Secretary may award grants under subsection (a) for a period not to exceed 5 years.

"(c) CONDITIONS FOR DEMONSTRATION GRANTS.—

"(1) REQUIREMENTS.—Each State desiring a grant under subsection (a) shall develop an alternative to current tort litigation that—

"(A) allows for the resolution of disputes over injuries allegedly caused by health care providers or health care organizations; and

"(B) promotes a reduction of health care errors by encouraging the collection and analysis of patient safety data related to disputes resolved under subparagraph (A) by organizations that engage in efforts to improve patient safety and the quality of health care.

"(2) ALTERNATIVE TO CURRENT TORT LITIGATION.—Each State desiring a grant under subsection (a) shall demonstrate how the proposed alternative described in paragraph (1)(A)—

"(A) makes the medical liability system more reliable by increasing the availability of prompt and fair resolution of disputes;

"(B) encourages the efficient resolution of disputes;

"(C) encourages the disclosure of health care errors;

"(D) enhances patient safety by detecting, analyzing, and helping to reduce medical errors and adverse events;

"(E) improves access to liability insurance;

"(F) fully informs patients about the differences in the alternative and current tort litigation;

"(G) provides patients the ability to opt out of or voluntarily withdraw from participating in the alternative at any time and to pursue other options, including litigation, outside the alternative;

"(H) would not conflict with State law at the time of the application in a way that would prohibit the adoption of an alternative to current tort litigation; and

"(I) would not limit or curtail a patient's existing legal rights, ability to file a claim in or access a State's legal system, or otherwise abrogate a patient's ability to file a medical malpractice claim.

"(3) SOURCES OF COMPENSATION.—Each State desiring a grant under subsection (a) shall identify the sources from and methods by which compensation would be paid for claims resolved under the proposed alternative to current tort litigation, which may include public or private funding sources, or a combination of such sources. Funding methods shall to the extent practicable provide financial incentives for activities that improve patient safety.

"(4) SCOPE.—

"(A) IN GENERAL.—Each State desiring a grant under subsection (a) shall establish a scope of jurisdiction (such as Statewide, designated geographic region, a designated area of health care practice, or a designated group of health care providers or health care organizations) for the proposed alternative to current tort litigation that is sufficient to evaluate the effects of the alternative. No

scope of jurisdiction shall be established under this paragraph that is based on a health care payer or patient population.

"(B) NOTIFICATION OF PATIENTS.—A State shall demonstrate how patients would be notified that they are receiving health care services that fall within such scope, and the process by which they may opt out of or voluntarily withdraw from participating in the alternative. The decision of the patient whether to participate or continue participating in the alternative process shall be made at any time and shall not be limited in any way.

"(5) PREFERENCE IN AWARDING DEMONSTRATION GRANTS.—In awarding grants under subsection (a), the Secretary shall give preference to States—

"(A) that have developed the proposed alternative through substantive consultation with relevant stakeholders, including patient advocates, health care providers and health care organizations, attorneys with expertise in representing patients and health care providers, medical malpractice insurers, and patient safety experts;

"(B) that make proposals that are likely to enhance patient safety by detecting, analyzing, and helping to reduce medical errors and adverse events; and

"(C) that make proposals that are likely to improve access to liability insurance.

"(d) APPLICATION.—

"(1) IN GENERAL.—Each State desiring a grant under subsection (a) shall submit to the Secretary an application, at such time, in such manner, and containing such information as the Secretary may require.

"(2) REVIEW PANEL.—

"(A) IN GENERAL.—In reviewing applications under paragraph (1), the Secretary shall consult with a review panel composed of relevant experts appointed by the Comptroller General.

"(B) COMPOSITION.—

"(i) NOMINATIONS.—The Comptroller General shall solicit nominations from the public for individuals to serve on the review panel.

"(ii) APPOINTMENT.—The Comptroller General shall appoint, at least 9 but not more than 13, highly qualified and knowledgeable individuals to serve on the review panel and shall ensure that the following entities receive fair representation on such panel:

"(I) Patient advocates.

"(II) Health care providers and health care organizations.

"(III) Attorneys with expertise in representing patients and health care providers.

"(IV) Medical malpractice insurers.

"(V) State officials.

"(VI) Patient safety experts.

"(C) CHAIRPERSON.—The Comptroller General, or an individual within the Government Accountability Office designated by the Comptroller General, shall be the chairperson of the review panel.

"(D) AVAILABILITY OF INFORMATION.—The Comptroller General shall make available to the review panel such information, personnel, and administrative services and assistance as the review panel may reasonably require to carry out its duties.

"(E) INFORMATION FROM AGENCIES.—The review panel may request directly from any department or agency of the United States any information that such panel considers necessary to carry out its duties. To the extent consistent with applicable laws and regulations, the head of such department or agency shall furnish the requested information to the review panel.

"(e) REPORTS.—

"(1) BY STATE.—Each State receiving a grant under subsection (a) shall submit to the Secretary an annual report evaluating the effectiveness of activities funded with grants awarded under such subsection. Such report shall, at a minimum, include the impact of the activities funded on patient safety and on the availability and price of medical liability insurance.

"(2) BY SECRETARY.—The Secretary shall submit to Congress an annual compendium of the reports submitted under paragraph (1) and an analysis of the activities funded under subsection (a) that examines any differences that result from such activities in terms of the quality of care, number and nature of medical errors, medical resources used, length of time for dispute resolution, and the availability and price of liability insurance.

"(f) TECHNICAL ASSISTANCE.—

"(1) IN GENERAL.—The Secretary shall provide technical assistance to the States applying for or awarded grants under subsection (a).

"(2) REQUIREMENTS.—Technical assistance under paragraph (1) shall include—

"(A) guidance on non-economic damages, including the consideration of individual facts and circumstances in determining appropriate payment, guidance on identifying avoidable injuries, and guidance on disclosure to patients of health care errors and adverse events; and

"(B) the development, in consultation with States, of common definitions, formats, and data collection infrastructure for States receiving grants under this section to use in reporting to facilitate aggregation and analysis of data both within and between States.

"(3) USE OF COMMON DEFINITIONS, FORMATS, AND DATA COLLECTION INFRASTRUCTURE.—States not receiving grants under this section may also use the common definitions, formats, and data collection infrastructure developed under paragraph (2)(B).

"(g) EVALUATION.—

"(1) IN GENERAL.—The Secretary, in consultation with the review panel established under subsection (d)(2), shall enter into a contract with an appropriate research organization to conduct an overall evaluation of the effectiveness of grants awarded under subsection (a) and to annually prepare and submit a report to Congress. Such an evaluation shall begin not later than 18 months following the date of implementation of the first program funded by a grant under subsection (a).

"(2) CONTENTS.—The evaluation under paragraph (1) shall include—

"(A) an analysis of the effects of the grants awarded under subsection (a) with regard to the measures described in paragraph (3);

"(B) for each State, an analysis of the extent to which the alternative developed under subsection (c)(1) is effective in meeting the elements described in subsection (c)(2);

"(C) a comparison among the States receiving grants under subsection (a) of the effectiveness of the various alternatives developed by such States under subsection (c)(1);

"(D) a comparison, considering the measures described in paragraph (3), of States receiving grants approved under subsection (a) and similar States not receiving such grants; and

"(E) a comparison, with regard to the measures described in paragraph (3), of—

"(i) States receiving grants under subsection (a);

"(ii) States that enacted, prior to the date of enactment of the Patient Protection and

Affordable Care Act, any cap on non-economic damages; and

“(iii) States that have enacted, prior to the date of enactment of the Patient Protection and Affordable Care Act, a requirement that the complainant obtain an opinion regarding the merit of the claim, although the substance of such opinion may have no bearing on whether the complainant may proceed with a case.

“(3) MEASURES.—The evaluations under paragraph (2) shall analyze and make comparisons on the basis of—

“(A) the nature and number of disputes over injuries allegedly caused by health care providers or health care organizations;

“(B) the nature and number of claims in which tort litigation was pursued despite the existence of an alternative under subsection (a);

“(C) the disposition of disputes and claims, including the length of time and estimated costs to all parties;

“(D) the medical liability environment;

“(E) health care quality;

“(F) patient safety in terms of detecting, analyzing, and helping to reduce medical errors and adverse events;

“(G) patient and health care provider and organization satisfaction with the alternative under subsection (a) and with the medical liability environment; and

“(H) impact on utilization of medical services, appropriately adjusted for risk.

“(4) FUNDING.—The Secretary shall reserve 5 percent of the amount appropriated in each fiscal year under subsection (k) to carry out this subsection.

“(h) MEDPAC AND MACPAC REPORTS.—

“(1) MEDPAC.—The Medicare Payment Advisory Commission shall conduct an independent review of the alternatives to current tort litigation that are implemented under grants under subsection (a) to determine the impact of such alternatives on the Medicare program under title XVIII of the Social Security Act, and its beneficiaries.

“(2) MACPAC.—The Medicaid and CHIP Payment and Access Commission shall conduct an independent review of the alternatives to current tort litigation that are implemented under grants under subsection (a) to determine the impact of such alternatives on the Medicaid or CHIP programs under titles XIX and XXI of the Social Security Act, and their beneficiaries.

“(3) REPORTS.—Not later than December 31, 2016, the Medicare Payment Advisory Commission and the Medicaid and CHIP Payment and Access Commission shall each submit to Congress a report that includes the findings and recommendations of each respective Commission based on independent reviews conducted under paragraphs (1) and (2), including an analysis of the impact of the alternatives reviewed on the efficiency and effectiveness of the respective programs.

“(i) OPTION TO PROVIDE FOR INITIAL PLANNING GRANTS.—Of the funds appropriated pursuant to subsection (k), the Secretary may use a portion not to exceed \$500,000 per State to provide planning grants to such States for the development of demonstration project applications meeting the criteria described in subsection (c). In selecting States to receive such planning grants, the Secretary shall give preference to those States in which State law at the time of the application would not prohibit the adoption of an alternative to current tort litigation.

“(j) DEFINITIONS.—In this section:

“(1) HEALTH CARE SERVICES.—The term ‘health care services’ means any services provided by a health care provider, or by any

individual working under the supervision of a health care provider, that relate to—

“(A) the diagnosis, prevention, or treatment of any human disease or impairment; or

“(B) the assessment of the health of human beings.

“(2) HEALTH CARE ORGANIZATION.—The term ‘health care organization’ means any individual or entity which is obligated to provide, pay for, or administer health benefits under any health plan.

“(3) HEALTH CARE PROVIDER.—The term ‘health care provider’ means any individual or entity—

“(A) licensed, registered, or certified under Federal or State laws or regulations to provide health care services; or

“(B) required to be so licensed, registered, or certified but that is exempted by other statute or regulation.

“(k) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated, such sums as may be necessary to carry out this section for each of fiscal years 2011 through 2015.

“(1) CURRENT STATE EFFORTS TO ESTABLISH ALTERNATIVE TO TORT LITIGATION.—Nothing in this section shall be construed to limit any prior, current, or future efforts of any State to establish any alternative to tort litigation.

“(m) RULE OF CONSTRUCTION.—Nothing in this section shall be construed as limiting states’ authority over or responsibility for their state justice systems.”.

SA 3264. Mr. WYDEN (for himself, Mr. BROWN, Mr. SPECTER, Mr. KOHL, and Ms. COLLINS) submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 999, between lines 16 and 17, insert the following:

SEC. 3402. LIMITATION ON HOSPICE SPENDING.

Section 1814(i)(1)(C) of the Social Security Act, as amended by sections 3132 and 3401, is further amended—

(1) in each of clauses (ii)(VII) and (iii), by striking “clause (iv)” and inserting “clauses (iv) and (v)”;

(2) in clause (iv)—

(A) in subclause (II)—

(i) by striking “subject to clause (v),”; and

(ii) by striking “.05 percentage point” and inserting “.25 percentage point”; and

(B) by striking the flush sentence following subclause (II); and

(3) by striking clause (v) and inserting the following new clauses:

“(v) After determining the market basket percentage increase under clause (ii)(VII) or (iii), as applicable, with respect to fiscal years 2014 through 2019, if the Secretary determines there is excess hospice spending (as defined in clause (vi)) for the fiscal year, the Secretary shall reduce such percentage by the amount of such excess hospice spending. The application of this clause may not result in the market basket percentage increase under clause (ii)(VII) or (iii), as applicable, being less than 0.0 for a fiscal year.

“(vi) For purposes of clause (v), the term ‘excess hospice spending’ means—

“(I) for fiscal year 2014, the excess (expressed as a percentage) of—

“(aa) the aggregate amount of payments for hospice care under this title for fiscal year 2011; over

“(bb) the aggregate amount of such payments for fiscal year 2010 increased by the medical care component of the Consumer Price Index for fiscal year 2011, plus 3.0 percentage points; and

“(II) for fiscal year 2015 through 2019, the excess (expressed as a percentage) between—

“(aa) the aggregate amounts of such payments for the fiscal year 3 years prior to the fiscal year involved; over

“(bb) the aggregate amount of such payments for the fiscal year 4 years prior to the fiscal year involved increased by the medical care component of the Consumer Price Index for the fiscal year 3 years prior to the fiscal year involved, plus 3.0 percentage points.”.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on December 17, 2009, at 9:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on December 17, 2009, in room 253 of the Russell Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON HOMELAND SECURITY AND GOVERNMENTAL AFFAIRS

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Homeland Security and Governmental Affairs be authorized to meet during the session of the Senate on December 17, 2009, at 10 a.m., to conduct a hearing entitled “Safeguarding the American Dream: Prospectus for Our Economic Future and Proposals to Secure It.”

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON INDIAN AFFAIRS

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be authorized to meet during the session of the Senate on December 17, 2009, at 2:15 p.m., in room 628 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on December 17, 2009, at 10 a.m., in SD-226 of the Dirksen Senate Office

Building, to conduct an executive business meeting.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON SMALL BUSINESS AND
ENTREPRENEURSHIP

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Small Business and Entrepreneurship be authorized to meet during the session of the Senate on December 17, 2009, at 1:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

AD HOC SUBCOMMITTEE ON CONTRACTING
OVERSIGHT

Mr. DURBIN. Mr. President, I ask unanimous consent that the Ad Hoc Subcommittee on Contracting Oversight of the Committee on Homeland Security and Governmental Affairs be authorized to meet during the session of the Senate on December 17, 2009, at 2 p.m., to conduct a hearing entitled, "Afghanistan Contracts: An Overview."

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. DURBIN. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on December 17, 2009, at 2:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CONSUMER PROTECTION,
PRODUCT SAFETY, AND INSURANCE

Mr. DURBIN. Mr. President, I ask unanimous consent that the Subcommittee on Consumer Protection, Product Safety, and Insurance of the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on December 17, 2009, at 2:30 p.m., in room 253 of the Russell Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PUBLIC LANDS AND FORESTS

Mr. DURBIN. Mr. President, I ask unanimous consent that the Subcommittee on Public Lands and Forests be authorized to meet during the session of the Senate to conduct a hearing on December 17, 2009, at 2:30 p.m., in room SD-366 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGES OF THE FLOOR

Mr. LEVIN. Mr. President, first, on behalf of Senator DODD, I ask unanimous consent that a military fellow in his office, CPT Joslyn Hemler, be granted floor privileges during the consideration of the 2010 Department of Defense appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 12:01 A.M.
TOMORROW

Mr. REID. Mr. President, I now move to recess until 12:01 a.m.

Mr. MCCONNELL. Parliamentary inquiry.

The PRESIDING OFFICER (Mr. DURBIN). The Republican leader.

Mr. MCCONNELL. Before we proceed to the vote, I would like to make a parliamentary inquiry: I believe it is the case that a simple motion to recess or adjourn is not amendable; is that correct?

The PRESIDING OFFICER. The Republican leader is correct.

Mr. MCCONNELL. Further inquiry. I also believe that a motion to recess or adjourn to a time certain is amendable with time changes.

The PRESIDING OFFICER. The Republican leader is correct.

Mr. MCCONNELL. I will not offer an amendment to change the time to convene later, but so everybody will know, with regard to their own personal schedules, this vote could occur at any time tomorrow. It wouldn't have to be at 1 a.m. The majority leader has the discretion to do that. We are, of course, prepared to talk around the clock and happy to have a vote at 1 o'clock. I just want everybody to understand it is my understanding that the majority leader does have the ability to set the vote later than 1 a.m.

The PRESIDING OFFICER. The majority leader.

Mr. REID. I ask for the yeas and nays on my motion.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The question is on agreeing to the motion.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD) is necessarily absent.

Mr. KYL. The following Senators are necessarily absent: the Senator from Wyoming (Mr. ENZI) and the Senator from Georgia (Mr. CHAMBLISS).

The PRESIDING OFFICER (Mr. BEGICH). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 59, nays 38, as follows:

[Rollcall Vote No. 380 Leg.]

SMALL BUSINESS ADMINISTRATION

MARIE COLLINS JOHNS, OF THE DISTRICT OF COLUMBIA, TO BE DEPUTY ADMINISTRATOR OF THE SMALL BUSINESS ADMINISTRATION, VICE JOVITA CARRANZA, RESIGNED.

EXTENSIONS OF REMARKS

HONORING ROSE KAUFMAN

HON. NANCY PELOSI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Ms. PELOSI. Madam Speaker, I rise today to honor the life of an extraordinary wife, mother, grandmother, and artist, Rose Kaufman.

The Pelosi family was blessed to be forever joined to the Kaufman family when our daughter Christine married Rose and Phil's son, Peter. Their wedding brought us all closer together and made us a single family and dear friends.

Rose was a beautiful person inside and out. I enjoyed listening to her warm, witty insights about people and her career in the arts. She was an actor and a screenwriter; a creative force and an active member of the San Francisco community. She was full of passion and spirit, brimming with ideas, committed to artistic excellence and the rich culture of our City and our nation.

Her remarkable story brought her together with Philip, her husband of 51 years. They shared a love of film and art in all forms. They collaborated on screenplays and build a warm, welcoming home for friends and family. Their partnership began as filmmakers, as professional peers; it transformed into a love story—one that stretched from their work on Phil's first film through her courageous battle with cancer in recent years.

The memories of Rose Kaufman will be ones of joy, happiness, optimism and creativity. Our whole family mourns Rose's passing, and will be reminded of her fun-loving spirit in the laughter of Octavio and Isabella. We will long remember her warmth, her vibrant personality, her commitment to those she loved, and her enduring contributions to those who loved her.

PERSONAL EXPLANATION

HON. DAVID G. REICHERT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. REICHERT. Madam Speaker, as indicated in the Leave of Absence request granted by the House of Representatives, I was not in attendance for votes on Tuesday, December 8, 2009, so that I could support my constituents, the law enforcement community, and the residents of the Pacific northwest at a memorial service to mourn the tragic loss of four Lakewood Police officers.

Were I in attendance, I would have voted in favor of the Motion to Instruct Conferees on H.R. 3288, rollcall Vote No. 931; H. Con. Res. 199, rollcall Vote No. 932; H. Con. Res. 206,

rollcall Vote No. 933; H. Res. 940, rollcall Vote No. 934; H. Res. 845, rollcall Vote No. 935; H.R. 2278, rollcall Vote No. 936; H. Res. 915, rollcall Vote No. 937; and H. Res. 907, rollcall Vote No. 938.

HONORING THE 65TH ANNIVERSARY OF THE BATTLE OF THE BULGE

HON. JOE SESTAK

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SESTAK. Madam Speaker, December 16, 2009 marks the 65th Anniversary of the Battle of the Bulge. On this day 65 years ago, German forces launched the Ardennes Offensive against American and Allied Forces in Belgium, Luxembourg, and Germany. The Battle of the Bulge, which lasted 40 days, represents one of the greatest displays of valor, honor, and perseverance in American military history. It also marked the beginning of the end of World War II.

One week into this historic battle, commanding officer General Anthony McAuliffe was approached by Colonel Harper with a note from Germany's command asking for an "honorable surrender" by American forces. When General McAuliffe was read the note, he laughed and exclaimed, "Us surrender? Aw, nuts!" He then realized that a reply was in order, and began to ask his staff what he should say. Lieutenant General Harry Kinnard spoke up, saying "That first remark of yours would be hard to beat." "What do you mean?" asked McAuliffe. "Sir, you said 'Nuts'." replied the Lieutenant General. And that was the answer that McAuliffe gave back to the Germans; Nuts.

Surrender was never an option for our boys. Despite being outnumbered and outgunned at the onset of the battle, the Allied Forces refused to yield. Even when they were forced to retreat to Bastogne in the face of an overwhelming German force, the objective remained the same: stop Hitler's army, whatever it takes.

According to the Department of Defense, American forces suffered almost 90,000 casualties during the battle, including 19,000 killed, 47,500 wounded and 23,000 missing. It is our duty to honor those lost in battle, and to acknowledge the sacrifice they made—the ultimate sacrifice—in defense of our freedom and security. These men were not expecting combat. In fact, the area they were defending had been considered a "quiet sector". As the German Forces advanced, neither they nor their officers were aware of the impending attack. Hitler's army confronted them with half a million troops, 1,800 tanks, and thousands of guns, yet our men prevailed.

In this way, the Battle of the Bulge serves as both a legacy and a precedent. Its legacy

is that of the largest land battle in our Army's history and the turning point of World War II. Its precedent is the model it provides, even today, for our men and women in combat. During my 31 years of service in the Navy, I witnessed acts of extraordinary bravery and resolve among the men and women under my command. As a Vice Admiral, I was honored to serve with the finest sailors that our country has to offer and witness these men and women perform their duties with the same purpose and spirit that led the Allied Forces to victory 65 years ago.

This past August, I was honored with the opportunity to welcome the 83rd Infantry Division of World War II to my District. Many of these men served in the Battle of the Bulge, and it was with tremendous gratitude and respect that I addressed them, shared my own experiences as a Veteran, and fielded questions. As the son of a Navy Captain who served in the War, I have an understanding of the sacrifices these men made to serve their country, including the years they spent away from home and family. I cannot begin to express how grateful I am to these men and the deep appreciation for all they have done to defend the democratic principles of this nation.

It is with humility and a strong sense of obligation that I ask us to recognize the Allied Forces' victory at the Battle of the Bulge in late January, 1945 and the men who made that victory possible.

RECOGNIZING THE CAREER OF PHIL URBAN

HON. PATRICK J. TIBERI

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. TIBERI. Madam Speaker, I am extremely pleased to honor the work of Phil Urban, on the occasion of his retirement as President and CEO from Grange Insurance.

Our nation has always been blessed by the many individuals, who through their innovation and drive led a successful business that impacted a community and its people. Motivated by an unceasing spirit, these entrepreneurs built this great country through their work and accomplishments. Today, the tremendous strength of America and individual communities like Central Ohio are still sustained through the passion and vitality of these dedicated people. Therefore, those who contribute to this heritage deserve to be honored for their service.

As president and chief executive officer, Phil Urban directed Grange Insurance to the heights of its industry, becoming a standout-provider in a crowded market. Phil's unparalleled focus on his craft and drive to succeed helped lead Grange to numerous industry awards and unprecedented profits. Yet, profits

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

cannot solely capture Phil's legacy in our community. Since announcing his retirement earlier this year, Phil has been inundated with an outpouring of affection and praise by his peers and the entire Grange family, all of which can surely attest to the impact he made in his position. The respect he showed for his over 1,500 Central Ohio employees is well-known and is a part of why Grange has become a company emulated and respected by many. Additionally, the weight Phil placed on corporate responsibility led Grange to give millions of dollars back to greater Columbus, leaving a legacy for Phil that will stand for years to come.

Through such distinction and service to his company and to Columbus, Phil stands as a pillar of our community. I am very pleased to thank him for all he has done for Central Ohio.

I offer my congratulations to Phil Urban for a career spent in service. I hope the spirit he daily brings forth in his life and work continues to inspire his friends and co-workers for years to come.

CELEBRATING THE 191ST ANNIVERSARY OF THE STATE OF ILLINOIS

HON. DEBORAH L. HALVORSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mrs. HALVORSON. Madam Speaker, today I rise to recognize a great day in American history. On December 3, 1818 Illinois joined the United States of America. This month marks the 191st anniversary of this event. I join over 12 million Illinoisans in celebrating our great state's inclusion in the Union.

For nearly two centuries, Illinois has occupied an important position within our country. From Illinois, great, transformative leaders have risen to national prominence. In 1830, our 16th President, Abraham Lincoln, moved to Illinois where he practiced law in Springfield and served in our state legislature and the U.S. House of Representatives before winning the presidency in 1860. It was in Illinois where Lincoln and foe, Senator Stephen Douglas, debated the issue of slavery, the first of which was in Ottawa. Lincoln proclaimed that, "A house divided against itself cannot stand." It was Illinois that answered Lincoln's call by being the first state to ratify the Thirteenth Amendment to the Constitution, abolishing slavery. Today, we are proud to have another Illinoisan following Lincoln's legacy in the White House, our 44th President Barack Obama, with whom I served in Springfield and who served our great state in the U.S. Senate.

Illinois is home to a wide array of historic sites testifying to its important role in our nation's history. From Chicago's Museum of Science and Industry, a physical remnant of the 1893 World's Fair, to the Cahokia Mounds, a pre-Columbian settlement in the southern part of the state, Illinois bears many of our nation's historical riches.

In addition, Illinois serves as one of the leaders in our nation's economy. Illinois is at the forefront of agriculture. It is the number two producer of corn, number one producer of

soybeans in the United States, and a major producer of pork. Illinois is one of our nation's leading transportation hubs, which contribute greatly to our local economy. My district is home to the largest intermodal in the country, which provides thousands of local jobs. Many large corporations call Illinois home, such as State Farm Insurance of Bloomington, which is a major employer in Illinois' 11th Congressional District. Many motion pictures have been filmed in Illinois including the classic film *Blues Brothers*.

Within Illinois, communities from large urban cities to small rural villages come together to form the fabric of the fifth most populous state in the nation. In my own 11th District, I am proud to serve communities ranging from Peotone, in the near Chicago, to smaller communities, such as Streator and Princeton. In my district and across the state, farmers and urban professionals, teachers and firefighters all compose the diverse body of Americans known as Illinoisans. I am proud to join them today in celebrating our great state.

LEE DERROUGH

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. GRAVES. Madam Speaker, it is with great pride and pleasure that I rise today to recognize the outstanding service and leadership of Lee Derrough, on the occasion of his retirement as CEO of Hunt Midwest Enterprises Inc.

Lee is a 1967 journalism graduate of the University of Kansas. Lee faithfully served forty-two years with the Hunt Organization. He began his career as a public relations assistant for the Kansas City Chiefs. Lee then became the Marketing Director for Worlds of Fun, before becoming General Manager of the park in 1974. It was also Lee's idea to develop Oceans of Fun, which, with Worlds of Fun, became the largest tourist attraction for Kansas City, providing hundreds of jobs and opportunities for young people throughout the metropolitan community. Many of the people who worked for Lee have gone on to be major contributors to our community in their roles as lawyers, judges, doctors, teachers and business associates.

Under Lee's leadership, he grew and developed more than 6,000 acres of surface commercial and residential real estate for Hunt Midwest Real Estate Development, Inc. He also served on the Boards of Directors for the Greater Kansas City Chamber Commerce, the Kansas City Chiefs Football Club, the Civic Council of Kansas City, the Clay County EDC, the Missouri Transportation Alliance. Lee also served as the Chairman of the Board for the Economic Development Corporation of Kansas City and the Convention and Visitors Bureau of Greater Kansas City.

Madam Speaker, I ask my colleagues to join with me in commending Lee Derrough for his dedicated service to the people of Kansas City, Missouri and the Hunt Midwest Organization. I know Lee's colleagues, family and friends join with me in thanking him for his

commitment to others and wishing him happiness and good health in his retirement.

PERSONAL EXPLANATION

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. GERLACH. Madam Speaker, unfortunately, on Monday, December 14, 2009, I missed two recorded votes on the House floor. Had I been present, I would have voted YEA on rollcall 969 and YEA on rollcall 970.

WES BANNISTER RECOGNITION

HON. DANA ROHRABACHER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. ROHRABACHER. Madam Speaker, I would like to bring to the attention of my colleagues the following press release, which tells the story of Wes Bannister, who succumbed to cancer earlier this month. As the first Vice President of the Orange County Water District, he advised me on water issues for many years, and gave me his personal direction. He was a leader in the community and the state, and he will be missed. I know firsthand that his contributions will be enjoyed by Orange Countians for generations to come.

WATER INDUSTRY LOSES A GREAT LEADER

THE ORANGE COUNTY WATER DISTRICT BOARD AND STAFF MOURNS THE UNTIMELY LOSS OF FIRST VICE PRESIDENT, DIRECTOR WES BANNISTER

FOUNTAIN VALLEY, CA (Dec. 11, 2009).—In the late hours of December 10, 2009, the water world and Orange County lost an important trailblazer and public servant, Wesley "Wes" Mastin Bannister lost his battle with cancer. Wes Bannister was elected to the Orange County Water District (OCWD) Board of Directors in 1991 representing Division 6, which includes Fountain Valley, Huntington Beach and parts of Westminster. He was re-elected to four consecutive four-year terms in 1996, 2001, 2004 and 2008. He was elected in 2007 and 2008 by his fellow board members to serve as the District's 1st Vice President.

"The Board and staff of the Orange County Water District have lost an incredible leader who lived and breathed water," stated OCWD Board President Stephen R. Sheldon. "Those who had the privilege of working with Wes know that he had the tenacity to get to the core of critical issues and drive and inspire others to do what was right and economically sound. He stood true to his principles and convictions, like no other person. We are truly sorry for his family's great loss."

During his tenure as a Board Member, the District celebrated many important achievements including the building and operation of the Groundwater Replenishment (GWR) System, the largest water purification project of its kind in the world, and a state-of-the-art Advanced Water Quality Assurance Laboratory.

In addition to serving on the OCWD Board, in 1993 Director Bannister was appointed Director to the Metropolitan Water District of Southern California (MWD) representing the

Municipal Water District of Orange County. In 2004, Director Bannister was elected as Chair of the MWD Board of Directors, for which he served until October 31, 2006.

"Wes was a principled leader and committed advocate for Orange County and its water interests who also worked faithfully to address the water challenges facing the entire southern California region," said Wayne Clark, President of the Municipal Water District of Orange County (MWDOC). "We were honored to have had Wes represent MWDOC as one of our appointed representatives to the Metropolitan Water District of Southern California and we are going to miss our good friend."

Director Bannister devoted over 23 years to serving the communities of Orange County. He served on the Huntington Beach City Council from 1986 to 1990, including as Mayor in 1989. "I had the distinct honor of serving with Wes on the City Council", stated Assemblyman Jim Silva (R-Huntington Beach). "If it weren't for his encouragement and support, I would not be serving in the Assembly today. Wes was invaluable to me and many of my colleagues when it came to solving state water issues. He was a mentor and a true friend who genuinely cared about the people in his community and gave of his time and energy to making a difference."

Director Bannister was also the Republican nominee for California Insurance Commissioner in 1990 and was nominated to the Electoral College by President Bush in that same year. He also served on the West Orange County Board from 1986 to 1990 and on the Orange County Sanitation District Board of Directors, District 11, from 1988 to 1990.

In 1986, Director Bannister was appointed by the Governor to the California FAIR Plan Board of Governors and continued to serve on this Board until his untimely death. Since 1993, Director Bannister had represented OCWD on the Board of Directors of the Association of California Water Agencies Joint Powers Insurance Authority (ACWA-JPIA). While serving, the Board elected him to the Governing Committee and to serve two years as its Vice President. Following his two-year term, the Board elected him President in 2005 for a three-year term.

Active in local affairs, Director Bannister served on the boards of the Boys and Girls Club and YMCA, as Charter President of the Huntington Beach Sunrise Rotary Club and as an advisor to the Huntington Beach Search and Rescue Post 536.

Director Bannister was born in Houston, Texas in 1936. He and his wife Elizabeth (Betty) Ann Rogers Bannister were married at Fort Sill in Oklahoma in 1959 where he was stationed and recently celebrated their 50th wedding anniversary. Director Bannister and his wife Betty have lived in Huntington Beach since 1969. Together, the Bannisters welcomed three children Catherine (Cathy) Ann, Alice (Lisa) Elizabeth and Douglas (Doug) Mastin.

In addition to devoting much of his time to serving the communities of Orange County, Director Bannister founded Bannister and Associates Insurance Agency in 1974, from which he retired in 2003. The family business continues to flourish under the leadership of his two surviving children Alice (Lisa) Elizabeth Bannister and Douglas (Doug) Mastin Bannister. Director Bannister is also survived by two grandchildren Kaitlyn Michelle and Brent Douglas.

RECOGNIZING AND COMMENDING THE 200TH ANNIVERSARY OF BIBLICA

HON. DOUG LAMBORN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. LAMBORN. Madam Speaker, I rise today to recognize and commend Biblica for the contributions they have made to our country and join with them in the celebration of their 200th anniversary.

On December 4, 1809, a small group of concerned citizens met in lower Manhattan to discuss how to make the Bible available to the residents of the city and formed the New York Bible Society, beginning an organization that has been woven into the fabric of United States culture for 200 years.

The New York Bible Society provided Scripture for members of the United States Armed Forces in each conflict, foreign and domestic, since the War of 1812, and in partnership with the United States military chaplaincy, distributed more than 1,000,000 Bibles to members of the Armed Forces looking for courage, guidance, and comfort.

When the gates of Ellis Island opened in 1890, the New York Bible Society greeted new immigrants with a copy of Scripture in their native language, and over the 60 years that followed, provided an average of 160,000 copies of Scripture each year to immigrants.

In 1962, John Glenn lifted off into space with a Bible he received from the New York Bible Society. In 1968, the New York Bible Society sponsored the Committee on Bible Translation, a group responsible for creating the New International Version, which is now the most widely distributed, contemporary English version in the world, with more than 300,000,000 copies in circulation.

The New York Bible Society moved to Colorado Springs, Colorado in 1988 and became the International Bible Society.

Following the 9/11 terrorist attacks, the International Bible Society distributed more than 800,000 copies of Scripture to those seeking hope and comfort during one of the darkest moments in United States history. The International Bible Society also provided Scripture to disaster survivors worldwide, including victims of Hurricane Katrina and the 2004 Indian Ocean tsunami.

The International Bible Society merged with Living Bibles International and Send the Light and today operates as Biblica.

Biblica is one of the largest distributors of Bibles and biblical resources in the world, operates in 54 countries, and has translated the Bible into more than 100 languages. Biblica is the leading provider of Bible translations on the Internet, providing the Bible in 29 languages to more than 100,000,000 Internet users annually.

It is an honor to recognize Biblica as an integral part of our nation's history and I commend them for the contributions they have made to the United States and around the world.

HONORING THE LIFE OF MARY MADELEINE SEGAL HALL

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HALL of Texas. Madam Speaker, I rise today to honor the life of Mary Madeleine Segal Hall, a remarkable woman and personal friend who passed away on October 6, 2009 at the age of 85.

Mary was born on July 18, 1924 in Jefferson, Texas to Margaret Manning and Maurice Segal. She graduated from Jefferson High School in 1940 and went on to attend the College of Marshall, now East Texas Baptist University, where she met her future husband of 48 years, the late Sam B. Hall, Jr., a former member of the U.S. House of Representatives and my good friend.

Throughout her 85 years, Mary was a dedicated member of the community. Her civic commitment was evidenced by the many community organizations in which she was involved. She was a charter member of Marshall Symphony League, served on the Boards of Marshall Symphony Society and the Starr Home, active in Belle Maison, Club 25 and on the advisory board of Historical Commission Advisory Council. During her husband's Congressional years, she was active in the Congressional Wives Club, Texas Breakfast Club, and Texas State Society. She loved her life in Washington where she would give tours of the White House on a regular basis. In 1977, she and her husband were named the first recipients of the J. Wesley Smith Award given annually by East Texas Baptist University for outstanding achievements.

Mary was a devoted Christian and served as a member of Eastern Hills Church of Christ in Marshall. She is survived by three daughters and sons-in-law, Becky and W.F. Palmer, Amanda and Tom Wynn, and Sandra and Don Bodenhamer; five grandchildren, and five great-grandchildren. She was a very loving, wonderful mother, grandmother, and great-grandmother; she was someone you wanted to emulate. Mary was a wonderful wife to her husband and wherever he was, she loved being there.

Madam Speaker, it gives me great pleasure to honor the life, accomplishments, and memory of Mrs. Mary Madeleine Segal Hall. Her contributions will be greatly missed but her kindness and service will not be forgotten.

INTRODUCTION OF THE UNITED STATES WAR BONDS ACT OF 2009

HON. KENDRICK B. MEEK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. MEEK of Florida. Madam Speaker, I rise today to introduce before the House of Representatives, the War Bonds Act of 2009. War bonds are a cost-effective way to reduce our dependence on foreign creditors and create an outlet for Americans to express their patriotism and support for our servicemembers as

well as the security mission for which they are deployed.

To be sure, thousands of Americans have made tremendous sacrifices over the course of this war. Members of the military, their families, and their friends have gone above and beyond the call of duty, and we must never take their service for granted. Many of us have begun shopping for our friends and families this holiday season, while a relatively small group of families are preparing to send their loved ones off to battle.

We have an opportunity to bridge that disconnection. We have an opportunity to open our wallets and provide gifts, big or small, to our troops. These funds will go toward more than war machinery, but to clothing, feeding, securing, and providing medical services for our service men and women abroad. It will allow them the means to make quick work of their mission and to return home safely to their families. The War Bonds Act of 2009 will allow Americans to show their support for the troops even if they are wary about the war itself.

We also need to responsibly finance the increase in troop levels rather than continuing deficit spending for the mission. Each soldier, sailor, airman, and marine that we send abroad costs \$1 million per deployment. A 34,000 person troop increase could raise our Afghanistan tab by some \$40 billion per year, affecting our ability to invest domestically and to rebuild our military from the wear of the Iraq war. In past wars, Congress has raised taxes to fund most of our fighting, but since 9/11 the war bills have been piling up. Our engagements in the Middle East have been financed primarily by debt, money borrowed from foreign countries. In fact, nearly \$3.5 trillion—46 percent of U.S. debt—is held by foreign investors.

War bonds allow us to borrow from ourselves, rather than other countries. United States savings bonds are considered some of the safest investments in the world. They are available in predetermined denominations and mature over a period of time while accruing interest. After a number of years, the owner of the bond can collect the face value cost of the bond plus interest. All U.S. savings bonds are backed by the full faith and credit of the United States Government.

The legislation I am introducing today will allow American citizens to do our part without being required to do so through taxation. The legislation will authorize the Treasury to issue and market war bonds to the American people to help finance the wars in Afghanistan and Iraq.

I believe that we need shared sacrifice and fiscal discipline in financing the war effort. Where we have sacrificed our future with billions of dollars of deficit spending on the war, we can begin bringing down that deficit with much smaller individual sacrifices now.

The U.S. War Bonds Act of 2009 finds a precedent in World War II savings bonds. From May 1, 1941, through December 1945, the War Finance Division and its predecessors were responsible for the sale of nearly \$186 billion worth of government securities. Of this, more than \$54 billion was in the form of war savings bonds.

I believe that the same patriotism is alive and well today, and that as a Nation and a

people we have not lost the will to make collective sacrifices for the greater good. The men and women in the U.S. military are fighting year-round in faraway places, with their sacrifices and those of their families beyond comprehension. I believe that in that same spirit, Americans will be able to use war bonds to offer a token of respect, admiration, and support for those in uniform who show the same for us every day of their lives.

A BILL TO DIRECT THE PRESIDENT TO TRANSMIT TO CONGRESS A REPORT ON ANTI-AMERICAN INCITEMENT TO VIOLENCE IN THE MIDDLE EAST

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. KUCINICH. Madam Speaker, H.R. 2278 condemns the use by groups designated as Foreign Terrorist Organizations in the Middle East of television programs to incite anti-American violence.

I do not condone the use of television programming to promote anti-American sentiment in the Middle East; I strongly object to it. Similarly, I strongly condemn ongoing policies that seek to punish civilian populations in an effort to undermine political leadership in their respective countries. However, if we want to stop anti-American incitement in the Middle East, we must end our military occupation of Iraq and Afghanistan, we must put an end to the drone attacks in Pakistan and we must end the blockade of Gaza.

Our continued occupation fuels the insurgency in Iraq and the Taliban in Afghanistan. Just this week, over 100 people have been killed and almost 200 wounded in a series of bombings in Baghdad, resulting in one of the deadliest attacks in Iraq this year. President Obama accepted his Nobel Peace Prize as over 16,000 American troops were readying for deployment as part of our military escalation in Afghanistan.

More unmanned drone attacks in Pakistan have been authorized by President Obama during his first three months in office than President Bush ordered during his entire presidency. Predator drones have killed hundreds of innocent civilians and have spurred significant anti-American sentiment. The recent revelations that the C.I.A. is running the predator drone program show that we are deploying an extraordinary use of lethal force in a country we are not at war with.

On the eve of the one-year anniversary of Operation Cast Lead, the people of Gaza continue to suffer immeasurably under the U.S. imposed blockade, living in tents next to the remains of their homes. Not one house has been rebuilt and not one pane of glass has been allowed in. Ninety-five percent of the drinking water is unfit for human consumption as the man-made humanitarian crisis continues. The United States and our closest ally, Israel, have a responsibility to uphold international humanitarian and international human rights law, both of which are violated by this blockade.

A resolution condemning television programming by designated Foreign Terrorist Organizations does not make our condemnation of terrorist acts more clear. Furthermore, this resolution does nothing to bring the United States and our friends in the Middle East closer to peace and stability. Anti-American sentiment in the Middle East can only be solved through diplomatic means and through the consistent application of peaceful solutions that ensure the security and basic human rights of all people.

HONORING THE LIFE OF JAMES ROBERT PAXTON

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HALL of Texas. Madam Speaker, I rise today to honor the life of James Robert Paxton, a veteran, civic servant, and personal friend who passed away August 2, 2009 at the age of 86.

"Jim Bob," as he was known to his friends and family, was born September 15, 1923. The youngest child of Eugene Stratton Paxton and Ella Clark Paxton, "Jim Bob" grew up in Elkhart, Texas before attending Baylor University. Deciding to put his education on hold, "Jim Bob" enlisted in the United States Navy as an officer where he taught airplane recognition in World War II. His service in the U.S. Navy took him many places, including his arrival on the Japanese island of Nagasaki to help liberate American and Allied prisoners the day after the atom bomb was dropped.

After World War II, "Jim Bob" returned to Baylor University to complete his undergraduate degree before attending law school at Southern Methodist University in Dallas, Texas. Mr. Paxton then served two terms in the Texas Legislature, where he met and fell in love with his wife, Doris, whom he married in 1954. The couple moved to Palestine where they lived and raised their family, and where Mr. Paxton practiced law for more than fifty years. Among his many outstanding achievements, "Jim Bob" was appointed by Governor Dolph Brisco to serve on the Texas Parks and Wildlife Commission.

As evident through his military and civic service, Mr. Paxton was not only a leader in his home as a loving husband and father, but a leader in his community and country. He was known as a man of faith, who lived his life in devotion to God, and he will be missed by those who knew him.

He is survived by his wife of 55 years, Doris Lee Hall Paxton, their five daughters, and numerous grandchildren, nieces, nephews, and friends. Madam Speaker, I ask those here today to join me in remembrance of this great American, James Robert Paxton.

HONORING U.S. MARINE CORPS
VETERAN JOHN D. DAY

HON. ERIC J.J. MASSA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. MASSA. Madam Speaker, I rise today to laud the lifelong achievements, patriotism and honorable milita service to our country by U.S. Marine Corps veteran John D. Day of Hornell, New York. It is a distinct honor to submit his name before the United States House of Representatives for his numerous contributions to the 29th Congressional District and a grateful Nation.

A graduate of Hornell High School, John went on to study Criminal Justice at Finger Lakes Community College and Corning Community College where he balanced his academic studies with his participation on the collegiate baseball teams. After completing his studies, John heeded the call of duty and enlisted with the U.S. Marine Corps where he served until his honorable discharge in 2000, after 4 years of service.

John then embarked on a career path of public service as a member of various, local police departments where he achieved the rank of Sergeant while simultaneously working towards the completion of his associates degree.

As a training officer, John was credited with designing and implementing numerous programs to better train officers and to improve job performance. Tragically, while en route to work at the Bath VA Police Department on October 27, 2008, John was killed when his vehicle was hit by a drunk driver.

Since the accident, John was posthumously promoted to Lieutenant and was honored in April as the United States Department of Veteran Affairs Police Officer of the Year at the Annual Law Enforcement Banquet. John was also cited by the VA National Central Office for his perfect record maintaining and completing all training records. In addition, the last two classes at the Federal Police Officer Academy at Little Rock, Arkansas, dedicated their graduation and hard work to the way John performed his duties at work and the professionalism he demonstrated.

On behalf of the United States House of Representatives, it is my honor to recognize Officer John D. Day's contributions to his country and community.

GRATITUDE FOR THE SERVICE OF
KAREN WILKINSON

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. CONYERS. Madam Speaker, the Judiciary Committee's Crime, Terrorism, and Homeland Security Subcommittee Chairman ROBERT C. "BOBBY" SCOTT and I would like to take this opportunity to thank Karen Wilkinson for her work with the Committee for the past 2 years.

Karen came to us as a detailee from the Administrative Office of the United States

Courts. At the end of December, Karen will return to Phoenix, Arizona to continue her work as an Assistant Federal Public Defender representing indigent clients in federal criminal cases, where she worked for eight years before coming to the Committee. Prior to that, she clerked for the U.S. District Court for Arizona and then joined the law firm of Brown & Bain. Karen graduated magna cum laude from Arizona State University Law School, received a Masters in Business Administration from NOVA University and her Bachelor of Science degree from the University of Michigan.

Karen's accomplishments during her tenure with the Committee include a number of bills that are very important to improving our country's criminal justice system. During the 111th Congress, she was responsible for guiding several legislative measures to approval on the floor of the House of Representatives, including: H.R. 448, the Elder Abuse Victims Act of 2009; H.R. 632, the National Silver Alert Act of 2009; H.R. 748, CAMPUS Safety Act of 2009; H.R. 908, the Missing Alzheimer's Disease Patient Alert Program Reauthorization Act of 2009; H.R. 1333, which amends chapter 40 of title 18 of the United States Code to exempt the transportation, shipment, receipt, or importation of explosive materials for delivery to a federally recognized Indian tribes; H.R. 1727, the Managing Arson Through Criminal History, MATCH, Act; H.R. 1933, a Child is Missing Alert and Recovery Center Act; S. 1289, the Foreign Evidence Request Efficiency Act of 2009, and H.R. 2661, the Court Security Enhancement Act of 2009.

In addition, she is shepherding several very important bills pending before the Judiciary Committee, such as: H.R. 503, the Prevention of Equine Cruelty Act of 2009; H.R. 3327, the Ramos-Compean Justice Act of 2009; H.R. 2289, the Juvenile Justice Accountability and Improvement Act of 2009; H.R. 2095, the Restitution for the Exonerated Act; H.R. 1149, the Child Protection Reauthorization Act of 2009 and H.R. 1422, the Adam Walsh Child Protection and Safety Reauthorization Act of 2009. Karen is also developing the Literacy Education and Rehabilitation Act, LERA, and the Department of Justice Reauthorization Act, legislation that would require a criminal defense representative to be appointed to the United States Sentencing Commission, as well as bills that would correct the firearm recidivist sentencing guidelines and the computation of good time credit in federal prison system.

We would like to thank the Administrative Office of Courts and the Federal Public Defender's Office of Phoenix for their generosity in allowing such a dedicated, responsible, and committed person to become such an integral part of our team. We are deeply grateful to Karen for her service, professionalism, and friendship during the past 2 years. She possesses that rare balance of humility, warmth, wit, and passion without a trace of ego, and she will be sorely missed. We wish her the best of luck and give her our thanks.

PAYING TRIBUTE TO THE LIFE OF
JACK GAINES THAXTON

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HALL of Texas. Madam Speaker, I rise today to pay tribute to the life of Jack Gaines Thaxton who passed away August 7, 2009 at the age of 90. A lifelong Texan, Mr. Thaxton was born April 23, 1919 in Kaufman, Texas to Estelle Gaines Thaxton and John W. Thaxton. He spent his childhood and adolescent years in Rockwall, Texas, graduating from high school in 1937. Even in his early years, he demonstrated character qualities which would be associated with his name throughout his life. He dedicated himself to many activities in school including football, which he excelled in, baseball, and tennis, also taking pride in his perfect attendance record.

Upon graduating, Mr. Thaxton worked for three years as assistant manager for the Boyer Drug Company in Rockwall before volunteering for service in the Texas National Guard, later serving with the 112th Calvary. During World War II, he campaigned in the Pacific Theater and in the liberation of the Southern Philippines and Luzon. After contracting malaria and hepatitis, Mr. Thaxton spent several months recovering in an Army hospital before being released in 1945. Mr. Thaxton received several decorations, including five bronze stars for meritorious service.

After he returned to Texas, Mr. Thaxton enrolled at the University of Texas in Austin, Texas, where he earned a Bachelor Degree in Business Administration in 1949. Shortly after graduating, he married Marguerite Ruth Davis and the couple moved to Corpus Christi where he worked for H.E.B Grocery Company for thirty years. Marguerite passed away after twenty-two years of marriage, and Mr. Thaxton later remarried to Marjorie N. Thaxton.

Mr. Thaxton decided to combine his passion for sports and education when he established a golf scholarship at his alma mater, Rockwall High School, the proceeds of which help students further their academic goals.

He was a faithful member of the First United Methodist Church, a Mason, and later a member of the Al Amin Shrine Temple. He is survived by his son, James Eric Thaxton and his wife Carol Arnold Thaxton, along with three grandchildren.

Madam Speaker, I ask those present today to join me in honoring the life of this American veteran and dedicated American citizen, Mr. Jack Gaines Thaxton.

IN MEMORY OF WILLIAM POPE
"BILLY" LANGDALE, SR.

HON. SANFORD D. BISHOP, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. BISHOP of Georgia. Madam Speaker, I rise today to honor the memory of William Pope "Billy" Langdale, Sr., a man I was proud

to call my friend and constituent. An accomplished public servant who was devoted to his community, state, country, his family, and friends, Billy passed away on December 12, 2009, at the age of 88.

Billy lived his entire life in Valdosta in Lowndes County, Georgia. He graduated from Valdosta High School in 1938 where he was a proud member of the Valdosta Wildcat football team. He went on to attend the University of Georgia, where he played football for the Bulldogs before enlisting in the United States Marine Corps in 1942. He served in the Marines for 10 years and was awarded a Bronze Star before retiring at the rank of Lieutenant Colonel.

His public career began in 1960, when he was elected as chairman to the Lowndes County Board of Commissioners, where he served for 16 years. He then served as Chairman of the Georgia Department of Transportation board for 2 years before becoming the Second Congressional District representative on the DOT board, a post he held for more than 25 years. He was instrumental in numerous local transportation projects, from highway improvements to the six-laning of Interstate 75.

Billy fittingly received many accolades for his public service, including being named as one of Georgia Trend magazine's "100 Most Influential Georgians" as well as South Georgia Business magazine's list of the "Most Influential South Georgians." A highway in my district is named the "Billy Langdale Highway" in his honor. Upon his retirement in 2008, both the Georgia State Senate and the Georgia House of Representatives passed resolutions thanking Billy for his many years of service to the state.

Madam Speaker, the State of Georgia, especially the Second Congressional District, and our Nation have been truly blessed to have benefited from the tremendous leadership of Billy Langdale. He will be remembered for the compassion he spread continuously throughout his life, his great humor, his never ending modesty, his intense desire to help others, and his unwavering love for his family.

A TRIBUTE TO BOB HEFT

HON. DAVE CAMP

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. CAMP. Madam Speaker, I rise today to pay tribute to and remember the life of an outstanding individual, Mr. Robert G. Heft of Saginaw, MI, who I am sad to report passed away this week.

Mr. Heft, who liked to be called simply "Bob," was a man whose innovation and patriotism created a legacy that reaches even into outer space.

Bob was the man behind a true representation of patriotism, the symbol of our Nation that flies proudly today above this very building, across the country, around the world, and yes, is even on the moon.

Using his mother's sewing machine and a hot iron, Bob created the first fifty-star flag as an assignment for school. His teacher origi-

nally gave him a B minus, so they made a deal: if Bob's design was accepted by Congress, he would change the grade to an A.

So Bob sent his prototype to his Governor and Congressman.

Then, one morning in 1958, Bob received a very special phone call. On the other end of the line was President Dwight D. Eisenhower, personally calling the high schooler to tell him that Bob's version of the American Flag was picked by the President to replace the 48-star flag as the official design for our recently-expanded Nation. Bob's flag was chosen from more than 190,000 entries submitted.

Bob was there with the President on July 4, 1960, when the flag was flown for the first time. What began as a history project later became the longest-serving flag in American History, an American icon, and the true face of freedom. Bob's work is an inspiration to our students that each morning recite the pledge of allegiance to the flag of the United States of America.

And yes, it was his flag that just a few years later was launched and planted on the Moon, a perpetual reminder that our citizens' innovative talents know no bounds.

Bob's service to our Nation did not end there though. He was a longtime Professor at Northwest State Community College in Archbold, Ohio. After his retirement, Bob served as mayor of Napoleon, Ohio for 14 years, becoming the longest serving mayor in the town's history. During this time, Bob also became a popular motivational speaker, going to schools and veterans' groups all over the country to tell his unique stories. The many that met him said that Bob emanated a true warmth and love for his country.

I wish to extend my sincere thanks to Bob Heft, a true patriot throughout his life. I also wish to extend my deepest condolences to his family and friends. Though most citizens may have never met him, all have been touched by the symbol of American freedom that he created, and has become part of the integral fabric of this country.

EARMARK DECLARATION

HON. ZACH WAMP

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. WAMP. Madam Speaker, as a leader on earmark reform, I am committed to protecting taxpayers' money and providing greater transparency and a fully accountable process. H.R. 3326, Department of Defense and Related Agencies Appropriations Act, 2010 contains the following funding:

Requesting Member: Rep. ZACH WAMP

Account: Research, Development, Test And Evaluation, Army—Medical Technology
Legal Name Requesting Entity: Department of Orthopedic Surgery, University of Tennessee College of Medicine Chattanooga

Address: 975 East Third Street Chattanooga, TN 37403

Description of Request: The University of Tennessee College of Medicine Chattanooga requested funding for its work with artificial bone implants and grafts for American sol-

diers, airmen, sailors and marines who have lost limbs in combat. This research will greatly enhance the lives of injured service members giving them more independence and allow them to live more productive and fulfilling lives. The University of Tennessee College of Medicine Chattanooga receives \$1,000,000 for this project.

Distribution of funding:

Yearly Staffing—37%

Consultative Services—9%

Scientific Material—54%

Requesting Member: Rep. ZACH WAMP

Account: Other Procurement, Army—Training Devices, Nonsystem

Legal Name Requesting Entity: Tennessee Army National Guard

Address: Houston Barracks, 3041 Sidco Drive Nashville, TN 37204

Description of Request: The Tennessee Army National Guard requested funding to purchase and maintain Combined Arms Virtual Trainers to better prepare service members for deployments to Iraq and Afghanistan. This equipment replicates virtual battlefields and allows Army National Guard soldiers to train as they will fight. Allowing Combined Arms Training within a virtual environment will save lives on the real battlefield. The Tennessee Army National Guard receives \$5,000,000 for this equipment.

Distribution of funding: Equipment, Software, & Maintenance—100%

HONORING THE LIFE OF EDWARD ALLEN POPE

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HALL of Texas. Madam Speaker, I rise today to honor the life and accomplishments of Edward Allen Pope of Amarillo and life-long resident of Dallas, who died at the age of 85 on October 29, 2009.

Ed was born October 31, 1923 to Gertrude Milam and Edward G. Pope. After graduating from Crozier Tech High School in 1942, he joined the U.S. Navy and earned the rank of Lieutenant Commander. He served during World War II and the Korean Conflict as a naval aviator. He received The China Service Medal, the National Defense Service Medal and the Naval Reserve Medal. After Naval retirement, he became an electrician for Ling, Oliver and O'Dwyer, working there until his retirement in 1989.

In December 1947, he married Virginia Shelly, and they would have celebrated 62 years together this year as man and wife. He was a great "in-law", loving Virginia's family as his own. Ed was a family man—a great father of strong faith and conviction. He was a faithful member of Christ Church in Dallas, serving on their Vestry as Junior Warden for 35 years. He loved unconditionally and he loved a good time. His rule in life was "the more the merrier" and he was the leader and planner for hunting, skiing and boating excursions and many family outings. He was an inquisitive, generous, tender-hearted, gentle man loved by all who knew him.

Ed is survived by his wife, Virginia; a brother, Norman Pope of Austin; a daughter, Janace Pope Ponder of Amarillo and her husband, David; his daughter-in-law Debby Pope; his grandchildren, Paige Garmon, Abby Mitchell, Carmen Juckett and Courtney Pope; and great grandchildren, Michael Clouse, Peyton Garmon, Madison Garmon, Shelby Garmon, Kaylee Mitchell and Jacob Juckett; as well as nieces, nephews and many close friends and other family members. He was preceded in death by his parents and his son, Joseph Pope. Madam Speaker, I ask those present today to join me in honoring the life of this great American, Edward Allen Pope.

INTRODUCTION OF THE RESOLUTION OF INQUIRY

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. WOLF. Madam Speaker, I rise today to introduce a Resolution of Inquiry directing the Attorney General to transmit to the House all information relating to the decision to dismiss an important voter intimidation case, *United States v. New Black Panther Party*. The case sought to enforce Voting Rights Act statutes against members of the New Black Panther Party that threatened Philadelphia voters—both verbally and physically—last year.

This case was inexplicably dismissed earlier this year—over the ardent objections of the career attorneys overseeing the case as well as the department's own appeal office.

I regret that Congress must resort to oversight resolutions as a means to receive information about the dismissal of this case, but the Congress and the American people have a right to know why this case was not prosecuted.

As ranking Republican member of the House Commerce-Justice-Science Appropriations Subcommittee that funds the Justice Department, I take oversight of the department very seriously.

I also strongly support voting rights protections. In 1981, I was the only member—Republican or Democrat—of the Virginia delegation in the House to vote for the Voting Rights Act and was harshly criticized by the editorial page of the *Richmond Times-Dispatch*, and when I supported its reauthorization in 2006, I was criticized again by editorial pages.

Time and again over the last year, the department has stonewalled any effort to learn about the decision to dismiss this case.

I have written Attorney General Holder on six occasions asking for an explanation for the dismissal of this case. To date, I have received no response from him.

I wrote the DOJ Inspector General to request a review of this decision. He deferred to the Office of Professional Responsibility—which reports directly to the Attorney General.

I have written the Office of Professional Responsibility seeking information on its investigation. The Office has refused to share any information.

In fact, the only response I have received—from a legislative affairs staffer—was woefully incomplete and—in places—inaccurate.

Two months ago, I met with House Judiciary Chairman CONYERS to ask for his assistance in obtaining this information, but he has yet to take any action. This is a shameful failure to provide necessary congressional oversight.

It is not only Congress that is being stonewalled by the Attorney General. The U.S. Commission on Civil Rights has repeatedly sought this same information, in fulfillment of its statutory responsibility to ensure the enforcement of civil rights law.

After being similarly rebuffed, the commission filed subpoenas with the department for this information as well as to interview the career attorneys that handled the case.

However, we understand that the Attorney General has instructed his department to ignore these subpoenas. The nation's chief law enforcement officer is forcing these career attorneys to choose between complying with the law and complying with the Attorney General's obstruction.

At least one of the attorneys has been compelled to obtain private counsel.

I urge the House Judiciary Committee to report this resolution out favorably and to demand that the Attorney General answer the questions surrounding this case.

The career attorneys and Appellate Division within the department sought to demonstrate the Federal Government's commitment to protecting voting rights by vigorously prosecuting any individual or group that seeks to undermine this right.

This House must not turn a blind eye to the Attorney General's obstruction. He has an obligation to answer the legitimate questions of the House and the Civil Rights Commission.

It is imperative that we protect the right of all Americans to vote—the sacrosanct and inalienable right of any democracy.

I submit for the record a copy of the resolution that I am introducing.

RESOLUTION

Directing the Attorney General to transmit to the House of Representatives all information in the Attorney General's possession relating to the decision to dismiss *United States v. New Black Panther Party*.

Resolved, That the Attorney General is directed to transmit to the House of Representatives, not later than 14 days after the date of adoption of this resolution, copies of any document, memo, or correspondence of the Department of Justice with regard to *United States v. New Black Panther Party*, or any portion of any such document, memo, or correspondence that refers or relates to—

(1) any department communications with regard to the case between November 5, 2008 and November 15, 2009;

(2) any communication with the defendants or the defendants' attorneys between November 5, 2008 and November 15, 2009;

(3) any communication with third-party organizations or individuals between November 5, 2008 and November 15, 2009; or

(4) any evidence with regard to the dismissal of the case.

HONORING THE LIFE OF EDDIE M. BROOKS

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HALL of Texas. Madam Speaker, I rise today in honor of the life of Mr. Eddie Brooks, a loving husband and father, veteran of the Korean War, and an American hero, who passed away August 18, 2009 at the age of 90.

Hailing from Hope, Arkansas, Mr. Brooks committed twenty years of his life in service to the United States Army, serving with the Army Medical Service, Medical Detachment, and 555th Field Artillery Battalion in the Korean War. Mr. Brooks was sent into combat in Korea with no training, but rose to the occasion, demonstrating bravery in how he handled himself and defended his comrades.

Early on in his deployment, his unit was trapped in a river bed where they were exposed to extensive shooting and grenades. Mr. Brooks was injured when one grenade got under his feet, seriously wounding one leg. Corporal Eddie M. Brooks refused evacuation, continuing to treat other wounded soldiers and assisting in their removal from the area. The United States Army Headquarters 25th Infantry Division stated, "When the unit began displacement because of increased hostile action, he drove a 2½ ton truck loaded with critical supplies to safety. Corporal Brooks' gallant and selfless devotion to duty reflects the greatest credit upon himself and the Army Medical Service." When asked about his received honors, Mr. Brooks always expressed his feeling that he was undeserving but appreciative, believing that others had sacrificed more than him.

For his military service, Mr. Brooks was awarded the Purple Heart, Silver Star, Germany Occupation Medal, United Nations Medal, Good Conduct Medal, National Defense Medal, and the Korean Service Medal.

At home, Mr. Brooks was the devoted husband to his wife of 58 years, Joyce, and the father of four daughters, Brenda, who passed away in 2005 due to illness, Debra, Charlotte, and Angela. Held in high esteem by all who knew him, he left behind a legacy of honor, service, and love. Madam Speaker, I ask those here today to join me in paying tribute to this great American hero, Mr. Eddie M. Brooks.

HONORING FRANK "PONCHO" ROBERTS

HON. KEVIN BRADY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. BRADY of Texas. Madam Speaker, I rise today to honor Frank "Poncho" Roberts, a dedicated husband, father, and community servant on the occasion of his graduation from Sam Houston State University in Huntsville, Texas. Mr. Roberts graduates with a bachelor of fine arts degree in theatre.

Poncho Roberts was born to Frank and Daisy Roberts on February 19, 1932, in Madisonville, Texas. He spent part of his childhood in Huntsville, but later moved to Houston and graduated from Austin High School in 1949. After graduation, he worked for the Southwestern Bell Telephone Company. He spent most of his career working for the company at NASA as a craftsman and supervisor. Poncho fondly recounts his days working as a contractor for the space agency having seen some of its earliest missions from Gemini to Apollo.

Upon retirement in 1986, Poncho and his wife, Sugar, moved back to Huntsville to be close to their children. With a heart for serving others and a joyful, outgoing personality, Poncho was called on to help with various community service projects. He was the driving force behind the effort to build the Huntsville Aquatic Center, which has given the youth of Huntsville a place to swim and has allowed for the development of the Huntsville Lakers Swim Team.

Poncho has volunteered many hours of his time to work with the Huntsville-Walker County Chamber of Commerce working at the Sam Houston Statue and Visitors Center. He is a member of the Huntsville Rotary Club and leads the "I Like Me!" program that distributes books to children to promote literary and character building. Poncho is also a deacon at University Heights Baptist Church in Huntsville.

Poncho is well known for the penchant he has for the fine arts, especially theatre, and he has been a part of many plays performed by the Huntsville Community Theatre.

Of all his accomplishments, Poncho is most proud of being a loving husband and father. Poncho and Sugar have been married for 58 years. They have raised two children, a son, Frank Jr., and a daughter, Debbie. They have eight grandchildren and two great-grandchildren with another on the way.

Madam Speaker, Poncho Roberts has dedicated his life to being a family man and to serving his community. He is proof that education is a lifelong endeavor. It is such an honor to represent good people like Poncho in the U.S. House of Representatives. I urge you to join me in congratulating him on his graduation. That's Togetherness, One More Time.

EARMARK DECLARATION

HON. MICHAEL N. CASTLE

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. CASTLE. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding funding benefitting the State of Delaware included in H.R. 3326, the Fiscal Year 2010 Defense Appropriations Act.

Name of Intended Recipient: Delaware National Guard

Location: First Regiment Rd, Wilmington, DE 19808

Requesting Member: Congressman MICHAEL N. CASTLE

Account: DRUGS

Name of Project: Delaware National Guard Counterdrug Task Force

Project Description: The Act includes \$300,000 to provide counterdrug support to federal, state, and local law enforcement agencies and to Community Based Organizations requesting Drug Demand Reduction Assistance. Funding will provide unique military support and resources to our police agencies which enable the police to concentrate more police resources to other priorities in their department. Increased funding from federal appropriations will permit the Delaware National Guard to provide support to open requests from the FBI, Delaware State Police, and local authorities. It will also enable the Delaware Guard to expand its Drug Education Program.

Name of Intended Recipient: WL Gore & Associates

Location: 555 Paper Mill Rd., Newark, DE 19711

Requesting Member: Congressman MICHAEL N. CASTLE

Account: OM, DW

Name of Project: Special Operations Forces Modular Glove System

Project Description: The Act includes \$4,780,000 to accelerate the fielding of the Modular Glove System for U.S. Special Operations Forces (SOF). This is a five piece system that provides the war fighter the necessary protection across a wide range of climactic conditions. Developed to be compatible with the SOF's Protective Combat Uniform designed for frigid conditions, this SOF Modular Glove System provides cold weather protection to -50 degrees as well as waterproof protection in wet conditions. The Special Operations Command has an established requirement for a Modular Glove System to better meet the real-world mission needs of its SOF in a broad range of deployed environments. This funding would accelerate the fielding by about one year to ensure all U.S. SOF forces in theater have access to this high technology, readiness enhancing system.

Name of Intended Recipient: University of Delaware

Location: Hulihan Hall, Newark, DE 19716

Requesting Member: Congressman MICHAEL N. CASTLE

Account: RDTE, A

Name of Project: Composite Applied Research and Technology for FCS and Tactical Vehicle Survivability

Project Description: The Act includes \$3,200,000 to rapidly advance the Technology Readiness Level of existing and promising new ultra-lightweight composite structures and armor for combat and light, medium and heavy tactical vehicle applications. Using heavy materials such as steel and aluminum will continue to result in vehicles that are too heavy to transport and will overload vehicles—which reduces life, increases maintenance costs and requires more frequent vehicle replacement. The project is addressing the critical needs of the U.S. Army to protect our soldiers and provide them with the best equipment to carry out their missions. Lightweight composite vehicle structures and armor increase mobility and mission payloads while increasing soldier protection against direct fire, improvised explosive devices and explosively formed penetrators.

Name of Intended Recipient: INVISTA S.à r.l.

Location: 2801 Centerville Road, Wilmington, DE 19808

Requesting Member: Congressman MICHAEL N. CASTLE

Account: RDTE, A

Name of Project: Improved Thermal Resistant Nylon for Enhanced Durability and Thermal Protection in Combat Uniforms

Project Description: The Act includes \$3,200,000 to increase the safety and protection of U.S. soldiers with improved flame resistant, durable, and lower cost materials for the U.S. Army combat uniforms. These improvements will meet an urgent need due to the threat of Improvised Explosive Devices (IED). This project will fund and accelerate research, development, testing, and evaluation for nylon fiber development, fiber formulation, fabric scale up and performance blend specification for U.S. Army combat uniforms.

Name of Intended Recipient: ILC Dover LP

Location: One Moonwalker Road, Frederica, DE 19946-2080

Requesting Member: Congressman MICHAEL N. CASTLE

Account: RDTE, DW

Name of Project: Joint Services Aircrew Mask Don/Off Inflight Upgrade

Project Description: The Act includes \$2,400,000 for research, development, testing, and evaluation of a Joint Services Aircrew Mask, which will provide above the neck Chemical, Biological, and Anti-G protection to DoD aircrew personnel. The mask is a hood that goes over the wearer's head and seals at the neck. This project will enhance our military's mission capability while minimizing performance degradation in chemical and biological contaminated scenarios.

Name of Intended Recipient: Piasecki Aircraft Corporation

Location: 2nd Street West, Essington, PA 19029

Requesting Member: Congressman MICHAEL N. CASTLE

Account: RDTE, N

Name of Project: X-49A Envelope Expansion Modifications

Project Description: The Act includes \$3,600,000 to conduct flight demonstrations at New Castle County Airport in Delaware on the Vectored Thrust Ducted Propeller (VTDP) Compound Helicopter technology's potential to increase rotorcraft speed, range, and survivability. These funds will cover the cost of design, fabrication, assembly, instrumentation and check out of propulsion and control system modifications that will enable flight beyond the current operating limits of the baseline conventional helicopter. Many current US combat and humanitarian operations require rotorcraft capabilities well beyond those of existing fleet helicopters.

Name of Intended Recipient: ANP Technologies, Inc.

Location: 824 Interchange Blvd., Newark, DE 19711

Requesting Member: Congressman MICHAEL N. CASTLE

Account: RDTE, DW

Name of Project: NIDS Handheld Common Identifier for Biological Agents

Project Description: The Act includes \$2,400,000 for research, development, testing,

and evaluation to develop a handheld device for detection of a variety of biological warfare agent related bacteria and viruses. According to the Report of the Commission on the Prevention of Weapons of Mass Destruction Proliferation and Terrorism (released in December 2008), a biological attack is more likely to be used by terrorists than any other weapons of mass destruction in the near future. The proposed handheld common identifier for biological agents will allow war fighters to perform rapid, on-site biological agent tests during threat situations.

Name of Intended Recipient: University of Delaware

Location: Hullahen Hall, University of Delaware, Newark, DE 19716

Requesting Member: Congressman MICHAEL N. CASTLE

Account: RDTE, N

Name of Project: Advanced Composite Maritime Manufacturing

Project Description: The Act includes \$1,600,000 to research and develop design, engineering and manufacturing technologies for U.S. Navy ship structures based on advanced lightweight composite materials. The objective of this project is to keep Navy, SOCOM (Special Operations Command), and Coast Guard craft at the forefront of technology, and help insure superiority of the US military in the water over current and future adversaries. The application of these materials and technologies will provide ship structures that are optimally engineered, and manufactured using state-of-the-art methods to provide the highest performance at the lowest cost.

Name of Intended Recipient: University of Delaware

Location: Hullahen Hall, University of Delaware, Newark, DE 19716

Requesting Member: Congressman MICHAEL N. CASTLE

Account: RDTE, N

Name of Project: Millimeter Wave Imaging

Project Description: The Act includes \$1,360,000 for research, development, testing, and evaluation to develop real-time millimeter-wave imaging to allow U.S. soldiers to see in harsh conditions, including dust, fog, sand, and clouds. Millimeter wave imaging systems are able to image through smoke, fog, marine layer, blowing dust and sand, and fabric. The technology development is supported by the Office of Naval Research with the intent to deploy systems on military helicopters landing in harsh environments such as the "brownout" conditions faced when landing in the deserts of places such as Afghanistan and Iraq. It will also improve situational awareness of Naval vessels, particularly when close to the shore or at ports.

Name of Intended Recipient: University of Delaware

Location: Hullahen Hall, University of Delaware, Newark, DE 19716

Requesting Member: Congressman MICHAEL N. CASTLE

Account: RDTE, A

Name of Project: Cybersecurity in Tactical Environments

Project Description: The Act includes \$800,000 for research, development, testing and evaluation to detect vulnerabilities and intrusions in the U.S. Army's battlefield networks.

The U.S. Army uses mobile computer networks to both communicate between soldiers, and between soldiers and their weapons systems. This concept is called network centric warfare, and the security and availability of this network is critical to combat operations. The project will focus on detection of data exfiltration in tactical networks, intrusion detection in mobile ad-hoc networks, detection of malicious hardware and software components, and detecting security threats in commercial off the shelf (COTS) wireless networking equipment.

Name of Intended Recipient: Fraunhofer USA Center for Molecular Biotechnology

Location: 9 Innovation Way, Suite 200, Newark, DE 19711

Requesting Member: Congressman MICHAEL N. CASTLE

Account: RDTE, DW

Name of Project: Army Plant Vaccine Development Program

Project Description: The Act includes \$1,600,000 for research, development, testing, and evaluation to deliver a combined multivalent one-shot vaccine to protect the U.S. Armed Forces and civilian communities against plague and anthrax. This quick response ability can assist communities around the world with mass therapeutic treatment or for mass vaccination in the event of bioterrorist attack or natural disease outbreak such as an avian influenza.

Name of Intended Recipient: Delaware National Guard

Location: First Regiment Road, Wilmington, DE 19805

Requesting Member: Congressman MICHAEL N. CASTLE

Account: OP, A

Name of Project: Phoenix Quad-Band Satellite Receiver for the Delaware National Guard

Project Description: The Act includes \$3,200,000 for a mobile communications terminal to provide the Delaware National Guard with improved high data rate exchanges between various satellites and ground communications systems in secure and non-secure digital formats.

GRATITUDE FOR THE SERVICE OF GEORGE C. ELLIOTT

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. CONYERS. Madam Speaker, I rise today to honor George C. Elliott for his two years of dedicated service to the Committee on the Judiciary. As a detailee from the United States Patent and Trademark Office (USPTO), George spent a year with the Committee in 2007 and was gracious enough to come back for another year when I requested him again in 2009. George will be returning to the USPTO at the end of 2009, where he will resume his duties as a Director.

George came to work for the Committee to support Congress' efforts to pass patent reform legislation. George's knowledge and experience in patent law proved invaluable to

this endeavor. In the 110th Congress, George's tireless work in advising and crafting policy options contributed greatly to passage of the House of Representative's patent reform legislation, H.R. 1908. His dedication to this task continued in the 111th Congress, where he has played an equally important role in advancing patent reform legislation.

In addition to patent reform, George has worked on a variety of other intellectual property policy and legislative matters, including patent settlements, technology transfer, gene patents, and USPTO appropriations. George's expertise, work ethic, and friendly nature have earned him the respect and admiration of his colleagues. He has become a fixture of the Committee's staff and a valued member of the Committee's intellectual property team.

We were privileged to have this opportunity to work with George and we wish him all the best in his future endeavors.

HONORING THE CAREER OF DON LINDSEY

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HALL of Texas. Madam Speaker, the Boy Scouts of America, which will celebrate its 100th Anniversary on February 8, 2010, has contributed to our communities through their leadership and dedication over the past 100 years, creating a better environment for our families to live, work and play. I rise today to pay tribute to one individual in particular, Mr. Don Lindsey, who began his scouting career in 1957. As an Eagle Scout, Mr. Lindsey took over a newly formed group as a Scoutmaster, a position he held for 31 years, and was directly involved in the making of 144 Eagle Scouts from this troop. He has served as a Boy Scout Chairman twice, and is directly responsible for \$4.4 million in facility renovations and new additions to Clements Scout Ranch over the last four years, with another \$6 million slotted for use.

Along with his service to the Boy Scouts of America over the past 52 years, Mr. Lindsey has been involved in service to his community and country in many other forms. He served as mayor of Terrell, Texas for ten years, County Fire Marshall for eight years, and retired from 35 years of military service as an Army Command Sergeant Major. In his church, Mr. Lindsey has served as an elder, deacon, and board member. He currently serves as a Council Committee Member and Summer Camp Director for Circle Ten Council. His contributions to his community have been recognized through the many awards and decorations he has received, including the Whitney Young Award; God and Service Award; Citizen of the Year for Terrell, Texas; Silver Beaver; and the George Meany Award.

Mr. Lindsey is a man who lives by example through his service to God, country, and through his role as a Scout, which has garnered him respect by all those who come in contact with him. Madam Speaker, I ask those present today to join me in recognizing a true servant to our country, Mr. Don Lindsey.

RECOGNIZING KYLE FOSS AND
MICHAEL HAWKEN

HON. HOWARD P. "BUCK" McKEON
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. McKEON. Madam Speaker, I rise today to recognize two incredible young men, Kyle Foss and Michael Hawken. Both Kyle and Michael have achieved three prestigious honors: the Eagle Scout Award, the Venturing Silver Medal, and the Venturing Ranger Award. Nationally, less than one in ten thousand Boy Scouts earn all three of these honors, and they are the first young men in the history of California's 25th Congressional District to earn these prestigious honors.

The hard work and dedication of Kyle and Michael will pay dividends throughout their lives. The Boy Scouts teach boys and young men the value of hard work, commitment, community service, and morality. Kyle and Michael have been shaped by this outstanding organization and will continue to build on the strength of the program.

Kyle and Michael have proven to be young men of great character. They have learned what it means to be responsible citizens and have committed themselves to improving the communities in which they live. In a fast-paced and rapidly changing world, Kyle and Michael have anchored themselves in the most consistent fundamentals of America. I admire their spirit and enthusiasm to go above and beyond their duties in all that they do. I thank these young men for their service to our community, our state, our nation, and congratulate them on their remarkable achievements.

WALTONVILLE COAL
GASIFICATION PLANT

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to express my opposition to the encroachment of federal authority into matters of the state and the continued appeasement of environmental special interests over the well-being of the American people.

Several weeks ago, the Illinois Environmental Protection Agency permitted the construction of a new coal gasification plant near Waltonville, IL. An appeal was filed to prevent construction with the U.S. EPA based on their "finding that carbon dioxide and other greenhouse gases represent a significant threat to public health and welfare."

Burdensome regulations levied on unsubstantiated science will destroy jobs. Coal gasification, the production of coal gas to convert into liquid gasoline, is a real solution to rising energy prices and it creates jobs here in the United States.

Taking drastic precautionary steps like those suggested by the EPA will have profound consequences on workers in Southern Illinois and all people throughout the country. Government action to reduce greenhouse gas emissions is

not without a heavy cost. It is irresponsible for a group of unelected bureaucrats at the EPA to make significant policy decisions that will restrain and prevent job creation based on unproven science. The EPA's response to their endangerment findings will more certainly endanger the economic well-being of Americans than fulfill the Obama Administration's promise of reducing carbon emissions or lowering global temperature.

HONORING THE ACCOMPLISHMENTS OF MALIA CALI

HON. STEVE SCALISE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SCALISE. Madam Speaker, I rise today to honor Malia Cali, the 2009 High School Heisman Award winner. Malia is a senior at St. Thomas Aquinas High School in Hammond, Louisiana, and is only the second winner in the history of the award from the State of Louisiana. She is a three-year All State selection in track and field, cross-country and soccer. Off the field, Malia founded "Cleats for Kids," a non-profit organization that collects used cleats and distributes them to children in Nicaragua. As if her impressive athletic and community service achievements weren't enough, Malia also has the No. 1 academic ranking in her senior class.

The High School Heisman has been awarded to one male and one female student each year since 1994. The High School Heisman recognizes the Nation's most esteemed high school senior men and women for excellence in academics, athletics and community service. Malia's success both on and off the field is a testament to what can be accomplished with hard work, dedication, and a commitment to others.

It's easy to see why Malia Cali was selected over nearly 55,000 other entrants in this competition. Malia is truly deserving of this prestigious award. Her successes and achievements shine brightly on the State of Louisiana, and I am proud to highlight the accomplishments of Malia Cali here today.

STATEMENT ON H.R. 4173, THE
WALL STREET REFORM AND
CONSUMER PROTECTION ACT OF
2009

HON. MELISSA L. BEAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Ms. BEAN. Madam Speaker, as the principal author of the compromise provision regarding the preemption of State consumer financial laws under the National Bank Act and the Home Owners Loan Act that was included in the manager's amendment on page 139 to 150, I wanted to take this opportunity to explain to my colleagues my intention in drafting the language.

The compromise language made improvements in several areas to allow national banks

and Federal savings associations, which are institutions that operate under a national charter to comply with a uniform national standard where appropriate. I would like to further explain four components of the compromise specifically for the House. Those components include (1) limiting the scope of new preemption procedures to State consumer financial laws, so as not to affect preemption for other State laws; (2) the ability for categories of State consumer financial law to be preempted; (3) modifications of the preemption standard to more accurately reflect the Supreme Court Case of *Barnett Bank v. Nelson*, which established the preemption standard currently applied to national banks and Federal savings associations; and (4) the degree of deference afforded to the Office of the Comptroller of the Currency and Office of Thrift Supervision by the courts.

First, under the compromise, the changes to preemption procedures under the National Bank Act for national banks and the Home Owners Loan Act for Federal savings associations are exclusively limited to State consumer financial laws. During the drafting of the compromise, I removed a sentence, previously suggested by the Committee that said national banks are to generally comply with State law. I removed this sentence because I wanted to make clear that the changes in the Act do not alter the preemption standards and precedents that apply to those State laws which are not State consumer financial laws. Narrowing the scope to just State consumer financial law is consistent with the initial scope of Subtitle D of H.R. 3126, The Consumer Financial Protection Act, when it was introduced in July 2009.

Second, the compromise language included language that allows for categories of State consumer financial law to be preempted. This means that if the Comptroller of the Currency (the regulator of national banks) or the Director of the Office of Thrift Supervision (the regulator of Federal savings associations) determines a State consumer financial law in a particular state should be preempted because it "prevents, significantly interferes with, or materially impairs" the abilities of a national bank or Federal savings association, then that specific determination can be applied to other States' consumer financial laws with equivalent terms. For example, if one state seeks to require additional disclosure requirements for credit cards that the Comptroller of the Currency determines "prevents, significantly interferes with, or materially impairs" the ability of a national bank to engage in the business of banking, that determination can be applied to another state's credit card disclosure laws if those laws have equivalent terms.

Third, a critical portion of the compromise was drafting a preemption standard that embodied existing precedent. The preemption standard that was reported out of the Financial Services Committee stated that a State law could be preempted if it "prevents or significantly interferes with" the ability of a national bank (or a Federal savings association) to engage in the business of banking. "Prevents or significantly interferes with" has been often mentioned as the shorthand citation of the preemption standard established by the Supreme Court in 1996 in *Barnett Bank v. Nelson*. However, as I and many others have

noted, the Supreme Court ruling was not limited to those two terms as the only circumstance in which preemption of State laws is appropriate. In fact, they expanded on those words by saying that a State law should be preempted not only when it "prevents or significantly interferes with," but also "stands as an obstacle to the accomplishment of the purposes," "encroach(es) on," "destroy(s) or hamper(s)," or "impair(s)."

Since the Barnett case describes a number of situations in which State law is preempted, in addition to the "prevents or significantly interferes with" standard, I was concerned that limiting the underlying text to the shorthand expression of "prevents or significantly interferes with" could be construed as narrowing the Constitutional standard. I therefore added the words "materially impairs," so that there would be no question that the preemption standard is the same as the standard described in Barnett, and that State consumer financial law may be preempted if it violates any of the well established Constitutional benchmarks for preemption. I chose the word "materially" because if the impairment is not material—meaning it would only have a negligible effect on the bank—it should not be subject to preemption under current law.

When making preemption determinations on State consumer financial laws, the Comptroller of the Currency for national banks, Director of the Office of Thrift Supervision for Federal savings associations, or the Court must find that Federal law applicable to national banks and Federal savings associations, including regulations and similar issuances, deals with the subject or activity that the State consumer financial law is seeking to regulate. A good example is the detailed disclosure requirements set by Federal law and Federal regulators, developed after substantial consumer testing, that apply to certain types of consumer financial products.

Finally, the compromise language is intended to clarify that when a court is reviewing an OCC determination concerning the proper interpretation of the National Bank Act or other Federal law that the OCC is charged with administering, the court is to apply the traditional deference accorded to an agency, often referred to as "Chevron" deference. The same clarification applies when a court is reviewing an OTS determination regarding the proper interpretation of the Home Owners Loan Act or other Federal law that the OTS administers. Further, while the underlying legislation directed the courts to apply a different type of deference to OCC or OTS preemption determinations, the compromise amendment makes clear that the Chevron deference standard applies to all OCC and OTS interpretations of Federal law, the National Bank Act, and the Home Owners Loan Act, including those made in the context of a preemption determination.

Madam Speaker, I thank you for the opportunity to further explain the preemption compromise I drafted in the manager's amendment.

I yield back the balance of my time.

IN CELEBRATION OF THE WORK OF RONALD EUGENE KIRK

HON. DAVID SCOTT

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SCOTT of Georgia. Madam Speaker I rise today to honor a dedicated member of my staff, Mr. Ronald Kirk, who has dedicated his life to government service. Born on November 2, 1944, in New York City to William Henry Kirk and Marjorie Smith Kirk, Ronald Eugene Kirk, the fourth of five children, was born and raised in Harlem and is a product of the New York City Public School system. Ron's passion for community involvement and neighborhood empowerment was evident from the start of his life. After receiving a bachelor's in business administration from Pace University and a master's in business management from Manhattan College, Ron began his lifelong involvement in community service.

Early on, Ron became politically active and cut his teeth with such community based organizations as the Community Planning Board #10 in Manhattan, the Community Corporation/Harlem Youth in Action, Model Cities and several political organizations established in the Harlem community. He was twice elected Democratic District Leader in the 70th Assembly District of New York. Ron served as foundation director of the City University of New York and as a confidential secretary to a New York Supreme Court Judge. During his time in New York, Ron received numerous accolades and commendations from such notable individuals as Representative CHARLIE RANGEL, former Mayor David Dinkins, Former New York Secretaries of State Basil Patterson and Percy Sutton. His efforts have been recognized by organizations such as the Sickle Cell Foundation, the Catholic Youth Organization, and the New York City Department for the Aging.

Upon moving to Atlanta, Ron served as a dedicated host for the 1996 Olympics held in Atlanta, Georgia, and worked for the David Scott for Congress campaign in 2002. For the past 8 years he has served admirably as my senior Immigration/Department of State Specialist and Constituent Services Representative.

Ron is a dedicated family man, having been married to the lovely Emma for 38 years, has two beautiful children, Kwesi and Amina, and three wonderful grandsons, Nikai, James and Malachai. Ron is actively involved in community outreach and the Red Oak Methodist Church in Stockbridge, Georgia.

It is with a heavy heart that I and my staff say goodbye to Ron as he retires from my Congressional staff. I am extremely proud of the accomplishments Ron has made throughout his life and for his outstanding work in my office. As this chapter of Ron's life closes and he begins his new chapter, it is a blessing to know that Ron's ability to be a social catalyst touched the lives of many in the 13th District of Georgia and the Nation. Ron, I wish you every success for the future and thank you for your outstanding work effort, passion for change, and your ability to look at the impossible and ask, "why not?"

God bless Ron Kirk.

RECOGNIZING THE 75TH WEDDING ANNIVERSARY OF MARVIN AND MARY LOU COHRON

HON. JEFF MILLER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. MILLER of Florida. Madam Speaker, I rise today to recognize Marvin and Mary Lou Cohron on the occasion of their 75th wedding anniversary. Their 75 years of marriage is a testament to all American families, and I am proud to honor the Cohrons.

Marvin and Mary Lou first met at Excel Junior High School in Monroe County, Alabama, around 1932. Both were the children of farming families and spent much of their free time going to church services and social functions. On a Sunday evening, December 23, 1934, Marvin drove Mary Lou and some of her family to the home of the Justice of the Peace where the two were married. Marvin was 16 and Mary Lou was 15.

After their marriage, Marvin and Mary Lou tried their hand at farming. After 3 years of marriage, Marvin had saved enough money from the sale of collard greens they had grown to buy Mary Lou a wedding band. Marvin moved to Pensacola, Florida, in 1939 and started work at the Pensacola City Bus Company while Mary Lou continued working at Vanity Fair in Alabama until she was able to join her husband in Pensacola. In 1943, Marvin was drafted into the United States Navy where he served honorably in World War II. He then went to school on the G.I. Bill to learn refrigeration maintenance and repair. In 1950, Marvin began work at Navy Point stores before going into business for himself in 1958. He opened Cohron's Air Conditioning/Refrigeration Sales and Service and Mary Lou worked as the bookkeeper and secretary for the office. In 1986, the Cohrons retired. They now spend their days enjoying fishing, camping, and ballroom dancing. They belong to several seniors' dance clubs and Mary Lou belongs to the Red Hat Society.

Madam Speaker, on behalf of the United States Congress, I am privileged to recognize the 75th wedding anniversary of Marvin and Mary Lou Cohron. Their family has been an invaluable part of our community for over seventy years. My wife Vicki and I wish Marvin and Mary Lou, their 5 daughters, 10 grandchildren, 12 great-grandchildren, and great-great grandchild all the best.

HONORING JUDGE DRAYER

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. GERLACH. Madam Speaker, I rise today to honor the Honorable Calvin S. Drayer Jr. who is retiring after faithfully serving the people of Montgomery County, Pennsylvania, as a Common Pleas Court Judge since 1998.

Before joining the Montgomery County Court, Judge Drayer had a distinguished legal career that spanned nearly 30 years. He was a founding partner in the Norristown-based firm of Wilson, Drayer, Morrow and Broderick where he concentrated on estates and trust law.

Despite his demanding career and heavy caseload, Judge Drayer has always been generous with his time and talent outside the courtroom. He is a Fellow of the American College of Trusts and Estate Counsel and a member of both the Supreme Court Orphans' Court Procedural Rules Committee and the Pennsylvania Joint State Government Commission Advisory Committee on Descendents' Estates. Judge Drayer also was an organizer of the probate and Tax Section of the Montgomery County Bar Association and an adjunct professor in the graduate tax program at the Villanova University School of Law.

Madam Speaker, I ask that my colleagues join me today in recognizing the outstanding service and extraordinary career of the Honorable Calvin S. Drayer Jr. and all who dedicate their careers to the pursuit of justice.

A TRIBUTE TO FLOYD HAYS ELLIS

HON. BRETT GUTHRIE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. GUTHRIE. Madam Speaker, I rise today to honor the memory of a truly remarkable Kentuckian, Floyd Hays Ellis. Over the course of his long and storied life as a farmer, soldier, businessman and state senator, Bowling Green's favorite son embodied the values of the "Greatest Generation" to which he belonged.

Generous in the extreme, Ellis was just as thoughtful a legislator as he was a friend and father. Known for his winning smile and dry sense of humor, he proved to be a canny businessman, as well. He served for 20 years as the president and CEO of the Warren Rural Electric Cooperative Corp., in addition to chairing the boards of Citizens First Bank, Trans Financial Bank Corp., Commonwealth Health Corp. and the Kentucky Association of Electric Cooperatives.

Though many people who enjoy his level of success often sacrifice their private lives for the sake of their profession, Floyd never put his work before family and friends. To the contrary, Floyd's natural sociability and devotion to his loved ones was perhaps his most remarkable trait.

Sadly, on Saturday, December 12, 2009, Floyd Hays Ellis passed away in the company of his long-time group of friends and confidants; and while Kentucky may never again see one of its finest sons, the evidence of his legacy will be visible in the countless lives that he touched.

HISTORICAL PERSPECTIVE OF THE ONEIDA TRIBE OF INDIANS OF WISCONSIN

HON. STEVE KAGEN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. KAGEN. Madam Speaker, the Oneida Tribe of Indians of Wisconsin is sovereign government with a long and proud history of self-government. We are a federally recognized treaty tribe of the United States. We have faced threats and continue to face threats to our homelands. The Oneida have persevered in the face of adversity for centuries, and we proudly and passionately continue to protect and preserve our homelands.

The Oneidas, along with the Mohawk, Seneca, Cayuga and Onondaga comprised the original Five Nations of the Iroquois Confederacy that dates back to the 1500s, which later became the Six Nations when the Tuscarora joined in the 1700s. The Iroquois held millions of acres of land in what is now the State of New York, which entered statehood in 1776.

During the Revolutionary War, the Oneida and the Tuscarora supported the colonies and served in General George Washington's army. For this service, our lands were to be protected forever, a promise reflected in the 1794 Treaty of Canandaigua between the Oneida and United States.

The 1784 Treaty of Fort Stanwix was the first treaty between the Oneida and United States that established peace between the Iroquois Confederacy and the colonial states, which operated under the Articles of Confederation at the time. This treaty of peace established the government-to-government relationship between the Oneida Tribe and the United States that continues to exist today.

Through the 1785 Treaty of Fort Herkimer and the 1788 Treaty of Fort Schuyler with the State of New York, the Oneida lost more than 5 million acres of their ancestral homelands to the State of New York.

In 1789, the States ratified the United States Constitution, which declared treaties of the United States to be the law of the land. The United States adopted the Non-Intercourse Act of 1793, which prohibited the purchase of any Indian land by any person or entity without the Federal Government's approval.

In spite of the Non-Intercourse Act, the State of New York continued to enter into a series of land transactions between 1795 and 1846 with the Oneida in direct violation of Federal law. These land transactions continued to deplete the Oneida land holdings in New York until only 32 acres remained in Oneida possession by the 1820s.

During the 1820s, Oneidas relocated to what would become the State of Wisconsin to establish new homelands. The Oneidas purchased 5 million acres of land from the Winnebago and Menominee Tribes for the purpose of preserving sovereignty as a self-governing sovereign nation. This band of Oneidas became recognized as the Oneida Tribe of Indians of Wisconsin, who entered their final treaty with the United States in 1838, 10 years before Wisconsin entered statehood.

The Treaty of 1838 between the Oneida Tribe of Indians of Wisconsin and the United States established the present day Oneida Reservation boundaries located in northeast Wisconsin and comprised of 65,430 acres. To the present day, the Oneida Reservation has not been diminished or disestablished by an Act of Congress and our reservation boundaries as established by treaty continue to exist under the full force and effect of Federal law and the United States Constitution.

The Dawes Allotment Act of 1887 enacted by Congress was the next challenge of maintaining our homelands. Our lands were divided into individual parcels that resulted in a significant loss of tribal land ownership because our members did not understand the English language and did not understand land taxation. Consequently, tribal land ownership was reduced to a few thousand acres within the Oneida Reservation boundaries.

The Dawes Allotment Act and the loss of tribal land ownership were ended when Congress passed the Indian Reorganization Act of 1934, IRA. The Federal policy of the IRA was to recognize and strengthen the authority and autonomy of tribal governments, and implicit in the recognition of tribal authority is a tribe's right of self-government. The IRA provided the foundation for adopting a tribal constitution that would govern tribal members.

In 1936, the Oneida membership adopted the Oneida Constitution that established an elected governing body for the Oneida membership. Upon adoption of the Oneida Constitution, the United States Federal Government purchased 1,270 acres of land within the Oneida Reservation and placed that land into trust for the benefit of the Oneida Tribe.

Since passage of the IRA, the Oneida Tribe has taken the initiative to actively acquire ownership of land within the Oneida Reservation boundaries, and to provide for its membership through governmental programs and services that meet the needs of the people. More importantly, the Oneida Tribe has strengthened its authority by the adoption, implementation and enforcement of tribal laws. The Oneida Tribe preserves its sovereignty by exercising the inherent right of self-government over our lands and members within the Oneida Reservation boundaries.

Among the most significant of our continuing initiatives is the Oneida Land Claim and the resolution of that claim. The Oneida Land Claim is the oldest and largest land claim in the United States. Oneida has twice prevailed before the Federal courts, most recently in 1985 when the United States Supreme Court recognized the Oneida's rightful claim against the State of New York for its violations of Federal law more than 200 years ago.

The Oneida Tribe entered into treaties with the United States that are recognized as the law of the land under the United States Constitution. Federal law, United States Supreme Court decisions and Federal Indian policy recognize the treaty obligations of the Federal Government to the federally-recognized tribes of the United States. The Oneida treaties also established the government-to-government relationship between the Oneida Tribe and the United States, and form the basis for the Federal trust responsibility that is also recognized by Federal law, United States Supreme Court decisions and Federal Indian policy.

The Oneida Land Claim is deeply intertwined with the history of the United States. We have strived to resolve this claim through continued negotiation and mediation and will continue to do so as a means to protect and preserve our Tribal homelands. The Oneida will continue to act in an honorable manner to resolve the land claim that allows the United States, under the Federal trust responsibility owed to the Oneida Tribe by virtue of our treaties with the United States, to right the wrongs of the past that continue to exist today.

EARMARK DECLARATION

HON. GREGG HARPER

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HARPER. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326—Department of Defense Appropriations Act, 2010.

Requesting Member: Congressman GREGG HARPER

Bill Number: H.R. 3326

Project Name: Regional Counter-Drug Training Academy—Meridian

Project Amount: \$2,800,000

Account: Operating Forces Drug Interdiction and Counter-Drug Activities, Defense

Recipient and Address: MS National Guard, Naval Air Station, 219 Fuller Road, Meridian, Mississippi

Description of Request: The National Guard Bureau identified a Fiscal Year 2009 unfunded requirement of \$24.2M for Counterdrug (CD) Schools. With appropriate funding, CD schools will be better positioned to provide counter narcotics-based training programs critical to domestic law enforcement against narcoterrorism. The RCTA Meridian budget has shown little growth since FY2000, yet the costs associated with training law enforcement officers have increased by approximately 20 percent.

Requesting Member: Congressman GREGG HARPER

Bill Number: H.R. 3326

Project Name: On-Board Hybrid Power Unit (OBHPU)

Project Amount: \$1,040,000

Account: Research, Development, Test, and Evaluation, Army

Recipient and Address: Diversified Technology, 476 Highland Colony Parkway, Ridgeland, MS 39157

Description of Request: 2010 funding will ensure the completion of, field-testing, development, integration plan and a training program for the production version of the OBHPU 10 KW system. The Space and Missile Defense Command (SMDC) supports the OBHPU program to provide on-board electric power to deployed radar and missile systems, and is applicable in many other fields.

Requesting Member: Congressman GREGG HARPER

Bill Number: H.R. 3326

Project Name: Simulation Based Reliability and Safety (SimBRS) Program

Project Amount: \$4,900,000

Account: Army, Combat Vehicle and Automotive Advanced Technology

Recipient and Address: Mississippi State University, P.O. Box 6301, Mississippi State, MS 39762.

Description of Request: SimBRS engages in synergized research and development experimentally validated cradle-to-grave modeling and simulation capabilities to optimize reliability in vehicular components and systems with consideration of uncertainties in input loads, manufacturing, operations and maintenance, and material properties to decrease weight and cost, and yet increase the performance, durability, and safety of the warfighter. This initiative is a follow-on effort to ongoing Mississippi State University simulation based reliability systems research.

Requesting Member: Congressman GREGG HARPER

Bill Number: H.R. 3326

Project Name: VePro—Health Usage Monitoring and Vehicle Prognostics

Project Amount: \$2,880,000

Account: Army, Combat Vehicle and Automotive Advanced Technology

Recipient and Address: nCode International, 200 Research Blvd., Starkville, MS 39759

Description of Request: Better understanding of operational usage severity is critical for vehicle designs to reliably meet needs at minimum cost and weight. VePro will save billions of dollars spent annually on maintaining U.S. Army equipment, improve readiness and reduce danger to soldiers from unexpected vehicle failures. The next stage is to evolve these into scalable, robust cost effective pre-production Vehicle Health Management Systems (VHMS)—technology configuration, manufacturing, assembly and testing for pre-production systems.

Requesting Member: Congressman GREGG HARPER

Bill Number: H.R. 3326

Project Name: F-15C AESA Classified Demo

Project Amount: \$8,000,000

Account: Air Force, F-15E Squadrons

Recipient and Address: Raytheon, Forest Consolidated Manufacturing Center, 19859 Highway 80, Forest, MS 39074

Description of Request: Funding will be used for the final year of a 3-year development effort to demonstrate APG-63(V)3 Active Electronically Scanned Array (AESA) classified capability with a Radar Common Data Link (RCDL). ANG and USAF F-15s are the backbone of forces assigned to perform a significant portion of the Nation's Homeland Defense mission, protecting the United States from attack by an airborne threat. FY10 funding will complete the third and final phase of the 3-year RCDL demonstration program.

Requesting Member: Congressman GREGG HARPER

Bill Number: H.R. 3326

Project Name: Silicon Carbide Electronics Material Producibility Initiative

Project Amount: \$2,400,000

Account: Air Force, Advanced Materials for Weapon Systems

Recipient and Address: II-VI Wide Band Gap Materials Group, 201 Research Blvd., Starkville, MS 39759

Description of Request: Funding will be used to develop technology, and establish pro-

duction capability, along with evaluation and testing of SiC materials and integrated circuits for use in high power, high frequency DoD weapons systems and platforms. Future mission requirements dictate a range of current and next-generation U.S. Military systems requiring critical high frequency and high power components with dramatically enhanced capabilities which are unattainable with current technology.

Requesting Member: Congressman GREGG HARPER

Bill Number: H.R. 3326

Project Name: Advanced, Long Endurance Unattended Ground Sensor Technologies

Project Amount: \$3,920,000

Account: Defense-Wide, Special Operations Intelligence Systems Development

Recipient and Address: Mississippi State University, P.O. Box 6301, Mississippi State, MS 39762

Description of Request: A significant challenge in modern military operations is the ability to achieve and maintain real-time battlefield situational awareness. Achieving battlefield situational awareness requires the ability to robustly and persistently monitor the movements of the adversary in near real-time across a wide range of operational environments including foliage, mountainous, and urban terrain. This initiative is a follow-on effort to ongoing Mississippi State University Unattended Ground Sensor (UGS) research and development in support of the U.S. Special Operations Command (USSOCOM).

EARMARK DECLARATION

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SMITH of New Jersey. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of the FY 10 Department of Defense Appropriations Act.

Requesting Member: Representative CHRISTOPHER H. SMITH

Bill Number: H.R. 3326

Project name: Re-establishing Ties: The Road from Warrior to the Community

Account: OM, ARNG

Legal Name of Requesting Entity: New Jersey Department of Military and Veterans Affairs

Address of Requesting Entity: 101 Eggert Crossing Road, Lawrenceville, NJ 08648

Description of Request: This funding would be used to help successfully transition returning soldiers back in civilian life through the NJ National Guard's multi-tiered, reintegration program to address the needs of the returning combat veteran. This program includes: PTSD and TBI Screening; Suicide Prevention Efforts; Small Business Restart Assistance; and Counseling Services, among other benefits.

CELEBRATING THE 50TH ANNIVERSARY OF THE GARFIELD RIDGE CHAMBER OF COMMERCE

HON. DANIEL LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. LIPINSKI. Madam Speaker, I rise today to honor the Garfield Ridge Chamber of Commerce as it celebrates 50 years of service to the community.

Founded in 1959, the Garfield Ridge Chamber has grown to 100 members who work tirelessly to fully embody its motto, "The Neighborhood that Cares and Shares."

The chamber takes great pride in being an active member of the community, participating each year in the Patriot Day Parade and Annual Pumpkin Parade, providing Christmas decorations along a major thoroughfare in the neighborhood, delivering a business directory to 17,500 homes in the area, and recognizing a police officer, firefighter, and teacher of the year at its annual dinner dance.

The chamber's largest event, in which it takes special pride, is the "Snack with Santa," at which children are provided with a gift from Santa, snacks, and a puppet show. This year marks the 26th anniversary of the event, which is extremely popular, attracting over 1,300 attendees.

Throughout the year, chamber members show their commitment to the organization and its role in the community at monthly gatherings featuring speakers who keep business owners informed of new developments and innovations.

Through its dedication to service, the Garfield Ridge Chamber of Commerce has contributed immensely to the larger community. As a proud native of Garfield Ridge, I sincerely offer the chamber's many dedicated members my heartfelt congratulations on the occasion of its 50th anniversary.

A PROCLAMATION HONORING
SHERRI LAWRENCE FOR HER
CERTIFICATION BY THE NA-
TIONAL BOARD FOR PROFES-
SIONAL TEACHING STANDARDS

HON. ZACHARY T. SPACE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SPACE. Madam Speaker, Whereas, Sherri Lawrence has been granted certification by the National Board for Professional Teaching Standards; and

Whereas, Sherri Lawrence has sufficiently demonstrated adherence and dedication to the five core propositions of teaching set by the National Board for Professional Teaching Standards; and

Whereas, due to her hard work and dedication to her profession, Sherri Lawrence was able to achieve this esteemed honor; and

Whereas, we recognize the values and lessons teachers impart to our children; and

Whereas, the creative ingenuity that Sherri Lawrence has demonstrated while educating her students; now, therefore, be it

Resolved, that along with Ohio's 18th Congressional District, I congratulate Sherri Lawrence for her certification by the National Board for Professional Teaching Standards.

THE LOSS OF JACK PEEL

HON. KATHY CASTOR

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Ms. CASTOR of Florida. Madam Speaker, I rise today in honor of a brave American veteran and a great Floridian, Jack Peel, who passed away on November 29, 2009.

Mr. Peel was a native Floridian, born in Chipley, and a graduate of Chipley High School. He served his country for four years in the Navy where he made lifelong friends with his fellow sailors. He then joined the Air Force where he remained for the next 26 years and retired as master sergeant.

After retirement from the military, Mr. Peel and his beloved wife Lynette made their home in Bay Crest Park in Hillsborough County, Tampa. There he dedicated his time to public service. He served as president of the Bay Crest Park Civic Association, an active member of the Town N Country Alliance, a Catholic Church community volunteer and advocate. Jack Peel had a talent for persuading his neighbors, policymakers, and the Hillsborough Board of County Commissioners to beautify and enhance Bay Crest and Town N Country. He and Lynette and the outstanding Town N Country community activists worked diligently to improve our community. For his dedication to service, the Civic Association completed Peel Park in December 2009 in honor of Mr. Peel.

Madam Speaker, Jack Peel will be greatly missed. For all who love our community, be inspired by Jack Peel's dedication and service.

BUENOS AIRES NATIONAL
WILDLIFE REFUGE

HON. RAÚL M. GRIJALVA

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. GRIJALVA. Madam Speaker, I rise today to pay tribute to all the staff at the Buenos Aires National Wildlife Refuge. The Refuge consists of a beautiful 118,000 acres of mountains, riparian zones, and grasslands in the Southern Arizona desert and contains majestic areas such as Brown Canyon, Arivaca Cienega and the Baboquivari Mountains.

The Buenos Aires National Wildlife Refuge is a sanctuary for many different types of wildlife including the Pima pineapple cactus, the pygmy-owl and the endangered masked bobwhite quail. Additionally, 325 bird species, 53 species of reptiles and amphibians, 58 mammal species, including mule deer, white-tailed deer, pronghorn, javelina, and mountain lions all call the Refuge home. Without the protection of the Refuge, many of these species would disappear and be lost to us forever. The Refuge is also a vital part of the community

and offers guided tours, hiking, camping, horseback riding, mountain biking, excellent birding, and plenty of beautiful picnic areas. The Refuge even offers wonderful educational opportunities through volunteer projects and nature workshops.

The men and women employed at the Refuge work tirelessly to preserve this beautiful area. Through their efforts, the Refuge has successfully reintroduced the endangered bobwhite quail and the pronghorn deer into the wild and ensures their continued protection. These people are truly the guardians of an environmental treasure and view their task as a privilege, not just a job.

In addition to the wonderful staff at the Refuge, an exemplary group of volunteers known as the Friends of the Buenos Aires National Refuge dedicate their time to the community education conservation, and preservation of this wonderful land. This nonprofit group gives selflessly to promote the goals of the Refuge and with the help of the Refuge staff; they recently held the 1st Annual Grasslands Fair to celebrate this beloved land.

The Buenos Aires National Wildlife Refuge, its staff, and the volunteers who dedicate their time are all truly valued players in the protection of America's wild lands. Being a member of the House Committee on Natural Resources and having seen our community grow to over a million people, during my lifetime, I know the importance of protecting areas like the Buenos Aires National Wildlife Refuge. It gives me great joy to see such wonderful people giving of themselves to preserve and protect this spectacular region of southern Arizona.

A PROCLAMATION HONORING
MICHELE MANISKAS FOR HER
CERTIFICATION BY THE NA-
TIONAL BOARD FOR PROFES-
SIONAL TEACHING STANDARDS

HON. ZACHARY T. SPACE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SPACE. Madam Speaker, Whereas, Michele Maniskas has been granted certification by the National Board for Professional Teaching Standards; and

Whereas, Michele Maniskas has sufficiently demonstrated adherence and dedication to the five core propositions of teaching set by the National Board for Professional Teaching Standards; and

Whereas, due to her hard work and dedication to her profession, Michele Maniskas was able to achieve this esteemed honor; and

Whereas, we recognize the values and lessons teachers impart to our children; and

Whereas, the creative ingenuity that Michele Maniskas has demonstrated while educating her students; now, therefore, be it

Resolved, that along with Ohio's 18th Congressional District, I congratulate Michele Maniskas for her certification by the National Board for Professional Teaching Standards.

**CELEBRATING METRO GOLD LINE
CONSTRUCTION AUTHORITY'S 10
YEARS OF SERVICE**

HON. ADAM B. SCHIFF

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SCHIFF. Madam Speaker, I rise today to congratulate the Metro Gold Line Foothill Extension Construction Authority as it celebrates ten years of service and commitment to the community. Since the Construction Authority was established by the California State Legislature to design and construct the Pasadena Metro Gold Line, it has completed 13.7 miles of light rail, which averages 24,000 daily weekday boardings.

One decade ago, the Los Angeles County Metropolitan Transportation Authority, faced with serious budgetary problems, delayed the construction of the light-rail line to Pasadena. Senate Bill 1847 was introduced to create the Construction Authority and finish the work that had already been started on the new rail line. The newly created Construction Authority was not only able to complete the project on time but was also able to build it under budget.

Today, the Metro Gold Line Foothill Extension Construction Authority is continuing its work in connecting downtown Los Angeles to the San Gabriel Valley and beyond. Funding has been secured to extend the line to the city of Azusa and plans are in place to continue the Gold Line to Montclair and Ontario International Airport. The success of the Gold Line is a testament of the collaborate efforts between the staff of the Construction Authority and the elected officials, civic leaders, and residents of the surrounding communities.

The Gold Line not only provides a reliable and efficient source of transportation to residents of the greater Los Angeles region, it also alleviates traffic and is a part of our fight to reduce pollution. The congestion on the Gold Line corridor highways has continued to increase as the Inland Empire grows in population. As we work to find solutions to solve our traffic congestion dilemma, extending the Gold Line into our eastern cities is clearly part of the answer.

It is with great pleasure that I congratulate the Metro Gold Line Foothill Extension Construction Authority on its ten years of success. I am proud of the role I have played in helping the Gold Line become the pride of the San Gabriel Valley and I wish it continued success!

THE BELLEVUE WOLVERINES

HON. DAVID G. REICHERT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. REICHERT. Madam Speaker, I rise today to applaud a phenomenal high school football program in my District—the 8th of Washington—for winning another State Championship—their seventh in nine years.

The Bellevue Wolverines have an illustrious history of football success in the State of Washington, and they continued the trend on

Saturday, December 5, defeating the Liberty Patriots, 23–17, to secure another 3A title. Head Coach Butch Goncharoff and his assistants provide some of the best coaching and vision in the country and the program—well known for their great on-the-field success—often makes positive impacts in the community as well.

I congratulate every member of the roster for their continued and storied success on the field. I thank coach Goncharoff, his assistants, Athletic Director Brian Hercules and Principal David Wellington for creating an environment that allows student-athletes to thrive on the field, in the classroom and in their community. Once again, congratulations and I wish the Wolverines all possible success in the future.

**A PROCLAMATION HONORING LISA
ABELE FOR HER CERTIFICATION
BY THE NATIONAL BOARD FOR
PROFESSIONAL TEACHING
STANDARDS**

HON. ZACHARY T. SPACE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SPACE. Madam Speaker,

Whereas, Lisa Abele has been granted certification by the National Board for Professional Teaching Standards; and

Whereas, Lisa Abele has sufficiently demonstrated adherence and dedication to the five core propositions of teaching set by the National Board for Professional Teaching Standards; and

Whereas, due to her hard work and dedication to her profession, Lisa Abele was able to achieve this esteemed honor; and

Whereas, we recognize the values and lessons teachers impart to our children; and

Whereas, the creative ingenuity that Lisa Abele has demonstrated while educating her students; now, therefore, be it

Resolved, that along with Ohio's 18th Congressional District, I congratulate Lisa Abele for her certification by the National Board for Professional Teaching Standards.

EARMARK DECLARATION

HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. ROGERS of Kentucky. Madam Speaker, pursuant to the House Republican standards on congressionally-directed funding, I am submitting the following information regarding funding included in H.R. 3326—Department of Defense Appropriations Act, 2010.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: PA,A

Legal Name of Requesting Entity: Blue Grass Army Depot

Address of Requesting Entity: 431 Battle Field Memorial Road, Richmond, KY 40475

Description of Request: The funding of \$3.92 million will be used for the Blue Grass

Army Depot Superficial Water Oxidation-Conventional Demilitarization. These funds will provide the Army with a state-of-the-art environmentally friendly means of processing the problematic energetic wastes generated at the Blue Grass Army Depot.

**HONORING THE LIFE OF FORMER
CALIFORNIA ASSEMBLYMAN NAO
TAKASUGI**

HON. MICHAEL M. HONDA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HONDA. Madam Speaker, today I honor the life and achievements of my dear friend, former California State Assemblymember Nao Takasugi. Nao dedicated his life to public service with humility, integrity, and commitment to the American ideals of equality and justice.

Nao was a 19-year-old student at the University of California, Los Angeles, when he and his family were incarcerated in an internment camp for Japanese Americans during World War II.

His family was forced to sell most of their possessions, but was able to keep the family store, the Asahi Market in downtown Oxnard, which they had owned since 1907.

The Takasugi family was able to save the store during their imprisonment by entrusting the family business to a Mexican American employee, Ignacio Carmona. When the Takasugi family returned to Oxnard in 1945, Mr. Carmona returned the business back to the Takasugis, after faithfully carrying on the business for three years.

In 1943, Nao was among approximately 4,000 Japanese American college students who were released from the internment camps and allowed to attend college on the East Coast. Nao earned his business administration degree at Temple University in Philadelphia and a master's in business administration from the Wharton School at the University of Pennsylvania in 1946. When he returned to Oxnard, he ran his family's Asahi Market.

His family's imprisonment inspired him to commit his life to strengthening our democracy in public service, and did not cause deep embitterment. As Oxnard City Councilman, Mayor, and then California State Assemblyman, he ably represented all of his diverse constituents, crossing racial and ethnic divides, and building bridges across party lines.

At the age of 87, Nao died of complications from a stroke on November 19, 2009. He is survived by his wife of 57 years, Judy, and their five children, Scott, Russell, Ron, Tricia and Lea.

I was truly saddened by the loss of my dear friend Nao Takasugi. He was a gentle soul, and never let his kind demeanor get in the way of his strong beliefs about justice and civil rights. When he spoke, people listened as he was always true to his convictions and sense of honor. I will miss him dearly and will always reflect on his life as a metric of how I should conduct my own.

**"THIS CHRISTMAS," IN HONOR OF
ALL OUR ARMED FORCES AND
THEIR FAMILIES THIS CHRIST-
MAS SEASON**

HON. KENDRICK B. MEEK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. MEEK of Florida. Madam Speaker, I rise today with a poetic tribute in honor of our Magnificent Armed Forces and their Splendid Families this Christmas and holiday season. And for all of the ones who are so separated by the miles, so very far across the shores. Our hearts, especially go out to all of those families who have lost their greatest loves of all, in the defense of our nation. And to all of those recovering from the grave wounds of war we pray for their speedy recovery. Bless them all! I ask that this poem penned by Albert Caswell be placed in the RECORD in honor of them as follows:

THIS CHRISTMAS . . .

As the snow falls to the ground. . . .
And all of our children dance, with songs of
joy so all around. . . .
With stockings hung by the chimneys with
care. . . .
With all of those hopes and dreams, of Santa
there. . . .
With Christmas dinners and fires all aglow,
as before this family a feast lies so. . . .
A child is born, for all to know!
But, remember . . . remember . . . remember
all of those. . . .
Those families! Those Patriots of Peace, all
them, all of these. . . .
The ones, who this Christmas will not to-
gether be. . . .
Who upon battlefields of honor fight!
So far away from our Country 'Tis of Thee,
this night. . . .
Men and Women of such honor bright, who
for all of us. . . . so carry that fight. . . .
Who live with such heartache and death, as
on each new day their honor blesses
. . . .
As they bless us all, with all their gifts of
selflessness. . . .
And all of those ones, whose greatest of all
loves. . . . now so lie in soft quiet
graves. . . .
Precious Daughters and Sons, Husbands and
Wives. . . .
Fathers and Mothers, Sisters and Brothers
who so gave. . . .
Who so gave That Last Full Measure. . . . did
they!
Whose loved ones pain, can not be healed by
time, nor so divided. . . .
Who on this Christmas morning, sit with
tears in eyes. . . .
With one less place set at the dinner table
this year. . . . as they cry. . . .
And all of those who have come home, with-
out arms and legs. . . .
Blessing us with their fine gifts of courage
displayed!
Making us all so see, just how magnificent
and inspiring a heart can be!
And all of those with loved ones, who are so
far across the shores. . . .
As each new day but brings such great worry
. . . . sure. . . .
But, waiting. . . . but waiting for, that knock
on the door. . . .
That phone call, that they now not so pray
for. . . .
Quiet Heroes, one and all!

Watching them from Heaven, The Angel's
tear drops fall. . . .
Lord God, Lord God. . . . Bless Them. . . .
Bless Them All!
For So Many, So Few Have But Paid The
Cost!
So bore the burden, so carry that cross! That
cross of war!
This Christmas, as you hold your families
tight. . . .
And seem so fine, and so very right. . . .
And you see those smiles, of your children
very bright. . . .
Give thanks, Give praise. . . . as upon your
knees fall and pray. . . .
For all of those families, who've sacrificed
. . . . and blessings of freedom they
gave!
This Christmas. . . .

**TRIBUTE TO JANICE AND
BENJAMIN REZNIK**

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. BERMAN. Madam Speaker, I rise today to congratulate my good friends Janice and Benjamin Reznik on the occasion of their Parnas Award honor from the Masorti Foundation for Conservative Judaism in Israel 14th Annual Los Angeles Celebration.

Before becoming the Founding President of Jewish World Watch, Janice Kamenir-Reznik led an active career in the field of law. A graduate of UCLA law school, Janice spent years building a distinguished career in the legal field and then, recognizing her passion for community service work, turned to that avocation. Under her able leadership, Jewish World Watch—founded jointly with Rabbi Harold Schulweis—has become one of the leading advocacy groups in the fight against the genocide in Darfur and other global human rights abuses.

Janice served as the director of the Commission on Soviet Jewry for the Los Angeles Jewish Federation, and during her years in practice was President of California Women Lawyers, the statewide women's bar. She was a founder and president of California Women's Law Center, a public interest organization advocating for the rights of women and girls. She has testified before the House Judiciary Committee.

In addition to the numerous legal positions held by Janice over the years, she also served in many Jewish community leadership roles. I commend her for her invaluable contributions in serving on the following boards: Los Angeles Hebrew High School, Valley Beth Shalom, Los Angeles Hillel Council, UCLA Hillel, and the Jewish Federation Council.

Ben Reznik boasts a stellar professional and philanthropic record. Widely respected for his tenacious legal acumen, Ben has been described as "the most litigious attorney in Los Angeles" by his peers. He has been a key leader and activist in the community, devoting himself to a wide variety of organizations and causes. Currently, he is chairman of the Government, Land Use, Environment and Energy Department at the law firm of Jeffer Magels Butler & Marmaro LLP, JMBM, and leads 25

lawyers who comprise that department. Ben has also argued before the Supreme Court and has represented many prominent companies including the Mitsubishi Corporation and The Clarett Group.

Ben and Janice have three children, Yoni, Devi and Sami. They live in Encino where, through years of community activism and professional success, they have helped numerous people and are shining examples of what the Jewish tradition calls tikkun olam.

Madam Speaker and distinguished colleagues, I ask you to join me in congratulating Janice and Ben Reznik for their impressive career and dedication to the community and to congratulate them on receiving this honor.

**PAYING TRIBUTE TO THE
HEALTHCARE WORKERS UNION
1199 SEIU AS THEY MARK THEIR
50TH ANNIVERSARY**

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. RANGEL. Madam Speaker, this year marks the 50th Anniversary of 1199 SEIU as a healthcare workers union. For the union, the last 50 years have been challenging ones. Through its efforts, much has changed for the better, and they have been a large part of that change. In the words of founder and former president Leon Davis, it is a history of "tough struggles and pioneering advances, decent wages, and working conditions instead of poverty, respect on the job instead of contempt, security instead of fear, and hope instead of despair."

The 1199 changed history in 1959 when a drugstore union made up of pharmacists joined the Civil Rights Movement and set out to organize 30,000 predominantly Black and Latino workers in New York City's voluntary hospitals. The union succeeded in signing their first collective bargaining agreement with Montefiore Medical Center that year. Today, the union is 350,000 healthcare workers strong, in hospitals, nursing homes, and homecare agencies throughout New York, New Jersey, Massachusetts, Maryland, and Washington, DC. And they continue to grow despite these difficult times.

Aside from raising labor standards and restoring dignity to their members, 1199 has been a leading force for social and economic justice for all. It is why Dr. Martin Luther King, Jr., called 1199 his "favorite union." And it is why they were the only labor union Malcolm X chose to speak before. The union was once the headquarters for Cesar Chavez's national grape and lettuce boycotts, as well as the headquarters for Nelson Mandela's visit to New York when he was released from prison. In all its years of activism in electoral politics, the union's greatest crowning achievement was in 2008, when it dispatched thousands of members—many of them for several months—to help elect Barack Obama as our nation's first African-American president.

For all its achievements over the many years of service, including being champions of worker rights, I applaud 1199 on its 50th anniversary and have pledged to its president,

George Gresham, that the union can continue to count on my strong support in the many years ahead.

So Madam Speaker, I ask that you and my distinguished colleagues join me in celebrating the 50th anniversary of 1199 United Healthcare Workers East of the Service Employees International Union. As 1199 looks back at its historic accomplishments over the last 50 years, let's join it in looking forward to the next 50 years, meeting the challenges that lie ahead with the same spirit, determination, and strength that has shaped who it continues to be today.

A PROCLAMATION HONORING CYNTHIA RUCKER FOR HER CERTIFICATION BY THE NATIONAL BOARD FOR PROFESSIONAL TEACHING STANDARDS

HON. ZACHARY T. SPACE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SPACE. Madam Speaker,

Whereas, Cynthia Rucker has been granted certification by the National Board for Professional Teaching Standards; and

Whereas, Cynthia Rucker has sufficiently demonstrated adherence and dedication to the five core propositions of teaching set by the National Board for Professional Teaching Standards; and

Whereas, due to her hard work and dedication to her profession, Cynthia Rucker was able to achieve this esteemed honor; and

Whereas, we recognize the values and lessons teachers impart to our children; and

Whereas, the creative ingenuity that Cynthia Rucker has demonstrated while educating her students; now, therefore, be it

Resolved, that along with Ohio's 18th Congressional District, I congratulate Cynthia Rucker for her certification by the National Board for Professional Teaching Standards.

IN MEMORY OF DAVID STONE

HON. JANE HARMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Ms. HARMAN. Madam Speaker, the post-9/11 world has posed many challenges—especially to the old way of doing business. Someone who stepped up and used his military training and experience to transform airport security was David Stone. David died unexpectedly earlier last month, at age 57, and I rise to commemorate my friend and his exceptional career.

Admiral Stone was selected as the first federal security director at LAX—the top terror target on the West Coast—shortly after 9/11. He proved more than equal to the task. Working under immense pressure and close public scrutiny, Stone established strict new federal airport security standards, secured nearly \$1 billion in federal funding for security upgrades and positioned LAX to become a test site for

new security technologies that are now used around the world.

The Bush administration noticed and Stone was asked to apply his talents at the national level. As the Nation's third TSA administrator, he was charged with overseeing security at not just one airport—but all of them, in addition to ports, railroads, and pipelines. In just 2 years, he shaped the role of the TSA for years to come.

When Stone left the TSA it marked a culmination of more than three decades of national service. He was a decorated soldier, a graduate of the U.S. Naval Academy who rose to rank of Rear Admiral. During his 28-year military career he commanded warships, vessel fleets, NATO naval forces, and an aircraft carrier battle group. For his valor he received three Legions of Merit, five Meritorious Service medals, and three Navy Commendation medals.

A lovely memory is how David spoke to high school seniors in my district who were applying to the military academies. He was so excited about them—and recalled his own journey decades earlier. David Stone also shared this excitement and talent with a grateful nation. He is fondly remembered.

RESPONDING TO THE GOVERNMENT OF AUSTRALIA'S APOLOGY FOR THE MISTREATMENT OF CHILD MIGRANTS AND CHILDREN IN INSTITUTIONAL CARE UNDER STATE SUPERVISION

HON. ALCEE L. HASTINGS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HASTINGS of Florida. Madam Speaker, I rise today to recognize the apology offered by the Government of Australia for the mistreatment of child migrants and children in institutional care under state supervision.

In an effort to populate its empire, the British Government assisted private organizations with settling people in many of its overseas dominions. Between 1922 and 1967 over 7,000 children were sent to Australia and placed in the care of residential institutions. Many of these children were separated from their families and never told the truth about their loved ones. They became part of the half a million Australian children who were placed in institutional or foster care during this period who would later be called the "Forgotten Australians". As wards of the state, the Forgotten Australians suffered from appalling physical, emotional and sexual abuse. They were subjected to harsh, often brutal discipline and labor programs, and referred to by number instead of by name.

For years, their story has been lost—unheard and unacknowledged by the wider community. The aftermath of this government-condoned suffering left deep emotional and psychological scars on countless individuals and their families, and many resorted to crime, drug and alcohol abuse and suicide.

On November 16, 2009, Prime Minister Kevin Rudd formally apologized to the Forgotten Australians on behalf of the Australian

government and the Parliament of Australia and took an important step in national healing. This apology was accompanied by a commitment to properly record and share the experiences of the Forgotten Australians with future generations and support victims as they attempt to discover their familial backgrounds and reunite with loved ones.

This statement came nearly 2 years after another historic apology that Prime Minister Rudd gave on behalf of the Australian Government to the Indigenous people of Australia and the Stolen Generation. The willingness of the Australian government to address past wrongs and present inequalities shows its dedication to national healing, growth and reconciliation.

Madam Speaker, I commend the Australian Government for acknowledging its past transgressions and for its commitment to the sacred duty of protecting its children, families and communities in the years to come.

EARMARK DECLARATION

HON. MICHAEL K. SIMPSON

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SIMPSON. Madam Speaker, in accordance with the policies and standards put forth by the House Appropriations Committee and the GOP leadership, I would like to list the congressionally-directed projects I have requested in my home State of Idaho that are contained in the Conference Report accompanying H.R. 3326, the FY2010 House Defense Appropriations Bill.

Project Name: 3-D Technology for Advanced Sensor Systems

Amount Received: \$2,000,000

Account: Electronics Technology Account in the Department of Defense RDT&E

Recipient: Boise State University

Recipient's Street Address: 1910 University Drive, Boise, Idaho 83725

Description: The 3-D packaging approach offers the promise of a dramatic decrease in the system weight and volume, together with increased system performance. This project will provide funding to continue to develop 3-D processing techniques on silicon and LTCC platforms. These include technologies for die and wafer-scale bonding and 3-D interconnects. These techniques will be applied to create 3-D integration and packaging solutions applicable to a general category of high performance sensor systems. The military has a need for new three-dimensional (3-D) packaging of electronic systems, particularly sensor systems for portable (i.e., on-soldier) applications. 3-D integration and packaging of sensors will result in smaller electronics with expanded capability, allowing the soldier in the field to be more effective.

Project Name: Accelerator-Driven Non-Destructive Testing

Amount Received: \$2,000,000

Account: Support Systems Development Account in the Air Force RDT&E

Recipient: Idaho State University

Recipient's Street Address: 921 South 8th Avenue, Stop 8007, Pocatello, Idaho 83209

Description: The Idaho Accelerator Center (IAC) will develop a research, education and commercialization program that takes non-destructive testing techniques developed at the IAC and advances their development. The penetrating and non-destructive techniques that are under development include new techniques in positron annihilation spectroscopy with accelerator-based gammabeams, the use of mono-chromatic x-ray beams and the use of photon activation (via photonuclear reactions) for trace element analysis of materials and manufacturing processes. The development of practical non-destructive testing (NDT) techniques will help the U.S. Air Force reduce aircraft downtime necessary for inspection and enhance turn-around times by more quickly identifying needed repairs through spectroscopy and the use of x-ray. The development of practical NDT techniques will be of immense value to the armed forces in four critical areas: quicker return of aircraft to the line by reducing the tear-downs necessary for inspection; non-destructively addressing the enormous 'aging fleet' problem of the U.S.A.F. and the private sector; better economics by replacing parts on an on condition inspections basis instead of a 'life limited' basis; and the ability to successfully apply NDT techniques to composite materials. Currently, no commercialized NDT technique works on composite materials.

Project Name: Domestic Manufacturing of 45nm Electronics (DOME)

Amount Received: \$3,200,000

Account: Advanced Spacecraft Technology Account in the Air Force RDT&E

Recipient: American Semiconductor, Inc

Recipient's Street Address: 3100 South Vista Avenue, Suite 230, Boise, Idaho 83705

Description: Funding for this program will deploy a new foundry capability to address the most critical electronics sourcing issue faced for secure supply of advanced DoD integrated circuits in 2012 and beyond. DOME is an AFRL-sponsored initiative to implement a 45nm state-of-the-art wafer fabrication capability to meet current and future system requirements for fabrication of specialized integrated circuits in a broadly available foundry capacity to serve DOD. Microelectronics capability for defense applications requires advancement of technology for each generation of new defense system. Defense system requirements are often highly specialized and include capability beyond that of standard commercial devices due to their unique operational environments. An advanced and sustainable defense microelectronics supply solution is required that can provide parts in low volume at reasonable costs and be fabricated on-shore to meet security requirements. This advanced process technology enables higher speed, lower power electronics that are of vital importance to the military and intelligence communities. The DOME program will deliver the capability to manufacture semiconductors at the most advanced technology node currently in production, 45nm, at an American run on-shore facility optimized for DoD/IC business.

Project Name: Hybrid Energy Systems Design and Testing

Amount Received: \$2,000,000

Account: Military Engineering Advanced Technology Account in the Army RDT&F

Recipient: Idaho National Laboratory

Recipient's Street Address: 2525 Fremont Avenue, Idaho Falls, Idaho 83415

Description: The Hybrid Energy Systems Development and Testing Program will provide the Army transformational technologies that advance Army leadership in global energy security and carbon reduction. Hybrid energy concepts provided through this program could allow the Army to simultaneously address energy supply (electrical grid and fuel supply) security and surety, environmental (CO₂) footprint reduction, and provide national economic benefits. This project will leverage unique assets at the INL, such as its Hybrid Testing Lab, engineering-scale energy system beds, supercomputing capabilities, and hybrid systems design teams, and nuclear technology designs, to develop, validate, and assess hybrid and other advanced energy system concepts. This program will provide a foundation for Army leadership in clean, smart, secure energy for future defense and non-defense applications.

Project Name: Integrated Passive Electronic Components

Amount Received: \$1,360,000

Account: Advanced Spacecraft Technology in the Air Force RDT&E

Recipient: University of Idaho

Recipient's Street Address: 820 Idaho Ave., Morrill Hall 109, Moscow, ID 83844

Description: Spacecraft are critical for coordinating modern military operations, particularly for intelligence gathering, battle-space communications, resource deployment (e.g. Global Positioning System), and targeting. More accurate and timely information enables more effective deployment, but requires enhanced sensing, communications and computing, which require more power. Limited energy sources and cooling capacity aboard spacecraft restrict increased processing capability. Power consumption has become a limiting factor in the performance electronic and computing technologies. Microchip designers have addressed rising power consumption by reducing the voltage levels of the power delivered to the chips, with excellent results. However, this creates a new problem of how to deliver clean low-voltage power to the chips. This research will develop the technologies to enable low-voltage power regulation to be integrated onto the same piece of silicon that holds the computing circuits, thus making ultra-low-power microelectronics practical. The key to this technology is integrated passive components. In addition, this research will produce a new range of component options for analog circuit designers, enabling greater ability to program and increasing flexibility of on-board electronic systems.

Project Name: Material, Design, Fabrication Solutions for Advanced SEAL Delivery System external structural components

Amount Received: \$2,000,000

Account: Operations Advanced Seal Delivery System (ASDS) Development in the Department of Defense Research, Development, Test and Evaluation (RDT&E)

Recipient: Premier Technology Inc.

Recipient's Street Address: 1858 West Bridge Street, Blackfoot, Idaho 83221.

Description: Premier Technology Inc. will work with the Idaho National Lab, Navy PEO

Submarine (PMS 399), U.S. Special Operations Command, Naval Special Warfare Command and the Navy Office of Naval Research to provide material, design and fabrication solutions for ASDS external structural components allowing those components to withstand severe hydrodynamic, hydrostatic and shock loading while maintaining significant resistance to corrosion in situations where the ASDS is attached to the submerged host submarine operating at high speeds. Candidate components include the host submarine pylon assembly, ASDS lower hatch (buttress threads) and ASDS shaft line components. The goal of this project is to assist the U.S. Navy in bringing ASDS to its fullest operational capability by addressing challenges that it faces in key material issues.

Project Name: Radiation Hardened Cryogenic Read Out Integrated Circuits

Amount Received: \$1,600,000

Account: Defense Production Act Purchases in Department of Defense Procurement

Recipient: ON Semiconductor, Inc.

Recipient's Street Address: 2300 Buckskin Road, Pocatello, Idaho 83201

Description: Readout integrated circuits (ROIC) are the foundation of thermal imaging systems. These systems have forever changed modern warfare and surveillance. The United States Air Force and the Missile Defense Agency have been investigating ways to improve manufacturing capabilities and improve cryogenic and radiation performance of these circuits. The thermal imagers of the future will operate in harsh environmental conditions for longer periods of time and will have increased resolution (through increased pixel count) than the detectors of today. Maintaining a domestic source of this technology, as well as working to enhance the manufacturing capabilities of this critical technology, are as equally important as increasing the yield. The DPA Tide III Readout Integrated Circuit (ROIC) program will continue the improvement efforts to develop technology that includes a larger stitched die, smaller feature size (< 0.35um), improved yields, and reduced cycle times will enable a domestic U.S. source for ROIC manufacturing to meet our national defense needs.

I appreciate the opportunity to provide a list of congressionally-directed projects in the Conference Report accompanying the FY2010 Defense Appropriations bill on behalf of Idaho and provide an explanation of my support for them.

A PROCLAMATION HONORING
ERICA RHEA FOR HER CERTIFICATION BY THE NATIONAL
BOARD FOR PROFESSIONAL
TEACHING STANDARDS

HON. ZACHARY T. SPACE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SPACE. Madam Speaker,

Whereas, Erica Rhea has been granted certification by the National Board for Professional Teaching Standards; and

Whereas, Erica Rhea has sufficiently demonstrated adherence and dedication to the five

core propositions of teaching set by the National Board for Professional Teaching Standards; and

Whereas, due to her hard work and dedication to her profession, Erica Rhea was able to achieve this esteemed honor; and

Whereas, we recognize the values and lessons teachers impart to our children; and

Whereas, the creative ingenuity that Erica Rhea has demonstrated while educating her students; now, therefore, be it

Resolved, that along with Ohio's 18th Congressional District, I congratulate Erica Rhea for her certification by the National Board for Professional Teaching Standards.

EARMARK DECLARATION

HON. JO ANN EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mrs. EMERSON. Madam Speaker, pursuant to the House Republican standards on earmarks, I am submitting the following information in regards to H.R. 3326, the Fiscal Year 2010 Department of Defense Appropriations Bill.

Requesting Member: Rep. JO ANN EMERSON
Bill Number: H.R. 3326

Account: RDTE, A

Requesting Entity: Missouri University of Science and Technology

Address of Requesting Entity: 1870 Miner Circle, Rolla, Missouri 65409

Description of Request: Provide an earmark of \$2,400,000 to research materials that will lead to advances in the storage and generation of power. To maintain a strong national defense, our Nation must develop new devices from innovative polymer-based materials that have lower-power requirements, greater strength, lighter weight, higher sensitivity, and robustness to operate under extreme conditions. The research will provide materials that will lead to important advances in the generation and storage of power. The power generation systems would have advantages for military use over current systems in terms of weight, flexibility, and functionality.

Requesting Member: Rep. JO ANN EMERSON
Bill Number: H.R. 3326

Account: RDTE, A

Requesting Entity: Missouri University of Science and Technology

Address of Requesting Entity: 1870 Miner Circle, Rolla, Missouri 65409

Description of Request: Provide an earmark of \$2,400,000 to complete a project to develop high performance alloy materials and advanced manufacturing of steel castings for new lightweight and robotic weapon systems. This program would enhance defense component capabilities at a reduced cost. The program would also augment war fighter capability by increasing the mobility and reliability of weapons systems.

Requesting Member: Rep. JO ANN EMERSON
Bill Number: H.R. 3326

Account: RDTE, A

Requesting Entity: Missouri University of Science and Technology

Address of Requesting Entity: 1870 Miner Circle, Rolla, Missouri 65409

Description of Request: Provide an earmark of \$4,800,000 to develop new, low-cost, sensors and an integrating network methodology for geospatial localization and tracking of explosive related threats and precursor materials using spatially distributed, multimodal sensors. This effort is consistent with the U.S. Army goals of assured mobility and force protection.

Requesting Member: Rep. JO ANN EMERSON
Bill Number: H.R. 3326

Account: RDTE, AF

Requesting Entity: Missouri University of Science and Technology

Address of Requesting Entity: 1870 Miner Circle, Rolla, Missouri 65409

Description of Request: Provide an earmark of \$2,400,000 to develop fiber reinforced ultra-high temperature materials for hypersonic flight vehicles. Ultra-high temperature materials are imperative for the leading and trailing edges, and control surfaces, of future hypersonic vehicles. The proposed project would greatly advance the material selection and design capability for military systems projected to operate in the extreme environments associated with hypersonic flight. Success of this project would enable the United States to uphold its position of world leadership in these critical technology areas.

HONORING WILLIAM H. BEARDSLEY

HON. MICHAEL H. MICHAUD

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. MICHAUD. Madam Speaker, I rise today to recognize the accomplishments of William H. Beardsley.

William Beardsley served for the past 22 years as president of Husson University in Bangor, Maine. When Mr. Beardsley took over, the University was threatened by eminent bankruptcy, but because of William's strong leadership, the University today is financially solid and continues to educate the future leaders of Maine and the United States.

Under his guidance, enrollment at Husson tripled, the campus doubled in size and degree offerings multiplied, including the establishment of a new law school. Mr. Beardsley's strong, pragmatic leadership has created a thriving academic center with a promising future indeed.

Prior to his service at Husson University, Mr. Beardsley worked with the University of Vermont, Green Mountain Power Corp., Bangor Hydro Electric Co., Alaska Pacific University, the state of Alaska and Bar Harbor Banking & Trust Co. Humble, down to earth, engaging, eloquent and a visionary entrepreneur, Mr. Beardsley is a husband and father of three with a doctorate from Johns Hopkins University.

As the faculty and staff of Husson University prepare to continue educating its students without Mr. Beardsley, they are left in charge of an academic institution dedicated to providing quality private education with tuition costs comparable to many public universities. The low tuition and high level of financial aid at Husson University is one of Mr. Beardsley's most important legacies.

Madam Speaker, please join me in honoring William H. Beardsley for his life of dedication and service to his community and the education of Maine's students.

EARMARK DECLARATION

HON. JOHN J. DUNCAN, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. DUNCAN. Madam Speaker, consistent with House Republican Earmark Standards, I am submitting the following earmark disclosure information for project requests that I made and which were included within H.R. 3326, the "Department of Defense Appropriations Act, FY2010."

Requesting Member: Congressman JOHN DUNCAN

Account: RDTE—Air Force

Project Amount: \$1,600,000

Legal Name of Requesting Entity: University of Tennessee, 328 Ferris Hall, 1508 Middle Drive, Knoxville, Tennessee 37996

Description of Request: The funding will be used for design, testing, and evaluation of systems needed for the harvesting and storage of green energy. The need for the nation to design, implement, and test systems and processes capable of producing renewable energy at a large scale is vital for the U.S. military and the Nation as a whole.

A PROCLAMATION HONORING KELLY LAW FOR HER CERTIFICATION BY THE NATIONAL BOARD FOR PROFESSIONAL TEACHING STANDARDS

HON. ZACHARY T. SPACE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SPACE. Madam Speaker,

Whereas, Kelly Law has been granted certification by the National Board for Professional Teaching Standards; and

Whereas, Kelly Law has sufficiently demonstrated adherence and dedication to the five core propositions of teaching set by the National Board for Professional Teaching Standards; and

Whereas, due to her hard work and dedication to her profession, Kelly Law was able to achieve this esteemed honor; and

Whereas, we recognize the values and lessons teachers impart to our children; and

Whereas, the creative ingenuity that Kelly Law has demonstrated while educating her students; now, therefore, be it

Resolved, that along with Ohio's 18th Congressional District, I congratulate Kelly Law for her certification by the National Board for Professional Teaching Standards.

EXPRESSING CONDOLENCES AND
CELEBRATING THE LIFE OF
HENRY S. MILLER, JR.

HON. EDDIE BERNICE JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Ms. EDDIE BERNICE JOHNSON of Texas. Madam Speaker, I rise today in honor of Henry S. Miller, Jr. who passed away on Saturday, December 5, 2009.

Mr. Miller was an icon in the Dallas community who created a real estate empire with over 1,300 employees and 41 offices. After joining the business his father founded, Miller steered Henry S. Miller Co. to success by pioneering the concept of specialization of services. Essentially, Miller championed the idea of creating specialists in commercial real estate fields like industrial, retail, and multifamily. By doing this, he created a real estate culture that encouraged employees to be incredibly knowledgeable in specific areas, allowing the company to move forward quickly and effectively in those fields.

Throughout his career and life, Mr. Miller was regarded as an honest and humble man, and maintained these traits in an industry where it is easy to devolve into something much different. Known throughout the community as a businessman of integrity and knowledge, he was a pioneer in the Dallas real estate industry and helped to develop it into the powerhouse that it is today.

Madam Speaker, I ask my fellow colleagues to join me in honoring this great man who truly was ahead of his time.

RECOGNIZING THE MANY YEARS
OF SERVICE OF JIM PITCOCK

HON. JOHN BOOZMAN

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. BOOZMAN. Madam Speaker, I rise today to pay tribute to a fine Arkansan who, on December 11, 2009, ended a 51-year career in television, radio and politics.

Jim Pitcock's career in Arkansas radio, television and politics began in his hometown of Fort Smith in 1958 as a part-time camera operator at KFSA television. He would attend junior college during the day, then work at the television station during the evening newscasts.

A short time later he was offered a job at KCCL Radio in Paris, Arkansas where he received his first chance to do "on-air" work as a disc jockey. He traded in school for the job and spent the next two years driving back and forth to Paris while continuing his work at the television station in the evening.

In 1960, Jim began work as a full-time disc jockey at KFSA Radio in Fort Smith.

In 1963, KAAV, the "Mighty 1090" in Little Rock offered Pitcock a job in the Capitol City where he assumed the identity of "Ron Owens—The Midnight Satellite."

Almost a year to the day later, Jim Pitcock was hired by KATV Television where he

began a 32-year career as the station's News Director. At one point, Pitcock served as the longest-tenured news director in the country. He traveled from Moscow to Vietnam bringing Arkansans news in international significance with a local perspective. Pitcock also oversaw the station's coverage of then-Governor Bill Clinton's rise to the White House in 1991 earning the station a Regional Emmy Award from the National Academy of Television Arts and Sciences.

During his tenure Pitcock won numerous Associated Press Broadcaster's Association awards and led the station's news department atop the ratings for more than a decade.

Jim Pitcock has been honored with a number of other awards for his work as an Arkansas broadcast journalism pioneer including: The Arkansas Society of Professional Journalist's "Silver Microphone" Award for lifetime achievement and the University of Arkansas Department of Journalism's "Ernie Deane Award" for his contribution to broadcast journalism in the state.

Pitcock also served for a time as Congressman Bill Alexander's Field Director in Arkansas, worked with former Arkansas Attorney General MARK PRYOR and finished his career as an aide to United States Senator MARK PRYOR.

One of seven siblings, Jim Pitcock and all three of his brothers worked in the broadcast journalism field during their careers. Oldest brother Bill Pitcock (deceased) served as evening news anchor for KOTV News in Oklahoma City, Bob Gregory Pitcock worked as a correspondent for CBS News Washington and youngest brother Jerry Pitcock worked at KATV in Little Rock and the Arkansas Educational Television Network in Conway, Arkansas.

Jim has four grown children and six grandchildren.

A PROCLAMATION HONORING KIMBERLY BRUGGER FOR HER CERTIFICATION BY THE NATIONAL BOARD FOR PROFESSIONAL TEACHING STANDARDS

HON. ZACHARY T. SPACE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SPACE. Madam Speaker,

Whereas, Kimberly Brugger has been granted certification by the National Board for Professional Teaching Standards; and

Whereas, Kimberly Brugger has sufficiently demonstrated adherence and dedication to the five core propositions of teaching set by the National Board for Professional Teaching Standards; and

Whereas, due to her hard work and dedication to her profession, Kimberly Brugger was able to achieve this esteemed honor; and

Whereas, we recognize the values and lessons teachers impart to our children; and

Whereas, the creative ingenuity that Kimberly Brugger has demonstrated while educating her students; now, therefore, be it

Resolved, that along with Ohio's 18th Congressional district, I congratulate Kimberly

Brugger for her certification by the National Board for Professional Teaching Standards.

EARMARK DECLARATION

HON. ROBERT B. ADERHOLT

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. ADERHOLT. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326—the Department of Defense Appropriations Act, 2010.

Request as named in the report: Electrically Charged Mesh Defense Net Troop Protection System

Requesting Member: ADERHOLT
Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—Army
Legal Name of Requesting Entity: Victory Solutions, Inc.

Address of Requesting Entity: 4900 Corporate Drive, Suite A, Huntsville, AL 35805.

Description of Request: \$7,500,000. The funding would be used for "D-NET" a Defense Net Troop Protection System designed to intercept and negate the serious insurgent and terrorist threat tactics employing Rocket Propelled Grenades (RPG), mortars, and small rocket munitions encountered by U.S. Combat Forces. This product could help save warfighters' lives in hostile territories such as Afghanistan and Iraq through an innovative and low-cost system of defending vehicles against enemy attacks by further testing and prototype development of a system which has passed all tests so far and gotten favorable government program manager review, and which was developed with input from troops in the field. The spending plan for this Phase II of the program, to total \$7,500,000, is: Prototype Production and Field Test & Evaluation Program for integration and operational development. Further develop the D-Net technology based on Phase I R&D Tests to a Technology Readiness Level (TRL) worthy of deploying a limited quantity of "Field Prototypes" to Theatre for field and operations test and evaluation.

FY2010 Task A: D-Net "Field Prototypes" (\$3.5M). Deliver to Army Logistics: 100 "Field Prototypes" of the D-Net Static Troop Protection System for Theatre Deployment on military asset vehicle for field testing (Procurement of Prototypes delivered to Military. Develop, Build, Assemble, Kit Packaging within military requirements like HAZMAT etc, Deliver and Ship to War Zone to fill purchase for Field Test Program) (\$3.5M, or \$35K/unit).

Task B: Field Test Program, data collection and refinement (\$1.075M). Send science and engineering teams to Theatre for collection of field data from Field Prototypes deployed (Data collection material \$125K, OCONUS Labor \$425K), interact with operating community for feedback, return to lab and refine the technology for better performance and utility (Re-engineer labor \$225K). Requires OCONUS travel (\$300K).

Task C: Threat Characterization (\$350K). Analyze and Perform trade Studies on Threat

variants commonly engaged in Theatre scenarios. Engineering and analysis labor (\$350K).

Task D: Net Optimization & Continued R&D (\$1.3M); Range Test Net Materials (\$250K); Government Provided Range Test Facilities & Government Provided Threats for Tests (\$500K); Parametric Studies/ Validation Labor/ Salaries Engineering (\$250K) and Manufacturing labor (\$250K), Travel (\$50K).

Task E: Continue Launcher Development (\$870K). Ground and Aerial Launcher Design and Development R&D and Fabrication Material (\$320K); Testing (\$150K); Labor for Engineering, Integration and Manufacturing for Platform Depot Requirements (\$400K).

Task F: Integration to Systems & Platforms (\$405K). Design and Integration Trade Studies, COTS Sensor Integration Analysis and Labor (\$250K); Material (\$75K), Travel to Platform Project Offices (\$80K).

Request as named in the report: Marine Corps MK 1077 Flatracks

Requesting Member: ADERHOLT

Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—Army

Legal Name of Requesting Entity: SUMMA Technology, Inc.

Address of Requesting Entity: headquartered at 140 Sparkman Drive, Huntsville, AL 35805. The manufacturing facility is in Cullman, Alabama.

Description of Request: \$3,000,000. The funding would be used for the MK1077 Flatrack. This is a revolutionary material handling system that provides the Marines with expedited logistical support while achieving significant manpower and equipment reductions. These racks and the containers they work with can be used to transport ammunition or other supplies in and out of areas quickly, thus greatly reducing the warfighter's exposure to danger. This is a continuation of a multi-year procurement program, and the recipient company has a proven record of meeting the strict, structural requirements for this item. The USMC has a requirement for 3,500 MK1077 Flatrack units of which 1,000 units have been acquired to date. \$3,000,000 will provide approximately 347 additional units, bringing the inventory up to 1,347.

Request as named in the report: Waterside Wide Area Tactical Coverage and Homing

Requesting Member: ADERHOLT

Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—Army

Legal Name of Requesting Entity: Miltec Corporation

Address of Requesting Entity: Miltec Corporation, located at 21232 Hwy 431, Guntersville, AL 35976

Description of Request: \$4,000,000. The funding would be used for development and integration of systems for the final test and demonstration of the WaterWATCH affordable underwater monitoring capability. Most waterfront facilities are unprotected due to cost considerations. Finalization of this product would make available a security system which installations at military bases and other critical infrastructure locations (such as nuclear power plants near waterways) could afford. WaterWATCH integrates many currently avail-

able components through the development of new software and the testing of these systems. Approximately \$60,000 would be needed for travel, approximately \$150,000 for hardware, and the rest for labor (software development and testing).

Request as named in the report: Protective Self-Decontaminating Surfaces

Requesting Member: ADERHOLT

Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—Defense-Wide

Legal Name of Requesting Entity: Ventana Research Corp. (VRC) & Kappler, Inc., and Kappler, Inc.

Address of Requesting Entity: VRC at 2702 South 4th Avenue, South Tucson, AZ 85713-4816; and Kappler at 115 Grimes Drive, Guntersville, AL 35976-9364

Description of Request: \$2,000,000. The funding would be used for Prototype field validation tests of VRC-Kappler Chemical Biohazard Protective systems, lab tests of bacterial infections, diseases and contaminated human remains pouches (CHRP's); to field and live test nerve gas and radiological agents (in order to design the suit to withstand such an attack by a hostile nation). Present decontamination processes are labor intensive and require lengthy downtimes. Field-tested prototypes of this fabric demonstrate cost-effective Chemical Biohazard protection for military personnel and civilian populations. Applications could be military, for homeland security, or for dangerous medical and rescue operations. The spending plan is Personnel: \$620,000; Materials: \$80,000; Equipment: \$120,000; travel: \$25,000; Govt Agency partnerships: Oversight and testing work: DTRA/CBT: \$90,000; AFRL/Tyndall AFB: \$250,000; USA NSRDEC: \$90,000; Preproduction, Live Agents Tests, \$825,000

Request as named in the report: Scenario Generation for IAMD Evaluation (SGIE)

Requesting Member: ADERHOLT

Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—Defense-Army

Legal Name of Requesting Entity: QinetiQ North America Systems Engineering Group

Address of Requesting Entity: AMSRD-AMR-BA Bldg. 6263, Redstone Arsenal, AL 35898

Description of Request: \$4,200,000 for Scenario Generation for IAMD Evaluation (SGIE) in fiscal year 2010. The entity to receive funding for this project is QinetiQ North America Systems Engineering Group, located at 890 Explorer Boulevard, Huntsville, AL 35806. The funding would be used for 54 ground test cases identified in the IAMD TEMP and 7 flight test cases derived from ground test matrix. A scenario for each test case is required to capture the design specification as it is intended to perform in a battlefield situation. Taxpayer Justification: This program will contribute to the work of establishing an Integrated Air & Missile Defense System protect against air breathing missile and cruise missile threats. This work will provide a network centric system to integrate a mix of sensors and shooters through a common IAMD battle command system.

Request as named in the report: Enhanced—Rapid Tactical Integration for Fielding of Systems Initiative (E-RTIFS)

Requesting Member: ADERHOLT

Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—Defense-Army

Legal Name of Requesting Entity: PeopleTec, Inc.

Address of Requesting Entity: 4901-D Corporate Drive, Huntsville, AL 35805

Description of Request: \$3,900,000 for Enhanced Rapid Tactical Integration for Fielding of Systems (ERTIFS) in fiscal year 2010. The entity to receive funding for this project is PeopleTec, Doug Scalf, Linda Maynor, located at PeopleTec, Inc. 4901-D Corporate Drive, Huntsville, AL 35805. The funding would be used to support early SoS testing to ensure that interoperability issues are corrected before software is released for formal AIC testing. The ABCS-BA will leverage and evolve ERTIFS to support four types of required Interoperability Tests: (1) Individual System, (2) System of Systems (e.g. Software Blocking), (3) Backwards Compatibility—Interoperability and (4) Regression Testing. Taxpayer Justification: The early identification of these issues will limit cost and schedule overruns on Aviation/Missile Systems prior to expensive hardware tests.

Request as named in the report: Swarms Defense Systems

Requesting Member: ADERHOLT

Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—Defense-Army

Legal Name of Requesting Entity: Southeast Systems Technology

Address of Requesting Entity: 4090 South Memorial Parkway M/S 3427B, Huntsville, AL 35802

Description of Request: \$3,000,000 funding for SWARMS DEFENSE SYSTEMS in fiscal year 2010. The entity to receive funding for this project is Computer Science Corporation, located at 4090 S. Memorial Parkway M/S 3427B, Huntsville, Alabama 35801. The funding would be used to close the gap between current and future Air Defense Systems dealing with enemy mortars, rockets, UAV's, and cruise missiles. Future threats exceed all requirements of current system and future AD plans. Taxpayer Justification: Swarms Defense is designed to protect soldiers and critical assets against enemy fire, especially high volume small munitions such as mortars, rockets, UAV's, cruise missiles, developing the critical technologies required to close the gap in current asset protection plans.

Request as named in the report: Tactical UAV, Heavy Fuel Engine

Requesting Member: ADERHOLT

Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—Defense-Army

Legal Name of Requesting Entity: Science and Engineering Services

Address of Requesting Entity: 4015 Pulaski Pike, NW., Huntsville, AL 35810

Description of Request: \$2,000,000 for the Tactical UAV, Heavy Fuel Engine in fiscal year

2010. The entity to receive funding for this project is Science and Engineering Services, Inc., located at 4015 Pulaski Pike, Huntsville, AL 35810. The funding would be used for development of lightweight military fuel engine for UAVs. Scope includes building engines to perform platform integration and flight test for use in a military environment. Funding supports design and implementation of the process to military standards. Taxpayer Justification: Shadow UAS is ideal for providing direct information to commanders increasing awareness. Heavy fuel technology allows an engine to burn any fuel, diesel, JP5, JP8, gasoline, producing low emission, can be economically manufactured, and maintained

Request as named in the report: Army Responsive Tactical Space System Exerciser (ARTSSE)

Requesting Member: ADERHOLT
 Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010
 Account or Provision: RDT&E—Defense-Army

Legal Name of Requesting Entity: J2 Technologies Inc.

Address of Requesting Entity: 4801 University Square, Suite 31, Huntsville, AL 35816

Description of Request: \$3,000,000 for Army Responsive Tactical Space System Exerciser (ARTSSE) in fiscal year 2010. The entity to receive funding for this project is J2 Technologies Inc., located at 4801 University Square, Suite 31, Huntsville, AL 35816–1815. The funding would be used to provide the hardware-in-the-loop test capability designed to address the need to define performance requirements, evaluate and execute Operationally Responsive Space programs thus ensuring the warfighter's continued access to space. Taxpayer Justification: Army Responsive Tactical Space System Exerciser (ARTSSE) provides technologies critical to maintaining access to space. ARTSSE supports an unfunded Army need to provide a responsive surge for space based communication, surveillance, and reconnaissance, especially when a change in circumstances brought about by foreign-owned assets requires a response from the U.S. systems within hours or a few days in order to maintain protection of U.S. personnel and assets.

Request as named in the report: Autonomous Cargo Acquisition for Rotorcraft Unmanned Aerial Vehicles

Requesting Member: ADERHOLT
 Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010
 Account or Provision: RDT&E—Defense-Army

Legal Name of Requesting Entity: Advanced Optical Systems, Inc.

Address of Requesting Entity: 6767 Old Madison Pike, Suite 410, Huntsville, AL 35806

Description of Request: \$1,600,000 for Autonomous Cargo Acquisition for Rotorcraft Unmanned Aerial Vehicles in fiscal year 2010. The entity to receive funding for this project is Advanced Optical Systems, Inc., located at 6767 Old Madison Pike, Suite 410, Huntsville, Alabama 35805. The funding would be used to demonstrate fully unmanned cargo pickup and delivery under operational conditions. The work will leverage current developments for manned systems, and will cooperate with

TRADOC and logistics personnel at Ft. Rucker and Ft. Lee. Taxpayer Justification: The Army needs to leverage rotorcraft unmanned aerial systems to provide unmanned pickup and delivery for logistics supply and weapons placement. Unmanned cargo operations would reduce both aircrew losses and costs.

Request as named in the report: On-Board Vehicle Power (OBVP)

Requesting Member: ADERHOLT
 Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—Defense-Army

Legal Name of Requesting Entity: DRS Training and Energy Management

Address of Requesting Entity: 110 Wynn Drive, Huntsville, AL 35805

Description of Request: \$3,100,000 for On-Board Vehicle Power (OBVP) in fiscal year 2010. The entity to receive funding for this project is DRS Training and Energy Management, located at 110 Wynn Drive, Huntsville, AL 35805. The funding would be used for OBVP provides electric power for vehicles and mission electronics. OBVP fits the space inside the bell housing of vehicle transmissions. The system is capable of producing 30–70 kW. Increased power is needed for IED detection and weapon systems. Taxpayer Justification: Growth in energy requirements on the battlefield has created a critical need to accelerate this program to production readiness. The system can deliver mobile/exportable electric power from the vehicle engine for electric power gap requirements.

Request as named in the report: Extremely Large, Domestic Expendable and Reusable Structures (ELDEERS)

Requesting Member: ADERHOLT
 Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: Dpa Defense Production Act Purchases

Legal Name of Requesting Entity: ATK Aerospace Structures

Address of Requesting Entity: 751 County Road 989, Building 1000, Iuka, MS 38852

Description of Request: \$9,800,000 For Current domestic large-scale, composites production capacity is constrained by processing limitations associated with the large diameter of the items being manufactured. At the same time, the Air Force is making future plans to utilize structures with diameters in excess of nine meters. The current domestic industrial production capacity does not support this scale of extremely large composite launch structures. The ELDEERS Title III program was initiated in FY2009 with \$8.0 million to scale-up domestic composites manufacturing and processing capacity and support facilities to meet this critical emerging need in military space access. The three-phase program includes evaluation, modification and qualification of current automated production equipment and facilities, and the acquisition of necessary industrial capacity and processing capabilities. In general, Title III activities serve to lower defense acquisition and life-cycle costs and to increase defense system readiness and performance through the use of higher quality, lower cost, and technologically superior materials and technologies. The ELDEERS Program will increase the capacity for increasingly large-

er composite structures, including development and acquisition of higher performing composite processing equipment.

Request as named in the report: Adaptive Robotics Technology for Space, Air and Missiles [ART-SAM]

Requesting Member: ADERHOLT
 Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—Defense-Army

Legal Name of Requesting Entity: Calhoun Community College

Address of Requesting Entity: 6250 Hwy. 31 North Decatur Campus, Tanner, AL 35671

Description of Request: \$4,200,000 for Adaptive Robotics Technology for Space, Air and Missiles [ART-SAM] in fiscal year 2010. The entity to receive funding for this project is Calhoun Community College, located at 6250 U.S. Highway 31 North, Tanner, AL 35671. The funding would be used for a joint venture with leadership from the U.S. Army Space and Missile Defense Command (SMDC) and Alabama Industrial Development Training (AIDT), and will establish national robotics research and development capability at Calhoun Community College to leverage government, industry, and academia partnerships and their respective investments. Additionally, funds will be used to procure instrumentation, components and test fixtures to provide a hands-on laboratory for experiments and process testing in an unmanned environment. Taxpayer Justification: The ART-SAM project, once operational, will develop robotics technologies, systems and products for a variety of SMDC projects, programs, and core mission needs. It will serve as an economic development catalyst for robotic research and development, training, operations and manufacturing. It will also support workforce development initiatives throughout the state.

Request as named in the report: Protective Self-Decontaminating Surfaces

Requesting Member: ADERHOLT
 Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010

Account or Provision: RDT&E—DW

Legal Name of Requesting Entity: Ventana Research Corp. (VRC)

Address of Requesting Entity: 139 Barnes Drive, Suite 2, Tyndall AFB, FL

Description of Request: \$1,600,000 for ACD&P project of self-decontaminating surfaces for long-lasting personnel (e.g. clothing) & shelter (e.g. hospitals) protection from Chem/Bio (& nerve gas) attacks. Light-activated decontaminating material produces singlet oxygen, a mild oxidant, to destroy CB agents. Demonstrated the material traps & stores excess singlet oxygen during periods of sun & artificial light. Stored singlet oxygen is released to provide indoor & outdoor protection of 8+ hours during no light & dark periods. Further, no protection loss demonstrated in intense Arizona sunlight 39+ hours during 100+ degrees days. Completed FY07 Individual Protection (IP) ATD milestones. Started FY08 IP ACD&P phase & initiated nerve gas protection ATD for ACD&P in FY10 and will continue ACD&P effort in FY09. Technology: Sun or artificial light activates the decontaminating material to produce singlet oxygen, a mild, short-lived oxidant that effectively destroys chemical/nerve & biological agents. This long-lasting & durable capability for around-the-clock

protection using sun or artificial light is the heart of the invention. Our FY10 request is prompted by the need for including nerve gas and nuclear decontamination capability. This will involve added-on tasks to the program in terms additional test and evaluation efforts. Nerve gas protection effort will address chemistry efforts and tests, nuclear protection disposable, absorbent materials.

Progress: (1) Mustard gas stimulant treated fabric tests demonstrated self-decontamination capability after exposure of 39 days to the intense AZ summer sun; (2) Kappler Provent fabric treated with VRC Decon Dye Coating demonstrated standard industrial practice can be used for first-article production of garments for breathability, field laundering, & durability testing; (3) VRC Decon Dye Coating showed no adverse effect upon Provent fabric's breathability, an essential Joint Service Lightweight Integrated Suit Technology (JSLIST) Ensemble requirement; (4) Airtight seam-bonding process demonstrated with Provent Fabric dyed with VRC Dye Coating enables standard protective suit manufacturing procedures eliminating protective coating application after suit completion, a more costly approach; (5) NMR & UV-Visible Spectroscopy showed Ventana Decon Dye Coating efficiently traps visible light-generated singlet oxygen in repeated release & oxidation a mustard gas & VX stimulant to decontaminated product in darkness; (6) UV-Visible Spectroscopy demonstrated to be a more cost-effective QA tool than conventional NMR inspection; (7) Live tests will be performed at the Defense Science & Technology Laboratory (distl), Proton Down, UK, during the week of April 27, 2009, additional tests are planned for 2Q09 & 3Q09. Samples have been provided to Dr. Stephen Lee, Chief Scientist, Ofc. Director U.S. Army Research Office, for coordination & ITAR, export/import matters & permits.

The requested FY10 program under JPM-CBD's leadership addresses: (1) Perform ATDs on VRC Decon Dye coatings to add nerve gas & radiological agent (disposable garments & coatings) protection; (2) Conduct operational validity tests (ACD&P) of preselected Light-Activated CBNR Protective systems; (3) Continue pre-production of protection systems at Kappler & Ventana for several ACD&Ps of representative JLIST materials, components & suits & upgrade facilities to full production status.

Request as named in the report: Remote Monitoring and Troubleshooting (RMAT) Project

Requesting Member: ADERHOLT
Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010
Account or Provision: OP.N

Legal Name of Requesting Entity: Intergraph
Address of Requesting Entity: 170 Graphics Drive, Madison, AL 35758

Description of Request: \$2,320,000 for RMAT will integrate with shipboard local control and monitoring systems by networking them together and providing secure shore-based remote monitoring of those systems in real time. Through the use of sensors, networks, and software-based controllers, RMAT will provide the means for monitoring and troubleshooting various shipboard systems that are vital to ship operations, and allow engi-

neers from various shore-based locations to collaborate in a real-time secure environment. RMAT will enable faster response times and mitigation of damage caused by engineering casualties, blast, fire, flooding, and equipment malfunction. Implementation of RMAT will increase the level of sensor data fusion, situational awareness, and survivability of the ship, as well as its ability to successfully complete its mission. The change from analog systems and manual data collection will save thousands of man-hours every year. Without funding for this effort, a need will exist to continue maintenance of obsolete hardware-based control panels and large redundant watch-standing and damage control repair parties that rely on slow, outdated, and error producing control systems and information management techniques.

Request as named in the report: Transitioning Stretch Broken Carbon Fiber to Production Programs

Requesting Member: ADERHOLT
Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010
Account or Provision: RDT&E—Defense-Army

Legal Name of Requesting Entity: Hexcel Corporation

Address of Requesting Entity: 3300 Mallard Fox Drive, Decatur, AL 35609

Description of Request: \$3,200,000 for composite structure on existing military aircraft has saved weight and reduced O&M costs. However, a solution to the high cost and unrealized weight benefits of these structures is badly needed. Studies done in conjunction with the major aircraft manufacturers show that while composite material properties predict a weight savings of about 50% is achievable, only about 10–20% is being realized in today's designs. The problem is that the composite materials that are currently available in the marketplace cannot be formed into the complex geometries necessary to realize the true weight savings available. This results in pressure at the design stage to reduce the complexity of parts so they are more fabrication friendly. If the designer holds firm on the part complexity, automated fabrication techniques are often ruled out due to the challenges of forming complex geometries with these processes. The end result is added weight and cost to the structure. Stretch Broken Carbon Fiber (SBCF) technology affords more weight reduction opportunities than any other solution under evaluation by the DoD. SBCF product forms offer a pseudo plasticity akin to metals that makes the forming of complex geometries much easier. These products can be used in all of the automated composite processes currently being used by fabricators including fiber and tape placement and engineered textile approaches for fabricating net shape preforms used in resin infusion processes. The focus of this program will be two-fold. First, funding will be allocated to various composite part fabricators to develop robust processes to mold full size prototype parts with SBCF product forms. Second, funding will be allocated to generate a Mil-HdBk-17 approved database. Both tasks are necessary to take this technology into production.

Request as named in the report: Cooperative International Neuromuscular Research Group

Requesting Member: ADERHOLT
Bill Number: H.R. 3326—the Department of Defense Appropriations Act, 2010
Account or Provision: RDT&E—Defense-Army

Legal Name of Requesting Entity: Children's National Medical Center

Address of Requesting Entity: 111 Michigan Avenue, NW., Washington, DC 20010

Description of Request: \$3,280,000 for funds will be used for ongoing research and testing using molecular patches, to see if the same improvements experienced by dogs in clinical trials can be extended to humans with muscle damage. The funds will be used for ongoing research and testing using molecular patches, to see if the same improvements experienced by dogs in clinical trials can be extended to humans with muscle damage. This research benefits both warfighters (in terms of combating the effects of biological warfare attacks), and also potentially the civilian population who suffer from similar muscle tissue deterioration.

PRINCIPIA COLLEGE SOLAR CAR

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to honor the achievements of the Principia College Solar Team at this year's Global Green Solar Challenge.

Thirty-two teams from around the world traveled to Darwin, Australia for a 3000 kilometer race across the Australian outback in solar powered cars. Only nine teams were able to finish the grueling challenge, included among them was this outstanding group from Elsah, Illinois. Principia's Ra7 finished seventh in the world in this year's race and third among American entries.

While other teams spent millions from corporate sponsorships, the Principia team spent less than \$180,000. The winner, Tokai University of Japan, was sponsored by Sharp Electronics, a leader in solar engineering. This year's runner-up was sponsored by the European Space Agency. When the race was over, Principia earned the Safety Award from race officials, their fourth overall and first in international competition.

I want to congratulate John Broere (Director of Engineering Science), Joe Ritter (Assistant Dean of Academics) and the members of the Principia College Solar Team on their outstanding achievement. Their efforts have done much in accelerating this exciting field of scientific exploration.

IN RECOGNITION OF DOROTHY BRYANT

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SKELTON. Madam Speaker, let me take this means to recognize Dorothy Bryant

from my hometown of Lexington, Missouri. Mrs. Bryant will be retiring at the end of this year after thirty years of dedicated service to the Lafayette County Sheriffs Department.

Mrs. Bryant began working for the Sheriffs Department on January 21, 1980, and since then has worked for five different Sheriffs of Lafayette County. She has worked for the current Sheriff, Kerrick Alumbaugh, for nine of her thirty years. A loyal and dedicated employee, Mrs. Bryant has worked tirelessly to serve the residents of Lafayette County.

Madam Speaker, Dorothy Bryant has helped keep the people of Lafayette County safe for the past three decades. I trust that my fellow members of the House will join me in wishing her the very best in her well-earned retirement.

HONORING LARRY KELLNER,
CHAIRMAN AND CHIEF EXECUTIVE
OFFICER OF CONTINENTAL
AIRLINES INC.

HON. JOHN ABNEY CULBERSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. CULBERSON. Madam Speaker, I rise today to honor Larry Kellner, chairman and chief executive officer of Continental Airlines Inc, the world's 5th largest airline. In May 2001, Larry Kellner was elected president of the airline and to the Board of Directors, and in March 2003, he was named president and chief operating officer. In December 2004, Mr. Kellner became chairman and chief executive officer, where he has promoted international growth at Continental Airlines and has fostered the company's unique culture, putting emphasis on strong internal communication and giving employees the tools to provide outstanding customer service.

Throughout Mr. Kellner's 14-year career at Continental, the company has won more awards for customer satisfaction than any other airline. In 2009, *FORTUNE* magazine ranked Continental the No. 1 airline on their annual airline industry list of "Most Admired Global Companies" for the 6th consecutive year. Continental Airlines also employs 41,000 system-wide and nearly 12,000 in Houston, Texas.

Prior to joining Continental, Mr. Kellner was executive vice president and chief financial officer of American Savings Bank, owned by The Robert M. Bass Group. Prior to that, he was executive vice president and chief financial officer of The Koll Company, a private real estate investment and construction firm.

Kellner graduated magna cum laude with a bachelor of science in business administration from the University of South Carolina, where he served as Student Body President. In addition, the University of South Carolina presented him with the Distinguished Alumni Award in 1998.

Mr. Kellner is active in numerous community and civic organizations. He currently serves on the board of directors for Marriott International and the Air Transport Association. On the civic front, he is a member of the board of directors for the Methodist Hospital, YMCA of Greater

Houston, the Greater Houston Partnership, the Spring Branch Education Foundation, and Central Houston, Inc., and is a member of the Boy Scouts of America National Executive Board. Mr. Kellner also serves on the advisory boards of the March of Dimes and Teach for America, and is on the development board of the University of Texas Health Science Center at Houston. He resides in Houston with his wife, Susan, and their four children.

After more than 14 years at Continental Airlines and 5 years as its CEO, Mr. Kellner will leave the company at the end of 2009 and will head Emerald Creek Group, LLC, a new private investment firm based in Houston.

Congratulations to Larry Kellner for his many achievements throughout his career at Continental Airlines and the best of luck in his future endeavors.

SHILOH MISSIONARY BAPTIST
CHURCH 100TH ANNIVERSARY

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to honor Shiloh Missionary Baptist Church of Mount Vernon, Illinois for reaching the centennial milestone.

Shiloh Missionary Baptist Church opened in 1909 on Vaught Avenue in Mount Vernon and held services at the location throughout 1960's. After being sold, the congregation was unable to find a new location. Being unwilling to dissolve their tight-knit congregation, the Shiloh Missionary Baptist family held services at a member's home for years before acquiring property on Conger Avenue in Mount Vernon.

In spite of adversity, including a disastrous fire in 1999, Shiloh Missionary Baptist Church has held true to its mission in the community and has become a part of Mount Vernon. Its congregation continues its outreach ministry to troubled youths and many others in the community.

I want to join with the members of this House in congratulating Reverend Lawrence James and the men and women of Shiloh Missionary Baptist Church on celebrating one hundred years of good works, to thank them for all they do for our community and to wish them another hundred years of success.

FREEDOM CAPTIVATES THE
HUMAN SPIRIT

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. WOLF. Madam Speaker, last week I spoke at a moving exhibit at the Heritage Foundation which featured a collection of 50 paintings by Ukrainian artist and gulag survivor Nikolai Getman.

Mr. Getman spent eight years in a Siberian gulag. Following his harrowing experience he secretly undertook to chronicle his time in the

Soviet forced labor system because he said he was "convinced that it was my duty to leave behind a testimony to the fate of the millions of prisoners who died and who should not be forgotten."

These 50 paintings are the fruit of 40 years of work on the part of Nikolai. They are a powerful testimony of one's man's triumph over totalitarianism. They ought not be relegated to the annals of history. While the Soviet Union no longer exists, those who seek to suppress freedom, be they in North Korea, China or Egypt, are still with us.

I submit my remarks from the Heritage Foundation event:

"Experience and the record had convinced me that communism is a form of totalitarianism, that its triumph means slavery to men wherever they fall under its sway, and spiritual night to the human mind and soul."

These words were spoken by famed Communist party member, Soviet spy and ultimate defector, Whitaker Chambers.

In testimony before the House Un-American Activities Committee, Chambers said that in spite of what he knew to be true of communism, he believed he was "leaving the winning side for the losing side" but that was "better to die on the losing side than to live under communism."

Of course we know that Chambers' fear proved to be untrue. That communism, as Ronald Reagan predicted, was destined for the "ash heap of history." That the gulags of that era, depicted before us tonight, were destined to be relics of the past.

Ronald Reagan modeled how to confront repressive regimes like the Soviet Union. He spoke truth to power. He boldly pressed the Soviets to respect the fundamental human rights of their own people. He raised the cases of dissidents by name.

He did this because of a fundamental belief that the U.S. constitution was a "covenant we have made not only with ourselves, but with all of mankind"

Reagan once said, "Coersion, after all, merely captures man. Freedom captivates him."

Indeed freedom captivates the human spirit and ultimately triumphs over tyranny whatever form it takes.

RECOGNIZING WINIFRED "WINN"
BUNDY

HON. GABRIELLE GIFFORDS

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Ms. GIFFORDS. Madam Speaker, I rise today to recognize Winifred "Winn" Bundy, who has been named a 2009 Arizona Culturekeeper for her commitment and dedication to upholding the traditions, rituals and culture of my State.

For thirty-five years, Winn has operated the Singing Wind Bookshop near Benson, Arizona. Time magazine called Singing Wind "one of the warmest bookshops on Earth" and a national travel writer said it was "the most unique book-buying experience of my life."

Winn did not start out planning to run a book store. In 1956, she earned a degree in

history and English from the University of Arizona. That year she and her husband bought the Singing Wind, a working cattle ranch.

Winn's love of literature led her to start selling books from the living room of her ranch home. Winn soon developed a reputation for featuring a rich selection of regional authors and topics that draw readers from around the world. Since then, Winn's ranch house has become a must-visit destination for lovers of Southwestern literature who come from far and wide by car and tour bus. Winn now has 150,000 titles in stock on everything from Indian rock art to ghost towns to the Jewish Western experience.

Since 1974, Winn has helped hundreds of Southwestern writers get their start. She specializes in small press books that do not appear in big chain stores and connects authors with publishers to get their works in print.

Winn also cultivates the love of literature and the humanities through the many community activities she sponsors. From its inception, Singing Wind has offered a bookmobile, school programs, book discussions, author readings and writers' festivals.

Earlier this year, Winn received the Juliana Yoder Friend of the Humanities Award from the Arizona Humanities Council. On December 20, 2009 she will be named an Arizona Culturekeeper, an award presented by the Westin Kierland Resort & Spa, in conjunction with the Sharlot Hall Museum, the Arizona Historical Society and Marshall Trimble, Arizona's official state historian.

I am proud of the work that Winn has done to preserve Arizona's culture and to bring literature to a wide audience. She is truly a deserving recipient of the Culturekeeper Award and I join with the award committee in commending her for all that she has done for the people of Arizona and for readers across the country and around the world.

VFW POST 2055 75TH ANNIVERSARY

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to honor the men and women of the Veterans of Foreign Wars Post 2055 in Centralia, Illinois, as they celebrate their 75th anniversary on December 18.

Post 2055 began in a renovated church in 1934 and was followed a year later by the chartering of the local VFW Ladies Auxiliary. The post has grown from its original membership of 56 to a high of more than 600 members.

The men and women of the Centralia VFW post have continued to serve their community and our nation long after their terms of active duty military service have ended. Post 2055 members assemble and send care packages to service men and women in Iraq and Afghanistan.

Members of VFW Post 2055 are dedicated to serving their community. They regularly volunteer at the local Veterans Administration hospital, teach firearms safety courses and participate in cancer research fundraisers.

I would like to thank the men and women of VFW Post 2055 in Centralia, Illinois, for their service to our nation, their continued support of America's soldiers and their dedication to their community.

TO COMMEMORATE THE ESTABLISHMENT OF THE NORTH AMERICAN HEADQUARTERS OF NUMONYX

HON. DANIEL E. LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. DANIEL E. LUNGREN of California. Madam Speaker, tomorrow in my district—in Folsom, California—Numonyx will establish its North American headquarters. Numonyx is a leading semiconductor technology firm that specializes in memory products.

Approximately 450 members of the Numonyx global workforce will be located in nearly 100,000 square feet of building space on its new campus. The campus will house product research and development, business management, testing labs, validation labs, sales, marketing, and more.

Folsom was chosen as the new home for Numonyx due to its business-friendly environment, highly skilled and educated workforce as well as being a family-oriented community. Numonyx will play an important role in the ongoing growth of the workforce, economy and technical skill within the greater Sacramento region.

Beyond the obvious business, employment, and economic benefits, Numonyx's impact reaches the community at large with "Numonyx in Your Neighborhood" campaigns. These campaigns assist in meeting the needs of individuals and charitable organizations within the Sacramento region.

I am pleased that this leading-edge and high impact company has chosen California's 3rd district as its home.

THE TALKING WATER GARDENS PROJECT IN OREGON IS AN EXCELLENT USE OF RECOVERY ACT FUNDS

HON. PETER A. DeFAZIO

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. DeFAZIO. Madam Speaker, I rise today to draw attention to an example of Recovery Act funds that have been invested wisely. The "Talking Water Gardens" is a high-priority wastewater treatment project in Albany and Millersburg, Oregon that received Recovery Act funds from the Clean Water State Revolving Loan Fund. Those funds will be used to construct 39 acres of treatment wetlands and reuse the treated water to improve riparian habitat. Unfortunately, a report by two members of the Senate entitled, "Stimulus Checkup: A closer look at 100 projects funded by the American Recovery and Reinvestment Act," inaccurately and unfairly criticized this

project. Had the two Senators who authored the report called these two Oregon cities to inquire about the project they would have learned that the Talking Water Gardens is a shining example of how Recovery Act funds can be used to improve our aging infrastructure, mitigate environmental damage, and create good-paying jobs. The project also illustrates how a successful public-private partnership can work. I respectfully submit this letter from the City of Albany, which further explains the inaccuracies in the "Stimulus Checkup" report on this important project.

CITY OF ALBANY,

Albany, OR, December 14, 2009.

Hon. PETER DeFAZIO,
Rayburn House Office Building,
Washington, DC.

DEAR CONGRESSMAN DeFAZIO: On December 10, 2009, we learned that Senator John McCain and Senator Tom Coburn named "Talking Water Gardens," our wastewater treatment and water reuse project, in a report that questions the validity of 100 projects funded by the American Recovery and Reinvestment Act. This project is an important, necessary, and high-priority wastewater treatment project for the State of Oregon that received funding through the State Clean Water Revolving Loan Fund program. This project provides sustainable benefits for the community, the economy, and the environment. We offer this letter in rebuttal to the "Stimulus Checkup" report dated December 2009.

No one from Senator McCain or Senator Coburn's offices have ever contacted the City of Albany or the City of Millersburg regarding the project. The information sources referenced in the report were never verified with us for accuracy. It appears that our project was singled out simply because of the whimsical name, "Talking Water Gardens." The project will construct roughly 39 acres of treatment wetlands and reuse the water to improve the riparian habitat on land that is the blighted site of two defunct lumber mills adjacent to the old oxbow of the Willamette River. This land has significant elevation differences, so the treated wastewater from the Albany-Millersburg Water Reclamation Facility and the ATI Wah Chang treatment facility will enter the project at elevations above the wetlands, creating several waterfalls that will aerate the water. Waterfalls are often referred to as "talking waters" and the name was chosen with children and the Native American Kalapuya/Willamette River heritage in mind.

The conclusions of the McCain-Coburn report are inaccurate and misleading:

(1) The report states that a non-competitive contract was issued for the construction. This is false. In accordance with the Oregon Revised Statutes, the cities employed a construction manager/general contractor (CM/GC) procurement method that is allowed and, in fact, encouraged by the State to lower public project costs. The process followed a Request for Proposal and interview process that included evaluation of both cost and non-cost elements. Of six proposals received, the selected contractor represented the best qualified and least costly.

(2) The report fails to mention that the Willamette River, one of the 14 American Heritage rivers, has new thermal load restrictions placed upon treatment plants to protect and recover threatened and endangered salmon fish species as well as other water quality regulations.

(3) The report fails to mention that the wastewater treatment plant serving the cities of Albany and Millersburg and ATI Wah

Chang must construct additional wastewater treatment capital facilities to comply with the regulations.

(4) The report failed to note that the project is a unique industrial/municipal partnership, between the cities of Albany, Millersburg, and ATI Wah Chang with the industrial partner contributing its share of capital.

(5) The report failed to note that this project provides a secure and environmentally-sound wastewater treatment solution for ATI Wah Chang, a major local employer and significant rare metals industry in the United States. This project protects the jobs at this industry that would have been put at risk had a cost-effective treatment solution not been found.

(6) The report fails to mention that the project is the least-cost alternative that requires the smallest ratepayer increases to comply with the regulations.

(7) The report fails to mention that this project received an Honor Award from the American Academy of Environmental Engineers for Excellence in Environmental Engineering.

(8) The report failed to say that the project will provide employment for an estimated 100 people in diverse sectors: electricians, mechanics, pipe layers, and excavators; surveyors, engineers and construction managers; raw material and equipment suppliers for the pipe, pumps, rock, concrete, asphalt, wiring, steel and other materials; landscapers and nurseries. These jobs are needed in Linn County, where 15.1% unemployment far exceeds the U.S. (10.2%) and Oregon (11.3%) seasonally adjusted rates as reported in the December 2009 Benton/Linn Labor Trends Report for October.

Talking Water Gardens is a shining example of how to balance the needs of the environment with the needs of cities and American industries to preserve jobs in these tough economic times. Many, many people have worked hard to make this project happen and singling it out for criticism without verified foundation is shameful at a time when we all need to be working together.

Sincerely,

SHARON KONOPA,
Mayor.

JUNIOR SERVICE CLUB 75TH BIRTHDAY

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to join in the celebration of the 75th anniversary of an important community organization in Collinsville, Illinois.

The Junior Service Club has worked for three quarters of a century to better the lives of the children in the community. The group's volunteers have worked tirelessly to provide fun activities for the community's youth. Over the decades, they ensured the children had a good meal during the holidays and have taught them the value of service to one's neighbors.

The club's fundraising efforts have gone to benefit hospitals, fire victims, community parks, senior programs and scholarships for graduates of Collinsville High School. Today, the club consists of about 50 members. Many

of the volunteers are teachers who represent the third generation of their family to belong to the Junior Service Club.

I want to join with the members of this House in congratulating the members of the Collinsville Junior Service Club on celebrating their 75th anniversary and thank them for their service. I want to wish them another 75 years of continued success.

PERSONAL EXPLANATION

HON. MARY JO KILROY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Ms. KILROY. Madam Speaker, on the legislative day of Tuesday, December 15, 2009, I was unable to cast a vote on rollcall vote 971. Had I been present, I would have voted "yea" on rollcall vote 971.

THE RETIREMENT OF CHIEF CHARLES A. TEALE, SR., FROM THE HARTFORD FIRE DEPARTMENT

HON. JOHN B. LARSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. LARSON of Connecticut. Madam Speaker, I rise today to honor Fire Chief Charles A. Teale, Sr., of the Hartford Fire Department who is retiring after serving 27 years—9 of those as its chief.

In his years of service, Chief Teale has gained a reputation as a fair, no-nonsense administrator who helped to restore order and stability to the Hartford Fire Department. Under his watch, the Hartford Fire Department maintained its Class 1 status, a designation shared by only 41 of 38,000 departments across the country. Among Teale's many accomplishments is his emphasis on attaining high educational and professional standards. Due to the department's educational outreach, the number of structure fires in Hartford decreased from 366 in 2001 to just 80 in 2008.

In one of his proudest accomplishments, Teale showed a dedication to the community he served that extended far beyond his duties as fire chief. He worked as co-chairman of a committee that raised \$125,000 to create a memorial to the 168 people who died in the Hartford circus fire of July 6, 1944. Motivated by the conviction that a memorial had to be created before the generation that remembered one of Connecticut's worst disasters passed on, Teale dedicated the beautiful memorial in 2005, on the 61st anniversary of the fire.

Chief Teale's own story is truly remarkable. He dropped out of school at age 14, but returned and excelled, thanks to the mentoring of legendary Hartford educator Walter "Doc" Hurley. He went on to earn multiple advanced degrees, including a master's in public administration from the University of Hartford. Chief Teale's passion for learning is everlasting, and after retirement he plans to pursue a doctorate

in psychology, which will help him empower Hartford's young men to make smart choices as they enter adulthood, just as Doc Hurley influenced him.

The residents of Hartford and Connecticut's First Congressional District are indebted to Chief Teale for his extensive efforts to serve the Greater Hartford community. His dedication to Hartford and its history, as well as his ability to lead, have made him not just an outstanding fire chief but an exceptional ambassador for the city. His fire boots will be hard to fill, but we wish him well on his admirable goals of returning to school and serving as a mentor to the young men in Hartford.

JUDGE DOROTHY SPOMER

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to honor Judge Dorothy Spomer, who broke barriers as she served on the bench in Southern Illinois. Judge Spomer was recently honored at Southern Illinois University Carbondale's Inspiring Women Gala.

Judge Spomer graduated from the University of Illinois College of Law in 1943, at the age of 22. Throughout her historic career, she set an example for other young women as the first female judge in Alexander County, the first female circuit judge in the First Judicial Circuit and the first woman to sit on the appellate court in the Fifth District.

A dedicated public servant, Judge Spomer came out of retirement in 1977, when Illinois Supreme Court Justice Joseph Goldenhersch called on her to serve on the appellate court in Mount Vernon.

Judge Spomer's example inspired her son, Judge Stephen Spomer, to carry on the proud family tradition of public service as he presides over the same Fifth District Appellate Court.

I would like to join Southern Illinois University Carbondale, as they honor her at their Inspiring Women Gala, in thanking Judge Dorothy Spomer for her lifelong service to Southern Illinois.

HONORING LIAM McLAUGHLIN

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. ENGEL. Madam Speaker, Liam McLaughlin is leaving the Yonkers City Council after serving four terms, representing the Fourth District since 1999. He served as Majority Leader of the City Council and is leaving as the Minority Leader and Chair of the Budget Committee and the Environmental Policy & Protection Committee.

He also served on the Education Committee, the Real Estate & Economic Development Committee, the Municipal Operations Committee, the Intergovernmental Relations Committee, the Rules Committee, and the Legislation and Codes Committee.

He graduated from Fordham University in 1989, majoring in accounting, and worked for the major accounting firm of Ernst & Young before taking his law degree from the New York Law School.

As a council member Liam worked with the mayor and fellow council members on a bipartisan basis for the betterment of his district and the City of Yonkers as a whole. He strove to hold down taxes, to create jobs, to improve the city's parks and playgrounds, increase senior citizen programs and implement a city-wide beautification program. He encouraged 'smart development' to make Yonkers attractive to new businesses which brought many new jobs to the city.

Aside from his representation on the council, he is a Board Member of the Aisling Irish Community Center, a Board Member and President of Tara Circle, a member of the Ancient Order of Hibernians, the Westchester Friendly Sons of St. Patrick, and a member of the New York State Bar Association.

I congratulate Liam for all of his good work and diligence in representing not only his district and its families, but the City of Yonkers as a whole. I was privileged to be able to work with him in helping Yonkers and know first hand that Yonkers is enormously better for having him. I know his family will be happier now that he will not have as many meetings to attend but the City of Yonkers will sorely miss his leadership and dedication. I wish him the best in all his endeavors and am looking forward to his return to office.

ST. MARY'S GOOD SAMARITAN HOSPITAL CENTENNIAL

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to honor a century of service from an institution of healing in Centralia, Illinois.

St. Mary's Hospital opened on Thanksgiving Day in 1909 and has been serving the Centralia area since. As the city grew, the Poor Handmaids of Jesus Christ and the Felician Sisters worked to meet the medical needs of the growing population. In 1958, the hospital moved to a new 117-bed facility on Pleasant Avenue, where it went through 3 expansions 1969 to 1981.

In 1996, St. Mary's Hospital merged with Good Samaritan Regional Health Center in nearby Mt. Vernon. With the merger, they entered the 21st Century at the forefront of medical care. Over the last 100 years, the people at St. Mary's have not forgotten their core mission and have served our community with a level of devotion that is second to none.

I want to join with the members of this House and the residents of South Central Illinois in congratulating St. Mary's Good Samaritan Hospital on celebrating its centennial. I want to thank them for their healing ministry and to wish them continued success for the next hundred years.

RICHARD ALGER FLORIDA AGRICULTURE'S MAN OF THE YEAR

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Ms. ROS-LEHTINEN. Madam Speaker, I rise today to give my heartfelt congratulations to Richard Alger on his recent induction into the Florida Agricultural Hall of Fame.

Being named to the Florida Agricultural Hall of Fame is a high honor, because it is the closest thing we have in South Florida to being named agriculture's man of the year.

With his very strong educational background, gregarious personality and true compassion for our community, Richard has been a strong voice for farming for over four decades.

Richard made his mark through his assistance to minority farmers in our area, as a board member of Farm Credit of South Florida; a generous contributor to the Farm Share program; and for working with the University of Florida on agricultural research.

I am pleased to join the Greater Homestead/Florida City Chamber, Jolayne, his family, including 17 grandkids, friends and neighbors in their celebration of his countless contributions.

HONORING TOM MCROBERTS

HON. COLLIN C. PETERSON

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. PETERSON. Madam Speaker, I rise today to honor the accomplishments of Tom McRoberts on the occasion of his retirement from the University of Minnesota, Morris (UMM). During his career of over 34 years with the University, Tom has served several communities as an administrator, mentor, and innovative educator. These titles are unable to capture the full measure of Tom's contribution to the University, local community, the state of Minnesota.

Tom is tireless in his efforts to expand learning opportunities. His ingenuity has never been bound by his official titles of Director of Continuing Education and Regional Programs, Director of the Center for Small Towns, Director of the Center for International Programs, and the other positions he's held over the years. Tom has served as a mentor and academic advisor to numerous students who have gone on to obtain internships and jobs in the public service arena and win prestigious national scholarships. He has been instrumental in developing programs to connect the University to the local community and to open the world for exploration by the students he has so faithfully served, including establishing the UMM Center for International Programs and creating the UMM Summer Scholars program for gifted high school juniors from around the region, soon to be in its twenty-sixth year.

Over the years, Tom has been recognized for his remarkable contributions with a number of honors, including the all-University John

Tate Award for Excellence in Undergraduate Advising, the UMM Academic Staff Award, the College of Continuing Education Deans Award for Individual Achievement, and the University of Minnesota Presidents Award for Outstanding Service.

This impressive record of service doesn't begin to describe the man. As his colleagues and students note, Tom is modest, compassionate, and blessed with a good sense of humor. One close colleague has described Tom as a specialist in making things happen without claiming credit. He accepts assignments others won't take. He sees opportunities to do good and he takes them and when these aren't obvious, he creates them. Tom has truly made walking the extra mile a way of life, achieving a legacy of accomplishments that will pay dividends for generations to come.

Madam Speaker, I wish to extend my congratulations and appreciation to Tom McRoberts for the extraordinary career at the University of Minnesota Morris.

SPRINGFIELD SENATORS—CROSS COUNTRY STATE CHAMPIONS

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to honor the achievements of an outstanding group of student-athletes from Springfield, Illinois.

The Springfield Senators girls cross country team took the state championship at this year's Illinois High School Association state finals November 7 at Detweiller Park in Peoria. Springfield High finished with a score of 124, six better than the runners-up from Yorkville. The Senators were led by Kirby Hale, who had the fourth-best overall time for the tournament, finishing in 17:51.

I want to congratulate Coach Dan Devlin, Assistant Coach Trae Cotner and the members of the 2009 Springfield Senators state champion cross country team: Kirby Hale, Madie Alexander, Maggie Cornelius, Christy Rolf, Jessica Larson, Leora Reyhan, Sarah Ward, Giuliana Bailey, Christina Kropid, Julia McClure, Erin Shultz and Lauren Smith. They have represented themselves, their school and our community in a first-rate fashion. I want to join with my colleagues in this House in wishing them continued success in their future academic and athletic endeavors.

EARMARK DECLARATION

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. YOUNG of Alaska. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326, the Departments of Defense Appropriations Act, 2010.

Project Name: Synthetic Liquid Fuels
Bill Number: H.R. 3326

Legal Name and address of entity receiving earmark: Eielson Air Force Base, Alaska

Description of how the money will be spent and why the use of federal taxpayer funding is justified: This project will supply the U.S. Air Force and other military branches a secure supply of synthetic fuels to operate fighters, bombers and other aircraft and military equipment. It will help the Air Force to achieve its stated goal of certifying its fleet of aircraft on a synthetic fuel blend and purchasing 50 percent of its fuels in the form of a synthetic fuel blend by 2016.

Appropriated Amount: \$2,400,000

Detailed Finance Plan: Research and Development, \$2,400,000

Project Name: AutoScan Under-Vehicle Inspection System

Bill Number: H.R. 3326

Legal Name and address of entity receiving earmark: Kachemak Research Development, Inc., 59584 East End Road, Homer, Alaska 99603

Description of how the money will be spent and why the use of federal taxpayer funding is justified: Kachemak Research Development, Inc. is a woman owned, HUBZone, 8(a) entity. AutoScan, an under vehicle inspection system developed by KRD, is a stationary system that captures the entire undercarriage image of vehicles, ranging in size from passenger vehicles to semi-trucks. Because of the unique capabilities of AutoScan, vehicles do not need to maintain a constant speed as they travel across the system. Funding will be used for product enhancement and beta testing of AutoScan generation 2 and 3 architecture. As part of the inspection protocol at every military base, CONUS and OCONUS, the undercarriage of every delivery vehicle must be inspected. Standard inspection protocols have been comprised of a mirror-mounted stick or search pits. AutoScan makes it possible for inspection personnel to maintain a safe stand-off distance. Additionally, it stores images for later comparison and analysis if needed. And it provides one, complete, clear image of any vehicle's under-side in real-time and capabilities that no similar system is able to provide.

Appropriated Amount: \$2,400,000

Detailed Finance Plan: Research and Development, and Testing, \$2,400,000

Project Name: Electromagnetic Interference Hardened Expandable Rigid Wall Shelter

Bill Number: H.R. 3326

Legal Name and address of entity receiving earmark: Alkan Shelter, LLC, 1701 South Cushman Street, Fairbanks, Alaska 99701

Description of how the money will be spent and why the use of federal taxpayer funding is justified: The U.S. Marine Corps has a requirement to develop an EMI hardened, expandable composite rigid wall shelter, which currently does not exist. The USMC Electronic Maintenance Shelter Program, Calibration Laboratory Program, and the Communication Maintenance Shelter Program are several funded programs with an immediate need. Sufficient funding is not available for an EMI hardened, expandable rigid wall composite shelter development program. Alkan Shelter, LLC, a small business located in a HUBZone in Fairbanks, AK, proposes a three-phase de-

velopment and test program for an expandable, composite EMI hardened shelter for the U.S. Marine Corps. First phase is to study the feasibility of EMI hardening to 60-80dB attenuation for the entire expandable shelter or hardening one wing of the shelter. The second phase is to manufacture the EMI hardened composite expandable shelter prototype. The third phase will be to perform EMI and environmental testing to ensure requirements are met. The Marine Corps now uses 1980's technology rigid wall shelters that have aluminum skins and a paper honeycomb core. These shelters are: poorly insulated, have a limited roof and floor load, do not have ballistic protection, the roof cannot be sandbagged, are highly subject to corrosion and can only be stacked six-high on ocean going container ships. Additionally, the U.S. military does not have an EMI hardened expandable rigid wall shelter. Alkan's new carbon fiber hybrid composite expandable shelter will provide a technologically superior structure that will correct the deficiencies of old 1980's technology. Combining high tech carbon fiber composites with EMI protection will provide the USMC and the U.S. military with a lightweight, expandable, rugged, thermally efficient, and safer working environment for carrying out their sensitive electronics and calibration repair and maintenance missions.

Appropriated Amount: \$800,000

Detailed Finance Plan: Research and Development, \$800,000

HONORING THE MEMORY OF DR. STEVEN KARL TEPLICK

HON. JO BONNER

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. BONNER. Madam Speaker, Southwest Alabama recently lost a dedicated medical professor and highly regarded academic physician. Dr. Steven Karl Teplick passed away on December 8, 2009, at the age of 68.

Dr. Teplick was Chairman of the Department of Radiology at the University of South Alabama's College of Medicine for nearly 15 years. He was known for his devotion to the teaching and training of medical professionals as well as leading the University's transition to digital cancer diagnostic technology.

Dr. Teplick was a graduate of the University of Vermont, and of Hahnemann Medical College in Pennsylvania. He completed his residency in Radiology and a fellowship in Neuroradiology at Boston City Hospital. Dr. Teplick served his country for three years as a major in the U.S. Army Medical Corps before returning as a faculty member at Hahnemann. Afterwards, he became Vice Chairman of the Department of Radiology at the University of Arkansas, before coming to South Alabama.

A member of numerous medical committees and organizations, Dr. Teplick was most notably a fellow in the American College of Radiology, president of the Alabama Academy of Radiology and a founding member of the International Society of Biliary Radiology.

Dr. Teplick was a lover of nature and enjoyed farming and his horses and beloved

pets. He is survived by his wife of 40 years, Carol; two children, Jennifer and Joanna; and four grandchildren.

As we pause to reflect upon the many contributions of Dr. Teplick to our community, we also extend our thoughts and prayers to his family for their loss.

EARMARK DECLARATION

HON. JOHN J. DUNCAN, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. DUNCAN. Madam Speaker, consistent with House Republican Earmark Standards, I am submitting the following earmark disclosure information for project requests that I made and which were included within H.R. 3326, the "Department of Defense Appropriations Act, FY2010."

Requesting Member: Congressman JOHN J. DUNCAN, Jr.

Account: RDTE—Defensewide

Project Amount: \$2,000,000

Legal Name of Requesting Entity: Lentix, 800 South Gay Street, Suite 1625, Knoxville, Tennessee 37929

Description of Request: The funding will be used for the development of a very high resolution benchmarking vision system for long-range surveillance with focus on SOCOM and Navy tracking needs.

EARMARK DECLARATION

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. YOUNG of Alaska. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3288, the Departments of Transportation, HUD, and Related Agencies Appropriations Act, 2010.

Project Name: Sexual Assault Response Team Center

Bill Number: H.R. 3288

Legal Name and address of entity receiving earmark: Sexual Assault Response Team (SART) Center, Municipality of Anchorage, P.O. Box 196650, Anchorage, Alaska 99519

Description of how the money will be spent and why the use of federal taxpayer funding is justified: Funding will be used for the continued development and operations of the Municipality of Anchorage Sexual Assault Response Team (SART) Center. This project will support victims through care while participating in investigation and prosecution and help in prosecution of sexual assault cases through professional evidence collection, documentation, preservation and processing.

Appropriated Amount: \$400,000

Detailed Finance Plan: Development and Operations \$400,000

HONORING JANET M. RODERICK

HON. MICHAEL H. MICHAUD

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. MICHAUD. Madam Speaker, I rise today to recognize the accomplishments of Janet M. Roderick of Rome, Maine.

Janet Roderick has been a longtime proponent of the small business community that drives Maine's economy, and her hard work has helped numerous individuals and small businesses throughout Maine.

Janet has been a Maine Small Business Development Center (Maine SBDC) certified business counselor since 2006 at the Maine SBDC service center at Coastal Enterprises, Inc. On December 21, 2009, Janet will be acknowledged as the 2009 Maine State Star. This honor recognizes her exemplary service on behalf of the small business community in Maine, particularly in Kennebec and Somerset counties in central Maine.

The State Star award is presented each year by the national Association of Small Business Development Centers and recognizes an outstanding SBDC employee from each state. The 2009 award is based on Janet's efforts in 2008 when she worked with 148 small businesses, provided 1,070 hours of one-on-one counseling, and helped to launch 20 new businesses in central Maine. Her efforts led to the creation of 37 new jobs and the retention of 21 jobs. Through her efforts, her clients were able to access capital totaling over \$4 million.

Janet has long been involved in helping small businesses, and she has been especially active with women-owned businesses and nonprofits. A certified public accountant, Janet was previously a counselor for 11 years with the Women's Business Center at Coastal Enterprises, Inc. in Augusta. Later, she was an accounting supervisor with an Augusta-based accounting firm, where she specialized in small and women-owned businesses and nonprofit organizations.

Janet was the SBA 1993 Accountant Advocate of the Year and the SBA 2002 Women's Business Advocate of the Year and this further recognition is well deserved. The State of Maine and its small business community owe a debt of gratitude to Janet M. Roderick for her commitment to the success of small business. I applaud Janet's work and extend congratulations to her as the 2009 State Star.

Madam Speaker, please join me in honoring Janet M. Roderick for her life of dedication and service to her community and the growth of Maine's small businesses.

EARMARK DECLARATION

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. YOUNG of Alaska. Madam Speaker, pursuant to the Republican leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3288, the Transpor-

tation, Housing and Urban Development Appropriations bill.

Project Name: Port of Bristol Bay Expansion
Bill Number: H.R. 3288

Agency: Department of Housing and Urban Development

Legal name and address of entity receiving earmark: Bristol Bay Borough, 1 Main Street, Naknek, AK, 99633

Description of how the money will be spent and why the use of federal taxpayer funding is justified: Shovel ready dock expansion where the largest run of sockeye salmon is processed and shipped. This project is the economic engine for the low-income area of Bristol Bay. These funds will go toward constructing a sheet pile dock and addition to the 27 year old structure.

Appropriated Amount: \$1,000,000

Detailed Finance Plan: Construction \$1,000,000

THE NATIONAL EMANCIPATION
COMMEMORATION ACT OF 2009**HON. JOHN CONYERS, JR.**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. CONYERS. Madam Speaker, I am pleased to introduce, on behalf of myself and my colleagues DAN LUNGREN of California, SHEILA JACKSON-LEE of Texas, and ALCEE HASTINGS of Florida, the National Emancipation Commemoration Act of 2009. This legislation will establish an 18-member National Emancipation Commemoration Commission to provide for an appropriate national observance of the 150th anniversaries of the Emancipation Proclamation in 2013, the Thirteenth Amendment to the Constitution in 2015, and related events, and to conduct a study exploring why modern slavery continues to exist in the United States and elsewhere.

Our Nation's history is unfortunately intertwined with the story of slavery and the slave trade. For hundreds of years, men, women and children were captured and taken from Africa and enslaved in the American colonies. Yet alongside the history of slavery in the United States, we also remember the stories of those who fought against the abhorrent practice—some with the pen, and some with the sword. The work and lives of historical figures like Frederick Douglass, Sojourner Truth, and Harriet Tubman are familiar to our classrooms and history books. Other abolitionists are less well-known, such as Levi and Catherine Coffin, a Quaker couple in Indiana who helped over 3,000 slaves escape to freedom.

The struggle for freedom for all Americans reached a new height on January 1, 1863, when President Abraham Lincoln issued the Emancipation Proclamation. With it, he declared "that all persons held as slaves" within the States rebelling against the Union "are, and henceforward shall be free." As the Union Army advanced on the Confederate territory, thousands of slaves gained their freedom each day. Shortly after the war ended, the Thirteenth Amendment to the Constitution was adopted, prohibiting slavery and involuntary servitude throughout the United States.

Despite these milestones, slavery has not yet been relegated to the pages of history. An estimated 27 million people are still in servitude worldwide—including an estimated 50,000 or more people enslaved in the United States.

The National Emancipation Commemoration Commission's work is two-fold. It will advise the Attorney General on making grants available to government and non-profit entities for activities and programs related to the commemoration. These activities may include the publication of scholarly research, production of a commemorative stamp or coin, and the development of informational displays and programs at National Parks and historic sites related to slavery, the Underground Railroad, and the Emancipation throughout the United States.

The Commission created by this bill is also tasked with connecting the commemoration of Emancipation with the problem of modern slavery in the United States and around the world. The Thirteenth Amendment to the Constitution is a living promise of freedom that places a duty on all of us to prevent involuntary servitude. In support of that duty, the Commission will conduct a study addressing why slavery in all its forms still exists, analyzing the persistence of modern slavery in the United States from 1865 to the present, and make recommendations to address issues and concerns highlighted by the study.

For as long as there have been slaves in this country, there have been justice-minded individuals and groups dedicated to the abolition of slavery. It is appropriate that we commemorate their work and the 150th anniversaries of the Emancipation Proclamation and the Thirteenth Amendment, and in so doing, renew our commitment to ending modern slavery in the United States and around the world.

INTRODUCTION OF THE OUT-
PATIENT MENTAL HEALTH MOD-
ERNIZATION ACT OF 2009**HON. ALCEE L. HASTINGS**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HASTINGS of Florida. Madam Speaker, I rise to introduce the Outpatient Mental Health Modernization Act of 2009, which will support a high quality and cost-savings approach to long-term care mental health services.

Five million Medicare beneficiaries have mental disorders other than mental retardation and 1.3 million of these individuals are under the age of 65. Medicare Partial Hospitalization Programs (PHPs) provide a structured and clinically intensive alternative to hospitalization for patients who otherwise might require sustained inpatient psychiatric hospitalization. PHP psychiatric patients typically receive four to six hours of treatment per day, five to six days a week in hospital-based settings and community mental health centers.

The severity the patient's illness often prevents the individual from obtaining or seeking transportation to the PHP facility, or from accessing high quality food. Additionally, some

psychiatric medications that are prescribed to the patient cannot be safely administered without food. These patients often live in group-supervised settings due to difficulties in maintaining family relationships and their financial instability.

Currently, Medicare does not cover the costs of nutritional planning, meals or transportation for patients who receive psychiatric treatment in a PHP setting. Therefore, PHP facilities are responsible for the cost of providing food and transportation. This aggravates financial burdens that many PHPs and countless other community organizations are experiencing in these difficult economic times.

The Outpatient Mental Health Modernization Act of 2009 requires Medicare to reimburse PHPs for providing transportation and food and nutritional services. The bill also establishes a Behavioral Health Advisory Committee in which a diverse group of behavioral health stakeholders would examine and provide recommendations on how to address the persisting challenges of access, stigma, quality and operability in the mental health delivery system. The Outpatient Mental Health Modernization Act of 2009 is a house companion to S. 1522, a bill that was introduced by Senator DAVID VITTER (R-LA) on July 28, 2009.

Madam Speaker, PHPs are a cost effective alternative that can prevent mentally ill individuals from facing expensive inpatient care, incarceration, or institutionalization. The growing use and role of mental health PHPs in our health care system requires that we amend the law to assist PHPs in delivering the services, care and support to those who are living with severe and chronic mental illness. I urge my colleagues to support the bi-partisan Outpatient Mental Health Modernization Act of 2009, which help sustain an important treatment option in long-term care service network.

EARMARK DECLARATION

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. YOUNG of Alaska. Madam Speaker, pursuant to the Republican leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3288, the Departments of Transportation, HUD, and Related Agencies Appropriations Act, 2010.

Project Name: Arctic Utilidors (Phase 11) at Eielson Air Force Base, Alaska

Bill Number: H.R. 3288

Legal Name and address of entity receiving earmark: Eielson Air Force Base, Alaska 99702

Description of how the money will be spent and why the use of federal taxpayer funding is justified: This project (which would be another increment in a highly successful, multi-year funding effort) will repair large sections of the utilidor that are in extreme need. The utilidors and related piping were constructed and installed in the 1950s and were they to fail during the winter season, when temperatures are commonly -40F and lower, the base could suffer catastrophic results in as quickly as four hours.

Appropriated Amount: \$9,900,000

Detailed Finance Plan: Repairs \$9,900,000

Project Name: Install Edge Lights, Taxiway Golf at Eielson Air Force Base, Alaska

Bill Number: H.R. 3288

Legal Name and address of entity receiving earmark: Eielson Air Force Base, Alaska 99702

Description of how the money will be spent and why the use of federal taxpayer funding is justified: Provides for new taxiway edge lights along a major aircraft access point to the base runway. Project includes installing 12,000 lineal feet of underground wiring and lighting fixtures. There will also be new asphalt shoulders installed after the lighting is completed.

Appropriated Amount: \$3,450,000

Detailed Finance Plan: Installation \$3,450,000

IN HONOR OF COLONEL JOHN ROBERT MCCARNAN

HON. MICHAEL N. CASTLE

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. CASTLE. Madam Speaker, it is with great pleasure that I rise today to recognize the career of Colonel John Robert McCarnan, retiring Chief Executive Officer of the Delaware River and Bay Authority Police Department (DRBA-PD). Colonel McCarnan, through exemplary commitment and service, has protected the people of our great state for more than 40 years, and he has proven to be a tough and formidable leader in a profession that requires exceptional skill and dedication.

Colonel McCarnan's tenure as CEO of DRBA-PD began in July of 1993. Since that time, he has led the DRBA-PD to new heights, working hard to establish high standards and promote professionalism, integrity, and customer service-oriented policing. DRBA-PD is known as a professional and progressive police organization, and this is a direct result of John's diligence and talent. Police officers serve such an important function in our society, and to be as effective as possible, they must have dedicated and organized leaders. John has been this and more to DRBA-PD and he leaves behind him big shoes to fill for those that will follow.

A genuine Delawarean through and through, John earned his Bachelor of Science in Criminal Justice from Wilmington University and later his Juris Doctor Degree from Widener University's School of Law. John began his law enforcement career as a patrol officer with the Wilmington Bureau of Police, later moving to the New Castle County Police Department, where he served for 20 years. John worked faithfully and diligently during his years with New Castle County, serving eight of them as Chief of Police. After his retirement from the New Castle County Police Department, John lent his skills to the Delaware State Government, first as Deputy Attorney General and later as Executive Director of the Division of Alcoholic Beverage Control. Some of John's professional affiliations include: both the Delaware and American Bar Associations; the District of Columbia and the Pennsylvania Bar;

the U.S. District Courts for Delaware and Pennsylvania; and Life Member, and former Chairman, of the Delaware Police Chief's Council.

John is a dedicated man who has had a very successful career, filled with achievements both impressive and numerous. But John is more than that; he is a loving husband to his wife, Sharen, he is a devoted father and grandfather to his children, Barbara and Darren, his daughter-in-law, Dana, and his grandson, Robbie, and he is a concerned citizen, serving as an Executive Board Member of the Delaware Safety Council. John also served 6 years as a member of the Delaware Army National Guard. I can attest to John's outstanding achievements and his fine character, and today, as he begins a new chapter in his life, I stand to honor and recognize the service he has rendered to both the individual citizens and the collective communities of Delaware. The Delaware River and Bay Authority Police Department's mission is to protect and serve Delaware and New Jersey, and Colonel John McCarnan has been doing exactly that for the past 16 years. I thank him for his service and wish him the best on this momentous occasion.

CALLING FOR A DRAMATIC INCREASE IN ASSISTANCE FOR DEVELOPING COUNTRIES IN FINAL LEGISLATION ON GLOBAL WARMING TO HELP THEM ADJUST TO THE CONSEQUENCES OF CLIMATE CHANGE

HON. ENI F. H. FALEOMAVAEGA

OF AMERICAN SAMOA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. FALEOMAVAEGA. Madam Speaker, I rise today to urge my colleagues to support a doubling of assistance by developed countries for developing nations in helping them adjust to the impacts of global warming. Increased commitments are essential if we are to achieve a successful international climate change agreement, one that will prevent the most devastating effects of global warming.

Ironically, the poorest and most vulnerable countries are the ones that will suffer the most from rising sea levels, severe weather events and other consequences of climate change—despite the fact that those nations have contributed only negligibly to the problem. U.S. leadership is vital if we are to prod other developed countries to step up to the plate and provide appropriate levels of assistance. And in the aftermath of House passage of the Waxman-Markey cap-and-trade legislation earlier this year, the Senate must now act.

That is why my colleagues—Rep. RAÚL GRIJALVA, Rep. EMANUEL CLEAVER, Rep. MAXINE WATERS, Rep. PETE STARK, Rep. DENNIS MOORE, Del. DONNA CHRISTENSEN and Rep. MICHAEL HONDA—sent a letter today to Sen. JOHN KERRY, the Chairman of the Foreign Relations Committee and leader on climate change legislation in the Senate, urging him to double assistance for developing countries in legislation the Senator is currently drafting. As our letter states, “the amount of funding developed countries are currently promising to developed countries is grossly insufficient to

meet the need. . . . Given the magnitude of the problem developing countries face, and given the responsibility of developed countries for the majority of historic greenhouse gas emissions, we believe that U.S. climate change legislation should double the emissions allowances currently dedicated in the House bill to international adaptation and mitigation in developing countries."

Madam Speaker, for the RECORD, I include a full copy of the letter to Senator KERRY.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, December 15, 2009.

Hon. JOHN F. KERRY,
Chairman, Senate Committee on Foreign Relations,
Dirksen Senate Office Building,
Washington, DC.

DEAR MR. CHAIRMAN: We want to commend you for your valuable contributions toward enacting climate change legislation. We particularly appreciate your introduction of S. 2835, which focuses on the countries most vulnerable to the impacts of global warming. We sincerely hope that with that measure as well as the recent pledges by China and India to curb their emissions relative to economic growth, and President Obama's support for mobilizing developed countries to contribute \$10 billion a year by 2012 and implementing longer-term mechanisms to assist developing countries with adaptation and mitigation, Copenhagen makes substantial progress toward completion of a binding agreement to limit climate change.

The bill you are working on with the Senators Graham and Lieberman offers a crucial opportunity to advance that agreement. We urge you to include an adequate commitment of resources for the nations and peoples most vulnerable to the consequences of global warming in that legislation.

The needs of developing countries are manifest. As noted by the recent World Development Report 2010, even if average global temperatures rise only 2 degrees Celsius above pre-industrial levels, "Between 100 million and 400 million more people could be at risk of hunger. And 1 billion to 2 billion more people may no longer have enough water to meet their needs. . . . It is estimated that developing countries will bear most of the costs of the damages—some 75–80 percent." As the Stern Review made clear, even if greenhouse emissions ceased today, the world would still face at least two decades of increasing global temperatures.

In the very near future, higher temperatures will lead to economic and political instability, refugee crises and conflicts over ever-scarcer natural resources in developing nations, all of which will have direct, negative implications for developing and developed countries alike. That is why the United Nations negotiating blocs of Least Developed Countries and the Alliance of Small Island States (AOSIS)—which together represent 80 countries least responsible for climate change but most severely affected by it—have recently called for a minimum 45 percent reduction of greenhouse gas emissions below 1990 levels by 2020. They are further requesting that there be no more than a 1.5 global temperature rise from pre-industrial levels, and that atmospheric greenhouse gas concentrations return to below 350 parts per million of carbon dioxide equivalent.

As AOSIS has pointed out, "Serious adverse impacts are already being felt by island states at the current 0.8°C of warming, including coastal erosion, flooding, coral bleaching and more frequent and intense extreme

weather events. The U.N.'s lead agency on refugees has already warned that some particularly low-lying island states are 'very likely to become entirely uninhabitable'."

Estimates vary on the level of funding needed by the developing world to lessen the destabilizing impacts of climate change that will likely occur regardless of the adoption of an international agreement. However, the UN's latest Human Development Report estimates that additional adaptation finance needs alone will amount to \$86 billion annually by 2015. And last week in Copenhagen, Yvo de Boer, Executive Secretary of the United Nations Framework Convention on Climate Change, said that developed countries should expect to contribute \$100 billion annually to developing nations.

Yet the amount of funding developed countries are currently promising to developed countries is grossly insufficient to meet the need. The United States must demonstrate leadership if the developed world is to meet its obligation to provide appropriate sums. The Congressional Research Service's calculation of the funding produced by H.R. 2454 for developing countries—based on the current percentage of emissions allowances dedicated to international adaptation and international clean technology deployment and the allowance prices used in the EPA/IGEM Model—suggests that less than \$1 billion per year would be available in 2012, rising to less than \$1.6 billion by 2020.

Given the magnitude of the problem developing countries face, and given the responsibility of developed countries for the majority of historic greenhouse gas emissions, we believe that U.S. climate change legislation should double the emissions allowances currently dedicated in the House bill to international adaptation and mitigation in developing countries.

While such enhanced allocations would amount to substantial sums of money, we believe they will more than pay for themselves over time when compared to American commitments of troops and resources that would likely be required to address adverse impacts in developing countries affecting vital U.S. interests. As retired Marine Corps General Anthony Zinni, former commander of U.S. Central Command, has noted, "We will pay now to reduce greenhouse gas emissions. . . . or we will pay the price later."

Again, we applaud your efforts at addressing the enormous challenge of climate change. As legislation moves toward passage in the Senate, we sincerely hope that it provides increased commitments to the countries and peoples most vulnerable to the consequences of global warming.

Sincerely,

ENI F.H. FALEOMAVAEGA,
Member of Congress.

RAÚL M. GRIJALVA,
Member of Congress.

EMANUEL CLEAVER,
Member of Congress.

MAXINE WATERS,
Member of Congress.

PETE STARK,
Member of Congress.

DENNIS MOORE,
Member of Congress.

DONNA M. CHRISTENSEN,
Member of Congress.

MICHAEL M. HONDA,
Member of Congress.

CONGRATULATING RAPIDES REGIONAL MEDICAL CENTER

HON. RODNEY ALEXANDER

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. ALEXANDER. Madam Speaker, today I stand before you proud to announce that the Rapides Regional Medical Center has been named one of the nation's 100 Top Hospitals for cardiovascular care. Moreover, this hospital, located in Alexandria, Louisiana, is the only hospital in Louisiana to make Thomson Reuters' 2009 list.

As a premier teaching hospital, Rapides Regional Medical Center cultivates a community of care. The annual study examines the performance of 971 hospitals by analyzing clinical outcomes for patients diagnosed with heart failure and heart attacks, and for those who received coronary bypass surgery or interventions such as angioplasties.

As noted by the Thompson Reuters Company, "results show these top performers not only provided exceptional inpatient care, but also had significantly better post-discharge outcomes, including lower readmission rates for heart failure and heart attack patients as well as lower 30-day mortality rates for heart attack patients. This means that patients treated in hospitals with balanced high performance in cardiovascular care are more likely to have better results 30 days after discharge."

At a time when our healthcare system is under constant scrutiny by citizens and public servants alike, the team at Rapides Regional Medical Center provides hope and reassurance that in fact, the United States, and Louisiana, offer exceptional care.

I join those whose lives have been touched by Rapides Regional Medical Center in saying congratulations and thank you for the dedication to excellence by each employee and doctor on staff.

IN RECOGNITION OF THE PHOEBUS HIGH SCHOOL FOOTBALL TEAM

HON. ROBERT C. "BOBBY" SCOTT

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SCOTT of Virginia. Madam Speaker, I am honored to rise on behalf of myself, Congressman ROB WITTMAN and Congressman GLENN NYE to call attention to a group of young students from Hampton, Virginia, who have once again distinguished themselves, their school, their community and the Commonwealth of Virginia.

For the second consecutive year, the Phoebus High School Phantoms football team had a remarkable season. On December 12, the Phoebus High School Phantoms won their fifth state football championship this decade, defeating Stone Bridge High School of Ashburn 15–10, at Scott Stadium in Charlottesville, Virginia.

Taking over from coach Bill Dee, new head coach Stan Sexton led the Phantoms another 15–0 season. Their winning streak now stands at 30 wins. No other Group AAA school has won back-to-back championships since Phoebus did it in 2001 and 2002; now Phoebus has done it again. This has truly been Phoebus' decade in football, having won five state championships this decade with a record of 120–12 (.909). No other AAA school has won more than 102 games. This latest championship is just another accolade for the City of Hampton's youngest school, founded in 1975.

Phoebus High's legacy of excellence is not limited to just the field of athletics. Under the Direction of Principal Robert Johnson, the Phoebus faculty seeks to inspire students to strive for excellence and achievement in the classroom, in their extracurricular activities and in their communities. Phoebus has two innovative programs that expand the learning experience outside of the traditional classroom. Phoebus hosts the Hampton School Division's Center for High Technology. This magnet career academy includes classes in pre-engineering, design and 2 drafting, and Cisco network administration, preparing students for college classes and jobs in the technology sector. Phoebus is also home to the Blue Phantom Inn. This student-run restaurant gives students an opportunity to develop their culinary arts skills, and was nationally recognized in Southern Living magazine.

The Phantom's excellence in football is also characteristic of the quality of athletics in the Peninsula District of Virginia. Phoebus High School's championship this year marked the 11th time in the last fifteen years that a Peninsula District team has won a state title in football. To quote from our hometown newspaper, the Daily Press, "High school football on the Peninsula is championship football."

We would like to extend our enthusiastic congratulations to Coach Stan Sexton, his coaching staff and all of the players on the Phoebus High School Phantoms, the 2008 and 2009 Group AAA Division 5 Virginia High School League state football champions.

ON THE RETIREMENT OF DAVE LAUGHTER

HON. BART GORDON

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. GORDON of Tennessee. Madam Speaker, I rise today to recognize the service of a valued staff member of the House Committee on Science and Technology, David Laughter, on his retirement.

Dave has served as Financial Administrator for the Committee since 2001. He has been on the Hill since 1994, working for the House Committee on Ways and Means and Congressman DAN BURTON of Indiana. Before coming to the Hill, he served as the Deputy Administrator for Management and Policy Support for the United States Department of Agriculture, USD; Rural Electrification Administration, REA; and as the Vice President/General Manager for an OEM manufacturer supplying large sheet metal stamping dies and special

machinery to domestic and transplant auto assembly plants in North America.

Dave received his B.A. in Economics from Hillsdale College in Michigan. He is from Dayton, and, as a native Ohioan, he has a special place in his heart for the Bengals, the Reds, and Skyline Chili.

Madam Speaker, Dave is the first person new employees meet on their first day, and the last person they see when they are leaving on their last day. Dave handles all the Committee staff benefits and payroll, he maintains our budget to ensure we're on track, and he makes sure that all our bills get paid. Dave has provided a steady hand on the Committee's financial tiller for these past 8 years, and I want him to know how much I appreciate his hard work.

I know Dave has wrestled with this decision, and while I don't expect him to turn into a "Nature Boy," I'm sure he's looking forward to having a little more time to pursue his other hobbies and interests.

I know that all of the Science and Technology Committee's members and staff wish him well. He'll have more time to spend with his lovely wife, Marsha, his children, Carrie, David, and Brittany, his grandchildren Peter and Meredith, and his other family and friends. We hope Dave enjoys a relaxing retirement filled with fishing, grilling, and listening to classic rock.

Dave, thank you again for your years of service.

HONORING WILLIAM H. CASSIDY

HON. MICHAEL H. MICHAUD

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. MICHAUD. Madam Speaker, I rise today to recognize the accomplishments of William H. Cassidy of Calais, Maine.

A native of Calais, Bill has dedicated himself to public education for the past 36 years, serving as president of Washington County Community College since 2003. Under his strong leadership, the college added new academic programs, undertook significant capital improvements and formed new partnerships with many other universities and colleges in Maine and New Brunswick, Canada.

He has previously served in a number of senior administrative posts within the Maine Community College System as an associate commissioner within the Maine Department of Education, director of the Waterville Regional Vocational Center, and a teacher at the middle, high school, and college levels.

An accomplished academic, Bill holds credentials from Northern Maine Technical College, the University of Maine at Machias, Husson College, the University of Maine and Nova Southeastern University. Bill has been recognized for his achievements and leadership in collaborative international education, receiving the Lady Dunn Award of Excellence by the St. Andrews Campus of the New Brunswick Community College. Most importantly, Bill has left a lasting mark at Washington County Community College with his emphasis on volunteerism and the role of the college in the life of the local community.

Madam Speaker, please join me in honoring William H. Cassidy for his life-long dedication and service to his community and the education of Maine's students.

IN HONOR OF MR. MARVIN N. SCHOENHALS

HON. MICHAEL N. CASTLE

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. CASTLE. Madam Speaker, it is with great pleasure that I rise today to pay tribute to Mr. Marvin N. Schoenhals, former Chairman of the Wilmington Savings Fund Society (WSFS). Mr. Schoenhals, through his leadership, hard work and dedication, has accomplished a great deal for the state of Delaware, and I am honored to recognize him for his achievements, both personal and professional.

Skip joined WSFS in 1990 as President and Chief Executive Officer of both WSFS Financial Corporation and its principal subsidiary, Wilmington Savings Fund Society, located in Wilmington, Delaware. He was named Chairman in 1992 and served in this capacity until November 1, 2009, when Skip assumed the role of non-employee director. Skip's nearly 20 years as WSFS Chairman are marked by many noteworthy accomplishments; during his tenure, Skip led the \$3.6 billion financial services company to world class service levels and significantly increased shareholder value.

But Skip's impact on others is not limited solely to his professional career. He is a role model for others and is actively involved in his community, lending his knowledge and expertise to worthy causes and organizations. Skip is Chairman of Vision 2015, a coalition of Delaware leaders working towards making Delaware's public education the best in the world. He serves on, and from 2003 to 2004 was Chairman of, the Board of Directors of the Delaware State Chamber of Commerce and is also a member of the Delaware Business Roundtable, Chairman of its Education Committee, and a Trustee, and former Chairman, of the Delaware Public Policy Institute.

A cause very dear to Skip's heart is the Sunday Breakfast Mission, our state's largest shelter and rehabilitation facility. Each fall, WSFS partners with the Sunday Breakfast Mission to sponsor the Great Thanksgiving Food Drive, and, as Chairman of the Mission, Skip spearheads the effort, working diligently on behalf of his fellow Delawareans. With Skip's direct involvement in this initiative, the drive has experienced exponential growth, collecting a total of 37 tons of food for 2008. In 2009, Skip was awarded the Delaware State Chamber's Josiah Marvel Cup. This distinguished award is given annually in recognition of outstanding contributions made to the state, community and society; I applaud the Chamber's selection of Skip for this recognition and can say without hesitation that the honor which has been bestowed upon him is one he most truly deserves.

Skip's career in the financial industry has been nothing short of exemplary, and anyone that knows Skip knows that he is, and no doubt will remain, very active in his many professional, business, community, and advisory

organizations. Moreover, Skip is truly a great guy—dedicated to his wife, Linda, and to his church. Today, I commend Mr. Marvin N. Schoenhals for the service which he has rendered our state as not only Chairman of WSFS, but as a caring and devoted member of our society. In recognition of his tireless dedication and immeasurable contributions, I thank Skip and offer my best wishes on this momentous occasion.

CAPTAIN BOB BERNAZAL

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. POE of Texas. Madam Speaker, in July of 2008, a courageous mission was undertaken to rescue 15 hostages who were being held by the Revolutionary Armed Forces of Colombia, known as FARC. Three of these hostages were American civilians. The operation was code named, Operation Willing Spirit, a perfect description of the valor demonstrated by all of the rescuers involved. Captain Bob Bernazal, a Kingwood, Texas native, was especially vital to the success of the operation in his role as the Information Operations Integration Strategy Division chief of the 612th Air Operations Center.

Captain Bernazal's ability and dedication was clearly shown through his comprehensive planning of Operation Willing Spirit. The nine-year Air Force veteran has proved a fine example of the aptitude of our Armed Forces by ensuring mission success.

He is praised by his superiors as an outstanding Information Operations expert, and is recognized for the development and implementation of a plan for utilizing IO duty officers. We are fortunate to have great men like Capt. Bob Bernazal at our side to outwit our enemies and protect our nation.

It is with great pride and admiration that the Second District of Texas is able to commend Captain Bernazal as the Air Force-level Outstanding Information Operations Active Duty Company Grade Officer of the Year. This Kingwood, Texas native is truly deserving of this award as well as the respect of our nation. We thank him for his service. He is a great Texan and a true hero.

RECOGNIZING JUDGE CHARLES FOLEY

HON. ROBERT J. WITTMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. WITTMAN. Madam Speaker, I rise today to recognize Judge Charles Foley on the occasion of his retirement from the bench of the General District Court. Since 1986, Judge Foley has faithfully served the 20th Judicial District which includes the counties of Fauquier, Rappahannock and Loudoun in Virginia.

Judge Foley was born in Richmond, Virginia and in 1968 he married Ms. Janice Foley, with

whom he has two children, Page and James. Judge Foley graduated from the University of Richmond in 1968 with a Bachelor of Science in Business Administration.

In 1971, Judge Foley received his Juris Doctor from the T.C. Williams School of Law at the University of Richmond where he was the President of Phi Delta Theta legal fraternity. From there he moved into private practice until 1974 when he was elected Commonwealth's Attorney for Fauquier County Virginia.

Judge Foley served as a Commonwealth Attorney for 12 years until 1986 when he was appointed to the General District Court for the 20th Judicial District where he has served for the past 23 years.

All of his life, Judge Foley has been a positive influence on his community and his profession. In addition to being a founding member of the Young Lawyers Conference of the Virginia State Bar, he coached Youth baseball, basketball and soccer for 15 years. He also served as a board member, and later, as President of the Board of Directors of Fauquier Hospital, Inc. He has been a member of the American Judges Association as well as the Warrenton Fauquier Jaycees.

I continue to be impressed by Judge Foley's selfless contributions to his community in an effort to enrich those lives around him. I urge my colleagues to join me in congratulating Judge Charles Foley on his retirement from 36 years of public service.

PERSONAL EXPLANATION

HON. RICK LARSEN

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. LARSEN of Washington. Madam Speaker, I request that for rollcall vote #963, the Marshall Amendment to H.R. 4173, I inadvertently voted "no" but I intended to vote "aye."

IN RECOGNITION OF THE VILLAGE OF TINLEY PARK, IL

HON. DEBORAH L. HALVORSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mrs. HALVORSON. Madam Speaker, today I rise to recognize the Village of Tinley Park in Illinois, which was recently named "America's Best Place to Raise Your Kids" by Business Week Magazine. The village was recognized primarily for its top-rated schools, low crime, beautiful parks, affordable housing, and easy access to jobs.

Founded in 1892, Tinley Park rests just a Metra ride from the city of Chicago, and a short drive from Illinois' vast farmlands. Established on the Rock Island Railroad, Tinley Park grew over the years through both agricultural industries, including a grain elevator and a windmill, and manufacturing plants, including a soft-drink bottling plant. The population grew slowly prior to World War II; however, it grew rapidly after the war, doubling every decade from 1950 to 1980.

In recent years Tinley Park has grown in recognition, with all three main high schools ranking among the top 100 in the state. Students of Andrew High School help at neighborhood shelters, libraries, and nursing homes through a requirement they complete 24 hours of community service. This requirement keeps the students closely tied to their community and, as a result, only three percent of the student body of 2,400 move away during high school, compared with the state average of 14 percent. Tinley Park is also home to many exceptional citizens, including Olympic swimmer Christine Magnuson and former Major League Baseball player Kevin Sefcik.

TRIBUTE TO THE CINCINNATI URSULINE ACADEMY GIRLS VOLLEYBALL TEAM

HON. JEAN SCHMIDT

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mrs. SCHMIDT. Madam Speaker, I rise today to congratulate the Cincinnati Ursuline Academy Girls Volleyball Team on winning the Division I Ohio High School Athletic Association State Championship. This is Ursuline's fourth state championship in volleyball. Ursuline Academy also won state titles in 1975, 1993, and 2002.

After a heartbreaking loss in last year's state championship game the young women of Ursuline entered the new season determined as ever to make the sacrifices needed to win this year's title.

At Wright State University's Nutter Center the Lions prevailed in the championship game over an undefeated Dublin Coffman in four sets. Impressively, Ursuline never trailed the match until the third set. The Lions were led by senior Jade Henderson of Loveland with 18 kills and by senior Dani Reinert of Symmes Township with 48 assists.

Under the direction of Head Coach Jeni Case, Ursuline finished the season with a perfect record of 29-0. Additionally, the Lions captured the Girls' Greater Cincinnati League Championship for the second straight season.

Madam Speaker, please join me in congratulating Ursuline Academy on yet another State Championship. Go Lions.

CONGRATULATING THE JOLIET ARSENAL DEVELOPMENT AUTHORITY FOR BEING NAMED THE 2009 BASE REDEVELOPMENT COMMUNITY OF THE YEAR

HON. DEBORAH L. HALVORSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mrs. HALVORSON. Madam Speaker, today I rise to recognize the Joliet Arsenal Development Authority (JADA) for being named the 2009 Base Redevelopment Community of the Year by the Association of Defense Communities. I join the Association of Defense Communities in honoring JADA for bringing permanent jobs and revenue to the community in an environmentally friendly manner.

JADA was created in 1995, after Congress passed legislation allowing the former Army munitions facility in Joliet, IL, to be redeveloped with a transfer of ownership. The site has been developed into the largest intermodal facility in the Nation. An intermodal involves the transportation of freight in a container or vehicle, using multiple modes of transportation without any handling of the freight itself when changing modes. The development of the 3,000-acre site has already created 2,000 permanent jobs with approximately \$150 million in annual wages. A portion of the site will be devoted to a state-of-the-art facility engineering training facility for the development of a range of engineering skills. There remains enormous potential to create many additional high-paying manufacturing and engineering jobs at this site.

Throughout the process of this redevelopment, special attention has been devoted to mitigating the environmental impacts of ammunition waste on the site. A dozen public and private agencies worked to clean up the site and provide quality groundwater and soil. They finished this important work last year, three years ahead of schedule.

Will County and the Joliet area have greatly benefited from the efforts of the Joliet Arsenal Development Authority. It comes as no surprise JADA is being recognized on the national stage as a leader in redevelopment.

HONORING PAMELA THOMPSON

HON. MICHAEL H. MICHAUD

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. MICHAUD. Madam Speaker, I rise today to recognize the accomplishments of Pamela Thompson.

Pamela has been selected to receive the Presidential Awards for Excellence in Mathematics & Science Teaching. This prestigious award distinguishes Pamela as one of the best elementary school science teachers in the nation.

Pamela has been hailed for her enthusiasm, knowledge and ability to instill a love of learning in her students over her 27 dedicated years of teaching the students of Madison, as well as her contributions to Maine's overall education system.

An exceptional science teacher, Pamela constantly seeks methods to enrich her students' grasp of complex ideas. She is commended for deepening her own understanding of science, learning and applying the best instructions and strategies available. Most importantly, Pamela listens intently to the needs of her students and shares her awareness with colleagues.

Pamela is also credited with leading Maine School Administrative District 59's success in obtaining and implementing two consecutive science grants from the Maine Mathematics and Science Alliance. She has served on the Leadership Design Team since its inception in 2004, spearheading the integration of formative assessment probes, new science literature and science notebooks in a program that provides science kits to kindergarten through fifth

grade classes. She piloted the new strategies developed under the grants and shared her successes with the K-12 Science Design Team, which led to the creation of a professional development plan for the entire district science staff.

Madam Speaker, please join me in honoring Pamela Thompson for her life-long dedication and service to her community and the education of Maine's students.

HONORING THE BOURBON COUNTY HIGH SCHOOL BAND FOR WINNING CLASS A CHAMPION IN THE BANDS OF AMERICA NATIONAL COMPETITION

HON. BEN CHANDLER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. CHANDLER. Madam Speaker, I rise today to recognize the accomplishments of a special group of students in my congressional district. In November, the Bourbon County High School Marching Colonels became Class A champion at the prestigious Bands of America Grand Nationals competition for the second year in a row, placing first out of 91 marching bands from across the nation. I am proud to be able to address the accomplishments of such a talented group of students who are more than deserving of our recognition.

The Bourbon County High School Band, led by directors Eric and Nadine Hale and Kevin Akers, has enjoyed great success recently. In addition to their national championship—a prize considered to be the most prestigious award a marching band can win—they won the Class AAA title at the Kentucky Music Educators' Association championship just one week earlier. At the national championship, the 80-member band had the honor of performing for 25,000 people at Lucas Oil Stadium in Indianapolis. Winning one championship would be quite an accomplishment for any band, but that the Bourbon County Band has now won back-to-back national titles shows just how talented this group of young men and women is.

Madam Speaker, the Bourbon County Marching Colonels' unprecedented success is truly deserving of praise and recognition. I believe that educating our young adults in music and the arts is important in continuing to foster our great American culture, and it is with great pride that I rise today to acknowledge the successes of these extremely talented and accomplished young men and women.

EARMARK DECLARATION

HON. JOHN J. DUNCAN, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. DUNCAN. Madam Speaker, consistent with House Republican Earmark Standards, I am submitting the following earmark disclosure information for project requests that I

made and which were included within H.R. 3326, the "Department of Defense Appropriations Act, FY2010."

Requesting Member: Congressman JOHN DUNCAN

Account: OP—Army

Project Amount: \$5,000,000

Legal Name of Requesting Entity: TN Army National Guard, Houston Barracks, 3041 Sidco Drive, Nashville, Tennessee 37204

Description of Request: The funding would be used to allow Army National Guard trainers (both fielded and yet-to-be procured) to network together on a Combined Arms virtual battlefield.

TRIBUTE TO MR. JAMES B. FARR

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. BERMAN. Madam Speaker, on December 31, 2009, the House of Representatives will lose one of its most senior and valuable staff members—Mr. James B. Farr. Jim will be retiring after 38 years of service in the House of Representatives, during which time he served on the Committee on the Judiciary and, most recently, the Committee on Foreign Affairs, where he is the Financial Clerk.

Thirty nine years ago, as a young man from southern Maryland, Jim decided to leave the tobacco farm founded by his grandfather and seek a job on Capitol Hill. This was quite an adventure for a country boy who had grown up tilling the land. Proudly, the farm is still in the family, but no longer grows tobacco.

Following his graduation from Prince George's Community College with a degree in personnel and business management, Jim headed for Washington, D.C., where he landed on the doorstep of Congressman Emanuel Celler from Brooklyn and Queens, New York, the longtime former Chairman of the House Judiciary Committee. Jim was hired by Mrs. Dick, the Staff Director of the Committee, and began working as a clerk in the publications office where he sorted mail, answered the phones, referred bills and assisted in hearing preparation. It was shortly after his arrival on the Hill that he met his future wife, Christine Lynn Wills, who had moved to the Washington, D.C., area from West Virginia. Christine Lynn and Jim have been married for 31 years and have two lovely daughters—Michelle and Jennifer.

Jim's career on the Hill also progressed. In February 1973, he became the Judiciary Committee's publications clerk, where he was responsible for maintaining the Committee's documents. Three years later, Jim was promoted to be the Committee's financial clerk where, under the guidance of the Committee Chairman, he prepared, maintained and oversaw the Committee's budget. Jim was so talented, and his services so highly prized, that he was retained by Chairmen Peter Rodino, Jack Brooks and Henry Hyde. In 2001, when the late Rep. Hyde became Chairman of what was then known as the House International Relations Committee, he asked Jim to move with him and serve as financial clerk for

that Committee. There, Jim once again became an indispensable figure, helping to ensure the smooth functioning of the Committee and easing the transition to the late Chairman Tom Lantos and, subsequently, to me.

Mr. Farr has served the Congress under both Democratic and Republican leadership with great distinction and integrity. His service epitomizes the finest qualities of government service. We are all grateful for that service and for the example he has provided to generations of new committee staff whom he has mentored. He will now retire and spend more time with his family and more time on the farm, where third and fourth generations of the Farr family now reside. Thankfully, despite his years of dedicated and impressive service, Jim wears his years easily, and we wish him much good will as he pursues his favorite hobbies of boating, fishing, and hunting.

Good luck and thank you Jim from a grateful House of Representatives.

EARMARK DECLARATION

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. YOUNG of Alaska. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3288, the Departments of Transportation, HUD, and Related Agencies Appropriations Act, 2010.

Project Name: Maniilaq Association in Kotzebue, AK, for establishing a cancer treatment center

Bill Number: H.R. 3288

Legal Name and address of entity receiving earmark: Maniilaq Association, P.O. Box 256, Kotzebue, AK 99752

Description of how the money will be spent and why the use of federal taxpayer funding is justified: There are high rates of cancer among AK Natives and a cancer center located in rural Alaska would allow for screenings, early detection and local treatment.

Appropriated Amount: \$500,000

Detailed Finance Plan: Equipment \$500,000

Project Name: Denali Commission in Anchorage, AK, to support health projects and economic development activities for the arctic region

Bill Number: H.R. 3288

Legal Name and address of entity receiving earmark: Denali Commission, 510 L Street, Suite 410, Anchorage, AK 99501

Description of how the money will be spent and why the use of federal taxpayer funding is justified: The funding would be used to support health projects and economic development activities for the arctic region under the Denali Commission Act of 1998.

Appropriated Amount: \$10,000,000

Detailed Finance Plan: Programming \$10,000,000

THIS HANUKKAH—IN HONOR OF ALL OUR ARMED FORCES AND THEIR FAMILIES THIS HANUKKAH

HON. KENDRICK B. MEEK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. MEEK of Florida. Madam Speaker, I rise today with a poetic tribute in honor of our magnificent Armed Forces and their splendid families this Hanukkah, and holiday season. And for all of the ones who are so separated by the miles so very far across the shores. Our hearts, especially go out to all of those families who have lost their greatest loves of all, in the defense of our Nation. And to all of those recovering from the grave wounds of war we pray for their speedy recovery. Bless them all! I ask that this poem penned by Albert Caswell be placed in the RECORD in honor of them as follows:

THIS HANUKKAH

This Hanukkah . . .
As the family gathers round . . .
All in This Festival of Lights to be found . . .

All in this time of remembrance, as described in the Talmud of long . . . long ago . . .

With eights days of light and remembrance, of events so miraculous so . . .

As the children dance with songs of joy, and the love of your family grows . . .

Reciting Hallel prayer, and the games, as the Dreidels spin there so . . .

We should also remember, this other miracle of all of those . . .

THE MIRACLE OF OUR ARMED FORCES, SELFLESSNESS SO!

Of All Those families! Those Patriots of Peace, of all of these . . .

The ones, who will not together be . . .
Who upon battlefields of honor fight . . .

So far away from our Country Tis of Thee, on this night . . .

Men and Women of honor bright, who for all of us so carry on that fight . . .

Who live with such heartache and death, as on each new day our lives they bless . . .

And all of those ones, whose greatest of all loves . . . now lie in soft quiet graves . . .

Precious Daughters and Sons, Husbands and Wives . . .

Brother and Sisters, Fathers and Mothers who gave . . .

The greatest of gifts, That Last Full Measure . . . as did they!

Whose loved ones pain, can not be healed by time . . . nor so divided this day . . .

As on this joist holiday season, they sit with tears in eyes do they . . .

With one less place at the dinner table set . . . with all of this grieving so yet!

And all of those who have come home, without arms and legs . . .

Inspiring us with their courage they!
Blessing us all, but with all those fine gifts of selflessness conveyed!

Making us all so see, just how magnificent and inspiring a heart can be!

And all of those who have loved ones, far across the shores . . .

As each new day, but brings to them such great worry so for sure . . .

But, waiting . . . but waiting for, that dreaded knock on the door . . .

That phone call, that they so now pray not for . . .

Quiet Heroes, one and all!
Watching them from Heaven, The Angel's tear drops fall . . .

Lord God, Lord God . . . Bless Them . . . Bless Them All!

For So Many, So Few Have But Paid The Cost!

So bore the burden, so carry that cross! That cross of war!

This Hanukkah, as you hold your families tight . . . and all seems so very right . . .

As you see all those smiles on your children's faces, as these sacred nights races . . .

Give thanks, Give praise . . . as upon your knees you pray . . .

For all of those families, whose sacrifice . . . the blessings of freedom, they gave!

On This Hanukkah, in this The Kindling . . . as each new candle you light . . .

Eight days of prayer and gratitude, in this joist Festival of Lights . . .

A time for families to celebrate, to remember how miracles can burn so bright . . .

Remembering too, our Armed Forces miracles of sacrifice . . .

This Hanukkah!

THE SKYLINE SPARTANS

HON. DAVID G. REICHERT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. REICHERT. Madam Speaker, today I rise in recognition of a high school football program located in my District—the 8th of Washington—that won the 4A State title on Saturday, December 5, their third in a row.

The Skyline Spartans (12–2), located in Sammamish, Washington—and competing in the KingCo 4A League, Crest Division—defeated the Ferris Saxons, 45–21 at the Tacoma Dome to win the 2009 State 4A Championship. The win marked the third straight State title win for Skyline. I offer my congratulations to the entire team and team captains Anthony De Matteo, Cooper Pelluer, Jake Heaps, Jase Butorac and Tommy Aarts.

I also want to thank head coach Mat Taylor and his assistant coaches, Steve Chmiel, Tom Collins, Jeff Johnson, Bruce Hasson, Kyle Snell, Ryan Thorsen, Brett VanVoorhis and Evan Flay for providing wonderful examples for their players and dedicating many hours to the teaching and training of a group of talented young athletes. Our communities and our young people are better off with the influence you provide. Thank you for your service.

Congratulations and thanks also go out to Principal Lisa Hechtman, Athletic Director Kevin Rohrich and all the teachers at Skyline. Enjoy another football championship and know that your community, your students and your student-athletes all appreciate your efforts and sacrifices. Go Spartans!

IN HONOR OF MS. KAREN NESBIT

HON. PAUL RYAN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. RYAN of Wisconsin. Madam Speaker, I would like to take this opportunity to recognize and congratulate Ms. Karen Nesbit of Franklin, Wisconsin. Ms. Nesbit was recently awarded the 2008 Presidential Award for Excellence in Mathematics and Science Teaching. The Presidential Award for Excellence in Mathematics and Science Teaching Program recognizes outstanding teachers across the country for their contributions to the academic and personal development of students in science and mathematics.

Ms. Nesbit has been an educator for 23 years. She has taught in the Franklin Public School District since 1990, and currently teaches first grade at Pleasant View Elementary School. The education of our youth is very important to the continued success of our communities and our country. It is through the dedication of teachers such as Ms. Nesbit that students are well-equipped with the knowledge and skills they need for their future.

On behalf of those I represent in the 1st District of Wisconsin, I extend my gratitude and congratulations to Ms. Karen Nesbit.

FIRST FLIGHT OF THE 787
DREAMLINER**HON. JAY INSLEE**

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. INSLEE. Madam Speaker, I want to recognize the Boeing Co. on their first flight of the 787 Dreamliner. This successful flight marks an important milestone in the development of the 787 Dreamliner, and represents the collective efforts and hard work of everyone at the Boeing Company, particularly the dedicated Boeing employees who live in my district. The 787 Dreamliner is airplane that is not only much more efficient than any other airplane on the market, but also represents a new generation of technologically advanced commercial airplanes that will change the future of commercial aviation.

SPIRIT OF TOURISM AWARDS

HON. NICK J. RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. RAHALL. Madam Speaker, I rise today to offer congratulations to several of West Virginia's most dedicated and hardworking individuals. On December 1, 2009, several individuals were honored for their role in enhancing tourism to Greenbrier County when the Greenbrier County Convention and Visitors Bureau (CVB) presented their fourth annual Spirit of Tourism Awards.

The Greenbrier County CVB presented four awards to honor people who have made a dif-

ference in the local economy through enhancing local tourism. The Spirit of Tourism Awards recognize residents that have made a significant impact on the tourism industry in the areas of tourism development, volunteerism, securing a convention or meeting to the area, and excelling at partnering with the Greenbrier County CVB.

This year's Greenbrier Award recipient was awarded to Jim Justice for his hard work and dedication since his purchase of 'The Greenbrier' earlier this year. Mr. Justice has made significant developments since then with the development of a new restaurant, Prime 44, The Tavern Casino, and the announcement of the new PGA Tour 'The Greenbrier Classic'. Mr. Justice has worked hard to improve 'The Greenbrier' all the while increasing tourism to the county and state.

Russell Williams and Annamarie Visclosky were this year's recipients of the Greenbrier County Ambassador Award, which honors those who have assisted the tourism community by going above and beyond the call of duty. Mr. Williams and Ms. Visclosky have spearheaded a number of impressive activities in the community, including the Lewisburg Chocolate Festival, Carnegie Hall's Taste of Our Towns, and the Rhythm and Blues Festival.

The State Fair of West Virginia was named as this year's recipient of the Hometown Hero Award, which recognizes an individual or group that has gone above the call of duty in securing conferences or meetings in Greenbrier County. Board Member Kathryn Tuckwiller accepted the award on behalf of the State Fair of West Virginia.

The Friend of Tourism Award is chosen by the Convention and Visitors Bureau to recognize an individual or group that has excelled in promoting tourism in partnership with the Bureau. This year's winner was Brier Properties which was recognized for their significant hotel development in the area and their outstanding willingness to partner with the Greenbrier County CVB in marketing initiatives.

Madam Speaker, I ask that my distinguished colleagues join me in congratulating the winners of this year's Spirit of Tourism Awards who have contributed in unique ways to the growth and development of the economy in the Third Congressional District of West Virginia—a district that I am very proud to represent here in Washington, DC.

HONORING A.C. REYNOLDS HIGH
SCHOOL FOR THEIR VICTORY AT
THE NORTH CAROLINA STATE
FOOTBALL CHAMPIONSHIP**HON. HEATH SHULER**

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SHULER. Madam Speaker, I rise today to honor the recent accomplishments of the A.C. Reynolds High School football team, the Rockets.

On Saturday, December 12, the Rockets won the North Carolina 4-A State Football Championship against Hartnett Central High School, with a score of 14-13. They finished

the season with a record of fourteen wins and only two losses. A.C. Reynolds is the first high school in the history of Buncombe County to win three State High School Football Championships in 1999, 2002 and 2009.

I especially wish to congratulate A.C. Reynolds Head Football Coach, Shane Laws. I know from experience that teams do not rise to this level of success without a strong coach. It takes a great leader to instill the determination and work ethic that lead to victories on the football field.

The A.C. Reynolds Rockets Football team is known throughout the mountain area for their strong defense. This season's championship and stellar defensive play only continue that legacy. These young men have well represented the mountains of Western North Carolina throughout their drive to this year's State Football Championship. It is my privilege to recognize their accomplishments today in this chamber.

Madam Speaker, I ask my colleagues to join me in expressing our congratulations to this group of young men and their coaches for their accomplishments on the football field this season.

REINTRODUCTION OF THE REVI-
TALIZING CITIES THROUGH
PARKS ENHANCEMENT (RECIPE)
ACT**HON. CAROLYN B. MALONEY**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mrs. MALONEY. Madam Speaker, I strongly believe that open spaces and community parks are a critical part of urban infrastructure. That's why today I am reintroducing the Revitalizing Cities Through Parks Enhancement (RECIPE) Act, that would establish a \$10 million grant program for qualified, non-profit, community groups, allowing them to lease municipally owned vacant lots and transform these areas into parks. Parks and gardens created with the grants will not only provide safe places to gather, but will increase property values as well. The grants will be available from the Secretary of Housing and Urban Development to groups who have met standards of financial security, and who have histories of serving their communities. To further ensure that these grants are used to make lasting positive changes, land improved and made into open community space under this legislation must be available for use as open space from the local government for at least seven years.

CONGRATULATING THE SOUTH
JOHNSTON HIGH SCHOOL 2009
VARSITY FOOTBALL TEAM**HON. BOB ETHERIDGE**

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. ETHERIDGE. Madam Speaker, I rise today to congratulate the South Johnston High

School Trojans football team in Four Oaks, North Carolina for a historic season and trip to the 3-AA North

Carolina High School Athletic Association State Championship football game this past Saturday, December 12, 2009 at Kenan Stadium in Chapel Hill. South Johnston finished the season with an impressive record of 14 and 2 and were the 2009 Conference and 3-AA Regional Champions. This is the third conference title for South Johnston, the first ever appearance in the third round of Regionals and the school's first trip to the State Finals.

I am extremely proud of the dedication, determination, sportsmanship, and discipline of this talented football team. The members of the 2009 team are to be commended for their drive and perseverance. They include Dee Williams, Brandon Bussiere, Willie Jefferson, Brandon Beasley, Dan Atkins, Alex Barbour, Vivek Patel, Justin Sanders, Jim Abdalla, Anthony Crumity, Shawn Williams, Blake Ingram, Shaun Write, Josh Barbour, Matt McClendon, Rohelio Morales, Mitch McLamb, Marcus Faison, Aaron Anderson, Unek Lloyd, Matt Stanley, RonJonek Gill, Dan Stanley, John Jefferies, Javonte Burns, Woody Thornton, Johntavious Chrisp, Jon Farmer, Tyler Benson, Devon Smith, Pat Dunigan, Stacy Thornton, Mike Purvis, Erasto Simmons, Jovonte Cox, Trevor Beasley, Adam Hockaday, and Tyvon Small.

South Johnston Head Coach Joe Salas and his great team of assistant coaches worked tirelessly behind the scenes and are the architects of the behind the team's success.

I am proud to have the honor of representing this outstanding high school and I ask my colleagues to join me today in honoring these fine young athletes.

TERRORISTS BELONG AT GITMO, NOT A NEIGHBORHOOD JAIL

HON. LAMAR SMITH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SMITH of Texas. Madam Speaker, the Obama Administration has announced its plan to transfer 75 Guantanamo Bay detainees to the United States.

The Administration claims that transferring these detainees from Guantanamo Bay will somehow lessen al Qaeda's desire to attack America. But a change in location of detainees is not going to reduce terrorists' hatred of America.

However, the transfer of any Gitmo detainee to the U.S. will give them additional constitutional rights, making it harder for prosecutors to obtain convictions.

The Administration claims that it can detain these terrorists indefinitely. But many agree this is an impossible goal. Civil liberties groups were quick to point out that indefinite detention inside the United States without a trial is little more than a change in zipcode.

It is clear to all but those in the Administration that this decision will likely result in the almost immediate challenge to detention as soon as these terrorists arrive in Illinois.

The Guantanamo Bay facility in Cuba, not a prison in America's heartland is the right place for terrorists.

225TH ANNIVERSARY OF TRENTON'S TIME AS CAPITAL OF THE UNITED STATES

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. HOLT. Madam Speaker, I rise to commemorate the 225th anniversary of the city of Trenton's tenure as the capital of the United States.

Students of American history are familiar with the Compromise of 1790. James Madison and Thomas Jefferson won permanent residence for Congress on the Potomac in exchange for the Federal Government's assumption of State debts from the Revolution—a priority of Alexander Hamilton. What followed was the Residence Act, which established what we now know as the District of Columbia.

What is less understood is the capital's journey through eight other towns, the abandoned proposals and the near-misses before Congress settled here on the Potomac. During the Revolutionary War, Congress moved frequently to avoid British troops—meeting famously in Philadelphia then in Baltimore, York, and Lancaster. Upon ratification of the Articles of Confederation, Congress returned to Independence Hall only to be removed abruptly in the summer of 1783.

That June, approximately 500 mutinous Pennsylvania militiamen demanding back pay from their service during the Revolution, encircled Independence Hall and refused to let Members of Congress leave the building unless their demands were met. Uncertain of their safety and the integrity of Congress, the delegates fled across the Delaware to Princeton, New Jersey.

In Princeton, Congress redoubled its efforts to select a permanent seat of government. To settle regional animosity, Congress agreed on two permanent capitals on the Delaware and Potomac, while designating Annapolis and Trenton as interim capitals.

On November 1, 1784, Congress convened in Trenton. Travel-weary legislators reluctantly trickled into Trenton—then a town of roughly 500 people—and it began official business at the French Arms Tavern on the corner of Warren and State Streets.

When Congress finally reached a quorum on November 29 it considered matters of foreign affairs and finance, appointing ministers to Britain and France and selecting commissioners to the Board of Treasury.

The highlight of Trenton's time as the capital was a visit by the Marquis de Lafayette. During his visit he petitioned Congress to take official leave to France and addressed a joint session of the New Jersey State Legislature. In honor of Lafayette, one of George Washington's most trusted generals, Congress drafted a letter to the King of France praising Lafayette's service and passed a resolution commending Lafayette for his bravery during the siege of Yorktown.

As the session concluded before Christmas, Congress scrapped the plan for two capitals and took up a resolution to establish a permanent capital in Trenton. Unfortunately for Tren-

ton, debate stalled, and on Christmas Eve Congress agreed to meet in New York City after the New Year.

The rest as they say is history. The bustling, city life of New York was more appealing to Members of Congress than the calm of small-town Trenton. They quickly forgot their plans and continued to meet in New York until 1790.

Still, Congress's brief visit to Trenton offers a fascinating glimpse into the early history of the United States and should remind us that the remarkable Capitol building in which we conduct the people's business should not be taken for granted.

I commend the Crossroads of the American Revolution National Heritage Area, the Trenton Historical Society, and the other organizations that make up Trenton 1784—The Nation's Capital Committee, for their excellent work, schedule event and lectures and preparing exhibits and online resources to bring to life this fascinating yet fleeting moment in American history. Trenton was then and is today a town with great appeal.

IN RECOGNITION OF PATRICK W. HENNING'S OUTSTANDING CAREER OF PUBLIC SERVICE

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. GEORGE MILLER of California. Madam Speaker, I rise to offer the following statement, in recognition of Patrick W. Henning upon his retirement, on behalf of myself and the following members of the California congressional delegation: Representatives PETE STARK, HOWARD BERMAN, SAM FARR, LYNN WOOLSEY, ZOE LOFGREN, ANNA ESHOO, HENRY WAXMAN, DORIS MATSUI, JERRY MCNERNEY, JIM COSTA, BARBARA LEE, GRACE NAPOLITANO, LAURA RICHARDSON, BRAD SHERMAN, MIKE HONDA, LINDA SANCHEZ, JOE BACA, and other colleagues.

We rise in honor of Patrick Henning, upon his retirement from public service as the director of California's Employment Development Department, EDD. With nearly 40 years of experience in the field of labor, Mr. Henning brought to his office a deep and unmatched commitment to strengthening California's workforce.

Throughout his career, Mr. Henning has worked to improve the lives of California's workers—from his early days as a union organizer to his appointment to one of the state's largest Departments.

Prior to joining the Employment Development Department, Mr. Henning served the California Legislature for 17 years as a key labor policy consultant—first in the Assembly, and then in the Senate's Labor and Industrial Relations Committee headed by now-Secretary of Labor Hilda Solis. In the early 1980s, Mr. Henning served as California Labor Commissioner, and later as a member of the Agricultural Labor Relations Board. As a union representative in Southern California in the 1970s, Mr. Henning helped hundreds of workers bargain for improved wages, benefits, and working conditions.

Other major achievements include his tenure as chair of the state Developmental Disabilities Area Board for Los Angeles County. He also served several years in the United States Marine Corps Reserve.

Without a doubt, California's working families have benefited from Mr. Henning's lifelong contributions to the labor field. We would like to thank Mr. Henning for everything he has achieved for California's workers, and we give him our very warmest wishes for many happy years of retirement.

**HONORING BALBINA "BARBIE"
HERNANDEZ**

HON. CHARLES A. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. GONZALEZ. Madam Speaker, on December 11, 2009, San Antonio lost a great public servant when Balbina "Barbie" Hernandez passed away at the age of 62. I ask my colleagues to join me in honoring Barbie Hernandez as we celebrate her life, which was highlighted by decades of community service, philanthropy, and leadership.

Balbina Hernandez was born on November 2 and was named after her paternal grandmother. She was nicknamed "Barbie" in high school and was by known by this name the rest of her life.

She was an active member of her community, serving countless organizations and served the City of San Antonio for 18 years, which included being part of then Mayor Henry Cisneros' administration. As a single parent, Barbie passionately worked to be a role model for young women and boldly carried a red purse to remind people of the disparity in pay between men and women. Also, as a proud Vok, Barbie was dedicated to Lanier High School and worked to make a difference for the students attending her alma mater.

After working tirelessly to earn her bachelor's degree from the University of the Incarnate Word she set out to work for the Mexican American & Hispanic Physicians Association, MAHPA, as Executive Director. At MAHPA, Barbie took great joy in working to make college and medical school a reality for so many kids.

The City of San Antonio and the State of Texas feel a little emptier now, but we have all lived richer, better lives because of the life of Balbina "Barbie" Hernandez. Her life may have ended, but her contributions will live on and generations shall enjoy the fruits of her labor.

**STOP ANY TARP EXTENSION ACT
OF 2009**

HON. BRAD SHERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SHERMAN. Madam Speaker, I have co-sponsored the Stop Any TARP Extension Act of 2009. The position of the Treasury Depart-

ment—that it is free to reuse any repaid TARP funds—is entirely contrary to the law. Due to the Department's unwillingness to adhere to the statutory language of the Emergency Economic Stabilization Act of 2008, it is necessary to terminate that Act.

My office has inquired with the Treasury Department as to whether it possesses any legal opinion justifying the recycling of funds repaid by the banks. It should be noted that the Department has hundreds of lawyers and rarely does anything without a legal opinion, certainly not anything involving hundreds of billions of dollars. The Treasury Department refused to provide any legal opinion to Congress, implying that this is a case where he cannot find even one Department lawyer to reach the conclusion the Department would prefer.

Terminating TARP today will immediately return more than \$300 billion to the general treasury. This will give us the fiscal capacity to take the actions necessary to fight the great recession and get Americans back to work. I voted to enact the American Recovery and Reinvestment Act of 2009 in February and would be willing to support well designed job-creation programs again today.

A disadvantage of keeping TARP alive is that the administration may select job-creating programs based upon whether they somehow fit a contrived and expanded interpretation of the TARP statute, rather than whether they constitute the best job creation strategy. Once the TARP funds are returned to the treasury, Congress should immediately consider job-creating and recession-fighting bills.

THE SCHOOL PRINCIPAL RECRUITMENT AND TRAINING ACT OF 2009

HON. SUSAN A. DAVIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mrs. DAVIS of California. Madam Speaker, research shows that school leadership can be one of the most positive and effective factors in improving student learning. In fact, a strong school principal is often the principle reason behind a successful, well-functioning school that attracts and maintains quality instructors. In high-need schools, strong school leadership is especially crucial.

When the No Child Left Behind Act is reauthorized, the federal government will look to provide additional resources to help high-need schools improve student achievement. With a strong and inspirational principal at the helm, a high-need school will be more likely to achieve success.

Representative TODD RUSSELL PLATTS and I are introducing the School Principal Recruitment and Training Act of 2009 to put the nation on the right track toward creating a new generation of effective school leaders. The legislation provides competitive grants to recruit and train high-caliber aspiring and current principals to lead high-need schools and stay in their positions.

As part of the training, principals will be mentored by other successful school leaders, and they will receive on-going education even

after their placement. The legislation includes a data and reporting component so successful outcomes can be disseminated and replicated at other high-need schools.

Madam Speaker, I urge consideration of this legislation as we continue the effort to improve education in the United States and close the Achievement Gap.

**RECOGNIZING THE IMPORTANCE
OF TRADE TO THE UNITED
STATES ECONOMY AND THE IM-
PORTANCE OF PASSING FREE
TRADE AGREEMENTS WITH CO-
LOMBIA, SOUTH KOREA, AND
PANAMA**

HON. RODNEY P. FRELINGHUYSEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. FRELINGHUYSEN. Madam Speaker, the Department of Labor has recently announced that unemployment across the country remained at double-digits and many states have followed with their own bleak statements of jobs being eliminated and families struggling.

These continued job losses demonstrate the need to approve and implement three free trade agreements—Colombia, South Korea and Panama—that can and will "save and create" high value private sector jobs for Americans.

Since 2005, 64 trade pacts have taken effect across the globe. The U.S. is a party to only five—with Australia, Bahrain, Morocco, Oman and Peru. During the same time frame, Japan has signed nine and the European Union (EU), which already has liberalized trade practices among its 27 member states, has signed eight.

And yet, pending free trade agreements with Colombia, Panama and South Korea that will tear down barriers to our products languish in the United States Congress. Unfortunately, there has not been a debate in Congress on the ratification of these agreements.

When visiting South Korea in November, the President indicated that the U.S. would move forward on the pending U.S.-South Korea free trade agreement (KORUS FTA). This is a pact, signed over two years ago, which will virtually eliminate remaining tariffs between our two economies. It also takes aim at non-tariff barriers such as Seoul's burdensome safety standards that many U.S. businesses have been unable to meet and, thus, gain access to the growing Korean market.

As the U.S. stalls, the EU is moving to fill the void. It is actively negotiating with South Korea, using many of the same principles and goals that our trade officials used years ago. In fact, there are credible estimates that the U.S. will lose 345,000 jobs if it fails to implement the KORUS FTA!

Likewise, it has been nearly 1,100 days since President Bush sent a final U.S.-Colombia free trade agreement to Congress for implementation. In the meantime, the Canadians have completed their own deal with Colombia which will ultimately disadvantage our manufacturers and our farmers.

So, as Congress places us firmly on the sidelines, Canada, the EU, China and other commercial competitors are taking the field and our business.

This is not some dry, theoretical debate for my home state of New Jersey. Our businesses, large and small, and their workers, have a great deal riding on these agreements and others yet to be reached. They will create jobs here in America, in general, and in New Jersey, specifically.

For example, the Port of New Jersey and New York is a major international gateway for our region. Today, \$80 billion in commerce flows through the Port each year. Total exports from New Jersey have increased by \$8.1 billion over the past five years.

In fact, the latest data has shown that 130,500 jobs in New Jersey depend on trade. Of these, 50,500 are manufacturing jobs. Indeed, approximately one of every six manufacturing jobs in New Jersey is directly connected to trade. In addition, small businesses, America's job creators, would be among the major beneficiaries of U.S. initiatives to reduce foreign barriers to our exports.

Understandably, there is a high level of job-related anxiety in America today. This apprehension is fueling the rise of protectionism. The President and the Congressional leadership apparently now believe that defeating or delaying these trade agreements will somehow shield American jobs. To the contrary, discarding these pending trade agreements will deny American businesses the opportunity to create or grow high quality private sector jobs here at home and cede these markets to our allies and adversaries!

Madam Speaker, there is no doubt that Beijing, Ottawa, Tokyo and our EU friends understand the importance of trade. Our economy and, most importantly, our workers, are paying an incredibly high price for enacting these trade agreements. I urge the adoption of this resolution and the immediate ratification of the Colombia, Panama and South Korean free trade agreements.

RECOGNIZING THE SERVICE OF JAMES J. CORNELL, INSPECTOR GENERAL OF THE U.S. HOUSE OF REPRESENTATIVES

HON. ROBERT A. BRADY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. BRADY of Pennsylvania. Madam Speaker, on behalf of myself and Congressman DANIEL E. LUNGREN of California, I want to call to the attention of my colleagues a letter we recently sent to the Speaker regarding the retirement of Mr. James J. Cornell from the post of Inspector General of the House of Representatives. I enclose the letter here for your consideration.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON HOUSE ADMINISTRATION,
Washington, DC, December 16, 2009.

Hon. NANCY PELOSI,
Speaker, House of Representatives, The Capitol,
Washington, DC.

DEAR MADAM SPEAKER: The Inspector General of the House of Representatives, Mr.

James J. Cornell, will be retiring on January 2, 2010, after a long and distinguished career in service to the United States. His exemplary career spans 31 years, including nearly six years with the House. Jim is a perfect example of the exceptional public servants who labor in the fields, absent the fanfare, but without whom this institution would not function. Jim's commitment to excellence will be missed, but his legacy as Inspector General of the House of Representatives will have an enduring, positive impact on the institution.

One of the objectives of the Office of Inspector General is to produce value-added reviews and analyses which have improved House financial management, administrative processes, workplace safety and security—be it physical, informational or technological. Jim's creation of an advisory services division has expanded the types of value-added services provided by the Office of Inspector General.

Further, Jim's efforts to train House Officers' staff on process improvement and to provide mentoring and project support, have allowed numerous House management staff to detect process inefficiencies and find ways to eliminate them. None of this would have been possible without Jim's strong commitment to training, transparency, and accountability. Jim's hard work and tenacity for thorough analyses have been vital to ensuring the success of the House's administrative and financial operations.

Jim's non-partisan collaboration with House Leadership and the Committee on House Administration has provided a solid foundation for the continued work of the Office of Inspector General. Due to Jim's leadership, we have great confidence that the Office will continue to ensure strong internal controls on the financial and administrative functions, will promote policies and procedures to improve efficiency and reduce the risk of asset loss, and will streamline processes and ensure that House operations remain in compliance with applicable rules, laws, and regulations.

Although Jim will be missed by his colleagues, we share the excitement for his new challenge and opportunity. As Jim opens a Christian school in an under-served area in New Jersey, we know that he will make a positive impact on the lives of many children. Jim can take great pride and satisfaction in the positive and important accomplishments made throughout his career. We wish Jim and his wife Joanne a joyful and exciting retirement, and we know that all Members of the House join us in thanking Jim Cornell for his years of distinguished service.

Sincerely,

ROBERT A. BRADY,
Chairman.
DANIEL E. LUNGREN,
Ranking Minority
Member.

NATIONAL MEDIA SPELL 'SCANDAL' WITHOUT THE 'D'

HON. LAMAR SMITH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. SMITH of Texas. Madam Speaker, the national media spell 'scandal' without the 'D.'

Recently, the mayor of Baltimore was convicted of embezzlement.

On December 2, ABC's "Good Morning America" and CBS's "The Early Show" both briefly reported the Mayor's conviction.

Both failed to mention that she is a Democrat.

The Baltimore Sun and The Washington Post both failed to identify the Mayor as a Democrat in articles at the beginning of the trial.

The media also were guilty of selective omission in their coverage of scandals involving the Democratic former governors of Illinois and New York, as well as the Democratic former mayor of Detroit, among others.

On the contrary, when a former mayor in Georgia was arrested earlier this year, the Atlanta Journal-Constitution was quick to point out that he is a Republican.

The national media should treat both sides the same, not show favoritism based on party affiliation.

CONGRATULATING THE HARNETT CENTRAL HIGH SCHOOL 2009 VARSITY FOOTBALL TEAM

HON. BOB ETHERIDGE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 16, 2009

Mr. ETHERIDGE. Madam Speaker, I rise today to congratulate the Harnett Central High School Trojans football team in Angier, North Carolina, for their historic season and trip to the North Carolina High School Athletic Association State Championship football game this past Saturday, December 12, 2009 at Carter Finley Stadium in Raleigh. Saturday marked the first time any Harnett County school has made it to the state championship game since school district consolidation in the 1970s. Harnett Central also made history this year by finishing the season with a 15 and 1 record, a record made more impressive because this is the first year the team has played in the 4-A conference.

I am extremely proud of the dedication, determination, sportsmanship, and discipline of this talented football team and its coaches, and they are to be commended for their drive and perseverance. The 2009 team members include Anthony Johnson, A.J. Hayes, Jarrod Spears, Mike Murray, Jeremy Wells, Logan Klauka, Ocean Stroud, Torin Walker, Tate Wheelin, Brian Taylor, Jevon Morris, Nick Corbin, Brian Baker, Lemonte Taylor, Dalan Snow, Jacob Hyde, Shag Long, Kendrick Rodgers, Rico Currie, Michael Vahue, Todd Hodges, Donavon General, Dylan Kinton, Joseph Diniz, Ethan Gardner, Eric Upchurch, Jared Crumpler, Travis Jones, Alan Swan, Landon Ellington, Zack Avrette, Carlos Salas, Quincy Wells-Johnson, Alvin McLean, Frank Vetere, Wesely Smith, Johnathon Hill, Caleb Baker, Max Ramirez, Abiye Fubara, Jordan Keith, Tim McClain, Darius Forte, and Brandon McLean.

Head Coach Marc Morris and his great team of assistant coaches, including Wayne Stewart, Bill Wyrick, Travis Gaster, Clayton Williams, Joseph Capps, Kenny Jones, Scott Riley, Rodney Ellis, worked tirelessly behind the scenes all season and are backbone of the team's success.

December 17, 2009

EXTENSIONS OF REMARKS, Vol. 155, Pt. 24

32657

I am proud to have the honor of representing this outstanding high school and I ask my colleagues to join me today in honoring these fine young athletes.

SENATE—Friday, December 18, 2009*(Legislative day of Thursday, December 17, 2009)*

The Senate met at 12:03 a.m., on the expiration of the recess, and was called to order by the Honorable AL FRANKEN, a Senator from the State of Minnesota.

PRAYER

The PRESIDING OFFICER. Our guest Chaplain, Senator John Barrasso, of Wyoming, will lead the Senate in prayer.

The guest Chaplain offered the following prayer:

Please join me in prayer.

Almighty God, we praise You for the constancy and consistency of Your faithfulness in blessing and guiding the Senate of the United States through the years of our Nation's history. We turn to You again today and know that You will be faithful to give the women and men of this Senate exactly what is needed in each hour, each challenge, each decision. Give us light when our vision is dim, courage when we need to be bold, decisiveness when it would be easy to equivocate, and hope when others are tempted to be discouraged. So we commit ourselves to be Your faithful servants, examples of patriotism to our people, and crusaders for Your best for our Nation.

In Your Holy Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable AL FRANKEN led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, December 18, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable AL FRANKEN, a Senator from the State of Minnesota, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. FRANKEN thereupon assumed the chair as Acting President pro tempore.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2010—Resumed

Pending:

Reid motion to concur in the amendment of the House to the amendment of the Senate to the bill.

Reid motion to concur in the amendment of the House to the amendment of the Senate with amendment No. 3248 (to the House amendment to the Senate amendment), to change the enactment date.

Reid motion to refer the amendment of the House to the Committee on Appropriations, with instructions, Reid amendment No. 3249, to provide for a study.

Reid amendment No. 3252 (to Reid amendment No. 3248), to change the enactment date.

Reid amendment No. 3250 (to amendment No. 3249), of a perfecting nature.

Reid amendment No. 3251 (to amendment No. 3250), of a perfecting nature.

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

Mr. REID. Mr. President, I ask unanimous consent that the time until 1 a.m. be equally divided and controlled between the leaders or their designees, that Senators be permitted to speak for up to 10 minutes each, that the mandatory quorum be waived, and that the majority leader be recognized for the last 10 minutes and the 10 minutes prior to that the Republican leader be recognized, if he chooses to speak.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Illinois.

Mr. DURBIN. Mr. President, those who are following the business of the Senate may be surprised to find us in session a little after midnight. This is a decision made by the Senate just a few hours ago, to postpone the continuation of our session into a new day. The purpose is parliamentary, so that a motion which we have filed can be voted on. It is an important motion. It is a cloture motion. We often have them. It is a motion that closes debate on the floor and moves us forward to the consideration of a measure.

There are very few measures the Senate would consider any more important than the one on which we are about to vote. In about an hour or less, we will be voting on the Defense appropriations bill.

This is a bill which is critically important to our Nation's defense and security, as Secretary Gates reminded us today in a letter to the Senate. It is also a bill that is important to the men and women in uniform, those who are

in harm's way overseas literally risking their lives while we meet in the safety of this Senate Chamber.

The bill contains a 3.4-percent pay raise for our military, richly deserved, for the men and women who serve us. It also will be a pay raise appreciated by their families, many of whom wait patiently for the return of their loved one. There is money in this, as well, for military families, to make sure that not only the servicemembers but their spouses and children have health care. It is a very basic requirement of life and one we want to provide for all of our men and women in uniform and their families.

There is certainly an allotment and allocation here for equipment, which our men and women in uniform will need to perform their missions and come home safely. Readiness and training—it covers a wide range of important expenditures for our national security.

There is no more important bill when it comes to the safety of our troops and for our endorsement and support of what they are giving for our country.

In addition to that, there are provisions added by the House which are critically important at this moment in our history. We extend for several months the unemployment benefits for the millions of Americans who have lost their jobs during this recession. Although we see things getting a little better in the economy, there are still a lot of people suffering because of unemployment. They have not only lost their jobs, many have expended their savings. They have lost their health insurance. They may lose their homes. They are struggling. This bill extends for a short period of time those unemployment benefits and some help to pay for health insurance.

It is also a bill that provides for food stamps. I wish this Nation did not need food stamps, but we need them desperately. One out of six people in the State of Michigan is on food stamps because of the state of their economy, and many States with high unemployment rates are near that. The food stamps provide literally the basics and necessities of life for these families.

You would think, as I describe this bill, that it would pass in the Senate by the same overwhelming margin it just passed in the House 2 days ago. In the House, the vote was, if I recall correctly, in the range of 393 to 35 or something close to that. It was an overwhelming bipartisan vote. Mr. President, 164 Republican Congressmen

voted for it, and it is understandable why. It was a vote of confidence in our men and women in uniform. It was a vote of support for them. And it was a vote of compassion and caring for all the people suffering in this great recession.

Yet we may find—I hope it is not true—we may find that in just a few moments this will become a strictly partisan vote. I hope that does not happen. It should not. It was not a partisan issue in the House of Representatives. But many have said on the other side of the aisle that they will not vote to support our troops with this appropriation, nor provide money for the unemployed. I do not question their patriotism or their commitment to our men and women in uniform. They are doing it because of a political or procedural approach they want to use to try to stop or slow down health care reform. I think they picked the wrong bill for it. I think we have had a healthy debate, a vigorous debate, and we are likely to have that debate continue for the next several days. But why are we putting the men and women in uniform in the middle of this debate? They did not ask for that. They asked to serve our country, to be respected for that service, and to have some help so they come home safely. That is what this bill does.

I hope at 1 a.m., in just a few minutes from now, those on the other side of the aisle will reconsider their opposition to the Department of Defense appropriations bill. If there was ever a time when we should stand together in solidarity for those who defend our country, it is now. And I hope many on the Republican side of the aisle will join us in that effort, in a bipartisan effort, in a show of support for these men and women in uniform.

There is plenty of time for debate, but there is also a time for debate to end. There comes a moment, after we have tried our best and engaged in debate and amendments, when a vote should be taken and the Senate should decide.

We are dragging this series of votes out on health care reform I think to a degree which is unnecessary. At some point, and some point soon, we should take the vote and see if there are literally 60 votes in the Senate for health care reform. Having done our best on our side of the aisle to argue the case, those on the other side have argued against it, and now the people of America should have the last word through their elected Senators.

I urge my colleagues on the other side of the aisle, who tried yesterday to stop the proceedings or at least slow them down by requiring the reading of an amendment and are trying now through the attempt to postpone this vote on the Department of Defense appropriations bill, to accept the verdict of the Senate. There should reach a

point when we should do that. And we should do it in a timely fashion. Denying Members of the Senate on both sides of the aisle an opportunity to be home with their families—not to mention our poor staff, people around here who work night and day to support our efforts—denying them a chance to be home with their families in one last, perhaps, vain effort to stop a vote on health care reform really does not speak as well of this institution as it should.

I hope those on the other side of the aisle will have reached a conclusion, after 2 days in trying to stop this process, that it is better for us to have a record vote. If they believe this bill is so bad, they have a chance to vote against it. Those of us who support it will be on record for it. Then let the American people decide. Let them decide in the next election or let them decide in response to us.

But I hope that come 1 o'clock this morning, when we vote on the Department of Defense appropriations bill, we will have a solid bipartisan vote in support of our men and women in uniform. They deserve no less.

I yield the floor.

The ACTING PRESIDENT pro tempore. Who yields time?

The Senator from Texas.

Mrs. HUTCHISON. Mr. President, I know we are going to eventually vote on the DOD—the Department of Defense—appropriations bill. And it may pass tonight and cloture may be invoked. If it is not, it will be in 30 hours. So I think the bill that is before us is not what is driving, actually, the timing of the vote, at 12:15 in the morning on Friday morning. I think what is driving it is health care, and I believe all of us are going to support—or most of us are going to support—the Department of Defense appropriations bill when the time is right.

But I think it is very important that we have the opportunity to talk about the health care bill that is the underlying bill that will be the next piece of legislation that is considered. I hope people are looking at the underlying bill we have before us, because it is so important for the quality of every family, every person in this country, that we have a health care system that is affordable, available, and is the quality health care we have known in our country for all of these years.

I think what concerns so many of us is that we are concerned that if we have health care reform, instead of providing more access to more people to have the quality health care we all want every American to have, we are going to lose the choices and the patient-doctor relationships if we have a health care takeover that increases costs. The underlying bill is actually going to start taxing every drug people take, every piece of medical equipment they buy, and insurance companies are

going to have to raise their prices to accommodate the taxes that are in the bill.

The bill starts the taxes 2 weeks from today. Two weeks from today, the taxes on this health care bill start. The health care bill itself doesn't start for 4 years. So I think the people of America are saying: What am I hearing? What am I hearing? That taxes start next year, but there is no health program that will give me some kind of new option for 4 years.

It doesn't seem like the way we have had policy made in our country before, where you would be taxed for 4 years before there would ever be a program that you could sign up for. So I think that is what we are going to be dealing with in the next few days.

I think the people of America are very concerned about the bill and the explanations of the bill that we hear. It could be that this bill has changed. We don't know because we haven't seen a new bill come forward, but we have heard that a new bill is being written. So we don't know for sure what it says. But the bill that was introduced and that we have been debating for 3 weeks now has tax increases of about $\frac{1}{2}$ trillion over a 10-year period, tax increases, mandates, employer business expenses, individual mandates for every person to have to have health care coverage or pay a fine. It could be \$750 per person, the fine; it could go up from there. Every employer is going to have to offer a specified type of health care coverage or they are going to have a mandate that will require fines as well.

I think the American people have been watching this debate and are trying to listen to what is in this bill, and what I am getting in my office is more questions. I have had teletown meetings and people are calling in with questions. They are legitimate questions. When they hear that there are so many taxes and mandates and then the government is going to start saying what would be covered in any kind of plan, people are becoming very concerned.

I think that what happened a few weeks ago—the task force that came out and changed the guidelines for mammograms in this country for women—we have all been told for so many years that early detection is what has saved lives. In fact, that is true; we know early detection has saved lives. So women have been encouraged to get mammograms starting at the age of 40 and, at the age of 40, they start having mammograms on an annual basis. But a few weeks ago a task force, a task force that is a part of the bill that would have the government single-payer system, that task force began to change the guidelines. The guidelines were then that you don't need to have a mammogram under the age of 50. So you don't need

mammograms at the age of 40, you start at 50, and then it is every other year. Well, that concerned women all over our country. This task force that made this recommendation is the same task force that is going to be making the recommendations about what kind of health care coverage there will be in the underlying bill that is before us. So it begins to look as though there is going to be a government task force saying what will be covered in a government plan and that it is no longer women who are 40 and above, it is now women who are 50 and above. So those women between 40 and 50 are not going to have that same kind of access.

I think it is a concern that people are saying: Well, if it is going to happen on mammograms, what else is it going to happen on? What else is going to be taken away from me by a government task force instead of my doctor and me making that decision?

There are many questions about what is in this bill, many questions about what this means to my doctor-patient relationship. I think people around the country wish for us to say: Let's stop here. Let's do this in a way that people know how it is going to affect them, how it is going to affect their families. People want to know more about this bill before, all of a sudden, just before Christmas, we have a health care reform bill and it has taxes, it has more mandates on business in a very tough economic climate, and it has taxes that start actually next year, and it has $\$ \frac{1}{2}$ trillion worth of cuts in Medicare over a 10-year period— $\$ \frac{1}{2}$ trillion in cuts in Medicare. That is \$500 billion in Medicare cuts.

People from Texas were asking me: What does that mean? It means you are going to have severe cuts in Medicare Advantage, and there are hundreds of thousands of Texans who have Medicare Advantage and like Medicare Advantage. But that is going to be severely curtailed in this bill.

The payments to hospitals, the underpayments to hospitals for Medicare patients, has always been brought back up so that hospitals could break even, but that is not the case in this bill because those payments are going to be cut. So the underpayment to hospitals is going to be a part of this bill.

That is going to hurt our rural hospitals. We are very concerned about the rural hospitals that are already having a hard time. Their costs are higher and they have a harder time making ends meet, so we are worried about the quality of care people are going to get, particularly in our rural areas with these cuts to Medicare. There will be cuts to home health care. There will be cuts to hospice, nursing homes, long-term care. These are the cuts in Medicare that are not going to shore up Medicare; they are going to a new program at the expense of Medicare coverage, Medicare treatment for Medicare patients.

So here we are. It is 12:25. We are going to be voting in about 30 minutes, at 1 o'clock in the morning. It seems as though it is time for us to say that the American people are very concerned about this bill, and wouldn't it be better to start all over and have a bipartisan effort where Republicans and Democrats can sit down together and lay out the principles we want in health care reform: principles such as lower costs; principles such as making sure more people have access to coverage with bigger pools to lower the cost of premiums.

I think my time is up, and I will certainly yield the floor to those who are wishing to speak. I hope we can start over. It is more important to do this right than to do it fast.

Thank you, Mr. President. I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Michigan is recognized.

MR. LEVIN. Mr. President, many who are filibustering this Defense appropriations bill tonight are filibustering because they want to delay health care. They want to delay the health care reform legislation from being voted on so the bill that provides the funding to support our men and women in uniform who are serving on the front lines, often under arduous and dangerous circumstances to protect our Nation, is being filibustered to keep the Senate from acting on another unrelated piece of legislation. This is not only unbelievable, it is unconscionable.

A 3.4-percent pay raise for the troops is being filibustered. Additional funding for needed medical research in traumatic brain injuries and posttraumatic stress syndrome, and to improve the care, the medical care for our wounded warriors is being filibustered tonight. Funding to provide over 6,000 MRAP vehicles—those are the Mine Resistant Ambush Protected vehicles that are so desperately needed by our troops in Afghanistan—is being filibustered tonight.

There is \$1.8 billion for what is called the joint IED organization, which has one purpose, one mission, and that is to develop and deploy technologies to protect our troops from the deadly Improvised Explosive Devices that have maimed and killed so many, is being filibustered here tonight.

There is \$470 million for family advocacy programs and full funding for family support and yellow ribbon programs to provide support to military families, including quality childcare, job training for spouses, expanded counseling and outreach to families experiencing the separation and the strain and the stress of war is being filibustered here tonight.

What in the world kind of message does a filibuster such as this send to our troops? Our troops deserve the full support—and they should know they

have the full support—of the Congress when they are in the field carrying out the democratically arrived at policies and decisions of our government.

Instead, what they are getting tonight is a Republican filibuster. Those who are filibustering this Defense bill because they think they are aiming at health care reform are tragically off target. They are hitting our troops and their families. How in the name of heaven should the well-being of our troops be sacrificed for 1 hour when they are sacrificing so much for us day after day?

There are those who are going to argue that the end they seek—the delay of the health care reform bill—justifies the means they are using: holding hostage the critical funding to support our troops and their families. I couldn't disagree more. The lesson our troops are going to take from the filibusters tonight is that those who are filibustering this bill think a short-term political objective is more important than a prompt vote of support and confidence for our military members and their families.

Just yesterday, the ranking member, the ranking Republican member of the Appropriations Committee, said the following about this appropriations bill:

This Defense appropriations bill ought to be passed and it ought to be passed as soon as possible in recognition of our respect for servicemembers and their families.

Our respect for our troops and the sacrifice they and their families make for our country every day is exactly why this filibuster should be defeated tonight.

Those who are filibustering this bill because they want to delay a vote on health care legislation should end that filibuster out of respect for our troops and their families—out of respect for our troops and their families—and for the sacrifices they make for this country every day. The Senate should defeat this filibuster tonight.

The stakes are huge, Mr. President. They were set forth in a letter we received from the Secretary of Defense. This is what the Secretary of Defense is telling us:

I am writing to advise you of my serious concern over the prospect that fiscal year 2010 appropriations authority for the Department of Defense could expire by Friday, December 18, 2009.

That is today. He goes on:

Should we face this unfortunate situation, it would result in a serious disruption in the worldwide activities of the Department of Defense and limit our ability to pay our workforce, including military forces.

I am going to repeat this. This is what our Secretary of Defense is saying. He is not someone who shoots from the hip. Our Secretary of Defense is one of the most serious-minded, careful Secretaries of any agency that I have ever known. The Secretary of Defense

said the following. I will repeat it because I want everybody to know what the stakes are tonight if we don't defeat this filibuster:

Should we face this unfortunate situation, it would result in a serious disruption in the worldwide activities of the Department of Defense and limit our ability to pay our workforce, including military forces.

He concludes:

It is inconceivable to me that such a situation would be permitted to occur with U.S. forces actively deployed in combat. Accordingly, I strongly urge the Congress to do what is necessary to ensure the Department has the needed resources to fully and appropriately continue its vital national mission.

It is signed by Robert Gates. I hope everybody, before they decide whether to continue this filibuster, will read this letter from Secretary Gates and think about what the message is to our troops and their families if an unrelated issue as important as that issue is allowed to interfere with us appropriating the necessary funds for the men and women who put on the uniform of this Nation, who take that risk for us.

Let's remember that as we vote tonight and understand what the stakes are if this filibuster succeeds.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Arizona is recognized.

Mr. KYL. Mr. President, I find it rather curious that our colleague, my friend from Michigan, is accusing Republicans of filibustering this Defense appropriations bill. Republicans don't control the Senate or the House. The House just passed this bill Wednesday. Now, it could have been passed in October or September or July or perhaps it could have been passed in November.

Republicans didn't control the timing of this legislation. We have not been holding up the Defense appropriations bill. We always vote for the Defense appropriations bill. Everyone supports that. No, the majority controls the timing. The House finally got around—a week before Christmas or 10 days—to passing the bill, and they sent it here. The Senate took it up Thursday—yesterday.

Republicans are filibustering the bill? The majority leader brought it up yesterday. We are having the vote on it tonight. There is only one reason there are 60 votes required, and that is that the majority leader scheduled the vote at 1 a.m. in the morning for purposes that we all understand have to do with the health care legislation, and Republicans figured it was probably a good idea that we all be here and vote and, therefore, the majority could produce the 60 votes, which it has, there being 60 members of the majority. I suspect when we vote on this piece of legislation, virtually all of us in this body will support it. There is no question about that.

I find it odd that we are accused of filibustering. Have you heard any Re-

publicans giving speeches about this? I think of Jimmy Stewart, in that great movie talking for 24 hours straight, or whatever it was, and Senator HUTCHISON from Texas just gave about a 5-minute speech primarily talking about health care. Republicans haven't been speaking this bill to death, talking the bill to death. As I said, it was just offered yesterday.

Mr. DURBIN. Will the Senator yield for a question?

Mr. KYL. Let me complete my thought. We are voting on Friday morning, and so I think if anybody is staying up late enough to watch this, they might think it is rather odd. They haven't heard anybody talking this bill to death, filibustering.

Why haven't the Democrats been able to bring this most important bill to the Senate for a vote until a week before Christmas, when the fiscal year began October 1? Don't blame Republicans for the fact that this bill comes before us a week before Christmas and, therefore, we have to act on it at this point in time. Republicans had nothing to do with that timing. I will now yield.

Mr. DURBIN. I say to my friend from Arizona, the whip, what a great relief it is for him to say that. I will make a unanimous consent that we pass this, and we won't have to wait for the roll-call at 1 a.m., and Members can go home to their families. Will the Senator from Arizona join me in the unanimous consent request that we immediately take up, consider, and pass this important Department of Defense bill?

Mr. KYL. With all due respect, I will decline that kind invitation, given the fact that the majority leader saw fit to call us here to vote at 1 a.m. Everybody is probably on their way in, and they would appreciate the chance to do that and not be denied that opportunity.

Mr. LEVIN. If the Senator will yield for another question, I wonder if my good friend is aware of the statement of the ranking Republican on the Appropriations Committee, when he said that—the Senator from Arizona says we have not been talking, referring to Republicans, about the Defense appropriations bill at all. Is he aware of the statement of the ranking Republican on the Appropriations Committee, who said yesterday that this bill “ought to be passed as soon as possible, in recognition of our respect for the service-members and their families?”

I wonder if the Senator is aware of that statement, and “as soon as possible” is tonight, not tomorrow or the next day.

Mr. KYL. I am aware of it because the Senator from Michigan read it a moment ago. I talked to the Senator from Mississippi earlier today. There is nobody more committed to the troops than the Senator from Mississippi, who is concerned that we get this done. I talked to Secretary Gates about it

today. There is no question the Defense Department needs to be funded, and there is a point in time in which the funding runs out, and it needs to be funded. That is not the Republicans' fault. The majority leader could have brought this up. And the House is controlled by Democrats. Republicans didn't delay this bill until a week before Christmas. If there is a concern about tonight, all you have to do is pass a continuing resolution for 24 hours or 48 hours. There is no question that the troops will be funded or the Defense Department will be funded. Nobody believes that is an issue.

The point is, don't blame Republicans for being here at almost 1 a.m. in the morning a week before Christmas. We don't control the timing of the legislation. We are not the reason the bill isn't ready until right now or it wasn't brought up until now. We certainly haven't been talking it to death.

The ACTING PRESIDENT pro tempore. The remainder of the Republicans' time is reserved for the minority leader.

Mr. KYL. I thank the Chair.

The ACTING PRESIDENT pro tempore. The Senator from Wyoming is recognized.

Mr. BARRASSO. Mr. President, I want to speak about the troops because I spent Thanksgiving with the troops, the troops from Wyoming, our National Guard—

Mr. REID. Mr. President, parliamentary inquiry.

The ACTING PRESIDENT pro tempore. There is a parliamentary inquiry from the leader.

Mr. REID. Under whose time is the Senator from Wyoming speaking?

The ACTING PRESIDENT pro tempore. The time for the Republican leader to close the argument is all the time remaining for the Republican side.

Mr. MCCONNELL. Mr. President, I yield 6 minutes to the Senator from Wyoming.

The ACTING PRESIDENT pro tempore. The Senator from Wyoming is recognized.

Mr. BARRASSO. Mr. President, listening to the debate and discussion tonight, I spent Thanksgiving with the troops from Wyoming who are serving our Nation overseas in Kuwait and in Iraq. These 700 men and women, driving in and out of Iraq on dangerous missions, have driven over 1 million miles. I went to three different bases in Kuwait to spend Thanksgiving with the troops, to pray with them, and tell them how the people of Wyoming are supportive of their efforts, tell them all of us at home are trying to do all we can to make sure their families know how much we care and that we want to do anything we can in our communities to help the families.

I held three townhall meetings on Thanksgiving day at different military bases in Kuwait. In those meetings, listening to the troops, they said they

had what they needed in terms of the military supplies. But they said their biggest concern was jobs; what was going to happen to them when they got home. Would there be jobs in the energy field? Would they still be available? Do the people in Washington and in the Senate realize we have 10 percent unemployment in this country? They want to go back to their jobs. Do those people realize they are debating health care and that we have an economic crisis that the Senate ought to be focused on now? Do they realize all the discussions on health care are going to drive up the cost of care and cut Medicare and increase premiums for people and raise taxes? Do we care what is going to happen to our families? And we want to know about jobs.

They know, as many of them are small business people, that the National Federation of Independent Business estimates that if we pass this health care bill, it will cost our Nation 1.6 million jobs by 2013. That is what the men and women in the field, on Thanksgiving Day, from Wyoming, who are part of our communities, our brothers, sisters, and the firefighters, policemen in our communities and the teachers in our schools—that is their concern. That was the No. 1 concern in the military that I heard about in three different townhall meetings that day.

They want us to focus on the economy. They said: I want to make sure a job is there when I get back. I want to make sure health care is not going to be made worse by what will happen in this Senate between now and the end of the year. And don't cut Medicare for my parents or raise my taxes, and don't make things worse for me.

I heard from the men and women in the field that they have the same concerns the other American people have, which is the rating on the health care bill which is at an all-time low. Only 32 percent, one in three Americans support what the Senate is trying to jam through before the holidays with the health care bill. They have great concerns because they believe their own costs are going to go up and quality will go down and the cost of care for the Nation will increase if we proceed with the health care bill.

The other question they asked, of course, is, What is in the bill? Have you seen the bill? Have you read the bill? I had with me at these townhall meetings the first 400 pages of the bill so they could look at that, and we went through some of it. As I was working my way through—and this was at the Thanksgiving recess—they were astonished. Even as of today, when I had a townhall meeting by phone two nights ago, the people of Wyoming said: Do you know what is in the bill right now? I had to say no.

Mr. WICKER. Will the Senator yield?

Mr. BARRASSO. Yes.

Mr. WICKER. Isn't the Senator from Wyoming saying that the troops he

spoke to, and the troops we are going to fund in the next day or so with this legislation, want a strong country to come back to, and they would be happy if we were standing firm today, this weekend, to prevent the ever-increasing deficits, to prevent this country from being burdened with larger and larger debt, to protect the programs that they will come back to, and to make sure Medicare is not cut even further?

Isn't the Senator saying these troops expect us to be standing for the financial strength of this country so they can have the same America to come back to that they volunteered to fight for?

Mr. BARRASSO. Mr. President, that is exactly what I am saying. My colleague from Mississippi is so right. That is what the men and women from Wyoming who are serving right now in Iraq and Kuwait want. They want to come home to the same country they left, the place where they have jobs, where they have opportunities for their children, where they are focused on growth, economic development, opportunities for the children, for the next generation.

They are very concerned about the debt. They are very concerned about the amount of spending going on by this Congress. They are very concerned. As one said, the debt is the threat. It is astonishing to be with our men and women in the field, with their guns and with their ammunition, and what they want to talk about is the national debt in the United States right now as a result of the extensive amounts of spending that are going on in this country. They are saying do not make things worse. What is going to happen to our kids? Senator, aren't we still borrowing more and more money from China? Why are we doing that? How much money do we owe to the Chinese people? That is what I heard from Kuwait on Thanksgiving.

Mr. WHITEHOUSE. Will the Senator yield for a question?

Mr. BARRASSO. Mr. President, how much time do I have remaining?

The ACTING PRESIDENT pro tempore. The Senator has used the time yielded to him.

Mr. BARRASSO. I thank the Chair.

Mr. McCONNELL. Mr. President, how much time remains on this side?

The ACTING PRESIDENT pro tempore. There is 3 minutes 8 seconds remaining.

Mr. McCONNELL. Mr. President, regretfully, due to the schedule that the majority has set, we are going to be unable to finish the Defense bill before the current funding authority expires midnight on Friday. As we all know, the President will be out of the country. The House of Representatives, anticipating this problem, sent over a continuing resolution that would take care of the operations of this remain-

ing portion of government unfunded through December 31.

With the President out of the country, of course, this would have to be flown over to him to be signed. With the country at war and troops in the field, it would be the height of irresponsibility to let funding for the Defense Department lapse. That is why, of course, the House of Representatives sent us this continuing resolution.

I have indicated to the majority that I would propound a consent agreement that we take up and pass this continuing resolution, and I will do that at this time.

I ask unanimous consent that the Senate proceed to the immediate consideration of H.J. Res. 64, that the motion to proceed be agreed to, the joint resolution be read a third time and passed, and the motion to reconsider be laid upon the table.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. REID. Reserving the right to object, I hope the American people have the opportunity to see this, even though it is in the middle of the night. On the west coast it is 3 hours earlier, so there will be a lot of people watching.

They are doing everything they can to stall, divert, and distract. And now they are using the troops. It is difficult to comprehend the illogic of my friends, the Republicans. We have a simple issue here.

There was a unanimous consent request by my friend, the assistant leader, a few minutes ago that said if you support the troops, let's pass this bill, and that was objected to. So I object to the unanimous consent request of my friend. I will say this: Don't worry about the President being gone. The President will be back tonight. OK?

Mr. McCONNELL. Mr. President, I believe I have some time.

The PRESIDING OFFICER. Yes, 42 seconds.

Mr. McCONNELL. Mr. President, the reason we are in this snarl is because my good friend, the majority leader, has this issue all tangled up with the debt ceiling extension and a health care bill that there is this rush to pass before Christmas, a 2,100-page bill and no one has seen the final version yet. All of these things are all tangled up together.

Our advice would be to quit trying to pass this health care bill before Christmas that has an artificial deadline to pass something that most of us have not seen. Let's do the necessary business of the government and do what Senator SNOWE has recommended continuously, which is that we pass the bill on a bipartisan basis with a broad coalition of support.

I believe my time may have expired.

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

The majority leader.

Mr. REID. I yield 3 minutes to my friend from Illinois.

Mr. DURBIN. Mr. President, it is difficult to reconcile the statements made by the Republican whip and the Republican leader. The Republican whip says we are not stopping the Defense bill. The Republican leader says because of actions that have been taken here, this bill cannot pass.

I made a unanimous consent request to end this debate immediately and pass this appropriations bill and fund our troops, which I think both Republican leaders have said they want to do. But, unfortunately, the Republican whip objected to it.

We know why we are here. We are here because, as Senator LEVIN of Michigan, the chairman of the Armed Services Committee, said, there is a Republican filibuster against the funding bill for our troops. There will be an opportunity in a few moments for Members on both sides of the aisle to vote, and I hope all of the Senators of both parties will vote—a vote of confidence in support for our men and women in uniform by voting for this cloture motion, and then I will renew my unanimous consent request that we pass that bill immediately.

So there will be no questions, we will have had a rollcall vote, the Senate expressed its sentiment, and we move forward. I do not think there is any reason for us to delay this another minute. The fact we are here early in the morning may be part of a strategy I hope the Republicans have abandoned.

It is time to stand behind our troops and not abandon them during the course of war.

The ACTING PRESIDENT pro tempore. The majority leader.

Mr. REID. Mr. President, “We should not cause uncertainty or hardship for our Armed Forces.” The senior Senator from Mississippi, a Republican, said that.

“Playing politics with the critical funding that our troops need now is political theater of the worst kind.” The junior Senator from Texas, a Republican, said that.

“Our obligation to those troops must transcend politics.” The junior Senator from Arizona, the Republican whip, said that.

“Every day we don’t fund our troops is a day their ability to fight this war is weakened.” The senior Senator from Kentucky, the Republican leader, said that.

And yet not a single one of these Republican Senators, not a single one of the 40 Republicans in this body, has committed to renewing our commitment to our troops before the funding expires later today.

We are voting at this rare late hour, but not even the darkness outside can conceal the game being played inside this Senate Chamber. We are here in

the middle of the night, but the reason is as clear as day. Senate Republicans so desperately want to turn their backs on Americans who are suffering and dying for want of decent health care—45,000 a year, 750,000 bankruptcies, 14,000 losing their insurance every day—that they are turning their backs on America’s troops at wartime.

Rarely has the Senate seen such a sad statement. Rarely have I seen such brazen irresponsibility, and rarely have our Nation’s citizens received such little regard from their leaders.

Our sons and daughters are fighting tonight and every night in the deserts of Iraq and in the bitter cold mountains and valleys in Afghanistan on our behalf. The least we can do is make sure they have the training and equipment they need to succeed—the least we can do.

Our Nation’s bravest spend month after month half a world away from their families and children. The least we can do is make sure those military families and children who have already sacrificed so much can get the health care they need.

Our Nation’s most selfless men and women volunteer for duty. We have an all-volunteer Army. Every single one stepped forward to serve. They volunteered. The least we can do is to give them the well-deserved pay raise they need.

I received a letter, as has been announced here a few hours ago. The letter that Senator DURBIN and the senior Senator from Michigan talked about is a letter addressed to me. He let me know he has no patience for the partisan games being played and no time for the precious hours that are being wasted. He expressed, in his words, serious concern that this Senate might cause “a serious disruption in our military efforts around the world.” But Secretary Gates added this:

It is inconceivable to me that such a situation would be permitted to occur with United States forces actively deployed in combat.

I agree. I couldn’t agree more. I am going to vote for this bill in support of every single one of those servicemembers, including the hundreds of Nevadans who at this very moment fight for our Nation in other nations around the world.

I will vote yes because I support the 432 men and women from the 221st Armored Cavalry from Las Vegas and the 102 men and women from the 152nd Air Guard in Reno, both of which serve in Afghanistan. There are other Nevadans serving around the world.

Those on the other side of the aisle have stubbornly said they will not. The Senate Republican leadership has shamelessly turned the funding of our military into a purely partisan exercise. They can make all the excuses they want. We are here at 1 o’clock in the morning because of the Repub-

licans. We could have voted for this bill 2 days ago. I even had some Republican Senators tell me, regretfully and regrettably—they have admitted this to me personally, they have told me plainly that while they want to support our troops, they fear retribution from their own leaders. Retribution from their own leaders.

We know Senators on this side of the aisle have made commitments to vote for this. That is not exactly what John Kennedy, who was not only President of the United States but a war hero who served in this very body, would call a profile in courage.

I am confident not a single one of our troops could care less whether the leaders who give them what they need to succeed are progressives or conservatives. I am certain these men and women on deployment after deployment spend more time counting the days until they see their loved ones again than they do counting the political points scored on either side.

My vote in support of these soldiers, sailors, marines, and airmen has nothing to do with the party with which I am affiliated and everything to do with the country for which I took an oath to support and defend.

Although it is shortly after midnight here in Washington, DC, our Nation’s Capital, it is late morning on the battlefields of Iraq and Afghanistan. When the Sun rises over this city, this great city of Washington, a few hours from now, you will be able to see out those windows on the west side of this Capitol and see past the great monuments of Washington and Lincoln, and you will be able to see the Potomac River and see the skyline break for the great lawn of Arlington. Within that consecrated ground, in neat rows that rise and fall with the rolling hills, lie the remains of men and women, boys and girls who fought and fell for our flag.

Their headstones are simple, and from a distance they are identical. No matter how closely you look at the words and symbols etched in those solemn marble gravestones, you will never be able to discern whether that warrior beneath was a Democrat, an Independent, or a Republican. We cannot tell for whom he voted in the last election of his life or what she thought of this policy or that policy. That is not by accident. That is not an oversight.

While the demarcations of left and right, of red and blue seem so important to the daily lives as air and water to some of us, those stones are eternal reminders of such triviality. Dedication to this Nation above all else—“All For Our Country,” which is Nevada’s motto, should guide us now. On this hill, on this side of the river, in this early morning hour, we can stand a little more of selflessness we too often keep at a distance on the sacred ground we call Arlington.

I ask unanimous consent that the vote begin.

CLOTURE MOTION

The ACTING PRESIDENT pro tempore. Under the previous order, pursuant to rule XXII, the Chair lays before the Senate the pending cloture motion, which the clerk will state.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to concur in the House amendment to the Senate amendment to H.R. 3326, the Department of Defense Appropriations Act for Fiscal Year 2010.

Daniel K. Inouye, Harry Reid, Max Baucus, Patrick J. Leahy, Sheldon Whitehouse, Carl Levin, Patty Murray, Mark Begich, Maria Cantwell, Mark L. Pryor, Jack Reed, Edward E. Kaufman, Al Franken, Tom Harkin, Jim Webb, Paul G. Kirk, Jr., Michael F. Bennet.

The ACTING PRESIDENT pro tempore. By unanimous consent, the mandatory quorum call has been waived.

The question is, Is it the sense of the Senate that debate on the motion to concur in the amendment of the House to the amendment of the Senate to H.R. 3326, shall be brought to a close?

The yeas and nays are mandatory under the rule.

The clerk will call the roll.

Mr. KYL. The following Senators are necessarily absent: the Senator from Georgia (Mr. CHAMBLISS), the Senator from Missouri (Mr. BOND), the Senator from Kentucky (Mr. BUNNING), and the Senator from Texas (Mr. CORNYN).

Further, if present and voting, the Senator from Kentucky (Mr. BUNNING) would have voted "nay," and the Senator from Texas (Mr. CORNYN) would have voted "nay."

The ACTING PRESIDENT pro tempore. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 63, nays 33, as follows:

[Rollcall Vote No. 381 Leg.]

YEAS—63

Akaka	Franken	Mikulski
Baucus	Gillibrand	Murray
Bayh	Hagan	Nelson (NE)
Begich	Harkin	Nelson (FL)
Bennet	Hutchison	Pryor
Bingaman	Inouye	Reed
Boxer	Johnson	Reid
Brown	Kaufman	Rockefeller
Burr	Kerry	Sanders
Byrd	Kirk	Schumer
Cantwell	Klobuchar	Shaheen
Cardin	Kohl	Snowe
Carper	Landrieu	Specter
Casey	Lautenberg	Stabenow
Collins	Leahy	Tester
Conrad	Levin	Udall (CO)
Dodd	Lieberman	Udall (NM)
Dorgan	Lincoln	Warner
Durbin	McCaskill	Webb
Feingold	Menendez	Whitehouse
Feinstein	Merkley	Wyden

NAYS—33

Alexander	Bennett	Burr
Barrasso	Brownback	Coburn

Cochran	Hatch	Murkowski
Corker	Inhofe	Risch
Crapo	Isakson	Roberts
DeMint	Johanns	Sessions
Ensign	Kyl	Shelby
Enzi	LeMieux	Thune
Graham	Lugar	Vitter
Grassley	McCain	Voinovich
Gregg	McConnell	Wicker

NOT VOTING—4

Bond	Chambliss
Bunning	Cornyn

The ACTING PRESIDENT pro tempore. On this vote, the yeas are 63, the nays are 33. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

The motion to refer falls.

The Senator from Illinois is recognized.

Mr. DURBIN. Mr. President, in light of the vote and the fact that cloture has been invoked on the motion to concur, I ask unanimous consent that the motion to concur in the House amendment to the Senate amendment with an amendment be withdrawn, all postcloture time be yielded back, and the motion to concur in the House amendment to the Senate amendment to H.R. 3326 be agreed to, and the motion to reconsider be laid upon the table.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. McCONNELL. I object.

The ACTING PRESIDENT pro tempore. Objection is heard. The majority leader is recognized.

Mr. REID. For the information of all Senators, unless we can work something out with the minority, the next vote will occur very early on Saturday morning, around 7:30 or so that morning. There could be several votes. We will work with the minority to find out, in fact, if they want these other votes. I hope we can make that determination tomorrow. We have some people for whom that would be very convenient, if they knew it would be a simple majority vote or whether we need 60 votes on some of the issues that might be raised. We have one Member, of course, who has to walk very early, a long ways, and others who will be terribly inconvenienced.

But unless we hear from our friends on the other side of the aisle, the vote will occur at 7:30 or so Saturday morning. That is tomorrow.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURBIN. I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MORNING BUSINESS

Mr. DURBIN. I ask unanimous consent that the Senate proceed to a pe-

riod of morning business, with Senators permitted to speak for up to 10 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MEASURE READ THE FIRST TIME

Mr. DURBIN. Mr. President, I understand H.R. 4314 has been received from the House and is at the desk.

The ACTING PRESIDENT pro tempore. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 4314) to permit continued financing of Government operations.

Mr. DURBIN. I ask for its second reading and object to my own request.

The ACTING PRESIDENT pro tempore. Objection is heard.

Mr. DURBIN. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURBIN. I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDERS FOR FRIDAY, DECEMBER 18, 2009

Mr. DURBIN. Mr. President, I ask unanimous consent that when the Senate completes its business, it adjourn until 11 a.m., Friday, December 18; that the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of the House message with respect to H.R. 3326, the Department of Defense appropriations bill, postcloture, with Senators permitted to speak therein for up to 10 minutes each; that following any leader remarks, the time until 12 o'clock be equally divided between the two leaders or their designees, and with the time from 12 o'clock until 4 p.m. equally divided and controlled in 30-minute alternating blocks of time, with the Republicans controlling the first block and the majority controlling the next block.

Further, I ask that the time until 4 p.m. count postcloture.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. DURBIN. Mr. President, this morning cloture was invoked on the House message with respect to the Defense appropriations bill. If all postcloture time is used, the Senate

will proceed to vote on the motion to concur at approximately 7:30 a.m. Saturday.

ADJOURNMENT UNTIL 11 A.M.
TODAY

ask unanimous consent that it adjourn under the previous order.

Mr. DURBIN. If there is no further business to come before the Senate, I

There being no objection, the Senate, at 1:47 a.m., adjourned until Friday, December 18, 2009, at 11 a.m.

SENATE—Friday, December 18, 2009

The Senate met at 11 a.m. and was called to order by the Honorable MARK R. WARNER, a Senator from the Commonwealth of Virginia.

RESERVATION OF LEADER TIME

The PRESIDING OFFICER. Under the previous order, the leadership time is reserved.

**DEPARTMENT OF DEFENSE
APPROPRIATIONS ACT, 2010**

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of the House message with respect to H.R. 3326, which the clerk will report.

The assistant legislative clerk read as follows:

House message to accompany H.R. 3326, a bill making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes.

Pending:

Reid motion to concur in the amendment of the House to the amendment of the Senate to the bill.

Reid motion to concur in the amendment of the House to the amendment of the Senate with amendment No. 3248 (to the House amendment to the Senate amendment), to change the enactment date.

Reid amendment No. 3252 (to Reid amendment No. 3248), to change the enactment date.

The PRESIDING OFFICER. Under the previous order, the time until 12 noon shall be equally divided and controlled between the two leaders or their designees, with Senators permitted to speak for up to 10 minutes each.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDING OFFICER. The Senator from Illinois is recognized.

SCHEDULE

Mr. DURBIN. Mr. President, following leader remarks, the Senate will resume the House message with respect to H.R. 3326, the Department of Defense Appropriations Act. The time until 12 o'clock, as the Chair has mentioned, will be equally divided and controlled between the two leaders or their designees, and I have been designated by the majority leader. The time from 12 until 4 p.m. will be equally divided and controlled in 30-minute alternating blocks of time, with the Republicans controlling the first block and the majority controlling the next block.

If we are required to use all 30 hours of postcloture debate time, the vote on the motion to concur with respect to the Defense bill will occur around 7:30 a.m. tomorrow morning. Senators are

encouraged to plan accordingly in light of an anticipated winter storm expected to hit the Washington, DC area and Virginia tonight and tomorrow morning.

MEASURE PLACED ON THE CALENDAR—H.R. 4314

Mr. President, I understand that H.R. 4314 is at the desk and due for a second reading.

The PRESIDING OFFICER. The clerk will read the title of the bill for the second time.

The assistant legislative clerk read as follows:

A bill (H.R. 4314) to permit continued financing of Government operation.

Mr. DURBIN. Mr. President, I now object to any further proceedings at this time.

The PRESIDING OFFICER. Objection is heard.

The bill will be placed on the calendar.

The Senator from Illinois.

Mr. DURBIN. Mr. President, pursuant to the unanimous consent agreement, we now have time equally divided for the next 60 minutes between the Republican side and the Democratic side.

I see the Senator from Indiana is on the Senate floor, and certainly, if he is prepared to speak and could give me an indication of the time he will use to speak, I would appreciate it.

Mr. LUGAR. Mr. President, in response to the distinguished Senator, I would like to speak for 10 minutes, perhaps 12 minutes.

Mr. DURBIN. Well, I would say, in response to my friend from Indiana, that 30 minutes of the 1 hour between now and noon but for leader time—and I see your leader has taken the floor—is given to the minority, and I will yield to the Senator from Indiana, unless the minority leader is prepared to speak at this point.

I yield to the Senator from Indiana.

Mr. LUGAR. I thank the distinguished Senator.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, as we debate the Defense appropriations bill, I want to take the opportunity to update my colleagues on the activities of the Nunn-Lugar Cooperative Threat Reduction Program that is funded in this bill. I am very pleased that the Defense appropriations bill contains \$424.1 million for the Nunn-Lugar program this year. This amount of funding will ensure the continuation of current Nunn-Lugar projects and will permit Nunn-Lugar to take on new tasks in new countries, principally in the area of biological threat reduction.

Eighteen years ago, Senator Sam Nunn and I, along with a bipartisan group of legislators, in the last hours of that 1991 session, determined that our government had to address the proliferation threats posed by the dissolution of the Soviet Union. In the waning days of the 1991 congressional year, we passed legislation establishing the Nunn-Lugar Cooperative Threat Reduction Program, which devotes American technical expertise and money for joint efforts to safeguard and destroy materials and weapons of mass destruction. Since that time, the program has amassed an impressive list of accomplishments in the former Soviet Union, and it has been expanded to address weapons of mass destruction contingencies around the globe.

I have devoted much time and effort to overseeing and accelerating the Nunn-Lugar program. Uncounted individuals of great dedication serving on the ground in the former Soviet Union and in our government have made this program work. We have shared many productive adventures in locations and circumstances that few Americans have ever experienced. From snowy runaways at former Soviet bomber bases to biological weapons labs in Georgia; from the chemical weapon destruction facility in Siberia to submarine bases on the Kola Peninsula; from former nuclear weapons test sites in Kazakhstan to the mountains of Albania, it has been my privilege to support the talented professionals of the Defense Department and other agencies in reducing threats facing our country. I continue to be impressed by their commitment to the mission and their ingenuity in finding creative solutions to seemingly impossible tasks.

Much of this work has been done outside the public eye. This is not to say that nonproliferation activities have lacked public support. Congressional votes have consistently backed funding for Nunn-Lugar and other nonproliferation projects. But few Members of Congress or American citizens fully understand the contributions that threat reduction programs have made to the United States and global security.

During my conversations with Hoo-siers and others around the country, I do my best to explain what is happening on the ground in Russia and many other locations. I put out monthly press releases describing exactly how many weapons were destroyed in the previous month. My office displays a large representation of the Nunn-Lugar scorecard and numerous photos and artifacts from my visits to weapon elimination sites. But, understandably,

threat reduction programs rarely make headlines. We are engaged in an endeavor in which notoriety is likely to come if something goes wrong—if materials or weapons of mass destruction are not contained in some instance. This makes for an exceptionally painstaking standard that must be met day in and day out.

As of this month, the Nunn-Lugar program has dismantled 7,514 nuclear warheads, destroyed 768 intercontinental ballistic missiles, eliminated 498 ICBM sites, eliminated 155 bombers, destroyed 651 submarine launched ballistic missiles, dismantled 32 nuclear submarines, and destroyed 960 metric tons of chemical weapons.

Together, the United States and Russia have eliminated more nuclear weapons than the combined arsenals of the United Kingdom, France, and China. In addition, American and Russian experts have worked together to remove nuclear material from vulnerable locations around the world and to secure it in Russia. In 2008, the last of the nuclear warhead storage facilities identified under the Bratislava Agreement received safety and security upgrades. In May 2009, the chemical weapons destruction facility at Shchuchye began its important work of destroying 2 million chemical munitions.

I would point out, Mr. President, that in the case of each one of these shells, a hole is drilled in the bottom of the shell. The nerve gas is carefully extracted, bituminized, and placed in the ground, we hope, forever.

Despite these successes, some question why we should continue our work in Russia given recent strains in the United States-Russian relationship. I believe that both the United States and Russia must accept the fact that we need each other. Kremlin rhetoric will swing from one end of the strategic spectrum to the other. Projects will be on and then off. Our frustration level sometimes will be high. But we must not lose patience or miss the possibilities of cooperative threat reduction. We should recall that the Nunn-Lugar program was created to safeguard U.S. national security interests, and those interests exist regardless of the state of our relationship with Russia. It is also vital that we understand the verification utility of the Nunn-Lugar program, which provides for American technicians on the ground in Russia, systematically destroying Russian weaponry. The cooperative links established by such activity and the confidence-building value inherent in our on-site presence are assets of incalculable value.

Beyond Russia, it is vital that we break new ground in safeguarding and destroying weapons of mass destruction. I have never considered the Nunn-Lugar Act to be merely a program, or a funding source, or a set of agreements. Rather, it is an engine of non-

proliferation cooperation and expertise that can be applied around the world. And it is a concept through which we, as leaders, are responsible for the welfare of our children and grandchildren, as we attempt to take control of the global threat.

The United States must send the clear message that we are willing to go anywhere to prevent the proliferation of weapons of mass destruction. New opportunities for partnership must be pursued creatively and relentlessly. Some may say that we cannot forge cooperative nonproliferation programs with the most troublesome nations. But the Nunn-Lugar program has demonstrated that the threat of weapons of mass destruction can lead to extraordinary outcomes based on mutual interest. No one would have predicted in the 1980s that Americans and Russians would be working together to destroy weapons in the former Soviet Union. Taking the long view, a satisfactory level of accountability, transparency, and safety must be established in every nation with a weapons of mass destruction program.

This year, Congress enhanced our government's ability to pursue this goal by including language from the Nunn-Lugar Cooperative Threat Reduction Improvement Act of 2009 in the 2010 Defense authorization bill. These provisions give the Nunn-Lugar program additional flexibility to meet unexpected threats in locations around the world in which certain laws would bar the use of such funds. They provide the Defense Department with the authority to spend up to 10 percent of annual Nunn-Lugar program funds notwithstanding any other law to meet urgent proliferation threats. The Defense authorization bill also included important authority that allows the Secretary of Defense to accept contributions from foreign governments, international organizations, multinational entities, and other entities for activities carried out under the Nunn-Lugar program.

The Nunn-Lugar program has made tremendous progress on the destruction and dismantlement of massive Soviet weapons systems and the facilities that developed them. But in the future, the program will be asked to address much more complex and diverse security threats in a large number of countries.

I believe the proliferation of weapons of mass destruction remains the No. 1 national security threat facing the United States and the international community. Over the years, I have described international cooperation in addressing threats posed by weapons of mass destruction as a "window of opportunity." We never know how long that window will remain open. We must eliminate those conditions that restrict us or delay our ability to act. The United States has the technical ex-

pertise and the diplomatic standing to dramatically benefit international security. American leaders must ensure that we have the political will and the resources to implement programs devoted to these ends. The funds in this bill are vital to these efforts, and I thank the Appropriations Committee for its thoughtful attention to this issue.

Mr. President, I yield the floor.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The Republican leader is recognized.

HEALTH CARE REFORM

Mr. MCCONNELL. Mr. President, the majority leader has signaled that he will finally unveil the most significant piece of domestic legislation in modern history sometime on Saturday—and force a vote in the middle of the night about 36 hours later. This is truly outrageous.

This will be a bill that none of my constituents have seen, that none of the majority leader's constituents have seen, that none of you have seen, and that nobody outside the Capitol has seen.

You can fit into a phone booth the number of people who have seen this bill that will affect the lives of every single American in the most profound ways.

Every American should have an opportunity to know what their Senators are being asked to vote on before anyone can see it. I doubt if anyone in this Chamber could come down here and defend the secrecy surrounding this bill.

Earlier this week, the President said:

I think it is important for every single Member of the Senate to take a careful look at what is in this bill.

Unfortunately, there is no bill to read. Let me repeat: There is literally no bill to inspect. Even Senator DURBIN, my good friend from Illinois who is here on the floor, the second in command on the Democratic side, admits he hasn't seen the details of the bill.

The only thing we know for sure about this bill is that it will raise taxes, raise premiums, and slash Medicare. That much we know for sure. The Medicare cuts will be nearly \$½ trillion to pay for a vast expansion of government into health care that an overwhelming majority of Americans we now know oppose.

That is what is at the heart of this bill no one has seen yet. So we may not know all the details, but we already know this bill can't be fixed, and we know Americans are outraged by what has happened in this debate. A bill that was supposed to lower costs and lower taxes and lower premiums will actually raise all three, making existing problems not better but worse. It is not too late to start over and deliver the reform Americans want—the step-by-step reforms we know would actually lower health care costs.

The majority knows this bill is a colossal legislative blunder. That is why

they are rushing it through. That is why the only argument they are left with is a call to history. Well, history will be made either way, and this much is clear: Passing this bill in this way would be an historic mistake that those who support it will come to regret.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Mr. President, this is the bill that is before the Senate. It is 2,074 pages. It has been on the Internet now for 3 weeks in its entirety. You cannot only read it on the Democratic Senate Web site, you can read it on the Republican Senate Web site. So one might ask: Well, where is the Republican comprehensive health care reform bill? It is not to be found—not on the floor of the Senate, not on the Web site—because it doesn't exist.

After 1 year of debate about America's health care system, the Republicans in the Senate have failed to produce any legislation that has gone through the scrutiny this legislation has faced in terms of its impact on America, its impact on our budget. They are emptyhanded. What they bring to us on the floor of the Senate are speeches, press releases, charts, and graphs, and an occasional criticism. I say "occasional" because for 19 days on the Senate floor we have debated this measure—comprehensive health care reform—and let's take a look at the RECORD after 19 days of debate on the floor of the Senate.

The Republicans in the Senate—there are 40 of them—have offered four amendments to the bill in 19 days. Four amendments. Oh, and they have offered six motions to take the bill off the floor and send it back to committee. They have looked at this—and you heard the minority leader and his criticism of this measure—and found four things they are willing to bring before the Senate to change. It doesn't strike me that this is a good-faith effort to try to bring us to closure in a bipartisan way. Instead, what we hear from the Republican side of the aisle in addition to only four specific amendments over 19 days is: We haven't had enough time to offer amendments. Nineteen days, four amendments.

I guess some of us are reaching advanced stages in life and in age and maybe we don't have the energy we once did, but I honestly believe that even the Senate could come up with one amendment a day on health care reform, but the Republicans have come up with four over 19 days. It tells us one of two things: Either this is hard work and they are not up to it or they like the current system of health care; and if they do, I would like them to defend the current system of health care. I would like for them to try to explain in their States what I have found in my State. Instead of soaring rhetoric and

abstractions, let's get down to specifics.

This is a gentleman who lives in Evanston, IL, named David Buckley. Evanston is a great town just north of Chicago. I enjoy going up there and I have a lot of friends there. David had insurance when he needed it, but it ended up costing him his financial health. He is a freelance videographer. He was paying \$4,500 a year for health insurance when he was diagnosed with cancer at the age of 48. David Buckley had a prompt surgery followed by chemotherapy and radiation. He managed to rid his body of cancer. But that battle ended and another battle began.

David's insurance company agreed to cover his cancer treatment but only after 3 solid months of investigations of his application for health insurance to determine whether they could find in that application a preexisting condition which would eliminate any responsibility to pay for David's bills. They couldn't. After covering his cancer treatment costs, they did the next thing that insurance companies do: They raised his premiums, and they didn't just raise them a little bit. In the year following his cancer diagnosis, David's insurance rates went up 80 percent, and that was just the beginning. Within 7 years, David was paying \$28,000 a year in premiums. He had gone from roughly \$400 a month to more than \$2,000 a month in 7 years. He had a \$2,500 deductible, not to mention out-of-pocket expenses. He is self-employed, makes a decent living—about \$70,000 a year—but imagine taking \$2,000 out of your paycheck every month just for health insurance. He tried.

Incidentally, 12 days after his surgery, David, who is not lazy by any measure, flew into a war zone to shoot video. He was still wearing a chemo pump when he arrived for work. He pushes himself to pay his bills, but it has been a losing battle. What started as a \$5,000 debt in the year 2000 grew to a \$70,000 debt by 2003 and a large portion of it came from medical bills. David said:

I thought the point of having insurance was to keep you out of bankruptcy, not put you in it.

It is a valid point. Insurance is meant to be a promise of protection, but for too many people it isn't enough. For David, the high costs and ballooning debt led him to drop his health insurance last year. Think about that. He battled cancer and won, and you know once you have been through that life experience, you are always vigilant. You need the best care to make certain that anything that recurs is caught early, but David had to walk away from health insurance coverage because he couldn't afford it. He decided it was health care or saving for retirement or meeting the costs of living. He is in his late 50s and he is worried

about the years when he won't be able to work.

Health reform is going to help people like David—people who have insurance but still find themselves vulnerable to financial ruin. It will stop insurance companies from running the rates up sky high when you get sick. For those with employer-sponsored, large-group coverage, it will provide access to a broader insurance pool where costs will be pooled and spread.

Health reform will hold insurance companies to annual caps on how much they can charge for out-of-pocket expenses.

Think about the battle this man went through and won over cancer and then went to battle with his health insurance company. It is not unusual. It happens every day. This bill, which has been criticized by those on the other side of the aisle, will give David and others like him a fighting chance.

Let me tell my colleagues about another person. This is an interesting story. Valerie, this beautiful young woman, is from Arlington Heights, IL. She is a student, a doctoral student studying biochemistry at Cambridge University in England. When she was 4 years old, Valerie was diagnosed with type 1 diabetes. She decided early in life that she wasn't going to let her diabetes stop her career ambition. She couldn't become an artist or an entrepreneur; she knew she needed a stable job because she always needed to have health care. She had diabetes. Now, at 24, this brilliant young scientist, this doctoral candidate, worries that her diabetes and what she calls the "broken, insecure U.S. health system" will keep her from returning to the United States from England and using her skills to help her home country.

To control her disease, Valerie needs a lot of medical service, including regular doctor visits and insulin shots. For most of her life, her medical care was paid for by her parents, but those of us who raise children know what happens next. Most health care plans we have for our families cut off our kids at age 24, and that is Valerie's age. However, Valerie is going to school in England. If you listen to some of the criticisms on the floor here about England and Canada and other nations that approach health care differently, you might have an impression in your mind about what that means to be living in a country such as that.

Valerie, because she is a student at Cambridge in England, receives free health care through England's national health service that she says is as good or better than anything she had in the United States. In addition to free doctor visits, insulin, and syringes, her care includes regular contact with a dietitian and an endocrinologist, also free of charge.

These medical professionals have encouraged Valerie to take a more active

role in managing her own disease and she is in better health now than she has been for years. Eventually she hopes to open her own laboratory where she can use her great education and skills to continue research in mitochondrial biology and develop treatments and cures for disease. Valerie worries about whether she will be able to do that if she came back to the United States, and here is what she said:

As long as the same broken, insecure health system remains in place, I see little incentive to come home to the United States with my talents and experience.

We can't afford to lose talented scientists such as Valerie who one day might find a cure for a disease such as Parkinson's. We are the only industrialized Nation in the world where people can die for lack of health insurance, and that is a fact: 45,000 a year. They can't get the care they need to stay healthy and they lose their lives. If we don't change this system, if we don't reform it, we stand to lose talented people and we also stand to lose valuable lives.

The last person I want my colleagues to see is a friend of mine, Dale Mizeur. Dale lives in Blue Mound, IL. The Mizeur family is well-known in my part of the world. I think I have met them all, and they are a big family. Over the years, I have visited with them in their homes and in their home towns. Blue Mound is a little town south of Decatur, IL, 1,100 people. Everybody knows one another. They are all neighbors and friends. Most of them go to church together and have their community picnics; a great small town in Midwestern America. There are a lot of farmers there. There are retired factory workers from the Caterpillar plants up in Decatur and a lot of folks who like living in a small town. This used to be a thriving area. It has struggled with changes in manufacturing and changes in our economy, but it is a close-knit community.

Dale Mizeur lives there. He was born in Owaneco 61 years ago. He was a hard worker at a Cat plant up in Decatur for 32 years. He decided to retire 11 years ago. Based on a simple calculation, he was told he would have a modest pension and his health care costs would be covered in his union contract.

In the time since he retired, his expectations haven't been met. A difficult economy and new contract negotiations up in Decatur have resulted in the erosion of Dale's union health care coverage. As a result, he now has to spend more of his pension on filling the gaps in his reduced health care coverage. His monthly premiums have skyrocketed from nothing when he first retired to almost \$400 a month, and that is 20 percent of his pension check. In addition to these premiums, the quality of his coverage has gone down. What was once a generous health

care plan has such high out-of-pocket costs that Dale questions whether he can afford to stay with it.

He is like most Americans; he doesn't worry about his health until he needs to do something about it. During the early years of his retirement when his insurance coverage was rock solid, he considered himself healthy and never saw the need to use it. But we all get a little older, our bodies aren't what they used to be, and things have changed for Dale. A few weeks ago he noticed some pain in his chest, some dizziness that was too noticeable to ignore. He saw his doctor who told him to go to the emergency room. He fretted about what this was going to cost him, but he went anyway. Thankfully, Dale is physically OK, but economically and emotionally is another story.

Last week, Dale received his bill from the ER. His own personal out-of-pocket expense: \$600. He now has to figure out how he is going to pay that bill out of his pension. What other expenses will he have to delay? What about the mortgage and utility bills? He has to worry about the costs he will endure next time.

Dale and his wife live on a fixed income. As I said, he is 61 years old. The money that comes in each month is accounted for and there isn't a lot of wiggle room.

He is contemplating coming out of retirement after 11 years, primarily because he can't make ends meet and because of medical expenses. This isn't a very good economy for a 61-year-old retired factory worker to look for a job. He is one of the many early retirees who have found that health care costs threaten their financial stability. The unlucky ones lost their health care coverage completely, perhaps because their employer has gone bankrupt. Even those such as Dale, who still has coverage, are finding themselves in a much more precarious situation than they expected.

I tell these stories because they are real-life stories of people I have either met or come to know because they have contacted our office. I listened to the minority leader come and say: Stop the presses, stop the debate, stop moving forward in this effort to have real health care reform in America. The minority leader, from Kentucky, said we need to start over.

We have been starting over on health care for decades. We have never reached the finish line because there are always obstacles in our path. Right now, the obstacle is bringing this matter to a vote. Why were we in session at 1 a.m. this morning casting a vote? Because the Republican side of the aisle is determined that, regardless of the issue, they are going to stop us from bringing this matter to a debate and vote. They don't want us to have a vote on this. They don't want us to make a decision. They don't want to be on the record.

That is unfortunate. The bill they have chosen to filibuster—the one before us in the Senate—is a bill that should have no controversy whatsoever. It is a bill to fund our troops. It is the Department of Defense appropriations bill. Can you imagine, in the midst of a war, when the bravest men and women in our Nation are risking their lives at war, the Republicans are filibustering the bill to pay their salaries, the bill to pay for the equipment they need to stay safe, the bill to pay for the medical care of these soldiers, sailors, airmen, marines, and their families. It is unthinkable.

This is a bill that passed over in the House of Representatives overwhelmingly. I think the number was 394 to 35, and 164 Republicans voted for it because we want to stand behind our troops.

Last night, only 3 Republican Senators out of 40 would step up and say we should go forward on this bill—only 3. The rest of them, led by the minority leader and the minority whip, said we will stop this bill if this is the only way we can stop the health care debate. Why did they pick this bill of all bills—a bill where we should be standing in solidarity behind our troops, and we now have split into partisan camps.

There is nothing partisan about standing behind our troops. That vote early in the morning, unfortunately, was very partisan. There is also a provision in the bill that deals with the unemployed in America.

We want to go home. I want to go home. I called my wife this morning. I have been here 3 straight weeks now, and it looks like there is another week to follow before the holidays and Christmas. I don't like this. You give up a lot in this job. There are certain pieces of my family life I hold dear, and this is one of them—to be back home for Christmas, not just at the last minute but to be there, and it doesn't look like we will be able to do that. The Republicans decided they will use every political and parliamentary device possible to delay this vote. So we will do nothing today because we are running the clock out under the procedures of the Senate, and then we will meet at 7:30 tomorrow morning and have several votes on this Department of Defense appropriations bill, which should have been passed instantly when we received it from the House of Representatives. Then we will start the clock running again to move toward a vote on health care reform.

Why? Let's be honest. We ought to bring this matter up for a vote and see if we, in fact, have 60 votes on this side of the aisle. I hope we do. We are working on it. The reason I am here and the majority leader is not is because he is working, at this very moment, to bring those 60 votes together. Instead, the Republicans have said they are going to do everything possible, including

asking Members to stay here Christmas Eve and Christmas Day, in order to stop this vote on health care reform. That is unfortunate.

Let me tell you the bottom line of what this bill does for America. This bill is not perfect, and no bill we ever consider is. This bill, first, is the biggest deficit reduction ever introduced on the Senate floor. If we bring down health care costs, it not only will help families and businesses but even our Federal Government. As we bring down the increase in the cost in health care, Medicare for seniors will cost less to the government. The same thing is true of Medicaid, the health insurance program for the poor and disabled.

First and foremost, CBO tells us this bill, at a time when we have great national debt, will actually bring down America's debt \$130 billion in the first 10 years and \$650 billion more in the next 10 years. So it is a fiscally responsible bill. That is what President Obama challenged us to do: If you are going to pass health care reform, don't do it at the expense of the next generation. Pay for it.

We do. We more than pay for it. We also reduce the cost of government in the process. The second thing the bill does is start to bring down health care costs. It does it in a variety of different ways. I wish it were bringing it down faster. I commend the Presiding Officer, the Senator from Virginia, Mr. WARNER, who joined with a group of freshman Democrats, and they introduced cost-containment amendments to the bill—to be part of the managers' amendment—which have been heralded by the major business and manufacturing groups in America—a thoughtful amendment that addresses the core issue of how to bring down health care costs. They rolled up their sleeves and went to work and made an amendment.

You cannot say the same, I am afraid, for the other side of the aisle. Their amendments have not been as constructive as the one I just described. They have tried to stop this bill rather than improve it. Senator WARNER of Virginia and his freshman colleagues have taken a more constructive and positive approach.

Bringing down costs of health insurance and making it more affordable is job one for this health care reform. But it does something else. This bill extends the coverage of health insurance in America. Currently, there are 50 million Americans who don't have health insurance. They are people who have lost their jobs. They are folks who work for small businesses and cannot afford health insurance. They are people who have tried their best, but they can't get health insurance. There are 50 million of them. Imagine, if you will, going to sleep tonight, if you are a father or mother with a sick child, and you have no health insurance. Imagine, for one frightening moment, waking

tomorrow morning to face a diagnosis from a doctor of a serious illness or to be involved in an accident that requires medical care and having no health insurance. One out of every six Americans—50 million—have no health insurance.

This bill will change that. Thirty million Americans will be covered with health insurance who currently don't have coverage, and 15 million in the lower income categories—the working poor and lower income folks—will go into Medicaid at the State level; 15 million will go into private health insurance. At the end of the day, with this bill, 94 percent of Americans will have health insurance. That has never happened in our history—ever; 94 percent will have the piece of mind of having health insurance.

There is something else this bill does. It goes back to my illustration. It says to the health insurance companies it is over; the way you have been mistreating the people who pay your premiums is going to come to an end. We are not going to allow you to “fly-speck” applications for health insurance to find a preexisting condition. We are going to make sure those with preexisting conditions have a real opportunity for health insurance coverage and will not be denied when they need coverage. We are going to also make sure that when you get sick, the health insurance company cannot cut and run, as so many do. We are going to extend that coverage for young people through ages 24 and 25. This is all good and positive. It will mean the Patients' Bill of Rights, which former and late Senator Kennedy and even Senator MCCAIN worked for, will be part of the law of America.

There are critics of this health insurance plan, for sure. We saw them come out at townhall meetings and protests and so forth. Some don't want to change the system; they like the system. They fear government or whatever it may be. Their motive is to stop this. There are also critics who say this bill doesn't go far enough. It doesn't go as far as I would like to go. I think there ought to be a public option. We ought to have a not-for-profit plan that competes with private plans. The realities of the Senate don't make it possible to do that in this bill at this time.

When the Republican leader comes to the floor and says so many people oppose it—some oppose it because they may want to do nothing; others don't think it does enough—that is the nature of this process. I have been around long enough to know you can't satisfy everybody. Is it better if this bill passes or not? I think the answer is overwhelmingly it is.

Howard Dean is my friend and a former Governor. He said he would vote against this. I say to Dr. Howard Dean: Don't you believe 30 million Americans with health insurance are worth the ef-

fort? I think you do. I think most people do. We can do better, and we will work to improve the bill.

I yield the floor.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, how much time remains on this side?

The PRESIDING OFFICER. There is 16 minutes remaining on the Republican side and 3½ minutes on the Democratic side.

Mr. LUGAR. Mr. President, the bill before us contains more than \$128 billion for operations in Afghanistan and Iraq. Since the President's announcement 2 weeks ago that he would be ordering tens of thousands of additional U.S. troops to Afghanistan, the Congress has held numerous hearings examining the military strategy to be employed, political issues in the region, and the dispensation of funding for the war.

As we consider our course in Afghanistan, we should evaluate options according to how well they contribute to U.S. national security. The ultimate purpose of committing tens of thousands of new troops and tens of billions of additional dollars to the war effort in Afghanistan must be to enhance U.S. security and our vital national interests in the region.

Sometimes during long wars, specific tactical objectives can become ends in themselves, disconnected from the broader strategic context or an accounting of finite resources. Congressional oversight of the funds in this bill is part of that accounting. We need to get the most value for our defense dollar in Afghanistan, as well as Iraq. This is especially true at a time when our Armed Forces have been strained by many years of high deployment rates, our capacity for new government debt is limited, and our Nation has not fully emerged from a severe recession. As we think through the implications of the defense spending bill before us, we need to be cognizant that even if the President's Afghanistan plan achieves the very best stabilization scenario, allowing for U.S. withdrawals on the schedule he contemplates, we may be responsible for most of the Afghanistan defense and police budgets indefinitely.

Much of the debate in Congress has focused on the President's stated intention to begin withdrawing some U.S. troops by July 2011. Some Members have voiced the concern that such a date undercuts impressions of U.S. resolve and gives the Taliban and al-Qaida a target beyond which they can wait us out. Other Members, with a very different view of the war, worry that the July 2011 date is so flexible that it offers no assurance at all that troops will be withdrawn. This is a legitimate item for debate, but I am doubtful that success or failure hinges on this point nearly as much as it does on the counterinsurgency strategy employed by allied troops, the viability of

the Afghan security forces, and most importantly, how the United States engages with Pakistan.

I have confidence that the addition of tens of thousands of U.S. and allied troops, under the direction of Generals Petraeus and McChrystal will improve the security situation on the ground in Afghanistan. More uncertain is whether the training mission will succeed sufficiently to allow U.S. forces to disengage from combat duties in a reasonable time period. The most salient question, however, is whether improvements on the ground in Afghanistan will mean much if Taliban and al-Qaida sanctuaries in Pakistan remain or if instability within Pakistan intensifies.

As hearings in the Foreign Relations Committee have underscored, the potential global impact of instability in a nuclear armed Pakistan dwarfs anything that is likely to happen in Afghanistan. The future direction of governance in Pakistan will have consequences for nonproliferation efforts, global economic stability, our relationships with India and China, and security in both the Middle East and South Asia regions, among other major issues. The President and his team must justify their plan not only on the basis of how it will affect Afghanistan, but also on how it will impact our efforts to promote a much stronger alliance with Pakistan that embraces vital common objectives.

Secretaries Clinton and Gates and Admiral Mullen acknowledged the importance of Pakistan in the President's calculation. They underscored that the administration is executing a regional strategy. I am encouraged by press reports that have described the intense diplomatic efforts with the Pakistani government aimed at securing much greater cooperation.

But we should remain cognizant that the focus of policy tends to follow resources. By that measure, Afghanistan will still be at the core of our regional effort.

The President has said that the United States did not choose this war, and he is correct. But with these troop deployments to Afghanistan, we are choosing the battlefield where we will concentrate most of our available military resources. The Afghanistan battlefield has the inherent disadvantage of sitting astride a border with Pakistan that is a porous line for the militants, but a strategic obstacle for coalition forces. As long as this border provides the enemy with an avenue of retreat for resupply and sanctuary, our prospects for destroying or incapacitating the insurgency are negligible.

The risk is that we will expend tens of billions of dollars fighting in Afghanistan, while Taliban and al-Qaida leaders become increasingly secure in Pakistan, where the long-term strategic stakes are even higher. If they are able to sit safely across the border

directing a hit-and-run war against us in Afghanistan, plotting catastrophic terrorist attacks abroad, and working to destabilize Pakistan from within, our strategic goals in the region will be threatened despite progress on the ground in Afghanistan.

Some reports indicate that Taliban leaders, aware of the threat from U.S. operated Predator drones, are moving out of remote areas into crowded Pakistani cities, including Karachi. If such reports are true, the United States will have even fewer options in pursuing Taliban and al-Qaida leaders in Pakistan, absent the active help of Pakistani authorities. Specifically, will Pakistan work with us to eliminate the leadership of Osama bin Laden and other major al-Qaida officials?

In addition to improving the cooperation of the Pakistani authorities, the United States and our allies will have to become more creative in how we engage with the Afghan and Pakistani people. We should understand that as a matter of survival, people in dangerous areas on both sides of the border will tend to side with whoever is seen as having the best chance of winning. We should also recognize that tribal loyalties, most notably Pashtun loyalties, are at odds with a strong central government and with acquiescence to external military power. As Seth Jones of the Rand Corporation has observed: "The objective should be to do what Afghanistan's most effective historical governments have done: help Pashtun tribes, sub-tribes, and clans provide security and justice in their areas and manage the process." Meaningful progress in Afghanistan is likely to require tolerance, or even encouragement, of tribal administration in many areas, as well as convincing tribal leaders that opposing the Taliban is in their interest.

In these circumstances, we should explore how cell phones and other communication technologies can be used more effectively, both as an avenue for public diplomacy to the Afghan people and as a means for gathering intelligence from them. Already, seven million cell phones are in Afghanistan—one for every four inhabitants. The Taliban's reported priority on destroying communications towers underscores their understanding of the threat posed by these technologies. For example, cell phones could be used by sympathetic Afghans to produce real-time intelligence, including photographs of IEDs being prepared or calls alerting coalition troops to movements of the Taliban. Phones eliminate the need for informants to take the risks of visiting a police station in person or of conversing openly with U.S. troops. Similarly, expanding the use of credit card transactions could prove revolutionary in addressing some vexing problems in a country that lacks an effective banking system. They can pro-

vide a way to reduce corruption, improve accounting within the Afghan government and security forces, and relieve soldiers from the need to go AWOL to deliver pay safely to their families.

I want to recognize that the President has been confronted with extremely difficult choices in Afghanistan and Pakistan. He and his team have worked through the problem carefully and deliberately to reach their conclusions. There are no options available that are guaranteed to succeed. Every conceivable course, from complete withdrawal to maintaining the status quo to the plan outlined by the President, to an unrestrained and unlimited counterinsurgency campaign has its own set of risks and costs for the United States. The President deserves credit for accepting ownership of this difficult problem as we go forward. In this situation, the advocacy of the President and his national security team must continue to be as broad-minded and thorough as his policy review appeared to be.

Within months, the President is likely to ask Congress for additional funds for Afghanistan, beyond what is contained in this bill. In the meantime, the administration must be prepared to answer many questions about its strategy as the American people study the potential consequences of the President's decision.

THE PRESIDING OFFICER. The Senator from Arizona.

MR. MCCAIN. Mr. President, my friend, the Senator from Illinois, whom I see back on the floor—for the record, the Senator from Illinois and I entered the House together longer ago than we would like to mention, particularly for those who favor term limits. We have had our philosophical disagreements, but I have appreciated his leadership. I have appreciated his honest approach to the issues. We obviously have significant disagreements. Those disagreements have been respectful, and I look forward, during the next whatever period of time until we dispense with the issue of health care reform and the issue of DOD appropriations, to discussing this issue with him.

The Senator from Illinois has been saying that the Republicans are holding up funding for our troops by not conceding to an immediate vote on the Defense appropriations bill after the House sent it to the Senate. I understand that, and I understand his zeal to get onto other issues, which is the job of the majority, to get legislation passed, but I would like to point out the real facts.

The real facts about the Defense appropriations bill are that the House passed its version on July 30, last July 30. The Senate passed its version on October 6. By my calculation, that is well over 2 months ago. All they had to do then, of course, was go to conference

and report it out to the floor of the Senate—something that could have been done in 24, 48 hours. Instead, over 2 months has gone by and the Democratic leadership in both the House and Senate held captive this bill for the troops. Why would they do that? Because they knew that at the end of the year, they would stuff in unrelated must-pass legislation which has nothing to do with the Department of Defense or the men and women in the military, they would have to put that in so they could get it passed. We have a number of additional pieces of legislation stuffed into the bill which the Democratic leadership knew had to be passed.

I say in all due respect to my friend and colleague from Illinois—he and I, as I mentioned, have been around here the same amount of time—the fact is, after the House and Senate both passed their bills over 2 months ago, they could have brought it to the floor and we could have debated it and, of course, passed it into law.

So now we have the Secretary of Defense calling around to people saying: We have to pass this immediately. Where was the Secretary of Defense, whom I admire and respect, on October 7, 2009, after the Senate passed its bill? Where was he then urging Members to not harm the men and women who are serving in the military?

I will get from my staff the bills that are stuffed into this bill which have nothing to do with our Nation's defense and have everything to do with the agenda of the Democratic majority. I want to say again to my friend from Illinois, I understand that. I understand why they are doing what they are doing. But I don't understand why they are blaming us when after 2 months the bill has not been passed.

Let me just add, there is a portion of the bill called division B, "Other Matters." Only in the Senate could we call it "Other Matters." Let me tell you what they have larded onto the Defense bill.

Food stamps. Food stamps are very necessary. Is anybody going to be against food stamps? Of course not. It extends appropriations for the Supplemental Nutrition Assistance Program in the USDA. Food stamps administration, \$400 million in emergency funds through September 30, 2011.

Satellite Home Viewer Act extension. Perhaps the Senator from Illinois, my friend, can tell me what the Satellite Home Viewer Act extension has to do with defending our Nation. I know it has a lot to do with the ability of millions of Americans to watch NFL football, but I do not think it has a lot to do with defense spending.

PATRIOT Act extension. Section 1004 provides a clean 2-month extension until February 28, 2010, of the three PATRIOT Act provisions expiring at the end of this calendar year. That has

to do with investigation of business records and also roving wiretaps. Is there anyone who did not know the PATRIOT Act was going to expire? Was the Senator from Illinois unaware that we needed to extend the PATRIOT Act? Most people believe we do. We still have extremist organizations that want to attack the United States of America.

Flood insurance extension. It extends the Flood Insurance Program through February 28, 2010.

Small business extension. There is \$125 million for the Small Business Administration to continue offering reduced-fee and higher cap loan guarantees under the American Recovery and Reinvestment Act. It extends the higher limits through February 28, 2010. It further designates such amounts as emergency spending; i.e., it is not included in the budget. But that is an argument for another day.

The point is, again, small businesses are vital. Small businesses are what have been ignored. Small business is the reason the stimulus package has failed. It has done a great job for Wall Street—boy, these bonuses, \$16 billion, \$18 billion, are going to be distributed. They are going to have a Merry Christmas up on Wall Street at Goldman and Morgan and all those places. It is going to be great, thanks to the TARP and the stimulus package. But what is it on Main Street where we have 10-percent unemployment?

Of course we need to help small businesses. They have not done much so far, I tell you that. I will take you to my State and take you all over this country outside of Manhattan, and they will tell you small businesses are hurting very badly. We could not do that before. We had to put it on the Defense appropriations bill.

We also have payment for a North Carolina construction project. Here is something that really has a lot to do with defending the Nation. It provides a \$12.8 million appropriation for a construction project in North Carolina, of which—note designation of the State—of which \$4 million will be obligated immediately and the rest will be available 120 days after the signing of an agreement between the Federal Government and several local authorities. This is paid for through rescission funds previously appropriated for this project. I don't know what the project is, I say to my colleagues, but I am not sure we are in dire need.

In addition, highways extension. Section 1008 extends the authority for the highway trust fund to make and receive payments through February 28. It also provides \$33.4 million for administrative expenses, paid for out of the earlier rescission from the highway trust fund. I am one who believes we need to make sure the highway trust fund is funded and we move forward with the highways. Again, what does

that have to do with defending this Nation? Not a lot.

Unemployment insurance extension. Here we are again. It extends the authority of expiring Federal unemployment insurance programs and benefits through February 28, 2010, continuing the current availability of up to 99 weeks of total unemployment. Of course, we have to extend unemployment. Unemployment, except up on Wall Street, is at 10 percent. In my home State of Arizona, real unemployment is 17 percent.

In addition to that, I guess the conferees were beaver away by adding earmarks, and plenty of them—in fact, 1,720 earmarks, totaling \$4.3 billion; \$2.5 billion in unauthorized and unrequested C-17s. No one outside of those who are contractors believes we need to spend \$2.5 billion on unauthorized C-17s which cost \$2.5 billion; \$500 million in unrequested and unwanted funding for the Joint Strike Fighter alternative engine and Presidential helicopter. That is \$7.3 billion. There is \$18 billion in new non-offset funding for food stamps, unemployment assistance, COBRA benefits, physician payments, the so-called doc fix, and small business lending. By designating the funding as an "emergency," none of it is paid for. It is just another \$18 billion of debt that will be laid on our children and grandchildren and our national debt in 2010.

I guess some Americans wonder why we are going to have a debt for this year of \$1.5 trillion—trillion, "t," trillion. Someone said to me—several times it has been said to me—we hope the President never learns what comes after a trillion.

Here we are with another \$18 billion of funny money. Here we are with a bill passed by the Senate 2 months 10 days ago and passed by the House months before that. Clearly, one can only assume—let me put it this way: One would question, if the Senate passed its version on October 6 and the House passed its version on July 30, then why would we wait until December 16 to bring it to the floor of the Senate? One might conjecture that they did not bring it to the floor of the Senate because they knew it was going to have to be passed by the Congress of the United States. Of course, we are going to pass it. So this is the best opportunity to add these programs and projects that would never otherwise be passed. So here we are with legislation to take care of the men and women in the military and our national security needs and we have loaded it up with \$7.3 billion in pork and \$18 billion in new offset funding, which is not paid for. So then my friend and colleague from Illinois comes to the floor and says: Republicans are holding up the passage of this bill, even though—even though—the Senate passed this bill on October 6.

Mr. DURBIN. Would the Senator yield for a question?

Mr. MCCAIN. I would be more than happy to engage in a colloquy with my friend from Illinois, if he requests to do so or just has a question—either way.

Mr. DURBIN. I have a question. When we were here at 1 a.m., bleary-eyed and voting, there were two unanimous consent requests made to pass the Department of Defense appropriations bill immediately. Does the Senator from Arizona remember the objections to passing the bill immediately so we could get the money to the troops came from his side of the aisle when we tried to pass this bill?

Mr. MCCAIN. I do recall that, I say to my friend, and I also recall I was only allowed 10 minutes—10 minutes—to talk about this bill and the 1,720 earmarks such as the telescope in Hawaii and—I have a list here somewhere. But I was allowed 10 minutes, and I need a long time to talk about this.

If the Democratic majority, which is their right, wants to wait until December 17 and then jam it through in the middle of the night, that is their right to try it. But we need to talk more about why the American people are angry. Here we have a bill to defend the Nation—to defend the Nation—and \$18.9 million for a center at the University of Massachusetts “dedicated to educating the general public, students, teachers, new Senators, and Senate staff about the role and importance of the Senate.”

I hope this organization, this center at the University of Massachusetts, will somehow come into being, perhaps, but not by taking it out of money for Defense. If there is ever a time the American people need to understand the role and importance of the Senate—given our approval rating is about 4 percent, and I haven’t met any of them—I understand why someone would want to have a center to teach new Senators and Senate staff about the role and importance of the Senate. But \$18.9 million, when people are not being able to stay in their homes, when they are unemployed, when they can’t feed their families, when unemployment is 17 percent? Sure, let’s add it on to the Defense appropriations bill. That is the way to do it.

Here are some more: \$500,000 for my old favorite—the old Brown Tree Snake Program. I totaled up the millions that have been spent on the old Brown Tree Snake Program. Of course, Historical Fort Hamilton Community Club, that needs \$1.8 million. The old Historical Fort Hamilton Community Club, I am sure it is a nice place to visit.

I am sure it is great to have \$1.6 million to study human genetics at the Maine Institute for Human Genetics and Health in Brewer, ME; \$3.5 million for a microalgae biofuel project in Hawaii; \$5 million for the Presidio Heritage Center, a museum, in San Fran-

cisco; \$1.6 million for the Center for Space Entrepreneurship. I think that would match with the \$2.9 million we appropriated on the previous bill to study surgery in outer space.

I am telling you, the Trekkies are happy about these appropriations bills. Here are more: the \$1.6 million for a Virtual Business Accelerator for the Silicon Prairie; \$7.8 million to develop key technologies needed for the long-term operations in near-space conditions. So we have surgery in outer space and key technologies needed for near-space conditions for the Orion High Altitude Long Endurance Risk Reduction Effort, the Aurora Flight Sciences in Columbus, MI; \$2.4 million for Fusion Goggle System; \$800,000 for Advanced Tactical Laser Flashlight in Wyandotte, MI; \$10 million for the Hawaii Technology Development Venture.

My friends, this is kind of a classic example. I see my friend and colleague on the floor, Senator COBURN, a man of courage and integrity and one who I think has led, in many ways, this fight. But here is an earmark in this bill—it has never been authorized, never had a hearing—\$10 million for the Hawaii Technology Development Venture. What could that be? What could that be? Did we ever have a hearing? Did we ever have a depiction of this? Did we ever have it? No. It is included by the appropriators.

A few more: \$3.9 million for Intelligent Decision Exploration. If there is ever a place that needed that, it must be, in my view, the Congress. So \$3.9 million for Intelligent Decision Exploration. I think, frankly, the results of that exploration would be rather bleak. How about \$2.3 million for marine species; \$2.4 million for NAVAIR High Fidelity Oceanographic Library.

The list goes on and on and on. Oh, here is Hawaii again—strange how Hawaii pops up—\$2 million for Advanced Laboratory for Information Integration, naturally, in Hawaii; \$1.2 million for the Model for Green Laboratories and Clean Rooms Project.

Now, again, I wish to point out, as my colleague from Oklahoma has, these may be very worthwhile projects. They may be projects that maybe will help America. Maybe spending our Defense appropriations—\$5.8 million of it—for the Rock Island Arsenal Roof Replacement in Rock Island, IL, is something that is badly needed. Maybe the \$800,000 for the Natural Gas Firetube Boiler Demonstration at the Rock Island Arsenal is also very necessary. But how are we to know? How are we to know?

So the Senator from Illinois and the Democratic leader have come to the floor and are saying: The Republicans are blocking passage of vitally needed funding for the men and women in the military who are defending our Nation as we speak. My response is: Where were you for the last 2 months after

the Senate passed this bill? The Senate and the House could have had a conference and we could have had this bill long ago.

The fact is, it has been loaded up with food stamps, the Satellite Home Viewer Act extension, the PATRIOT Act extension, flood insurance extension, small business extension, payment for construction projects, highways extension, unemployment insurance, COBRA extension, the old doc fix—the old doc fix that we do year to year, which is another chapter in profiles of courage on the part of the Congress—poverty adjustment freeze, rescission of DTV funds, and it goes on and on. What does all that have to do with Defense? What does that have to do with defending this Nation? What does that have to do with giving the men and women, who are serving in our armed services today in harm’s way, the best equipment, the best training, and the best support we can provide to them?

I see my colleague from Oklahoma on the floor and so I yield the floor at this time.

The PRESIDING OFFICER (Mr. KAUFMAN). The Senator from Oklahoma is recognized.

Mr. COBURN. I thank Senator MCCAIN. I think America looks at us and says: Here it is, a week before Christmas, and we are debating the Defense appropriations bill, but it is interesting to note that the first appropriations bill that passed out of the Congress was the bill to fund us.

We put us first. We didn’t put our troops first. We didn’t put the Department of Defense first. We have had no inflation this year, and what did we do? We gave ourselves a 5.8-percent increase. The first appropriations bill to be passed and signed by the President. We put us first.

So here we find ourselves a week before Christmas debating the Defense bill, while we are in the midst of two wars, and there is an increase of only 4 percent. Yet we have all these people who say they are for Defense. We pass a bill that increases our own expenses by 5.8 percent and then we tell the Defense Department: You can’t do that. You can’t have what we have.

The fact is, it is easy to return 15 percent of everything you take in up here, in what you are allotted. I have done it, on average, every year I have been here. My employees are well paid. They work hard, but they are well paid. So we gave ourselves a 5.8-percent increase, but this Defense Department bill, in the middle of two wars, has a 4-percent increase.

That is not the worst of it because the average of all the increases right now is almost 11 percent on all the rest of the bills and here they are. That doesn’t include any of the spending for each of these agencies—which averaged around 30 percent of their budget—that

they got in the stimulus bill. Here we go: We give ourselves a 5.8-percent increase; Homeland Security, 7.2 percent; T-HUD, 23 percent; Interior, 16 percent; State and Foreign Ops, 33 percent. We did ours first to make sure we got us covered.

All of this is very ironic to me, based on the fact that out of every dollar we spend this year, 43 cents of it is borrowed. Of every dollar the Federal Government spends, 43 cents out of that dollar is borrowed. We are borrowing \$4.2 billion a day. That is not every business day, that is every day of the week. There is \$350 billion to \$380 billion worth of waste in the Federal Government. Yet not one place in any of these bills do we eliminate duplicative services; not one place in any of these bills did we eliminate fraud; not one place in any of these bills did we cut the value of earmarks—though the number is down, only slightly, but the total dollar is up.

We made no attempt to do what every family in America is doing today; that is, to prioritize. Next year, it is going to be 45 cents of every dollar the Federal Government spends we are going to borrow. Why is that important? It is important because the people making the decisions to borrow the money are not the ones who will have to pay it back. We are going to transfer that. We are going to violate the tradition and heritage of our country because we are going to transfer a markedly lower standard of living to our children.

I met this little girl. She is from Maryland. Her name is Madelyn. If you divide the total debt by the total population—just the debt we owe now—and that is truly Enron accounting because it doesn't count the internal debt we owe or money we borrowed from Medicare, money we borrowed from Social Security, and other transfer funds—it equals \$38,375. That is what it was when this picture was taken. It is well over \$39,000 for every man, woman, and child, and that is just on external debt. The only thing she owns is a dollhouse.

The real tragedy is, when Madelyn is 45, everybody her age and younger will be responsible for \$1.19 million worth of debt and over \$70,000 worth of interest per year before they pay any other taxes, before they buy themselves a home or an automobile or before they send their kids to school. They will be \$1.19 million in debt, plus combined unfunded liabilities.

This is the U.S. debt clock. It sits in the doorway of my office in the Russell Building. I had it out in the hall, but the Rules Committee would not allow people to look at that. I don't know whether they didn't want them to see it or it truly doesn't fit with protocol. Now I have a door open in my office and I have this on the live computer screen and it changes every day.

It is pretty interesting. This was as of November 21. So, November 21 to De-

cember 18, that is 27 days, we have borrowed another \$100 billion since we took this picture off the Internet. We are at \$12.118 trillion. Calendar year to date, the Federal Government had spent \$3.285 trillion. The debt per citizen on the 21st was \$39,000 and, per taxpayer, it was \$110,000. Our deficit as of November 1, for the calendar year, was \$1.409 trillion—all of it borrowed.

The private debt in the country is \$16 trillion. That is our private debt. That is what all of us owe on our own stuff. The mortgage debt is \$14 trillion.

If you look at the second screen that is outside my office, what you see is the total cost of the bailout so far—\$11 trillion. We only have personal savings of \$643 billion. Our savings per adult is less than \$3,000. How do you take that \$3,000 against the \$39,000 and make any sense out of it?

The final screen shows the personal individual debt, the credit card debt, and the payment debt. It also shows our GDP. We are good as a nation. Our workers are good. We produce \$91,000 worth of product per person every year. That is going to decline because of what the Federal Government is doing.

There was a guy once named Cicero and he warned of some things that were happening in one of the best known and most successful republics in the world. It happened to be Rome. Here is what he said. "The budget should be balanced." I think 90 percent of America would agree with that:

The Treasury should be refilled, the public debt should be reduced, the arrogance of officialdom should be tempered and controlled, and the assistance to foreign lands should be curtailed lest Rome become bankrupt. People must again learn to work, instead of living on public assistance.

They didn't listen to Cicero, much like the Senate is not listening to the citizens of this country and we are growing a Federal Government we cannot afford, outside the bounds of what this document, the U.S. Constitution, says is our legitimate role. If you go to it and look at article I, section 8, you see the enumerated powers and you go look at the 10th amendment and ask: How in the world is the Federal Government involved in all these things?

We have before us a bill to fund our troops and fighting two wars. Other than one other appropriations bill, we gave it the smallest increase.

By the way, in this bill is \$18 billion of what we call emergency so we do not have to play inside the budget. We automatically transferred another \$18 billion to Madelyn and her generation.

How do we get out of this? What do we do? We actually, in Congress, should be following the lead of the families in this country. What are families doing? Families are sitting down and making priorities. They are saying what are the things we must do? What are the things we want to do? What are the things we would like to do? Most of the

"What are the things we would like to do?" are going out of the window for American families today. A large portion of the things families want to do is going out the window so they can maintain the things they must do. It is called making hard choices.

When you see that the Congress took care of itself before it took care of anybody else, it describes the problem in Washington. We are absolutely clueless as to what the average American is going through. We could have all the words on this Senate floor said that we want to say, but our actions speak far louder than any words we could ever say. What are our actions? Our actions are to steal the future and prosperity of our children. It is not a very noble cause.

We are here this week not because of the Defense Department bill. We are not here the week before Christmas because of this bill. We are here the week before Christmas because somebody has set an artificial deadline that we must pass a health care bill, any health care bill, so we can say we passed a health care bill. That is why we are here. When we look at health care in our country, we recognize that we have significant problems in making sure everybody has access to care. We know what the problem is on access to care because we know per capita we spend almost twice as much as anybody else in the world on health care. The problem plaguing access to care—and as a practicing physician for over 25 years—is cost.

We have some bill coming sometime that will not be available for 72 hours for everybody in the country to read, that by the time you add the 2,074 pages to the couple of hundred pages we are going to add on, nobody is going to understand exactly what they are voting on. But we are going to vote on it because we said we would. We are going to impact one-sixth of our economy and we are going to destroy the best of our health care system in the name of fixing some of the problems in our system.

We are totally disconnected with America, the America I know. There was a guy who said—I will paraphrase the statement:

Freedom is a precious thing. It is not ours by inheritance alone. It must be fought for and defended by each and every successive generation.

What is that freedom he is talking about and who was he talking to? He was talking to the American people. He wasn't talking to our troops. The freedom he was talking about was the liberty that comes when free people come together under a democratic Republic with a limited Federal Government to make the best choices they can make for themselves and their families, and the freedom to do just that. That person was Ronald Reagan.

I got an e-mail from a constituent of mine. I can't use the exact words because they are not appropriate for the Senate floor. But he kind of paraphrased that statement and then he said: Every now and then somebody comes along and pees it all away. He said: Son, don't let it be you.

Our freedom is being taken away in this country—not intentionally but unintentionally. Because as the Federal Government grows and expands, your opportunity to make choices for yourself and your family become limited. We have a health care bill that is going to spend \$2.5 trillion over the next 10 years. It is going to cause premiums to rise, it is going to cause quality of care to go down, it is going to cause us to lose 1.6 million more jobs, and it is going to involve the Government between the patient and the caregiver. That bill will create 70 new government programs, 15,000 to 20,000 new Federal employees. It will create three panels that will ration care in this country directly. And it will in fact take Americans'—not just Americans on Medicare or Medicaid—Americans' freedom to make the best decision for them and their family as regard to their health care and stuff it in a box.

That is because we are going to tell you what you can have, what you can buy. We are going to totally disregard the art of medicine and we are going to practice cookbook medicine in this country.

A week ago we reversed the U.S. Preventive Services Task Force recommendation on breast cancer screening. We are going to have to do that hundreds of times every year under the bill that is being proposed right now because all of that is based on cost estimates. It was based on 1 out of every 1,970 women they find a breast cancer in between 40 and 50; but what people didn't say is 1 out of 1,400 women between 50 and 60 they find a cancer. So on a cost basis they are right; on a clinical basis they are not.

The majority whip earlier today said the Republicans didn't have any ideas on health care. The fact is we do have ideas on health care. What we know from a Thomson Reuters study that came out in April of this year is that there is \$700 billion in our system today that is not helping anybody get well and isn't preventing anybody from getting sick. If we want to truly cut the cost of health care, what ought to be required reading for every Senator in this body is the Thomson Reuters report. Because they can go through the fraud and abuse—19 percent of everything we spend. Unwarranted use—that includes me as a doctor doing tests I should not be doing. That includes defensive medicine, administrative inefficiencies, provider inefficiency and errors, avoidable care and lack of care coordination—duplication.

We have not attacked the disease of runaway health care costs in this coun-

try. What we have attacked is the symptoms. You do not cure people by treating their symptoms. You cure people by finding out what their disease is and curing the disease and treating the disease.

We are accused of being the party of "no." I want to tell my colleagues and the American public, "no" is a wonderful word. When your child is misbehaving, you say "no." When your adolescent child is making bad judgments, you say "no." When somebody is stealing something from somebody else, i.e. liberty, you say "no." When you are stealing the future, in terms of opportunity, we should say "no." When you are creating a government-centric health care system rather than a patient-centric health care system, "no" is a great word.

We have heard all about why we do not have any ideas. We had two mark-ups. The ideas we offered were rejected.

I see Senator WYDEN on the floor. He has a wonderful health care bill. It is somewhat different than the one I introduced but it is a great bill. It does not fall into any of the traps the bill that is on the floor today falls into. It also addresses many of the problems that are outlined in the Thomson Reuters study on health care in America.

Saying "no" at the right time saves lives. Saying "no" at the right time saves money. Saying "no" at the proper time preserves our future. Saying "no" when no is the best answer is the correct, right thing to do.

We have a government we cannot afford.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. COBURN. I ask unanimous consent for 30 seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COBURN. We have a government we cannot afford. We are borrowing money to buy things we do not need. We earmarked \$18 billion worth of projects this year. Some were good and some were terrible.

We eliminated no duplication in any agencies. We got rid of none of the fraud. We did nothing about efficiency, and we did nothing about creating priorities. I agree with my Democratic colleagues that health care should be a priority. When we had the leadership, we didn't do anything with it, and we should have. But mark my words, this is a turning point in America if we pass this health care bill. It is a turning point from which we will not recover.

I yield the floor.

The PRESIDING OFFICER. The majority whip.

Mr. DURBIN. Mr. President, it is my understanding the Democratic side has 30 minutes now.

The PRESIDING OFFICER. The Senator is correct.

Mr. DURBIN. I see the Senator from Oregon is here. If I could have a few

minutes to respond and then turn the floor over to him for as much time as he would need—I thank the Senator from Oregon.

First, a history lesson. Sometimes facts are tenuous, difficult, sticky things you can't get rid of. Let's look at the facts. When William Jefferson Clinton left the Presidency, America's budget was in surplus. For the first time in 30 years, we were generating more revenue than we were spending. We were adding life and longevity to the Social Security system, to Medicare, and many others. We did this with a prosperous, booming economy, one of the most prosperous we had seen in modern history. We created new jobs, new businesses, new home opportunities. When William Jefferson Clinton left office, we had a national debt of \$5 trillion.

In came the Republicans, billing themselves as fiscal conservatives. They were going to do it better, get government off our backs, reduce spending, and show us how they could manage. They took a \$5 trillion national debt, and over the next 8 years more than doubled it. In other words, when George W. Bush left office, America had more debt, twice as much, as was the case when he took office.

How did we reach a point where our debt mushroomed and more than doubled in 8 years? Because these fiscally conservative, flinty-eyed, stymie-hard Republicans engaged in a war they wouldn't pay for. Some of the Senators who just spoke this morning voted for us to go to war and not pay for it and just add it to the debt.

Secondly, President Bush did something no President had ever done in history. It was counterintuitive. It made no sense, but he did it. What was it? He cut taxes in the midst of a war. It has never been done because you can't explain it. You have the ordinary expenses of government that still continue, and now you have a new expensive war. And instead of doing what Franklin Roosevelt did in World War II, saying we are going to sell bonds, we will do our best to pay for this war, they said just the opposite: We will go into debt even deeper to not pay for the war. That is what they did. They went into debt by cutting taxes on the wealthiest Americans.

Unpaid for wars, tax cuts in the midst of wars for the wealthiest people, and then to add insult to injury, they passed the Medicare prescription Part D Program—a needed program, for sure—and didn't pay for it, adding hundreds of billions of dollars to the debt too. So at the end of 8 years, George W. Bush, who inherited a surplus from Bill Clinton, gave us twice the national debt, gave us the largest annual deficit we had ever seen, and left the economy in shambles.

Witness the recession we are currently in just starting to inch away

from. That was the record of the fiscally conservative, let's-get-tough-on-debt Republicans for 8 years, and many of those years they controlled Congress. All of those years the President had a veto pen.

When I come to the Senate floor and hear my Republican colleagues relate how they have a better vision of America—and their vision is in many respects a good one, to reduce debt for future generations—the record speaks for itself. They failed.

Now comes President Obama, and he says to Congress: We have to get the economy moving again. Some Republicans are criticizing him saying it is a mistake for us to put money into our economy. The President said we have to put people back to work, give working families a tax cut, create jobs building highways and infrastructure, do the things that help small businesses expand their payrolls. It costs money for sure, and I know we are in debt, but if we don't get that engine of the economy churning and moving forward, then we will never get out of this hole and more suffering will be the lot of the American people.

Not a single Republican would support that, not one. We didn't get one Republican vote for that in the House of Representatives. Over here, we had three—the two Senators from Maine and the Senator from Pennsylvania who has since crossed the aisle and joined the Democratic party. That was the reality. As a party, the Republicans opposed stimulating the economy in the midst of the deepest recession.

Now comes health care. President Obama says to us: Before you pass this health care bill, there is one basic rule—do not add to the deficit. Find a way to reduce health care costs for individuals, families, and businesses. Do not add to the deficit. The Congressional Budget Office took a look at this bill—it took a year to prepare it—and said it is the biggest deficit cutter in the history of the United States because over 10 years, this bill alone will save the Federal Government \$130 billion and over the next 10 years, \$650 billion. If we continue without changing the current health care system, it will mean more debt for everyone, higher premiums, higher costs, and more deficit. That is the fiscal choice we face.

I hear Senator MCCAIN, who is my friend—I respect him. We served the same period of time together in the House and Senate, and we disagree on a whole lot of things. But I like him. I think he likes me a little bit some days—come to the floor and say: Do you know what is wrong with this Department of Defense appropriations bill? In his words, the Democrats have “larded it up.” They have larded on things.

What is the lard in this bill? The extension of unemployment benefits for

millions of Americans out of work. Last time I came to the floor of the Senate it passed 97 to nothing—not exactly a hotly controversial issue. Sadly, it took us 1 whole month to get to a vote. Then it passed 97 to nothing.

We larded it up with food stamps. In the State of Michigan, one out of six people is on food stamps. Food stamps in this economy are a lifeline for people to feed their children when they are out of work and don't know where the next meal is coming from. Is that the kind of squandering of taxpayers' dollars that we often hear from Senator MCCAIN. I don't think so. He is not a hardhearted man. He wants to feed children. He wants food stamps.

How about COBRA? COBRA is an acronym for a program that allows people to pay for health insurance. One of the first casualties when you lose your job is your health insurance. We want people to keep that health insurance. We help them pay the premiums. That is in here. I don't think we are larding it up when we include that.

The extension of the PATRIOT Act for a few months. Of course, if we are going to be vigilant against enemies, we want to extend it. We can debate what should be in it, but an extension of the PATRIOT Act is going to mean that America will be safer. The alternative is unacceptable.

Money for the Small Business Administration—that is where jobs are created. If we don't give money in loans to small businesses, we will see people losing their businesses and cutting back on employment. This is just fundamental. There is no credible, respectable, mainline economist who argues that the way to get out of a recession is to cut spending at the Federal level. Exactly the opposite is true. You have to help people with the safety net. You have to try to create a catalyst for more job creation. That means spending money.

I don't think this is lard and earmarks and porkbarrel. We are talking about the basic necessities of life. The Department of Defense appropriations should not be filibustered as the Republicans are currently doing.

Before I hand the floor over to the Senator from Oregon, I salute him. He has given more hard thought as an individual Senator than almost anyone in this Chamber about what to do with the system. The Senator's premise in health care is the right premise—more competition, more choice. We may disagree on some concepts. That is what we are here for. But I want to salute the Senator from Oregon and tell him this underlying health care bill is going to do things for America that need to be done. It is going to start—not as much as we would like—to bring down the increase in costs and provide affordability for families and businesses. It will extend the reach of health insurance to 94 percent of the

American people. It is amazing. It is historic. It is going to create a Patients' Bill of Rights which gives every family in America the legal tools to fight back when the health insurance company says no to their doctor and no to what they or their families need. It has a lot of positive things in it.

I want to salute Senator WYDEN, as well as Senator BERNIE SANDERS of Vermont, for one particular provision in the bill. We don't have the details yet, but we believe this will result in the most dramatic expansion of health care clinics across America. Those of us who represent communities such as Chicago and even downstate Illinois know these clinics are the first line of defense for medicine. Men and women can walk through the front door and find primary care and have their needs taken care of even if they are poor. Some of the most dedicated, hard-working professionals in medicine are in those clinics.

I have walked into many in Chicago, such as the Alivo Clinic where my friend Carmen Velasquez is the director. I have said: Carmen, if I were sick or my wife were sick, I would feel confident walking in the front door of your clinic. You have the best people on Earth who are doing dramatic things.

I ask unanimous consent there be printed in the RECORD an article from the Chicago Sun Times that talks about the terrible health care disparities in the United States, particularly between African Americans and White Americans.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Sun Times, Dec. 18, 2009]

HEALTH GAP KILLS 3,200 BLACK CHICAGOANS EVERY YEAR

(By Monifa Thomas)

The wide racial gap in health is growing in Chicago, a major new study has found.

Already lagging far behind whites on most key measures of health, blacks in Chicago have fallen even further behind in 11 of 15 areas reviewed by Chicago's Sinai Urban Health Institute between 1990 and 2005—including infant mortality, heart-disease deaths and diabetes.

There's a stark, human cost in that: In all, the researchers estimated that the toll of the black-white health disparity is an additional 3,200 deaths of African Americans in Chicago every year.

It isn't that blacks' health is declining. In fact, overall, the health of both African Americans and whites in Chicago and across the United States has improved on most of the measures studied between 1990 and 2005. But whites showed gains at a sharply higher rate, resulting in a wider gap, according to the Sinai institute, which is part of Chicago's Sinai Health System and which works to find “approaches that improve the health of urban communities.”

Nationally, the racial gap in health between blacks and whites in the United States has remained fairly constant over the same 15-year period, according to the new analysis, which was abased largely on communicable disease reports and birth and death

records and was published online Thursday in the American Journal of Public Health.

In Chicago, areas where the divide between blacks and whites in Chicago worsened significantly included: the death rates from heart disease and breast cancer, rates of prenatal care during the first trimester of pregnancy and the number of cases of tuberculosis.

The death rate from all causes for black Chicagoans was 36 percent higher than whites in 1990. By 2005, the difference had grown to 42 percent. In contrast, at the national level the racial gap in death rates shrank, going from 35 percent to 29 percent.

The researchers attributed the growing racial gap largely to whites' greater ability to benefit from health care advances because of "racism and poverty."

"What's happening is that, as advances become available for these different diseases, white people are able to gain access to advances, and black people are not," said Steven Whitman, director of the Sinai Urban Health Institute. "It's absolutely essential to understand the underlying structural issues that are causing these disparities: those are racism and poverty."

Whitman said the segregated nature of Chicago puts minorities at a disadvantage for accessing high-quality health care. He also noted that blacks in Chicago often live in poorer neighborhoods with underperforming schools, fewer parks and recreation areas and more "food deserts"—areas that don't have supermarkets and the array of healthy foods they carry.

What isn't clear and needs to be studied, according to Whitman, is whether the disparities seen in Chicago are worse than in other cities.

Romana Hasnain-Wynia, director of the Center for Healthcare Equity at Northwestern University's Feinberg School of Medicine, said the racial health gap isn't helped by "one size fits all" public health messages aimed at lowering death rates from heart disease, cancer and other illnesses.

"We have to be targeted in our interventions," said Hasnain-Wynia, who was not involved in the study.

James Randell recently was diagnosed with heart disease at Mount Sinai Hospital after coming in with chest pain. The Chicago man said he was troubled—but not surprised—to learn that African Americans aren't seeing the same level of improvement in their health as whites. His layman's take? It's the result of a lack of health literacy among minorities.

"A lot of us, we don't know what we should be doing to be healthy," said Randell, 47. "If I had taken better care of myself, I wouldn't be here."

The gap between blacks and whites in Chicago on a number of health indicators has increased between 1990 and 2005. Here are a few areas where the divide has grown significantly:

Heart-disease deaths: 1990: 8 percent difference (meaning deaths for blacks were 8 percent higher than whites). 2005: 24 percent.

Female breast-cancer deaths: 1990: 20 percent difference. 2005: 99 percent.

No prenatal care during the first trimester: 1990: 119 percent difference. 2005: 199 percent.

Tuberculosis cases: 1990: 310 percent difference. 2005: 497 percent difference.

Mr. DURBIN. In heart disease deaths in 1990, there was an 8-percent difference between African Americans and White Americans. Today it is 24 percent. Female breast cancer deaths, there was a 20-percent difference be-

tween African Americans and White Americans in 1990. Today there is a 99-percent difference. Prenatal care during the first trimester, there was a 119-percent difference in 1990. Today it is 199 percent; tuberculosis, 310 percent difference in 1990, 497 percent today.

These gross health care disparities are the result of the lack of primary care in the neighborhoods and towns of America. Senator WYDEN and Senator SANDERS, thank you for leading the fight to expand that.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. WYDEN. Mr. President, before he leaves the floor, I commend the distinguished Senator from Illinois for his statement and want to make sure the body recognizes that it has been Senator SANDERS who has championed this cause relentlessly, making the case that, dollar for dollar, there is no better investment in American health care than these community health centers. I was going to spend my time talking about the opportunities for Democrats and Republicans to continue to team up on this health reform issue. I think it is worth noting that Senator SANDERS, who has championed this effort in this bill, is actually picking up on work that a number of the most influential Republicans in this country have been interested in for years.

President George W. Bush was a great champion of community health centers. BERNIE SANDERS, now in this bill, is making sure we get a very significant increase so that there will be many new clinics across the country.

There are opportunities for Democrats and Republicans to work together. I will talk about a way we can create a new marketplace in American health care through health care exchanges and get more value for the health care dollar. This is an opportunity for Democrats and Republicans to team up, much like with community health centers. I thank my colleague.

I know because of our work together on health legislation the Senator shares my view that we can continue this effort to bring the Senate together on both sides around key principles of health reform. I want to do that again this morning by focusing on one of the most transformational and least understood parts of the health care debate; that is, the question of health insurance exchanges. My guess is across the country people are still trying to figure out what in the world these are and whether this is yet some other kind of health care lingo. It is fair to say, in basic English, these exchanges will be like farmers markets. This will be an opportunity for people to go to one place and to do what they can't do in the dysfunctional American health care system today; that is, actually shop and be in a position to compare

various kinds of products and services. When you invest wisely, you can put the savings in your pocket. The reality is, that has not been possible in our country ever since the middle of the 1940s. During the 1940s, when there were wage and price controls, judgments were made about the delivery of American health care. The decision to tie insurance to someone's job made sense back then, when people went to work somewhere and stayed put for 30 years until their employer gave them a big retirement party and a gold watch.

But today's economy is very different. On average, people change their jobs 11 times by the time they are 40. We need to make sure that no longer is the consumer insulated from the health care system, no longer are most consumers incapable of being rewarded when they shop wisely. People understand that they lose out in terms of their wages if health care costs continue to rise as a result of inefficiency. So these health insurance exchanges are the key to making health care markets work, in effect, for the first time since the middle of the last century.

In the merged bill, Senator REID, in my view, has laid an important foundation. There are three fundamental principles in Senator REID's merged bill. Of course, we are going to continue to work on this. When the managers' package and this bill get out of the Senate, we are going to be working on this for quite some time. We are going to work on this long after 24/7 cable TV has moved on to other topics.

But in Senator REID's merged bill, there are three important features of the exchange. The first is, it is going to be possible for consumers to make apples-to-apples comparisons of various health care plans. Consumers will be able to see that one plan will cost them \$20 in copays for a physician visit, but perhaps another plan will cost them \$30. It will be much like you can do in a store, a Costco, a grocery store, where consumers look at products on a shelf, look at the price, look at the various offerings, and choose the best product for themselves.

The second feature in the merged bill that Democrats and Republicans alike should appreciate is that it will be possible to keep low-quality plans out of the new marketplaces. This is especially important at the outset. I learned this back in the days when I was codirector of the Oregon Gray Panthers, the senior citizens group. One of the things the country learned in the early days of Medicare is a lot of the policies that were sold to supplement Medicare were just junk. They were not worth the paper they were written on, and people would buy 10, 12, 15 policies, literally wasting money they could have used for food and fuel and paying the rent. It took us until the mid-1990s to drain the swamp, and finally we were able to do it, standardize

those packages, stop the ripoff of older people with products that literally were not worth the paper they were written on.

The consumer protection provisions Senator REID has put in the merged bill, as it relates to exchanges, are going to keep low-quality plans out. This is going to offer customers the peace of mind of knowing that when they look at the plans, they can be certain they will have to meet minimum consumer protection standards. This is an important message to send in a new marketplace, and it will be an opportunity to have a very different start than we saw with Medicare, during those early days, when seniors were sold these policies to supplement their Medicare, private insurance policies that were a lot of junk.

Finally, under the merged bill, you are going to be able to see the value you are getting for your health care dollar, in an important respect, through what are called loss ratios that insurance companies will have to make public. What this means, of course, is consumers want to know that when they put out a dollar for premiums, they will get a significant portion of that dollar back in actual benefits and services. With the exchange, it is going to be possible to finally get this kind of loss information in one place and make it public.

So what I would like to do is talk about the steps from here and particularly build on principles the President talked to us about earlier this year in terms of ideas that bring Democrats and Republicans together; that is, more choice and more competition in the health care marketplace. What we are pointing to is the day when every consumer in America can say to their insurance company: I am giving you an ultimatum. You treat me right or I am taking my business elsewhere. That is what we are pointing to.

Here are some of the steps it is going to take in the days ahead to build to that future.

First, you have to have a big enough pool of people as soon as you can so as to maximize their clout in the marketplace. You have to make sure the exchanges are open to more than just folks who have been uninsured. If you open it just to folks who are uninsured, who have not seen a doctor, who have had chronic illnesses, who have not been able to get the preventive care they need, you have coming to the exchanges folks who are sicker and, of course, they are more expensive in terms of getting them good health care, and it is harder to hold down costs.

Once you have a big enough pool, where the risk is spread across a large group of people who have a wide range of health risks, you will be in a better position to force the insurance companies to compete and drive down costs for everybody.

In effect, in the days ahead, we will be in a position to put in place a cycle in the health care marketplace that will get more value for the American consumer. More and more people will come to the exchanges because the premiums are lower. More insurers will come into the exchange because they see that is the place you have to go in order to get business. Then you have what amounts to the beginnings of a revolution in the health care marketplace: get as many healthy people into the exchange; make it impossible for insurance companies to find loopholes and use slick marketing campaigns to cherry-pick just the youngest and healthiest; force them to compete on the basis of price, benefit, and quality and then you are on your way to taking a dysfunctional American health care system and getting the choice and competition that will finally pay off for the American consumer.

There are some additional interim steps I wish to mention briefly. The majority leader, Senator REID, and Chairman BAUCUS and I have come to an agreement that will also provide the opportunity to get more choice and more competition into the health care marketplace. What we have agreed to is, folks who spend more than 8 percent of their income on health care but are not eligible for subsidies—in effect, folks with what is called the hardship waiver—they would be able to get a voucher from their employer and go into the marketplace. With that kind of approach, which would be tax free to them, our estimate is that it will be less than one-third as expensive, in terms of getting health care for those folks, as the alternative—the system of subsidies. Again, we get more people covered in a more affordable way, building on these time-honored principles of choice and competition.

Finally, Senator COLLINS, Senator BAYH, and I have a proposal, a proposal that has been endorsed by the National Federation of Independent Business, that would say that employers that are in the exchange can voluntarily say they want to give their workers more choices. In effect, it would say to those small employers in the exchange: You and your workers will have a choice to have a choice. No employer is required to do anything. But should they want to concentrate on making their widgets rather than being in the health insurance business, they would have the opportunity to do it.

What they would give their worker would be tax free to the employer, tax free to the worker. Once again, you bring the principles of choice and competition into the health care marketplace and move us closer to that day when the consumer can give the insurance company the ultimatum I have envisioned; which is: Treat me right or I go elsewhere.

I close by saying, in my view, the majority leader has laid the foundation

for a new health care marketplace. I certainly would like to do more. As the distinguished Presiding Officer knows, as cosponsor of our bipartisan Healthy Americans Act, I would like to do more, and I would like to do it faster. But make no mistake about it, this is laying a foundation to create a new marketplace in American health care, where that concept has been foreign.

To let people make apples-to-apples comparisons, keep crummy products out of the exchange, make sure people can get information about loss ratios, that is a real foundation. Then we seek to go further. We have had the counsel of some of the country's leading thinkers about American health care.

Let's get more healthy people into the exchanges. Let's make sure we have these big pools. Let's make sure the insurers cannot try to steer the marketplace because we know they are going to try, in ingenious ways through advertising and market promotion strategies, to still find the best risks. Let's build on what Senator REID has laid out with respect to the exchanges in the days ahead.

We are going to be at this a long time. You are not going to fix a dysfunctional health care marketplace in a matter of weeks. We are going to be at this the rest of this week, next week, well into 2010. I have been part of this debate since I was codirector of the Oregon Gray Panthers, going back 30 years now.

I continue to believe there is an opportunity for Democrats and Republicans to work together. Our party has been right on the issue of coverage. You cannot fix this unless all Americans have good, quality, affordable coverage because otherwise there will be too much cost shifting. But as I have said to my colleagues on the other side of the aisle—I see Senator BUNNING, and he and I have worked together on the Finance Committee—our colleagues on the other side of the aisle make important points with respect to choice, with respect to markets, with respect to competition. This is an area we can work on together.

There is nothing partisan, in my view, about creating a new health care marketplace through these exchanges. This bill lays a foundation, and there will be opportunities for Democrats and Republicans to build on that foundation in the days ahead.

I yield the floor.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. BUNNING. Mr. President, what is the current order of business?

The PRESIDING OFFICER. The Republicans control 29 minutes at this point.

Mr. BUNNING. Twenty-nine minutes?

The PRESIDING OFFICER. Yes.

Mr. BUNNING. The order of the day would be the Defense appropriations bill?

The PRESIDING OFFICER. The Senator is correct.

Mr. BUNNING. Thank you very much.

Mr. President, I rise to talk about the 2010 Department of Defense appropriations bill. There are several parts of this legislation I would like to discuss. But first of all, I would like to talk about the process the majority has used for this bill.

This past weekend, we passed an omnibus bill that jammed together six different appropriations bills. I had high hopes that this year we would not have to resort to an Omnibus appropriations bill. We have done it in the past. I was hoping this year we would not. I hoped we could go through regular order and give each bill the time and attention it deserves. In fact, I think we could have done that if we were not spending so much time on the floor with this monstrous health care bill. We have had a lot of floor time but not much action on health care. However, earlier this week, we passed a bill containing all the remaining appropriations bills, except the one for funding the Department of Defense.

Why was this done? Why was this bill left for last? It was done because this bill was used as a political football. The majority felt that because this bill contains important funding for our troops, they could attach unrelated provisions to it and then insinuate that anyone who has concerns about these provisions and tries to slow down the bill to look at them is jeopardizing our fighting men and women. In fact, some Members of the majority have made those claims this week.

My question to them is, why didn't the majority include the appropriations for the Department of Defense in the omnibus we just passed? The funding for our troops could have been signed by the President and made into law by now. However, the majority wanted to use this funding as a political hammer. This is not right, and the American people should know what is really going on here. Our troops deserve better.

I wish to talk about some of the provisions contained in this bill, beginning with the detention facility at Guantanamo Bay.

The bill before us does provide that no detainees from Guantanamo may be released into the United States. It also does not provide funding for the closure of the Guantanamo detainee facility. These are good provisions, but they are not good enough. This bill does not prevent sending these prisoners to the United States for trial and housing them in our own backyards. It would be much improved if it contained a complete ban on moving them to the United States.

On January 22, 2009, President Barack Obama signed an Executive order to close the detention center at

Guantanamo Bay. I am against the shutting down of that facility. It is absolutely irresponsible to order this closure and not have a plan in place to address what the United States will do with all the detainees held there. Under no circumstances should they be brought to the United States. The terrorists housed at Guantanamo Bay are the worst of the worst. I have personally visited these facilities and met with the brave men and women who guard these detainees. As long as the terrorists remain housed at Guantanamo, they cannot harm us or any of our allies. However, the administration has seen fit to push ahead on sending Guantanamo detainees to the United States. In fact, we learned they now plan to send some of the most dangerous terrorists in the world to Illinois. President Obama could not bring the Olympics to Illinois, but it looks as though he will bring terrorists there instead. The plan appears to be to use a currently empty supermax facility in northwestern Illinois to hold Guantanamo detainees.

I think bringing these terrorists to the United States is a terrible idea. First of all, there are serious legal problems associated with bringing these terrorists to our soil. The Supreme Court has noted that it is "well established that certain constitutional protections available to persons inside the United States are unavailable to aliens outside of our geographic borders."

The nonpartisan Congressional Research Service said that "noncitizens held in the United States may be entitled to more protection under the Constitution than those detained abroad." This means they could be afforded extra rights which are available to American citizens. They could include protection under the fifth amendment due process clause, which would cover how they are confined, or they also may raise claims regarding religious practices.

Furthermore, while the Obama administration may not have the intention to release any detainees, their wishes could be overruled by a civilian judge. Guantanamo detainees who are cleared for release have, in fact, petitioned the court to be released into the United States. Last year, a Federal judge even approved such a request before being overruled by an appellate judge. The reason the higher court cited for overturning the ruling was that the government could not be forced to accept someone into the United States from outside the country. If we start bringing detainees to the United States, this legal safeguard will be removed.

Throughout the debate on whether closing Guantanamo is good policy, supporters of the idea have consistently maintained that the facilities serve as a lightning rod for anti-U.S.

sentiment and that it is used as a recruiting tool for terrorists. I don't buy that argument. I would argue that the greatest recruiting tool for these terrorists is the United States itself and our way of life with democracy and freedom of religion. What if it was found that the Statue of Liberty was being used as a symbol to incite attacks on our country? Would we tear it down? Of course not. The United States has suffered many terrorist attacks prior to the opening of the Guantanamo Bay facility, including the horrific events of September 11, 2001. If we close this facility, then those who hate us will simply find another tool of motivation for their followers.

The bottom line is that the Guantanamo Bay detention facility works and we are putting ourselves at a disadvantage by not using it. I wish this bill had taken a stronger position on making sure this facility is not abandoned.

As everyone here knows, this bill also provides further funding for the wars in Iraq and Afghanistan. I was glad to see that the President finally announced a plan for Afghanistan earlier this month. We waited far too long for this decision. I was very concerned that this wait was unnecessary and was putting the lives of our servicemembers at risk. I am glad he finally heeded the call of our commanders on the ground for more troops. In fact, I agree with the bulk of his strategy for waging the war in Afghanistan.

However, I strongly disagree with him on one particular issue. I have serious concerns about the administration's decision to set a timetable for troop withdrawal. I could not disagree more with the announcement that U.S. troops will begin leaving Afghanistan in July of 2011.

What makes this situation even more confusing is that the announcement also claimed that any withdrawal will take conditions on the ground into account. This is puzzling and it is a contradiction. What will the administration do if conditions on the ground dictate that no troops be removed from Afghanistan? Will it proceed with a withdrawal anyway? I don't want to keep any of our brave men and women in Afghanistan any longer than absolutely necessary, but we have work to do. Leaving before it is done is unacceptable.

By announcing an arbitrary deadline for our forces to come home, possibly before the job is done, the President is telling our enemies how long they will have to hold out and wait until we leave. They will bunker down and emerge after we are gone. It is unimaginable what the horrible consequence of this would be. I was glad to see this strategy rejected in Iraq, and it is no less foolish to apply it to the war in Afghanistan. I fear we could be setting our efforts up for defeat and putting our fighting men and women in

further danger, and I am deeply troubled by this.

While I strongly oppose President Obama's notion for a timeline for withdrawing from Afghanistan, I do support his call for a surge of troops to stabilize the country. We learned a great deal from our counterinsurgency strategy implemented by GEN David Petraeus and Ambassador Ryan Crocker in Iraq. He knew that if the U.S. forces spent most of their time only in a small protected area such as the Green Zone in Baghdad, then little would be accomplished.

The surge in Iraq was successful not only because there were simply more troops in Iraq; it was what they did that mattered. By simply going out into insurgent areas and being more visible, this gave reassurance to the local populations that Americans were still around, but it did not stop there. Previously, coalition forces would clear an area but then retreat. This time, they were there to stay.

Our soldiers became involved with the local communities, assisting with infrastructure and even doing things such as helping to set up farm cooperatives. The strategy evolved from only clear, to clear, hold, and build. Soon, our forces had the trust of the locals. The citizens of Iraq began to help with the stabilization and rebuilding of their country. They began to cooperate with our military efforts and help us fight insurgents. Before, they were scared and powerless. Now they were safe and had the ability to make their lives better. These conditions have made it very difficult for our enemies to operate. It is now time to apply these lessons to Afghanistan. It is time to clear, hold, and build there.

It is unfortunate but true that the Afghan Government suffers from a deplorable level of corruption. However, it will not do us any good to refuse to help until things get better. This is because they won't get better without our help. The citizens in Afghanistan by and large do not trust their government, and this creates an atmosphere that is very helpful to our enemies. When our forces move into communities, they create stability and undermine insurgent forces and corruption.

Use of the proper strategy can help improve the government, as we have seen in Iraq. However, if it is not improved, then the people will never trust it and it will not protect them. They will have no choice but to comply with the wishes of the insurgents. Eventually, the government will slide into chaos and the Taliban and al-Qaida will return to power. We cannot let this happen. A return to Afghanistan's previous status as an unhindered launching pad for global terrorist plots is totally unacceptable. We know all too well what the consequences of this are. However, it could possibly get even worse than that.

We have seen the difficulties Pakistan has had in fighting the Taliban on its own soil. Currently, U.S. and NATO forces are fighting and hopefully soon beating the Taliban and al-Qaida in Afghanistan. If we were to leave before finishing the job, the result could be disastrous for Pakistan. A Taliban-controlled Afghanistan would be a sanctuary and staging point for the radical Islamist terrorists to attack from. Pakistan is a nuclear power, and its fall to these groups would be utterly catastrophic.

Victory in Afghanistan is essential.

We learned a lot from the Bush administration's revised strategy for Iraq that put that war on a path to success. It would be a shame if we did not apply those hard-learned lessons to the current conflict in Afghanistan.

As I mentioned at the beginning of my remarks, this is a large bill—larger than it had to be. The use of this Defense appropriations measure as a political football is why it is so big. I think it is a shame that the majority chose to legislate in this manner.

We did not need to do it this way. It is probably too late in this process for us to fix this mash-up of different bills and give all of these issues the individual attention that they deserve. However, hopefully, next year will be different. Hopefully, the majority will not try to once again politicize the bill that is supposed to be about funding our military. Hopefully, they will not hold this bill back and wait until the last minute like they did this year. It is the responsibility of the majority to set the schedule of the Senate.

We will see this time next year if they are still devoted to playing politics with the funding of our troops. I sincerely hope they are not.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Ms. MURKOWSKI. How much time remains on our side?

The PRESIDING OFFICER. There is 10½ minutes remaining.

Ms. MURKOWSKI. Mr. President, I rise to speak today on H.R. 3326, the Defense appropriations bill for fiscal year 2010. I appreciate all of the hard work that goes into the formulation of this bill and commend the leaders of the Defense Appropriations Subcommittee, Mr. INOUE and Mr. COCHRAN, on an outstanding product.

It is a product that does justice to the men and women who wear the uniform of the United States in defense of peace and liberty. It is a product that does right by our military families who we must never forget also serve.

I would like to take a few moments to share some comments about what this bill means for the fighting men and women in my State of Alaska. Alaska is home to about 21,000 men and women who serve on active duty. Add to that number approximately 4,700

members of the National Guard and Reserves.

The bill that is before us supports the soldiers of Fort Richardson, Fort Wainwright and Fort Greely; the airmen of Elmendorf Air Force Base, Eielson Air Force Base, Clear Air Force Station, and 18 radar sites in remote, rural areas of the State; the Marine detachment hosted by Elmendorf Air Force Base; and Naval Special Warfare Center Detachment in Kodiak.

It supports units big and small. Units like the 4th Airborne Brigade Combat Team, of the 25th Infantry Division based at Fort Richardson near Anchorage which number in the thousands of troops.

The 4th Airborne Brigade Combat Team is known as "the Spartans." This Spartan Brigade will be spending Christmas in Afghanistan.

Also in Afghanistan this Christmas are 11 members of the Alaska Air National Guard 176th Wing who left Anchorage on November 5 after serving an early Christmas.

We wish you well this Christmas. We are thinking about your families and we collectively pray for your safe return.

Mr. President, I mentioned Christmas. We know that we are upon the holiday season, although in this Chamber it certainly doesn't feel that way. There is no sense of giving and sharing and the general cooperation and cheeriness that comes—at least in my family—with the holiday season.

I think we have to also, as we approach the holidays, think about what is going on throughout the country as we face an economic recession. Families are choosing to do differently this year. They are squeezing back on their family budgets, and they are making some different choices—some hard choices. I think it is fair to say that folks are probably looking at us in Congress and saying: We wish they would be doing more of the same, making some of these hard choices when it comes to spending.

To put it into context in terms of what we have seen in Congress this past week or so, last Sunday—less than a week ago—we passed a \$1 trillion-plus spending bill. These were six different appropriations bills, and three of those six bills were not subject to Senate amendment and debate. We went above and beyond the regular order and produced an omnibus package. Again, it was a package in excess of \$1 trillion in spending or about a 12-percent increase over the previous year.

Shortly before that, about a week prior to the action on the omnibus, the EPA, the Environmental Protection Agency, issued an endangerment finding. This endangerment finding—for those who are following this issue, I think many recognize that the potential cost to this country, the financial burden that could be placed on this

country if we advance through the regulatory process, as opposed to the legislative process, these regulatory burdens, I think it is clear the costs and impact to this country and our Nation's economy are truly dangerous.

When we talk about an endangerment finding coming out of EPA, it is just that—it endangers our economy, it endangers jobs, and it endangers the competitiveness of those of us in this country.

Again, people are looking at this and saying: What is going on in Washington, DC? Don't they realize we need to be working to save and create jobs? We need to do positive things that will help us as a nation and our economy, not those things that legislatively, or through regulation, would hurt us.

Now we are in the midst of trying to move through a health care bill in the final days before Christmas—a \$2.5 trillion reform package that, at this point in time, we are not quite sure what is in it. But when it is revealed, it is possible we will have about 36 hours to review it, to understand it, and to appreciate the implications for us in our States and the impact to our economy.

Again, one of the aspects we do know about this is that the framework we are operating off of is one that will increase taxes on small businesses and individuals in this country. It will cause cuts to Medicare at a level that is incomprehensible, almost $\$1\frac{1}{2}$ trillion. For all that we can tell, it is going to increase premiums.

Alaskans are looking at this package and saying: This isn't the reform we thought the Congress was going to be giving us.

Following on the track of the spending, we are going to be discussing increasing the debt limit. Again, people in the rest of the country are wondering: What is going on in Washington, DC. What is in the water that is causing them to spend at levels that are almost uncontrollable?

Our reality is that you and I are not going to be facing the financial consequences in the outyears so much as our children. During the holiday season—I have kids, and I still try to keep their presents secret. So I have a tendency to rat-hole them away, hide them.

The one thing we cannot hide from our children this Christmas is the fact that what they will be receiving is an incredible debt. That is not a "gift" that we can afford to give our children. When it comes to the discussion about the health care bill and the consequences of it, there have been a great number of journalists who have been opining and commenting. We certainly have kept the press busy with this.

There was an article on the opinion page in the Washington Post a couple days ago by Michael Gerson. He made a statement that I would like to read. He states:

The entire Democratic health reform effort is foundering, as its deep bow enters the

shallow channel of fiscal reality. And that splash you hear is the sound of various groups being thrown from the ship to lighten the load. Instead of beginning with affordable, realistic objectives, President Obama and the Democratic Congress set the goal of guaranteed, comprehensive coverage for everyone. This requires a lot more money in the system, which must come from someone.

Then I go to an article in this morning's Hill magazine. For this one, the headline is "Senate Plan to Tax Health Plan is Bad Policy." It starts off:

Millions of working Americans will pay thousands of dollars more in taxes under the Senate proposal that taxes healthcare benefits to finance reform.

According to the Congressional Budget Office, this excise tax will affect one in five Americans.

Millions more will have their health benefits cut and see their costs go up. This is the opposite of healthcare reform.

You might think that was an article that I might have written or that some of my Republican colleagues wrote. Actually, this article was penned by Jim Hoffa, who is the Teamsters' general president, and Mr. Larry Cohen, the president of Communication Workers of America.

Mr. President, my point in saying this is that as people understand more and more about what is contained within this health care legislation, they are coming to understand the impact to them and to their families. They are quite anxious because they know that as the years go out, the costs don't go down, the costs only go up.

We are concerned in Alaska about access to care. I have stood on this floor many times and talked about how, in Alaska, we simply do not have the Medicare providers that we need to see the people in my State, particularly in our largest communities. We just learned that one of the medical clinics in Anchorage has made an announcement. They issued a letter to their patients saying that Northwest Medical had four practicing physicians who were seeing Medicare patients earlier this month, and three of the four physicians opted out of Medicare, resulting in 550 Medicare beneficiaries being without a physician.

What is happening is that they are calling us for a doctor's appointment. The problem is that we can't get them in anywhere either. We have one facility in Anchorage where they are taking new Medicare-eligible individuals. When we did a count—the institute of economic research did a count as to how many providers in Anchorage, AK, were taking new Medicare individuals. It was 13. We heard from a provider just last week that she is opting out. These three make a total of four. This is simply not sustainable.

For us as a Senate and as a Congress to be moving forward in the name of health care reform, any provision that will further jeopardize access for the people of Alaska or the people of rural

America or all over this country, that we would do anything that would jeopardize their access is foolish. It makes no sense.

We must stop this reform effort. We must do our job in Congress to provide the people of my State, and all of our States, real health care reform that reduces the cost, provides for access, and does right by the American people.

With that, I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. BROWN. Mr. President, as we near Christmas, our troops are overseas, away from their families during this holiday season, facing dangers most of us cannot even contemplate. Many in this Chamber have long supported the wars in Iraq and Afghanistan, but the loudest supporters of war today are leading the charge in trying to block the Defense appropriations bill.

It is irresponsible, plain and simple, to play politics with the funding of our troops. It is a disservice to them. It is a disservice to their families. It is a disservice to our great country.

We do not agree on health care reform. I understand that. I get that. But to hold up the funding for our troops, I do not get that. This bill funds our overseas military operations and provides our troops with a hard-earned pay raise. It includes funds for joint IED Defeat Fund, Mine Resistant Ambush Protected Vehicles, so-called MRAPs. It provides equipment for our National Guard and Reserve.

The tired politics of delay and distraction offered by my Republican friends does a disservice to our troops, to their families, and to the Nation.

It does a disservice to the millions of Americans also who would benefit from the provisions of the Defense appropriations bill that would extend the COBRA Premium Assistance Program.

This month, thousands of Americans—hundreds in the Miami Valley were hit so hard, where in the Dayton area they were hit so hard from DHL to General Motors to NCR to the suppliers for those companies, hundreds and hundreds in the Mahoning Valley, where people in the Washington Post read about Warren, OH, what happened to people there with this terrible recession.

It is a disservice to hundreds all over my State who saw a 65-percent spike in their monthly health insurance premium. That is because the 9-month COBRA subsidy—one of the things we did right earlier this year. The government has never stepped in to do that to help people in tough times with their health insurance. The 9-month COBRA subsidy started phasing out in December.

COBRA provides a much needed health insurance option to those Americans out of work. It allows workers to stay on their previous employer's

health plan for 18 months, but it could be prohibitively expensive. That is why I introduced a bill 11 months ago—the Coverage Continuity Act—to provide a health insurance subsidy to laid-off workers. They simply cannot afford COBRA without it.

Remember, COBRA is the health insurance program where if you lose your job, you can keep your same health insurance. You continue to pay your own premium, but you have to pay the employer contribution. If you have lost your job, it is pretty hard to do that, putting it mildly.

This, for the first time, gives a very generous subsidy so people can keep their insurance. A version of that proposal I introduced in January was included in the stimulus. It provided a 65-percent subsidy toward the price of a COBRA premium for recently laid-off workers.

Now that subsidy has expired for some. It is about to expire for many more. Nearly 16 million Americans are out of work still and 14,000 lose their health insurance every day.

When I hear my friends on the other side of the aisle say: You have to slow down on health reform, we don't want to do this too fast, they need to go back to their States. I hope they get some time off at Christmas. I hope, after they spend time with their family, they go out and start talking to people getting hurt by this recession. They are not hard to find. They are in every neighborhood in every community in every State—people who lost jobs and are losing their health insurance.

In Ohio—from Toledo to Millard to Mansfield to Ravenna, Gallipolis—350 Ohioans every day lose their insurance. Across this country, 1,000 people a week die because they do not have health insurance. Mr. President, 1,000 people a week die because they do not have health insurance. Yet too many people in this institution, too many people think we have to wait.

They need to know, when you think about 1,000 people dying every week without health insurance in this country, they need to understand a woman with breast cancer is 40 percent more likely to die if she does not have insurance than a woman who has breast cancer with insurance. If that is not reason enough for them to get on board and stop their delay tactics and quit saying: Let's slow down; let's slow down, it clearly has not worked. That is why the COBRA extension is so important. The extension is similar to one included in S. 2730, the COBRA Subsidy Extension and Enhancement Act, which I introduced with Senator BOB CASEY in November.

The bill before us will ensure Americans receive the COBRA subsidy for 15 months, not 9. It means that most workers who first started receiving the subsidy last March when it started will

continue to receive it until May of next year.

It extends the day on which you can be laid off and still be eligible for the subsidy. Under current law, only those who lose their job in the next 2 weeks will be eligible. We need to extend that eligibility window at least to February of next year. This will help Americans, such as Don Hall from Castalia, OH. Castalia is a community west of where I live near Sandusky, OH, in the north-west part of the State.

Don was laid off from an auto supplier in October of last year. As severance, the company gave him 6 months of paid COBRA coverage and then he became eligible for the premium assistance program we included in the stimulus.

However, his ninth and final subsidy payment came through in November. He is still out of work. Earlier this month, on December 1, he and his wife were charged \$763 for their coverage, up \$500 from the month before. He was paying about \$250. Now he is paying \$763. Don is also fighting to save his house from foreclosure. He has cut back as much as he can, but he doesn't want to stop paying for a cell phone because that is his only way for potential employers to contact him. He has had six job interviews in the last 13 months. None have panned out because there are not enough jobs in Castalia, Sandusky, Toledo, and Lorain.

Don worked hard and played by the rules. Similar to so many American men and women, he is experiencing hard times and needs some help. They on the other side of the aisle say: Let's slow down; we have to slow down.

For Don, slowing down means the loss of his house. It means he is more likely to get sick and ruined financially because they want to slow down.

Don's story is not unique. Take Tim Wolfrum from Milford, OH. His COBRA subsidy is scheduled to expire at the end of December, at which point he will owe \$417 a month. That is nearly as much as he receives in unemployment benefits.

When Tim started shopping around in the individual market knowing he would be forced out of COBRA, everything he found either had exorbitant premiums or bare-bones coverage. That is because Tim suffered a heart attack 2 years ago and suffers from a digestive disease. These preexisting conditions made him a liability for private insurance companies.

Tim is confident he can find a job once the economy picks up. But in the meantime, he needs the COBRA subsidy.

Carol Williams from Dayton, OH, is in a similar bind. She is 63 years old and was employed at R.J. Reynolds for 18 years before being laid off in October of last year. She started receiving the COBRA subsidy in March but was responsible for the entire premium this month.

Remember, COBRA is what you were paying when you were employed. If you lose your job, you continue to pay COBRA to keep your insurance and you also have to pay your employer's contribution. Almost nobody can do that after they have lost their job for very long. That is why the subsidy we put in the stimulus package back in February and that is why the subsidy we want to put in this Defense appropriations bill is so darn important to so many Americans.

Because Carol remains unemployed and suffers from minor thyroid problems and high blood pressure, her insurance options are limited.

She decided to pay the full COBRA premium in December, with the hope that Congress will act to extend the subsidy. Here is her calculation: While they delay, while they say: Let's slow down, on the other side of the aisle, Carol says: My premium went up several hundred dollars. If I cancel, I will never have insurance. If I dig deep and do not heat my house as warm, do not eat as well for the next few weeks, I will pay more and hope Congress passes this so she can get that better rate again.

That is what delay says; delay for their little political reasons and the little political games and tricks the other side of the aisle is playing, such as they did at 1 o'clock this morning, puts Carol Williams in a position where she has to make those hard decisions. I wish some of my friends on the other side of the aisle would meet the Carol Williams of the world. I wish for 1 day we could walk in the shoes of the Carol Williams of the world and see the kind of horrible decisions they have to make because they want to play their political games.

Let's not let Carol down and Don and Tim down. Let us in this Chamber hear their cries. I hope they hear the cries of thousands of people in Helena, Kalispell, Wilmington, Dover, and all over this country. It is too important for us to fail.

I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I thank my friend from Ohio for his statement, for two reasons. It is very much on target and, second, a couple towns in my state of Montana have the same problems that some of the towns in his State of Ohio have. We are all in this together. So many people and so many towns all across the country need health care coverage or are denied coverage because some insurance company has said they have some preexisting condition.

I thank my friend for his statement.

The Defense appropriations bill before us provides essential support for American troops fighting for our freedom abroad. The bill before us also continues crucial safety net programs

for American families, for those families struggling with tough economic times here at home.

What our colleague and former majority leader, ROBERT C. BYRD, said in 1988 remains true:

Without economic security, we cannot have national security.

Millions of jobless Americans struggle for economic security every day. Even people with jobs are seeing their paychecks stretched.

For every six unemployed workers, there is only one job opening—only one for every six unemployed. We need to continue to work to help create jobs. We also need to address the challenges that unemployed Americans are facing right now. This bill takes action to help Americans who are seeking jobs.

Without this bill, the three unemployment insurance provisions established or continued by the Recovery Act that we passed at the beginning of the year will expire in 2 weeks. If we don't pass this legislation, unemployed Americans will not be able to apply for new unemployment insurance benefits after December 31, and those who are currently receiving benefits will lose this vital help.

The loss of these benefits will be devastating to many Americans, including a young father in my home State of Montana from whom I heard recently. He was working hard to support his family at a carwash in northwestern Montana. Then he was laid off. Since then, he has simply been unable to find work.

His work situation only adds to his concerns because he recently lost a child to sudden infant death syndrome, and his wife is now pregnant with another child. They are living in a house 20 miles out of town. They heat their house entirely by burning wood because that is all they can afford on his unemployment benefits.

Without this bill, his benefits would run out in 2 weeks, and his family would be left in the cold while he struggles to try to find work.

This bill would extend emergency unemployment compensation for 2 months. That program provides additional weeks of unemployment benefits for out-of-work Americans, such as my western Montana constituent, during this period of high unemployment.

The bill would also provide 2 additional months of extended unemployment benefits. Those benefits provide targeted assistance to areas of our country that have been affected by particularly high unemployment rates.

The bill includes a 2-month extension of the Federal Additional Compensation Program. That program increases all unemployment benefits by \$25 a week. Together, these provisions will protect unemployment benefits for roughly 2 million Americans. Those are people who would lose unemployment benefits if we do not pass this bill.

These extensions would provide much needed economic security for Americans who are struggling to find work in these uncertain times.

I do not think enough of us realize the depths of angst people suffered when they are out of work and trying to find work and when potentially their unemployment benefits, which help a little bit, might not be extended.

In addition to the critical unemployment insurance extensions in this bill, this package also includes an extension of what people call COBRA. What is that? That is assistance that helps unemployed Americans and their families to maintain their health care coverage.

When workers lose their jobs, they lose more than just their paychecks. Unfortunately, they also lose their ability to afford health insurance coverage as well.

To address this problem, the Recovery Act we passed earlier this year provided assistance to help their families to pay for health insurance while looking for a new job.

Fortunately, in most cases, workers who lose their jobs have the right to keep their employer health care coverage for up to 18 months under the COBRA program. It is called that after the name of the Consolidated Omnibus Budget Reconciliation Act that set up the program. That is why it is called COBRA. To be eligible for COBRA health benefits, workers typically had to pay all the premium costs, plus an additional 2 percent for administrative costs.

Can you believe that? People laid off have to pay all the costs, plus an additional 2 percent. That is a penalty. It is not a gift. It is not assistance. It is a penalty.

Paying the full premium, plus administrative costs, is simply more than most families can afford when out of work. It is just plain wrong that we even had that in the law in the first place.

Fortunately, this provision, the COBRA provision in the Recovery Act, provides relief to struggling workers. And what did it do? It made a change. That provision covered up to 65 percent of health premium costs for up to 9 months for unemployed Americans. Previously, it was zero percent, and now it is 65 percent of health premium costs for up to 9 months for those who are unemployed.

This premium subsidy has made a real difference in helping unemployed workers and their families maintain health insurance. Roughly 7 million Americans have benefited from this assistance. The bill before us today would extend that for another 6 months for those who remain unemployed. In addition, the legislation would offer similar assistance to people who lose their jobs between now and the end of February.

This assistance is the right prescription for families in these tough eco-

nomic times. For many Americans who have lost their health coverage because they have lost their jobs, this benefit provides critical help to ensure they can get their health care when they are in need.

This bill also protects access to health care for seniors and military families. The legislation would ensure that doctors will not suffer a reduction in payments for their services. The bill would reverse planned cuts to physician payments under what is called the sustainable growth rate, otherwise known as the SGR. Blocking cuts to doctors' payments would keep health care available to seniors in Medicare, and it would help keep health care available to military families insured by the TRICARE program. Without this provision, Medicare and TRICARE providers would see a 21-percent cut in their payments. That could make it difficult, obviously, to continue to participate in the program. Doctors say they can't do it. They are not going to participate.

I am committed to finding a permanent solution to the flawed payment formula that has caused this cut. In the meantime, this bill would make sure our physicians in Medicare and TRICARE will not face deep, unfair cuts. This bill would help ensure they can continue to care for our seniors and military families—another reason this legislation is so important. Not only does it help fund our troops, but all these other benefits are here, those I am outlining, which make a big difference and mean so much to so many people, basically people who are out of work in these tough economic times.

The bill also includes a provision to protect access to critical safety-net programs for low-income families who would otherwise lose those benefits in already tough economic times.

This legislation would hold the poverty level constant at the 2009 level. That would prevent a decrease in the year 2010, because prices went down this last year. This legislation would thus keep struggling families, who are right at the poverty line, from dropping off of critical safety-net programs. To keep up with the rising cost of living, the Federal poverty level is adjusted for inflation each year. Because of the great recession this year, prices actually went down. There was what is commonly called deflation instead of inflation. As a result of this deflation, the Federal poverty level could actually be lower in 2010 than it was in 2009. That means American families right at the poverty line, who rely on programs such as Medicaid, home heating assistance, and food stamps, could actually lose their access to these vital services even though they did not have any additional income. This legislation would allow families who qualify for safety-net provisions today to stay on those

critical programs if their circumstances don't change. These families cannot afford to bear any additional hardship in this recession, and this provision would ensure they do not lose the vital services they need to keep them afloat.

This bill also extends vital funding for the repair and maintenance of our roads and our bridges. This would save hundreds of thousands of highway jobs. These are jobs that pay well and jobs that cannot be shipped overseas. This provision provides a 2-month extension of Federal highway funding—not very much but 2 months is better than no extension, and that will allow important repairs to America's roads and bridges to continue so we can, next year, pass a meaningful highway program, a multiyear program, hopefully 4 or 5 or 6 years.

Without this provision, this 2-month extension, the Federal Highway Administration and construction projects across the Nation will be forced to shut down, taking thousands of jobs along with them. The safety of our Nation's roads and bridges is vital. And at a time when unemployment is already more than Americans can bear, we cannot afford to lose hundreds of thousands of good highway jobs. These provisions make sure we don't.

Economists have seen some signs that the economy is starting to recover, but many American families, unfortunately, continue to struggle. This legislation will provide vital support and services that the economy and American families need to get through these tough times. Working together, we are going to get this economy back on track. Passing this bill is part of the answer. Passing this bill is important for both our national safety and our economic security. I urge my colleagues to support this vital legislation.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOND. Mr. President, earlier this month President Obama renewed his commitment to the counterinsurgency on a "clear, hold, and build" strategy for Afghanistan. As I have said several times before on this floor, I believe this strategy will allow our troops to return with success and put Afghanistan on the road to stability. But, as I have also said, when you go into a war, when you launch a major effort such as this involving tens of thousands of Americans who will be putting their lives on the line, we must go in with an attitude of success. We are going in to suc-

ceed. Let's be clear about that. We must succeed in Afghanistan unless we are to face the kinds of risks we faced on 9/11.

Harking back to the early 2000s when the Taliban ruled Afghanistan. Their friends from al-Qaida came into Afghanistan and used it as a ground for recruiting, training, issuing command and control, and preparing for attacks. From that part of Afghanistan came the directions and the leadership for the tragic attacks on 9/11.

As President Obama has said many times over, fighting in Afghanistan is the war of necessity. It is one we cannot fail to win because we have seen what happens when Afghanistan falls into Taliban hands.

I happen to disagree with him because Iraq was the next featured spot for al-Qaida, Osama bin Laden, and Ayman al-Zawahiri to go. We had that from the Clinton administration. Their intelligence chief, Security Chief Clark, said that when we drive Osama bin Laden out of Afghanistan, he will boogie to Baghdad. That is what all of the information we saw in the intelligence committee indicated. They wanted to make Iraq—Baghdad—at the confluence of the Euphrates and Tigris Rivers, headquarters for their operations. They call it the Caliphate.

We went in and cleaned out Saddam Hussein, who was a vicious, murderous tyrant. We didn't find any weapons of mass destruction. People said we didn't need to go in. However, in the intelligence community, we found out that, No. 1, the intelligence was off base. They made assumptions they should not have.

But we also sent in the Iraq Survey Group, headed by David Kay, who went in to look at the conditions in Iraq and found out what those conditions were prior to our going into Iraq to clean out Saddam Hussein. The conclusion Mr. Kay and his very skilled team came to was that Iraq was a far more dangerous place even than we knew. There were terrorist groups running around in there.

Abu Mus'ab al-Zarqawi, who later became famous for beheading Westerners he captured, on television, for the edification of his twisted viewers, had a group called Ansar al-Islam. That group later morphed into al-Qaida and became al-Qaida in Iraq.

Fortunately, very good intelligence work and the administration of a shot from a listening pod on an Air National Guard F-16—and I am proud to have been a sponsor of earmarks to put listening pods on Air National Guard aircraft—wiped out Abu Mus'ab al-Zarqawi.

At the same time he was running around, he was looking for weapons of mass destruction. There is no question that Iraq had used weapons of mass destruction before. He had used them against the Kurds, his own people. He

had the facilities to produce them. He had the scientists to produce them. He had the recipes to produce them and what we call a just-in-time inventory system. He could have started up chemical or biological weapons of mass destruction, had he not been taken out, and turned them over to terrorist groups.

In Iraq, we successfully took out Saddam Hussein. Then we tried to prevail with a counterterrorism strategy. That is where you send in some of our elite forces and you take out the leaders of al-Qaida. Then you go back to your base. The problem we found was that once we left, al-Qaida would come back.

Insurgency is different from a regular war. They would come back in. If anybody cooperated with the American forces, they would kill them or torture them first and kill them or even torture their families in front of them and then kill them. So we knew things were not going right.

President Bush chose, with Secretary Gates—he and Secretary Gates chose GEN David Petraeus, who was a real scholar. He happened to have gone to the same college I went to, but he was a real scholar. He had developed a counterinsurgency strategy that he believed was the only way to deal with insurgency, so they instituted the "clear, hold, and build" approach in Iraq. They would send in the troops and clear out al-Qaida. Then they would embed or lock down with the Iraqi forces there. That way, they could maintain the security of the area. People would not dare come back in with American and Iraqi troops there.

My son happened to see both sides of that. He was there in 2005, in the ground intel operation in Fallujah. They found that the locals were not interested in working with the Americans. We now know why. They were very fearful for their lives if they did.

The second time he went, he went in with the 2/6 Marines, who drove al-Qaida out of Al Anbar Province. His scout snipers were assigned to capture his old stomping ground in Fallujah. They did it, and the difference was dramatic.

By that time, General Petraeus had set up the Sunni citizens watch, working with the Iraqi Government. They had the Sunni police. When they went in, they immediately started recruiting young Sunni men to serve in the police force in Fallujah. They offered people who had injuries medical help. They offered assistance for those who needed reparations, who had damage. They got that done.

Within a month, my son said, the marines were not all needed, they were not active, because when somebody brought in an IED, an improvised explosive device, or an AQI—al-Qaida in Iraq—person came in, the Sunni citizens watch would turn it over to the

Sunni police and they would take care of it.

That is why we have made the progress, despite what some on this floor said—that the war is lost; we can't win it; we ought to withdraw. The counterinsurgency strategy worked.

When we moved into Afghanistan, we found that in the years since we had driven the Taliban out, we turned the task of keeping Afghanistan stable and secure over to NATO. NATO forces, regrettably, were not adequate. They employed a counterterrorism “fire and fall back” strategy, or even less. Some rode around in armored vehicles during the daytime and went back and had tea in the late evening. The Taliban owned the evening.

So when GEN Stan McChrystal went there, he was assigned by President Obama to carry out his strategy. The President outlined a very clear strategy, which was, we need a counterinsurgency strategy, clear, hold, and build—what I refer to as “smart power.” You need military force, but you need economic development assistance, whether it be medical or governance assistance. You need to help people develop a better life. He tasked General Petraeus to do that.

General Petraeus outlined a strategy—he outlined it in August; we first saw it then—and he outlined a good strategy. He said he needed 40,000 troops. Since the President has said he is going to send 30,000, he has cut back on the objectives. He believes that will work.

We are now getting the troops there. It is going to take time to get the troops there. I wish we had started 3 months earlier because we had been losing ground until we got the additional troops in. But he started getting the troops there.

I believe we can provide stability and security in Afghanistan. Are we building a nation? No. But we are building stability and security. Before you can have a nation, before you can even have a working economy, you have to have security. You have to make sure the insurgents, the Taliban or occasionally their friends from al-Qaida, do not come back in and take over the area and destroy your crops.

Previously, the Taliban had cut down all the pomegranates. Afghanistan was the breadbasket for that part of the world. They had destroyed agriculture so that only their colleagues in the drug trade could control the land. That is where a significant amount of the money for funding the Taliban has been coming from, poppy production and the drugs it produces.

That process is ongoing. But we have found some test markets where that has worked. I was told by then-General Eikenberry in January 2006, and echoed by President Karzai, that they needed extensive agents from America to help them rebuild their agriculture. I tried

for 2 years. With the help of my colleagues on the Appropriations Committee, we twice appropriated \$5 million to the Department of State to get the USAID to send in extension agents. With \$10 million, absolutely zero people went, as far as we know. So in 2007, I worked with the Missouri National Guard, good friends of mine. They sent a survey team over and said: We can help. In early 2008, they sent a 50-member agricultural development team to Nangarhar Province, Jalalabad. It was the No. 2 poppy producing province in the nation, but they had an excellent Governor. They wanted to work. So the Guard team went in. These were trained soldiers and armed airmen and women who knew how to fight in a battle. But they also had agricultural backgrounds in their day jobs, in civilian employment. They were farmers, agronomists, soil specialists, foresters, food processors, veterinarians. They went in and helped the farmers of that province rebuild their agriculture.

By the end of the growing season in 2008, President Karzai said they had made a tremendous difference. He said it was one of the great successes. Ten more National Guard teams are going. In December of last year, when I was there, before I went out to Nangarhar, President Karzai served us a wonderful dinner including broccoli from Nangarhar. I found that not only did they have security but poppy production in Nangarhar went from being second highest in the Nation to almost zero. We now have our third Missouri National Guard team over there. They are planning on going 7 more years, because they want to continue that partnership. Guard units across the Nation are lining up to partner with other provinces.

This is a great model. Unfortunately, it is not enough to have Guard forces there. We have to have a national security budget that includes the civilian side, the economic and development side, the agricultural side, the educational side along with the military force. That is one of the things I am worried about. We have to make sure that we get the “build” side of clear, hold and build, of smart power working in Afghanistan. We cannot expect them to maintain their security if they don't have a way of earning a good livelihood. Make no mistake, they are earning a better livelihood with legitimate crops than they were with poppies. They are not bowing down to the drug lords or to the Taliban. Most of all, producing flowers for drugs was against their religion so they are happier. But we need to do a lot more of that.

I think the first and most significant part in doing that was sending the 30,000 more of our trained military volunteers deploying to Afghanistan. The bill before the Senate today is critical to ensuring these troops have the equipment, training, and resources

needed to execute their mission. You can't send that many more troops there without giving them resources. This bill is essential for giving the resources.

I especially thank the majority of the House and Senate for not loading this critical troop bill up with poison pills. I know there was some discussion—it must have been tempting—to use legislation to pass unrelated and controversial proposals. I have always voted for and continue to support funds our troops need. If we had seen on this bill things to add, for example, another expensive, doomed-to-fail stimulus bill, I would have had to vote no. We have seen that the majority's \$1 trillion stimulus bill, passed late last winter, has failed to produce the jobs promised and the budget which doubles the debt in 5 years and triples it in 10. It puts our children and grandchildren's financial future at hock. I didn't want to see that on legislation to appropriate the funds that our troops needed. I am delighted they didn't.

I offer a very special thank you to my good friend Chairman DAN INOUE who heads our Appropriations Committee. He is a true American hero, and I have the utmost admiration for him and greatly commend him for the manner in which he is leading the Appropriations Committee. He tirelessly works to ensure that America's priorities in defense are put in the right place. I issue my strongest thanks to him and our distinguished Republican leader THAD COCHRAN. One of the things I think they did, which was absolutely necessary, was to add the most reliable, heavily used workhorses in the Air Force inventory, the C-17 cargo aircraft, to the bill. This is the modern transport plane used to move our warfighters into battle. It gives them the equipment and supplies to execute their mission. With the President's recent announcement of an additional 30,000 troops, there is going to be more need for them. It is only growing. Secretary Gates has said we must prepare for the fights we are in today. It is no secret that the C-17 is in the middle of the fights, getting equipment and troops to and from Iraq to Afghanistan today. It is a combat-tested aircraft, essential to the fight we are in.

The CRS said it was designed to fly 1,000 hours per year over 30 years. But overseas we have seen it flying 2,400 hours a year. The logistics are particularly responsive to the kind of delivery the C-17 can make. Some people say: We have enough C-17s and C-5s. I agree with General Schwartz who stated “too much iron is not enough.” The C-5As, which must be retired and now can be retired, only have a 50-percent readiness level, a per-hour operating cost of \$29,000, and 40 maintenance man-hours per 1 hour of flight. It is time to retire them and replace them with the C-17.

Dr. Ashton Carter hit the nail on the head. I commend him for his vision. He said:

I feel industrial base issues are completely legitimate because having the best defense industrial technology base in the world is not a birthright. It's something we have to earn again and again.

As America's only large airlift production line, if we were to end C-17 production, it would risk our Nation's long-term opportunity to produce the aircraft we need. It will also keep the scientists, engineers, designers, and dedicated workers who can turn out the future aircraft we need.

I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

Mrs. HUTCHISON. Mr. President, I was listening to the remarks of the Senator from Missouri about his football team. I couldn't possibly follow that without mentioning my beloved Texas Longhorns who are going to play for the national BCS championship.

Mr. BOND. I am on the Senator's side.

Mrs. HUTCHISON. I appreciate the Senator from Missouri saying that he supports fully the Longhorns as the Big 12 champions. It is always good for the conference, of which the University of Missouri is a great member, that we win the national championship which I have all confidence that my beloved Longhorns will do.

Moving right along to the other important issues of today, I certainly am serious when I start talking about the issue that is before us today. I see the distinguished chairman of the Appropriations Committee sitting on the floor. The winner of the Congressional Medal of Honor, the only Member of our body who has that great distinction, and well deserved, Senator DAN INOUE is one of the great leaders who fought in World War II, was a hero, was given the Congressional Medal of Honor, our Nation's highest military honor that can be bestowed. He has led our committee in such a commendable way.

Senator INOUE has always assured that we have the support for our troops. I have served with Senator INOUE and Senator COCHRAN, our ranking member, and Senator Ted Stevens before him. I can tell you that all of these Senators have led our Defense Appropriations Committee. They have led it by assuring that our troops always have what they need, whether they are in the field of battle, which has been the case for part of our terms here, or whether they are not in the field of battle which has also been the case for much of our terms here. But it happens that our troops are on the field of battle today. That is why I have supported this appropriations bill, supported it as a member of the Defense Appropriations Subcommittee and certainly am assured that we have

the appropriations that give our troops who are in harm's way today the support they need.

I was in Iraq this year. I was in Afghanistan and Iraq last year visiting with those who are doing the work that keeps us free, that allows us to speak on this floor, that allow us to have Christmas holidays with our families. There is not a better experience in my entire time in public life than to get to visit with our troops on the field when they are in harm's way. I have been to Bosnia when we were in Bosnia, Kosovo, then Iraq, Afghanistan, Kuwait, where we have so many troops who are supporting our troops in Iraq, and also now supporting our troops with the equipment transfers into Afghanistan.

Those troops are not going to be with their families this Christmas. We will pass this bill. We will support our troops. We will follow in the great tradition of the Senate. This will be a very bipartisan vote.

HEALTH CARE REFORM

I also wish to mention that the major issue we must face before we finish in the Christmas holidays and then hopefully go on into next year is the health care reform bill that is before us. This is of great concern to me because I don't think we ought to rush the health care reform bill. Health care affects every family, every person in our country. It is a quality-of-life issue. America has had the great tradition and now expectation that we will have the best health care in the world, that we will have a doctor-patient relationship that determines what treatment is best and what is needed, and the patient then makes the final decision.

I very much fear this government takeover of health care is going to put government in between the doctor and the patient. This is a bill that, for the next 10 years, is going to transform our health care system with \$½ trillion in new taxes, new mandates, which can only run up the cost of health care. For those who have coverage, it will be more expensive. For those who do not have coverage, I fear the alternatives are not going to be much better.

I think we have alternatives that can work; I just do not think this one is it. What would work? What will Republicans support? Republicans have a plan with three basic principles. No. 1, we want to bring the cost of health care down so there could be more affordable access for more people in our country. That means we have medical malpractice reform to curb frivolous lawsuits. It means we have the ability to have risk pools that are bigger so premiums are lower.

That means small business health plans. It means that we allow small businesses, without a bunch of bureaucratic nonsense, to come together, form bigger risk pools, and give lower cost options to employers to give to

their employees. That is what every employer in this country wants. They do not want mandates. They do not want taxes. They do not want sticks. They want carrots; and that is, alternatives that are affordable for them.

Last, but not least, why not give every individual who buys their own health care a tax credit that helps them buy their own health care at an affordable cost? I am supporting a bill. It is the DeMint-Hutchison bill that would have a \$5,000 tax credit available for people who have to buy their own health care coverage because they do not have employer options. That would take away the burden that is so heavy on families today.

So we have alternatives. We can do this right. We can do it right if we will take the time to do it right.

The bill that is going to be voted on, surely within the next 3 or 4 days, is actually a bill we have not seen. We have a bill before us. We have been debating it for 3 weeks. But there is another bill that supposedly is the consensus bill that is being written behind closed doors that we have not even seen, and we are going to be asked to vote on it in a 2- or 3-day period. We do not know how long it is, so we do not know how much time we are going to have to read it. But we know we cannot mess around with health care in this country and pass something that may not be right, that may not cover all the bases, that may have hidden things in it we cannot prepare for.

We need the time to do it right. The Republicans are offering a hand to the other side and saying: Let's do this in a bipartisan way. I stated the Republican principles. We can do health care reform with those principles. Maybe the Democrats have certain principles they could lay out, where we could come together and have something that would not be a government health care takeover, that would not be \$½ trillion in Medicare cuts, that would not add \$2.5 trillion to the debt of our country, which is about to sink in debt, and that would not have taxes and mandates and burdens on small business at a time when we want small business to hire people. We want small business to grow and help our economy thrive. But it cannot with more taxes and burdens.

We know we can do better.

The PRESIDING OFFICER (Mr. BURRIS). The time for the Republicans has expired.

Mrs. HUTCHISON. Thank you, Mr. President. I hope we will go back to the drawing boards and create a bill that America will be proud of and that we will see the American people support.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Hawaii is recognized.

Mr. INOUE. Mr. President, first, I wish to thank the Senator from Texas for her very generous remarks.

The measure before us represents the culmination of the work of the Appropriations Committee for the year. But in many respects, it is our committee's most important responsibility.

What could be more important today, 1 week before Christmas, than demonstrating support for our men and women in uniform, whose sacrifices and dedication to the people of this country are unmatched.

If I may be a bit personal at this point, I have spent several Christmases away from home in my youth when I was serving in Italy and France during World War II. I have seen the anguish of wives without their husbands on Christmas Eve. I have seen the tears of mothers when they received the news of the death of their son. I have seen the blood. I have seen the misery.

As has been noted by others, this measure before us provides the essentials for the Department of Defense. That is the least we can do for our men and women. Yes, the amount involved is tremendous, \$636 billion. The amounts in this measure will go to pay the troops, support their families, provide care for the wounded, and equip our forces. Funding of \$128 billion is included in this total to give our men and women in harm's way the resources they need—the guns, the bullets, the bulletproof vests, helmets, and such.

I know there are some who oppose the wars in Afghanistan and Iraq. I should like to remind my colleagues that I too voted against sending forces to Iraq. Yes, I did—1 of 23 of us here. Nonetheless, when the majority of both Houses voted to engage in that conflict, regardless of my personal view on the wars in which our Nation is involved, I have always supported the funding required to ensure that those who have responded to our Nation's call are provided all the equipment and resources they require to carry out their missions. That is the least we can do. While others may disagree, I will flatly state that it is unconscionable not to support them.

This is a good bill. It is a good measure. Some will criticize the relatively small amounts which are allocated to items requested by Members of Congress. Some will question the overall level of resources for defense and, as noted earlier, there are some who oppose funding the war.

But, despite the few loud voices who raise objections to this bill, I am certain the majority of my colleagues support this measure because this is a good bill which provides essential funding to provide for the common defense.

I think we should remind ourselves that at midnight tonight the continuing resolution providing stopgap funding will expire. Tomorrow morning, if it is not clear that the Congress will pass this measure, the Department of Defense will begin to take steps to

shut down some of their functions worldwide. And I can assure you, it will be costly, it will be inefficient, and totally unnecessary.

The Senate has already voted overwhelmingly to cut off further debate on this measure. It is clear there is broad-based support. There is no reason to wait any longer.

As we sit here 1 week from Christmas, we are engaged in an extremely partisan debate in a highly charged atmosphere over our Nation's health care system. Both sides of the aisle feel passionately about this issue. I do not fault my colleagues who oppose that measure. But this defense bill is too important to be caught up in partisan politics. This bill was drafted in a bipartisan agreement, and I think we should recall that it was reported out of the Appropriations Committee by a vote of 30 to 0, unanimously. In both bodies of this Congress, the respective versions of the bill were supported overwhelmingly.

The compromise measure we are working on at this moment passed the House of Representatives by a 398-to-24 vote. That is almost unanimous, unheard of. So I plead with my colleagues, let's not force a wasteful shutdown of the Defense Department. Let's not continue the delay which has stalled action on this bill. And, above all, let's not raise doubts in the minds of our military men and women worldwide, who would follow our actions, and make them question us: Do we support them? Instead, let's come together in the bipartisan spirit in which this bill was created and crafted and vote to pass it today.

As in ancient times, it was said: Peace on Earth, good will to all men.

Mr. President, I would like to submit a short list of technical corrections to the Disclosure of Congressionally Directed Spending Items report that is attached to the explanatory statement for H.R. 3326, the Department of Defense Appropriations Act for fiscal year 2010. The following corrections are necessary to provide the most accurate description of congressionally directed spending items in this bill.

Senators BINGAMAN and UDALL of New Mexico should be removed from the list of sponsors for the Advance Propulsion Non-Tactical Vehicle in Research, Development, Test and Evaluation, Air Force.

Senator REED should be added in support of the Standoff Sensors, Detection of Explosives and Explosive Devices—IEDs—in Research, Development, Test and Evaluation, Army.

Senator SCHUMER should be added in support of the WMD Civil Support Team for New York in National Guard Personnel, Army.

Senators CRAPO and RISCH should be added in support of the Radiation Hardened Cryogenic Read Out Integrated Circuits in the Defense Production Act account.

I yield the floor, Mr. President.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. KAUFMAN. Mr. President, I thank you for your help in this, as always. I say to the Presiding Officer, you are a great colleague, and I appreciate it.

Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

BROADCAST STATIONS

Mr. KAUFMAN. Mr. President, I want to take a few minutes today to speak about television and to alert my colleagues to a troubling situation.

Recently, the only VHF television station licensed in Delaware canceled the one nightly public affairs program which covered Delaware issues, closed its local studio, and moved almost all of its employees out of Delaware.

That station—WHYY-TV—did this even though the community it is supposed to serve first, that should be its primary focus, is Wilmington, DE. This is offensive and it is wrong. These and other actions led the city of Wilmington, last week, to challenge the license renewal of WHYY. I understand and commend the city's complaint, and I hope it will bring about better service to Delawareans.

Frankly, I think WHYY was emboldened to make these changes by the weakened oversight of the regulatory agency charged with making sure broadcast stations serve the public interest: the Federal Communications Commission. If this sort of snub to the community of license proceeds with no repercussions, we could be seeing less and less local service from stations all across the country.

If the requirement to serve the public interest has no meaning, if the broadcast station provides its community of license with nothing more than what we can get from a national cable, satellite, or Internet channel, then the public is getting a bad deal for giving away spectrum at no charge.

At the core of the FCC's licensing policies—right from the beginning—is a principle that every community of appreciable size needs and deserves its own station. As a nation, we have licensed broadcast stations to cities all across America. In America, we do not have nationwide broadcast channels. You get that on cable channels such as HBO or Discovery, either through cable or through DISH. TV channels are local. These stations that are granted free use of public airwaves are required to be responsive to local needs. Each has a duty to determine the programming appropriate for its viewing community and then make its programming decisions based on those needs. That is the deal. You get the spectrum, you take care of the local needs. Broadcasters are, for all intents and purposes, temporary trustees of the public

airwaves. For that privilege, they must serve their own communities.

It is exactly because broadcasters must address local issues and needs that the FCC required cable companies to carry local broadcast channels. For the same reason, satellite carriers have been restricted in their ability to bring distant network signals into homes that should be receiving their local stations. That all makes sense. Yet unless the FCC steps up and makes it clear to broadcasters that their duty to serve the public interest is real and includes making program decisions that are responsive to their communities of license, I fear the public is going to lose out and local needs will go unmet.

As long as stations think they can get away with doing less, they will be tempted to do less. If there are no consequences to ignoring their obligations, they will take shortcuts and our communities will be the worse off for it. If that happens, our historic allocation of channels all across the country designed to ensure community-oriented service will become a sham.

I call these concerns to the attention of my colleagues today because this is what is happening in my own hometown of Wilmington, DE. We have one VHF station in Delaware. It is Channel 12, WHYY-TV. Its city of license is Wilmington, DE, and it is a public television station.

WHYY-TV is not always on Channel 12. In fact, it started out on a UHF channel in Philadelphia. But in the 1960s, when a commercial station operating on Channel 12 ran into problems, WHYY beat out the competition for the VHF license. It was no secret that WHYY made this move not because it wanted to relocate from Philadelphia to Wilmington but because it wanted to move from a UHF channel to a stronger VHF channel with greater viewership. However, this move nonetheless was tied to a promise that the station's primary duty was to serve the interests and needs of the people of Wilmington, DE, its new city of license. Unfortunately, it has been a near constant struggle for our community to get the attention it was promised.

When its license was first granted, WHYY agreed to present 16.5 hours per week of Delaware-oriented programming. Let me repeat that. They promised and agreed to present 16½ hours per week of Delaware-oriented programming. By the time its license came up for renewal in 1978, it was providing less than 3½ hours per week. As renewal of its license was challenged, WHYY added some additional Wilmington-oriented programming. Nonetheless, the FCC conditioned the grant of its license on demonstrating a commitment to local programs broadcast from Wilmington rather than Philadelphia.

WHYY was again chastised for failing to serve Wilmington during its 1983 li-

cense renewal proceeding. The criticism touched on such issues as the location of its main studio; its station log, staff, and management; the production of nonnetwork programming; and the amount of locally produced programming focused on Delaware. The FCC ordered WHYY to base personnel in Wilmington capable of addressing the many failures.

With the diminishing of FCC oversight of broadcasters' responsiveness to local needs, WHYY service to Wilmington diminished as well. Its main studio has long been in Philadelphia, and the Web site for both the Corporation for Public Broadcasting and the Public Broadcasting Service list it as a Philadelphia station. This is even though its license was based on being in Wilmington, DE. In June of this year, WHYY announced it was closing and putting up for sale its studio in Wilmington, closing its news bureau in Dover, and eliminating most of the 16 employment positions in Delaware. In short, it is virtually leaving our State and its city of license.

WHYY's programming decisions also mock its community of license. Gone is the daily afternoon report that focused on issues of interest to those living in and around Wilmington. Today, Delaware's only VHF station has committed to producing merely a single, 30-minute weekly—weekly—program focused on our State. The program is scheduled to air at 10 p.m. on Fridays and to be rebroadcast over the weekend.

If you look at the listings of locally produced programs that are touted on WHYY's Web page, you would be hard-pressed to find programs focused on Wilmington.

WHYY has the audacity to rationalize its cut in local programs by saying it will provide more Delaware-focused stories in its Philadelphia licensed FM radio station and online. So they get a broadcasting license and the programming is going to be on their radio station in Philadelphia and online. You don't have to be a genius to see this is not an acceptable substitute. This plan leaves entirely unserved those who look at television for information about the local community. Reporting through other media is not the same as reporting on television, and to do so WHYY does not need a TV license.

The people of my State feel short-changed and they should, and they are, especially because WHYY operates a noncommercial educational television station that receives support from tax revenues as well as individual and corporate donations. The public expects the licensee will be responsible and attentive to the obligations it holds to its community of license. There is no doubt WHYY has failed in this regard.

Those of us who live in Delaware understand we are situated in one of

those areas of the country where airwaves are crowded. Also, television channel assignments to major cities in adjacent States have left little room in the spectrum for allocations to communities in our State. I know other States face the same problem.

The television stations to which Delawareans tune their sets predominantly broadcast out of Philadelphia, Pennsylvania, and Salisbury, MD. These out-of-State stations, however, owe only a secondary obligation to address the needs of their Delaware viewers.

Broadcasting in this country is coming to a significant transition, but the promise that comes with digital transmission should mean States such as Delaware and communities such as Wilmington will receive more attention to the local needs and interests, not less. That was the promise of digitalization. That was the promise of high-def TV. That was the promise of broadband. The allocation of a channel to a particular community must bring with it some special duty or else it has no meaning at all.

The FCC needs to reassert its role to insist that the licensees—companies that get free use—that is free use—of the public's airwaves take their responsibilities to serve the public interests seriously. If they do not, we will see more stations such as WHYY take advantage of lax policies. We will have more citizens in more communities left with little or no local programming. The complaint filed by the city of Wilmington last week against WHYY's license provides the FCC with a perfect opportunity to give real meaning to a broadcaster's obligation to its community of license.

I strongly encourage the FCC to use this chance and act decisively to protect the public interests.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ISAKSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. REED). Without objection, it is so ordered.

Mr. President, I rise today to support the DOD appropriations bill before us and to take a few minutes to talk about a couple of the provisions in the bill that are important to Georgia but, in particular, I think, also point out something important for us to recognize as Members of the Senate.

In this appropriation is an appropriation to the Office of Economic Assistance for \$40 million. That money is appropriated to be competitively granted back to communities for various economic difficulties they have suffered. One of those communities is Hinesville,

GA, in Liberty County, the home of Fort Stewart. Fort Stewart is the base through which most of our troops who serve today in Afghanistan and Iraq pass and many are trained. It is an outstanding facility in a town with a population of about 29,000. It is a rural county near the coast and near the great Port of Savannah where almost all of the materiel and equipment is shipped from the United States to the theater in the Middle East.

A few years ago, it was announced by the DOD that we would add three new brigade combat teams in the United States of America, and Fort Stewart would be the host of one of those new brigade combat teams. Immediately, the community has done what it has always done. It invested tens of millions of dollars in infrastructure, road improvements, community improvements, and it incentivized the private sector through the banks and the developing community to build the housing necessary to house the dependents and families of those new troops who would come and be a part of that brigade combat team. So the construction work began over 2 years ago. Moneys were borrowed, developments were begun.

A little earlier this year, it was announced quickly and summarily that the Department of Defense was dropping back those three brigade combat teams and that none of the three would be created or deployed. Unfortunately for the community of Liberty County and for the private developers and the banking system there, they cannot get a do-over. They have already borrowed the money. They have already deployed the capital. They already made the investment.

Worst of all, the announcement came at a time when we are in great economic turmoil anyway, where our banking centers are under great stress. As I know everybody is aware, of all the States in the United States, the State of Georgia has had the most banks closed by the FDIC during the last 18 months. To have these assets become nonaccruing assets because the military changed its mind and the decision puts all of the banks that participated in that in a difficult situation.

I rise to thank the committee and Chairman INOUE and Ranking Member COCHRAN and all the members of the House committee, especially Congressman JACK KINGSTON from Savannah, for adding this \$40 million to the Office of Economic Assistance. It will be a help, but it also should be a warning. Whenever we announce to communities in our States an expansion of our military in that State, and we call upon them to provide the money, the infrastructure, and manpower as their cost to support those troops, if we pull the plug, we change our mind, unfortunately, they don't get a do-over. It is

important for us to live up to the responsibilities we have to see to it that, to the maximum extent possible, those communities are made whole.

In the months ahead, I will continue to work on behalf of Liberty County and the people of Hinesville, GA, who have made this investment to see to it we do everything we can to have the deployments necessary to make up the difference, and where that is not possible, to see to it that funds are available to hopefully mitigate some of the damage.

The beginning of that starts with passage of this bill today or tomorrow morning. It will pass this \$40 million program for the Office of Economic Assistance, so that Hinesville in Liberty County, and other communities damaged by the decision made to withdraw the brigade combat teams, will have a chance to be made whole.

TRIBUTE TO BILL BOLLING

Mr. ISAKSON. Mr. President, it is Christmas. We are all here in Washington working. Our troops are working for us around the world, in Afghanistan and in Iraq. There are a lot of other soldiers who have been working very hard this past year, the soldiers who support the Feed the Hungry programs and the community food banks all over the United States of America.

In Atlanta, GA, our State, there has been an award sponsored by Atlanta Gas Light for many years, called the "Shining Light award." The award is that a gas light is installed somewhere in Atlanta to pay tribute to an individual who has made a historic contribution to the community and for the betterment of mankind—people such as former President Jimmy Carter, such as Ambassador Andrew Young, such as the founder and the gem of our State, S. Truett Cathy, the founder of Chick-Fil-A.

This year, the award has been named and will be given to Bill Bolling. Bill Bolling runs the Atlanta Community Food Bank. Bill Bolling, this year, will oversee the distribution of 20 million pounds of food to 800 nonprofit agencies to feed citizens of our State. It is his 29th year in building the Atlanta Community Food Bank into one of the finest facilities in our country.

Bill Bolling is an unselfish, untiring, honorable man of our community, who unselfishly gives of his time to see to it that others in pain and in hunger have food, support, and nourishment.

In this Christmas season of 2009, on the floor of the Senate, I pay tribute to Bill Bolling for his unselfish contribution to our State and to those less fortunate. But, equally, I do the same for those around the country who, in this difficult time of recession and this wonderful time of holiday, see to it that those who have little have food and those who have hunger have some nourishment, and see to it that America is what it always has been: a giving

and compassionate country on behalf of its people.

I yield the floor.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. ROBERTS. Mr. President, the bill pending is, of course, appropriations for our national security, our defense. But within this bill is legislation containing a doctor fix—meaning to prevent any further cuts in reimbursements to our Nation's doctors. They now only get reimbursed up to about 80 percent. I think it is very important to do that—to do something for doctors. But it is equally important to prevent something that would be very disastrous to doctors and the entire health care delivery system of our country.

In that vein, there are a lot of things in the bill that I object to: the \$2.5 trillion cost, the 24 million people still left uninsured, the $\frac{1}{2}$ trillion cut to Medicare, with another $\frac{1}{2}$ trillion in job-killing tax increases, the stunning assault on liberty, and the Orwellian policies making health insurance even more expensive—any one of these things would make me vote no on this ill-conceived and dangerous legislation. We don't even know what the last iteration, the manager's amendment, of the effort will look like. We don't even know what the cost of that will be.

There is another issue that has troubled me the most, and that is the issue of rationing. I don't think this issue has sunk in with the American people, and especially within the media.

I want everyone to understand this bill aims to control the government's spending by rationing your access to health care. That is not "scaremongering" or a scare tactic. Facts are stubborn things.

In this bill, there are at least four government entities, and we are going to call them the "rationers" over here to my right on the chart who will stand between you and your doctor. These four entities are represented by the four walls on this chart behind me standing between you and perhaps your wife and the doctor. These folks are obviously somewhat elderly, and that is the big issue in regard to rationing, which I will talk about in just a minute.

Let's talk about the first one, the Patient-Centered Outcomes Research Institute. The acronym is PCORI. You haven't heard of that before, but it is the Patient-Centered Outcomes Research Institute. This one here, that is the first wall between this couple, or you, and your doctor. The Obama-Reid bill establishes the Patient-Centered Outcomes Research Institute to conduct something called comparative effectiveness research, or CER. Rest assured, every health care provider in the country knows what CER is. I am not sure the public understands it. I am not sure those in the media yet fully

understand it. It is research that compares two or more options for the same condition to see which one works best.

That sounds like a great idea, and it is a pretty good idea. But unfortunately, when CER is conducted by a government under pressure to meet a budget, it can be manipulated in some very sinister ways. That has been demonstrated by the United Kingdom's CER institute. Let's look at that as an example. It is the National Institute for Health and Clinical Excellence, the acronym being NICE—but it hasn't been very nice.

NICE is notorious for delaying or outright denying access to health care treatments based on comparative effectiveness research that takes into account the cost of the treatment and the Government's appraisal of the worth of the patient's life or comfort.

Some of the more shocking CER decisions handed down by NICE include restricting drugs to save seniors' vision from macular degeneration until the patient is blind in one eye; denying access to breakthrough treatments for aggressive brain tumors; and refusing to allow Alzheimer's therapy until the patient deteriorates. That is unbelievable, but that happens.

This Patient-Centered Outcomes Research Institute will be the American version of NICE, using CER to save the government money by rationing health care. We tried very hard in the HELP Committee to insert one word, "prohibit," that CER could not be used in any way for cost containment. It should be used for patient care, and we tried to put in the word "prohibit." It was talked about for 2 or 3 days, and then in a very partisan decision, "prohibit" became a thing of the past.

I have offered several amendments, along with my friend and colleague, Senator KYL, a real leader on trying to alert the Senate all about CER and the dangerous path it might be taking. Senator COBURN also talked about this, and he had an excellent article in the Wall Street Journal 2 days ago. Senator ENZI, the ranking member, also serves on the Finance Committee and has been involved with this effort. These amendments were to protect American patients from NICE-style rationing. Unfortunately, they have all been voted down on party-line votes. It is not that we haven't tried.

Let's get to rationer No. 2, the independent Medicare advisory board, right here, the second wall between you and your doctor.

The Obama-Reid bill establishes a new independent Medicare advisory board. It is to be an unelected body of 15 so-called experts who will decide Medicare payment policy behind closed doors with no congressional input. When they make this decision on reimbursement to all of the health care providers, and then all of the health care providers, some of which their national

organizations have chosen to go along with this bill, when they wake up to the fact that they are not protected, they will come to the Congress, and some will say we cannot do anything about it because, obviously, the Medicare advisory board will make that kind of decision.

That is a complete abrogation of our responsibilities, one way or the other, in terms of cutting reimbursements in the appropriate way to save money, or to make sure the reimbursements don't close down a particular vital part of our health care delivery system.

Although this bill says this anonymous board "shall not include any recommendation to ration health care," what else would you call denying coverage for Medicare patients based on cost? That is what it will do—deny payment for knee replacements or heart surgery or breakthrough drugs—all to achieve an arbitrary government spending target. I don't know what you call that, but I call that rationing.

Also, notice that this board will necessarily ration access to health care based on age and disability, of all things, since its payment policies will only affect the elderly and disabled who receive Medicare. What will be a patient's recourse if Medicare refuses to pay for an innovative new therapy that could save or prolong their life?

These are the reasons the Wall Street Journal dubbed this board the "Rationing Commission."

Let's go to No. 3. This is another rationer, the CMS Innovation Center. The Centers for Medicare and Medicaid Services, or CMS, currently administers the Medicare Program on which 43 million Americans rely. That is almost 15 percent of the population.

Listen up: CMS already rations care. It is not authorized to do so, but it does. It does so indirectly through payment policies that curtail the use of virtual colonoscopies, certain wound-healing devices, and asthma drugs.

Medicare already has a higher claims denial rate than most private insurance companies. Let me repeat that. Medicare already has a higher claims denial rate than most private insurance companies—something you are not going to hear my friends on the other side admitting, not when it is so convenient to simply demonize the big bad insurance companies. In fact, the courts recently had to intervene to prevent CMS from rationing a relatively expensive asthma drug in Medicare because rationing is now against the law. However, the Reid bill establishes a new CMS Innovation Center which will be, for the first time, granting CMS broad authority to decide which treatments to ration.

Last one, the last rationer—it is like the four horsemen—the U.S. Preventive Services Task Force. They got a lot of headlines recently, and I will go into that in just a moment. It is yet

another panel of appointed experts—we have four panels here, none of them elected or accountable. This particular task force will make recommendations on what preventive services patients should receive. Currently, the task force recommendations are optional. But the Reid bill bestows this unelected, unaccountable body with substantial new powers to determine insurance benefit requirements in Medicare, Medicaid, and even the private market.

The task force has already revealed the types of recommendations it will be making. Just recently, it decided to reverse its longstanding recommendation that women get regular routine mammograms to detect breast cancers starting at age 40. One really has to wonder if the task force's abrupt about-face—and it was abrupt—has anything to do with the fact that the Federal Government's financial responsibility for these screenings and for the health care needs they would potentially reveal would be greatly expanded if this health care reform bill passes.

In the words of one prominent Harvard professor:

Tens of thousands of lives are being saved by this screening, and these idiots want to do away with it. It's crazy—unethical really.

The outcry from oncologists, the American Cancer Society, the American College of Radiology, and breast cancer survivors and families all across the country has forced Secretary of Health and Human Services Kathleen Sebelius to backpedal, to do a backstroke real quick from the task force's recommendations, saying that they do not affect government payment policy. But this bill relies on the task force's recommendations some 14 times throughout the legislation to set benefits, to determine copayments, to make grant awards, et cetera—all policy decisions. So contrary to Secretary Sebelius's assertion, if this bill passes, the recommendations of the task force will become government policy. Not only that, they would be forced onto private insurers as well.

I know some may ask: Senator, why so cynical? Why not trust that these tools will be used only for good, to advance medical science and patient care? To those folks, I answer by showing this chart. This is my favorite chart, Dr. Ezekiel Emanuel's "Complete Lives System." It sounds like something you would be hearing somebody selling over a Del Rio radio station. It is Dr. Ezekiel Emanuel's "Complete Lives System."

As many of you know, Dr. Emanuel is the brother of White House Chief of Staff Rahm Emanuel. He is a bioethicist and one of those special advisers to the President. I am sure he is very intelligent, very smart. Maybe he should be the rationing czar.

Dr. Emanuel has published some very disturbing ideas on how to ration care

which can be summed up by this “brave new world, humpback whale” graph behind me. Dr. Emanuel’s “Complete Lives System” basically works off the premise that the older you are—listen to this—the older you are, the more you have lived, and therefore the less you deserve health care. Let me repeat that. The older you are, the more you have lived, and therefore the less you deserve health care.

You know something, the average age of my colleagues in this body is 62 years old—just something to think about.

President Obama has clearly been listening to Dr. Emanuel’s counsel. Remember his observation in an interview this summer that, as patients get closer to the end of their life—from the President no less—“maybe you’re better off not having the surgery, but taking the shots and the painkiller” instead.

Telling someone they cannot have a knee replacement because they are too old—how old is too old? Who should be making that decision? The doctor and the patient or any one of these four task forces, more especially this “Complete Lives System” as a blueprint?

The Wall Street Journal reported on the age rationing that occurs in Canada’s government-run health care system. Apparently in that country, 57 is too old for hip surgery. Luckily, many of those so-called old geezers can drive south and find care right here in the United States. I am not sure where they will go after this bill passes, however.

The White House may complain that I am taking Dr. Emanuel’s musings out of context. My response to that is this: This is the context. This is how the government will contain costs. This is the blueprint right here, the “Complete Lives System.” This is what we are going to be basing decisions on in terms of reimbursement, not between a doctor and patient.

All of the rationing policies in this bill must be viewed through the prism of Dr. Emanuel’s ideas, of this chart, and consequently this is the goal—to save the government money by rationing care. That is what the President means all the time when he says we are going to squeeze money out of the health care delivery system by basing that rationing on something like a pseudoscientific graph such as this. At least in the United Kingdom they are honest about it. These are the tools of rationing. These tools will restrict your ability and your family member’s ability to get a knee replacement or a breakthrough cancer drug or treatment for Alzheimer’s or a mammogram.

The four rationers—if we are not able to stop this, you are going to see the destruction of the American health care system, the best health care system in the world.

They are among the main reasons I will vote no on this bill.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. Mr. President, first, I compliment my colleague from Kansas. He and I have been working on this problem of delay and denial of care, the problem of rationing of care specifically as it comes about through the comparative effectiveness research that is in this legislation, for a long time. I appreciate what he has said today.

Given the amount of time, if I am not able to get a little bit more time over there, I am going to speak off the cuff, commenting on a couple of things he said.

I am concerned about the cost of this legislation. I am concerned about the cuts in Medicare. I am concerned about the taxes. I am concerned about the fact that premiums go up, not down, under the legislation. I am concerned about all sorts of things that are in this government takeover of health care in our country. But nothing concerns me more than the problem raised by my colleague from Kansas because, in my view, nothing is more important to all of us all over the country than the health of our families and ourselves, except, perhaps, our freedom.

In many respects, this legislation takes that away by denying us the ability to work with a physician, a family physician who can help decide what is best for us and then provide that kind of treatment to us. When that is taken away from us in the name of cost cutting for the Federal Government, yes, we are bending the cost curve down all right and we are also hurting the quality of health care for all Americans from now on. That is what bothers me most about this legislation.

I wonder why, if my colleagues on the other side of the aisle are so certain rationing is not going to occur, they have defeated over and over again the amendments my colleague from Kansas and I have proposed that very simply say: You will not use cost-effectiveness research to deny coverage. It is very simple. They say: The language already covers it. I don’t think so. But if it is your view that we should not ration care, then let’s just say it. No, they don’t want to do it. I think the reason they don’t want to do it is very clear—because throughout this legislation there are numerous ways in which rationing will occur, and it has to occur under their scheme of things because it is the only way to accommodate the promises that have been made relative to the amount of money they have to pay for it.

In some countries, they basically set a budget and say—I will pick a number out of the air—\$50 billion this year to spend on health care. It is kind of like we deal with Indian health care in our

country. It is said on Indian reservations that you better get sick early in the year because when they run out of money, that is it. Your appointment will be next January. Get in line.

We don’t want the kind of care Great Britain, Canada, and some other countries have where the quality of your care depends upon how much money they have available to treat you. At first, it is done subtly. They simply don’t inform you of things that might otherwise be available, so you don’t even know the treatments are available. Then they begin delay. It takes long and longer to get an appointment with the doctor. Then, finally, it is actual denial of care. They simply don’t make various treatments available, various pharmaceutical products available to you, and so on.

I was going to mention one of the experiences in Great Britain where they finally figured out how to get the delay down to 4½ months and are really proud of that.

The National Health Service in Great Britain launched what they called an End Waiting, Change Lives campaign. The campaign’s goal was to reduce patients’ waiting time from 18 weeks from referral to treatment—18 weeks. And that is supposed to be a good thing? That is not what Americans want. They know what starts with delay in getting an appointment eventually results in denial of care.

But probably the most pernicious thing is what my colleague was talking about with comparative effectiveness research where panels of experts decide what kind of treatments work best and which ones are most cost-effective for most people most of the time. The difference between that and a physician treating a patient is the physician knows each one of his or her patients.

He knows their needs, and they are not all average. They are not all the general rule. Some require special circumstances.

Mr. President, let me just conclude by reading from what one of our colleagues, Senator TOM COBURN, wrote in the Wall Street Journal. As everyone knows, he is a physician. He wrote:

The most fundamental flaw of the Reid bill is best captured by the story of one of my patients I’ll call Sheila. When Sheila came to me at the age of 33 with a lump in her breast, traditional tests like a mammogram under the standard of care indicated she had a cyst and nothing more. Because I knew her medical history, I wasn’t convinced. I aspirated the cyst and discovered she had a highly malignant form of breast cancer. Sheila fought a heroic battle against breast cancer and enjoyed 12 good years with her family before succumbing to the disease. If I had been practicing under the Reid bill, the government would have likely told me I couldn’t have done the test that discovered Sheila’s cancer because it wasn’t approved under CER [comparative effectiveness research]. Under the Reid bill, Sheila may have lived another year instead of 12, and her daughters would have missed a decade with their mom. The

bottom line is that under the Reid bill the majority of America's patients might be fine. But some will be like Sheila—patients whose lives hang in the balance and require the care of a doctor who understands the science and the art of medicine and can make decisions without government interference.

Mr. President, I rue the day that government stands in between a patient and a physician, when the physician says: I don't care what the research says the average patient needs or generally what is indicated or what costs too much. I know what this patient needs, and unless she gets it, she is going to die. At that point, if our government has inserted itself between the patient and physician and says: We are sorry, it can't be done, then our freedom will have been taken away, the quality of our health care will have been taken away, and we will have succumbed to a government so powerful that it literally has life-and-death control over us and our families.

That is fundamentally wrong, and we cannot allow that to happen by adopting the legislation that is before us now.

Mr. ROBERTS. Would my friend and colleague yield for just a moment?

Mr. KYL. I would be happy to yield, but I think I only have about 30 seconds left.

Mr. ROBERTS. I promise to be brief. I thought about saying this, but I think the example Senator COBURN wrote about in the Wall Street Journal about Sheila made me decide to speak of it.

I had a very close friend, a member of the British Parliament, who thought he had broken his wrist. He had a lot of pain. It took quite a while to get in to see a doctor for a broken wrist. He finally did, and it was put in a cast. Then he kept feeling bad and thought maybe it was set wrong. Finally, he got back in and never left the hospital. He died within about 2 or 3 days. He had bone cancer.

That, to me, was incredible that in Great Britain, this could happen. It was just inconceivable to me. You have to sort of equate it to what this bill would do and what other people would experience, very similar to that and the situation Sheila found herself in as well.

So I thank the Senator for yielding.

Mr. KYL. Mr. President, I believe my time has expired.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. DURBIN. Mr. President, for those who are keeping score and following the Senate, you may wonder what we are doing. We are in the middle of a filibuster, which is an attempt to stop legislation from moving forward. It is a filibuster inspired by the Republican side of the aisle. The bill they are filibustering and trying to delay is the Department of Defense appropriations bill. This is the bill that funds our

military. It is the bill that funds our soldiers, sailors, airmen, and marines who are at war in Iraq and Afghanistan.

This is a bill that, almost without fail, passes overwhelmingly with a bipartisan majority in the Senate and the House each year. It has passed the House of Representatives with a substantial vote of about 394 to 35, with 164 Republicans voting for it over there. There was no controversy associated with it. Yet when it came to the Senate, the Senate Republicans announced they were going to filibuster the Defense appropriations bill.

Why? Do they disagree with any of the contents? I have yet to hear—aside from Senator MCCAIN and Senator COBURN, who went through two or three provisions in the bill they disagreed with—anyone say we shouldn't fund our military. We certainly should. Now some have come to the Senate floor and argued the reason we are in this predicament is because the Democrats, who are in control, have waited too long to bring this bill to the floor. But that statement fails to acknowledge the reality of what this calendar year has meant because day after day and week after week, month after month, with very few exceptions, the role and strategy of the minority—the Republicans—in the Senate has been to slow down and stop the consideration of important legislation.

Mr. ROBERTS. Mr. President, would my friend and colleague yield?

Mr. DURBIN. Pardon me?

Mr. ROBERTS. Would my friend and colleague yield?

Mr. DURBIN. Only for a question.

Mr. ROBERTS. Only for a question.

Mr. DURBIN. I will be happy to yield for a question.

Mr. ROBERTS. I just want to assure him—in the form of a question—if he were asking me, am I filibustering, that is not the case. The problem was, as I see it—and I am asking the distinguished Senator whom I have known for a long time and whom I respect—what would he think about the response—this is the question—where we have only had seven amendments that have been allowed on this bill? I have one on the Medicare advisory board. We have the one on CER here—rationing—and I had another one in regard to a tax matter—about four amendments—all of which have been considered in the Finance Committee.

All were defeated by a party-line vote, so I knew where it was headed, but I thought it certainly deserved some debate and some consideration on the Senate floor. To all of a sudden limit a bill of this size—the health care bill, not the Defense bill—to seven amendments seems to be very untoward and showing a lack of comity in regard to a bill of this size.

The defense bill has the doc fix in it, and so, as such, I think you can pivot

into the problems doctors face and at least have an opportunity to talk about it. But this is the first time I have had 10 or 15 minutes to talk about anything about health care. It is not that I would choose to do it when we are considering a Defense appropriations bill. I have served on the Armed Services Committee, the Intel Committee, as the Senator knows. There is no person stronger for our warriors and our men and women in uniform, and they will get their money.

This bill is going to pass. That is not the issue. The issue is we haven't had enough time, and I would ask the Senator to comment on my comments and tell me if I am wrong.

Mr. DURBIN. I would say in response to the Senator from Kansas, he has a grievance with the consideration of this bill—the health care reform bill—a 2,000-page bill, which I will address in a moment. But I would say to the Senator from Kansas that we are considering this bill—the Department of Defense appropriations bill. And because of a grievance over the consideration of this bill, the Republicans are filibustering the Department of Defense appropriations bill. They are trying to slow down as much as possible the passage of the Department of Defense appropriations bill.

Many of us think that is unfair, particularly when we have our best and bravest young men and women at war, that we would somehow make the bill funding their effort and funding the things they need to protect themselves the center of a political debate over another bill. And it is a filibuster. Twice last night on this floor, early this morning—I should say in the early hours of the morning—I made a unanimous consent request that on a bipartisan basis we fund our troops. I offered it on the floor and twice it was objected to—the last time by the Republican leader and the Republican whip in the well of the Senate. They had a chance to pass this bill.

Now, the funding for our troops runs out at midnight tonight. We are going to come in at 7:30 tomorrow morning because the Republicans insist on this delay, and we are actually going to fund the troops. I really believe when push comes to shove, we will. I hope we do. I will be voting for it, and I hope the Republicans will join me. So I don't understand why the Republicans are holding the Department of Defense appropriations bill for our troops hostage to their anger or frustration over health care reform.

Then let me address health care reform. I would say to the Senator from Kansas, we have been on this bill for 19 days. Do you know how many substantive amendments have been offered by the Republican side to this bill in 19 days? Four—not even one a day. And six amendments—or I should say motions—were made to this bill to send it

back to committee and start over. So if the Senator has substantive amendments—and others do—the obvious question is, Where have they been? Nineteen days, four amendments.

It appears to me that when a decision was made several days ago on the Republican side to order the reading of an 800-page amendment, it was very clear that this had nothing to do with debate and voting on amendments. It was all about slowing things down and stopping them, and they tried and couldn't on the reading of this bill. Now they are trying, as best they can, when it comes to an unrelated bill.

You know, there comes a point when, I would say to the Senator from Kansas, there has to be a vote. I mean, we are here to vote. Let's get on with it. We either win or lose. You either win or lose, and we have to go forward. I know you don't support this from what you have said. I do. I may prevail; you may prevail. But at some point, don't we owe it to the American people to take a vote? Unfortunately, this delaying tactic that has been going on is just postponing what I think we are here to do, and it is doing it at a time of year when I have to tell you—and I always say, at least they told me when I ran for the House, if you don't like this job, you know, don't run for it. And if you get this job, don't complain about it.

Well, I am not going to complain, but I do have to tell you, most of the Members of this Senate would like to be home with their families for Christmas, and we may not be.

Mr. ROBERTS. Will the Senator yield to allow me to answer the Senator's question?

Mr. DURBIN. I will yield for a question, otherwise I would be yielding the floor. But I will certainly yield to the Senator from Kansas for a question.

Mr. ROBERTS. You could go for it, yield the floor, and see what happens.

I think the question the Senator asked of me—and I will defer it back to him in the form of a question was, Was I taking part in the filibuster? The only reason I am here to talk about rationing—and I had that rationing amendment ready, along with the Medicare advisory board, along with several others, is because we have not had the time or opportunity to offer them. Why are we rushing and not allowing time to consider amendments?

Consequently, I have four amendments sitting on my desk waiting to at least talk about them, as opposed to bringing them up. I don't think that is filibustering. I think I am taking advantage of whatever time we have to at least talk about these amendments, certainly on the health care bill.

On the Defense appropriations bill, it is very unfortunate this situation has developed, but I want to assure the Senator, and my good friend, that I am not here trying to hold up anything.

One other thing—is it not true there is a bill out there but nobody has seen it? More especially, the managers' amendment, which will be combined with what came over from the House, and we do not have a score. So whatever you have there, if that is the bill, I would sure like to get it up on the Web or something so we can take a look at it and also have the score.

We keep talking about the bill. I would ask the Senator: Is that the bill? Is that the final bill with the score?

Mr. DURBIN. I would say to the Senator from Kansas that it is not the final bill. There will be a managers' amendment offered tomorrow, and it will be considerably smaller than this. It will have specifics in it that have been reviewed by the Congressional Budget Office. That is underway. It will be introduced, I hope, tomorrow morning, and it will be up for consideration for a procedural vote early Monday morning, and then the remainder of the week, as long as the Republicans want us to stay.

It is your decision whether we will be here for Christmas, and we are prepared to stay, if necessary, to get it done, if that is what it takes.

But it is true there is a managers' amendment coming. It is also true the Congressional Budget Office—maybe one of the most powerful agencies of the Federal Government—can literally stop the Congress in its tracks while the people who work there pour through these bills and try to make some estimate as to whether they are going to add to the deficit; whether they will, in fact, reduce health care costs.

The good news for all of us is they took a look at our bill—the Democratic health care reform bill—and concluded it would, in fact, reduce the deficit \$130 billion over the next 10 years and \$650 billion beyond that.

It is also true this is the only bill that has been brought before us—the Democratic bill—which would expand the coverage of health insurance to 94 percent of Americans.

There has been a lot of talk about rationing in other countries. Senator KYL of Arizona speaks about England and Canada and rationing and waiting in line and how unfair it is—and there is a fundamental unfairness to waiting in line when a doctor says you need some medical treatment. But keep in mind there is rationing in America. Fifty million Americans have no health insurance. That is rationing. Many Americans have health insurance policies that are not worth anything. That is rationing.

We know more and more people are filing for bankruptcy in America because of medical bills because they do not have the out-of-pocket money for medical care they need in America, and that is rationing. In the developed world, which America certainly leads,

we are the only Nation on Earth where a person can die for lack of health insurance, and that is rationing and that is our current system.

Some say these reforms are too complex—2,000 pages. I defy anyone to take 2,000 pages and write down and describe the current health care system in America. They cannot. It is much more arcane, complex, and bewildering than this bill itself.

Also, I think this bill, it is critically important to note, is going to give people an opportunity to fight the health insurance companies who consistently turn down the requests of doctors and patients for care, saying they are not covered by the policy or the person failed to disclose everything they should in their application for health insurance.

We take them on. It is about time we did. These health insurance companies make a fortune. Their CEOs are paid a fortune, and they have created a situation which rations care to Americans today. I have seen it firsthand. I know friends who are going through it, people right in my office. And anyone who is listening to their constituents back home knows this is true.

There is also one other element I will mention before yielding the floor to the Senator from Minnesota. We will dramatically expand the Community Health Care Clinics in America with this bill. If you are aware—and you should be—of these clinics in your community, you know these are the clinics with the medical professionals, doctors, nurses, dentists, radiologists, who provide basic primary care to people who are not wealthy. They provide care at a fraction of the cost to people going into a hospital or emergency room for a fever or a child with an earache, and they do it well. They do it in Chicago, do it in Springfield, and do it all over my State—and we will expand it. You will see after this bill passes a dramatic change in primary care in America, more and more primary care physicians' costs being brought down with quality care at a local level.

We need more of it. This bill does it, and there is nothing coming from the other side that even matches it. I am prepared at this point to yield the floor to the Senator from Minnesota for the remainder of the time until 4 o'clock.

Mr. ROBERTS. I have one other question to ask of the Senator.

The PRESIDING OFFICER. The Senator from Minnesota has the floor.

Mr. FRANKEN. I will yield to the Senator from Kansas for a question.

Mr. ROBERTS. OK. "You again?" Just a personal aside.

When we get through with the Defense appropriations bill, which will be soon, and that issue will be settled—and I am not going to talk about it anymore with the exception that this is the only time I have had to speak to several amendments I feel very strongly about. But as I say, I don't know

whether four is the accurate number being substantive. I think the three amendments I have on my desk are substantive.

I would say to the Senator, when we take up health care again, would the Senator give me some assurances that I can offer these three amendments? One would be the Medicare advisory board; one would be to cut out the cuts in regard to the hospitals, \$1.5 billion to Kansas alone; and then what we are talking about are the four rationing task forces and boards that we had when I was making my speech.

If I could have some assurance I could offer those—

The PRESIDING OFFICER. The Senator from Minnesota has the floor. If he has yielded for a question, the Senator from Kansas will propound a question.

Mr. ROBERTS. That is the question, if he could give me some assurance that those would be considered? That would be fine. But that has not happened, which is why we are in the situation we are. I am done.

Mr. FRANKEN. Thank you, Mr. President.

Mr. DURBIN. If the Senator from Minnesota will yield for a kind of question?

Mr. FRANKEN. Certainly.

Mr. DURBIN. I would like to ask the Senator from Minnesota if he is aware of the fact that we have been debating health care reform for 19 days on the floor of the Senate, and in that period of time there have been four amendments offered by the Republican side of the aisle to change the bill and six motions to commit the bill back to committee, stop the debate on the floor, and that is the sum total of all of the effort on the Republican side to date? We do not choose the amendments, the leadership chooses it on the Republican side of the aisle.

I ask the Senator from Minnesota, is he aware of that?

Mr. FRANKEN. I am now. I was aware of the general shape of things, which is the sort of dearth of substantive amendments offered and the delay—yes. That I am aware of. Thank you.

Mr. President, I ask unanimous consent to speak for 10 minutes as in morning business.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERTS. Reserving the right to object, and I will not object to my good friend, but I can't let this stand when the distinguished Senator from Illinois says there are only four amendments, and I have on my desk amendments I have tried to—

The PRESIDING OFFICER. Does the Senator from Kansas have an objection?

Mr. ROBERTS. I am reserving my right to object. Under my reservation, I point out to my distinguished friend,

I would like to invite him to my office so he could see these amendments that this leadership has not allowed us the time to consider. I do not think that is right. I had to set the record straight.

The PRESIDING OFFICER. The Senator from Minnesota.

THE SCHOOL PRINCIPAL RECRUITMENT AND TRAINING ACT

Mr. FRANKEN. Mr. President, the American dream, and its promise of prosperity, has long been predicated on the simple idea that opportunity is a right, and not a privilege, and that every individual should be afforded a level playing field on which to set out into the world.

To fulfill this promise to our children, we must close the school achievement gap that is leaving so many of our low-income and minority children behind.

Closing the school achievement gap is one of the defining civil rights issues of our time. It is a cause that challenges our society to uphold its time-honored commitment to equal access and opportunity for all.

Yet reversing decades of educational inequality is no easy task. We cannot expect our schools to go it alone. We also need to improve social services in low-income communities to help students address the numerous challenges they face outside the classroom that make it difficult for them to learn. At the same time, we cannot absolve schools of their responsibility to improve considerably. There are exemplary schools scattered across the country that are proving every day that while they cannot solve all of their students' problems, they can push them to increasingly higher levels of achievement under the most trying of circumstances.

Our task now is to learn from these schools. While No Child Left Behind shined a light on the inequality of our educational system, it has done little thus far to address the problem. As we approach the reauthorization of No Child Left Behind, it's critical that we look to the schools that are beating the odds, and determine how to replicate their success.

One of the most common features of successful schools in low-income and high-minority communities is the presence of an effective school principal. This should come as no surprise; it is a matter of common sense to expect a successful school, or any successful organization, to have a strong leader. Moreover, research underscores the importance of school leadership. In fact, research shows that school leadership is second only to teacher quality in its impact on student learning.

Yet despite the importance of school leadership, the Federal Government has not devoted adequate attention and resources to improving the quality of principals in high-need schools, which serve high proportions of low-income and minority students.

Senator HATCH and I intend to change this. Having seen the extraordinary impact of effective school principals in Minnesota and Utah, we believe that improving principal quality is essential to turning around high-need schools.

That is why we have introduced the School Principal Recruitment and Training Act. The bill will create a pipeline of effective principals for high-need schools by providing high-quality programs with funding to recruit and train principals to take on the challenge of leading those schools.

One principal who has made a particular impression on me is Principal Andrew Collins at Dayton's Bluff Elementary School in Saint Paul, MN. The Dayton's Bluff School is diverse and poor. Nearly all its students are eligible for free and reduced price lunch. One-third of its students are English language learners.

Dayton's Bluff used to be one of the worst performing schools in Minnesota. Only 6 percent of its third graders and only 4 percent of its fifth graders were proficient in reading and math.

But that was Dayton's Bluff 10 years ago. In 2001, the school was restructured. Today, Principal Collins is in his fifth year of leading the school, and under his leadership, student achievement is increasing at a truly amazing pace. Proficiency on State math tests at Dayton's Bluff has increased from 49 percent 3 years ago—10 points below the State average—to 71 percent, or 8 points above the State average. African-American students at the school have performed more than 20 percentage points above African-American students statewide on both math and reading tests.

It is the same school, the same neighborhood, and the same kids. Yet the school is achieving vastly different results. The success of the school is a testament to the hard work of Principal Collins and his staff. Principal Collins has led the school's transformation by working closely with teachers to help them improve their instruction and their use of formative assessments and student data. He has also supported the growth of his teachers by giving them time to collaborate with each other on improving their instructional practices.

Principal Collins is, unfortunately, the exception to the rule. Many districts report shortages of qualified principals willing to lead schools that are particularly in need of a strong guiding hand. We need to recruit and prepare more principals like Principal Collins in order to improve student achievement, and close the achievement gap. We can't afford not to make this a priority.

When schools are not performing adequately, we hold principals accountable. But it doesn't make sense to place underprepared principals in

schools facing great challenges—and then be surprised when these schools experience high principal turnover rates and continue to struggle with student achievement.

We need to provide principals with more intensive and hands-on training than most of them currently receive so they will be ready to tackle the challenges of leading high-need schools. They need to be ready to lead and inspire staff, create a positive atmosphere for students, engage families, and use data to drive a continuous process of improvement. The School Principal Recruitment and Training Act would provide principals with the high-quality and intensive training they need to address these challenges.

We are fortunate to have principals in some schools who have put in long hours as school leaders, constantly striving to improve their schools for the sake of their students. We owe it to our children to provide the resources necessary to recruit, train, and support more principals of this caliber so every school, and particularly those in greatest need, can benefit from effective leadership.

Senator HATCH and I will continue to work in the coming months to ensure that we invest in principal recruitment, training, and retention so that our schools have the leadership they need to do right by our students. We view this investment as key to closing the achievement gap, and, in the process, delivering on America's promise of opportunity for all.

The PRESIDING OFFICER. The Senator from Utah.

Mr. BENNETT. Mr. President, may I inquire as to what the status of the time allotment is?

The PRESIDING OFFICER. The minority now has 30 minutes.

Mr. BENNETT. I thank the Chair.

I rise to discuss the Defense appropriations bill. We think of that in terms of funding the troops and taking care of challenges overseas, but there is an aspect to this bill I wish to focus on. In this bill, in addition to appropriations for the Defense Department, there is what has come to be known around here as the doc fix. That is, every year we face a situation with respect to physician reimbursements for Medicare. Every year the law that is before us cuts the level of reimbursements for Medicare to the doctors. Every year the doctors come back to the Congress and say: We can't survive this. We can't live with this. We have to have some more reimbursement. The cuts that are in the law can't be allowed to continue.

Every year we come along and say: All right, we will fix that but just for this year. Every year we say: All right, we will give you the full amount of reimbursement that you feel you are entitled to and, thereby, postpone the amount of cuts in your reimbursement

that are in the law. This has happened so often that it now has a generic name. Every time it happens it is called the doc fix. This year the doc fix is included in the appropriations bill for the Defense Department.

The reason it is appropriate for us to be talking about the impact of the doc fix at this particular time is because of the impact of the doc fix on the health care bill which is what we will return to when we are through with the Defense appropriations bill. Given the fact that the doc fix is in the Defense appropriations bill, I think it appropriate that I talk about the underlying problem for a moment. When you get to the health care bill and try to figure out how it is going to be paid for, this multitrillion dollar bill, you find that one of the main ways it is going to be paid for is by cutting the reimbursement to doctors and hospitals under Medicare. Indeed, I believe the amount that will be cut is up to $\$1\frac{1}{2}$ trillion. The reason I say I believe that is the amount is because we have not seen the actual language of the bill we will be asked to vote on probably on Christmas Eve. The bill has been drafted. The managers package has been drafted. It has been referred to CBO for a score. But it has not been shared with any of the Members of the Senate. We are guessing as to what it will be.

But there has been enough said and enough written about it that I think the guess of a $\$1\frac{1}{2}$ trillion cut in appropriations to physicians and hospitals is a legitimate number.

All right. We have never seen a cut of this magnitude before. We have had much smaller cuts that have come along, and every time we have dealt with those cuts by passing a doc fix.

Now what we are seeing here is the passage in the Defense appropriations bill of yet another doc fix. What that means is, we know, based on precedent, that the Congress will never allow the \$500 billion cut that is in the underlying health care bill to actually take place. If it is not going to take place, why is it in the bill? The answer to that is something I have a hard time explaining to my constituents, because they don't understand the ins and outs of the scoring situation by the CBO. But I will do my best to help make it clear.

The Congressional Budget Office is called upon to score each bill separately. So if you have a bill with respect to defense, they score that bill, and they do not talk about the impact of that on the overall budget. They say: These are the numbers. If you have a bill that deals with Interior, they score that bill. If you have a bill that deals with Transportation, they score that bill. Each bill is scored separately as a single entity.

Let's talk about the health care bill. The health care bill is going to increase costs dramatically. When it in-

creases cost dramatically, in order to keep President Obama's pledge that it will not add one dime to the Federal deficit, there has to be something in that bill that cuts the cost. So we assume, based on previous versions, what will be put in the managers' amendment is a \$500 billion cut in Medicare reimbursements. Now you begin to balance the dollars within that bill. Because if we have \$500 billion more in spending but we are going to take \$500 billion out of Medicare, then the two balance each other, and you can say, as the computers at CBO do say: This bill is in balance and will not increase the deficit.

All right. But if you take the \$500 billion that has been cut from Medicare reimbursement and pass a fix, if you will, for that \$500 billion in another bill, it doesn't get scored against this bill. That is what we are doing with respect to the Defense appropriations bill. We are taking the Defense appropriations bill and passing a bill that would pay doctors under Medicare, would take care of the shortfall under Medicare, but would not be scored against the health care bill.

I don't know of any business that dares to keep its books that way. I don't know of any business that could possibly survive that would say: All right, we are going to calculate only in this one area the cost of the product against the sales of the product and say the two balance each other in such a fashion that this is a logical thing to do. But at the same time in a separate situation, we are going to say we are going to borrow X amount of money to pay for the shortfall in this product, and we are going to pretend that the borrowing of the money separately somehow doesn't affect the accounting with respect to the product. Nobody keeps books that way. Indeed, if a private entity were to try to keep its books that way, it would not only go out of business but possibly its owners or managers would end up going to jail. You cannot do that kind of sleight of hand in a private enterprise, but we do it all the time with respect to the government.

The attempt was made, if you will recall, for us to do the doc fix prior to the time when we got to health care. The Senate turned it down. The Senate said: No, we are not going to engage in those kinds of smoke and mirrors with respect to the budget. We turned that down. As I was driving home that night and I had the radio on and listened to people talk about today in Congress, this is what I heard. They said two items with respect to today's activity. No. 1, it talked about the progress of the health care bill in the Senate. And then, No. 2, it said the House just passed a \$200 billion doc fix to take care of the shortfall in reimbursements to doctors with respect to Medicare. Again, the computers at the Congressional Budget Office can't link these

two events. But they were clearly linked in the comments and the report made on the radio, and they are clearly linked in the deficit.

So the House is saying: We understand that we are not going to keep the pledges we are making in the health care bill, and we are going to appropriate \$200 billion for the sole purpose of breaking the pledge that will be made in the health care bill. But because they are done in two separate pieces of legislation, we hope no one will notice. We hope the American people won't find out that this is the kind of bait and switch we are going through with respect to this bill. We are finding an example of this in the bill before us, the Defense appropriations bill. It has a doc fix in it to take care of the situation as far as the computers are concerned, but it will not take care of the situation as far as the deficit is concerned.

This is not the only piece of smoke and mirrors that we have in the underlying legislation. Going along with it is another item that I find absolutely incredible. I have run a business. I have kept books. I have paid taxes. I have dealt with the government as they have come in to audit. I know that no one in a business could ever get by with the thing that is proposed in the managers' amendment, we think—we haven't seen the amendment—along with the doc fix that I have been describing.

Let me try to put it in this form. Let's assume that you are the manager of a company and the sales manager comes to you and says: We have a new product. It is going to be a hot new product. It is going to be fabulous in terms of its return for the company.

You say: Great, love that. Good news. How does it work?

Well, we are going to manufacture this new widget and it will cost us X. But the revenue from it is going to be Y and that is much more than X so we will make all that money.

You say: All right. How much does each widget cost?

Well, each widget costs more than we are going to sell it for.

OK, how in the world are you going to make so much money when you have a widget that costs more to make than you can sell it for?

He says: Easy. This is the way we are going to do it. We are going to lay out a 10-year program of sales, and we are going to sell this widget for that entire 10 years. But we are only going to deliver the widgets for 6 years. So we have 10 years of revenue and only 6 years of cost. So we have 4 years of pure revenue and no cost whatsoever.

At that point, I am sure you would say: Let's get ourselves a new sales manager. Let's get ourselves somebody who understands that the world doesn't work that way. You cannot balance your books by charging for 10 years and

then only delivering for 6. But that is what the underlying health care bill does. It says the taxes to pay for this health care plan will start in 2010. Indeed, it will start within a week or two after the passage of the bill, if we pass the bill on Christmas Eve. But the expenditures under this plan to make things available for all of these people who have been telling us we need health care reform now, that we cannot wait, we have to have it today. I have seen the placards raised. I have seen the protests. We have to have it now.

We say: All right. One thing you will get now are the taxes and the increases in premiums on people who already have health care. But you won't get any of the other benefits out of the bill for 4 years. We have to do it that way in order to make the books balance.

You have the doc fix, which the underlying bill we are debating, the Defense appropriations bill, makes clear is not going to happen as part of the way you pay for the health care. And then you have the 10-year revenue, 6-year expense kind of scheme to pay for a good portion of the rest of it.

So what is going to happen between now and 2014 when the bill finally kicks in? You are going to have three open seasons—for those who understand the language of the health insurance business—three open seasons in which people will look at their level of premiums and say: Wait a minute, how come my premiums are going up when nothing additional is being done with respect to health care reform? The answer will be: Your premiums are going up so the money can be charged by the computers as compensation for the new benefits that will kick in, in 2014.

If you are so impudent as to ask: Well, is the money that is going to come from the increased taxes and the increased premiums being put in a trust fund somewhere to be held solely for the purpose of paying for the increased health insurance benefits? The answer, of course, will be no. The money that is coming from the increased taxes and from the increased premiums will all go against the current deficit. It will all go to deal with the money we are talking about with the stimulus package. It will all go for other governmental purposes. There will not be a time of it saved to deal with health care. That is not the way the government keeps its books. The money comes in. It goes into general funds. It gets spent, and it gets spent immediately.

Oh, so that means in 2014, when the expenses of this bill kick in, there will not be a dime that will have been accumulated to help pay for that? That is true, as far as cash flow is concerned. But it is not true as far as the CBO score is concerned, and that is all we care about. All we care about is what the CBO computers tell us about scoring this bill.

One of the frustrations I have had coming to the Senate from a business background—having run a business, having understood the challenges of running a business—is the way the government keeps its books. I cannot think of a more devastating demonstration of how misleading the government accounting system is than the bill we will get to when we are through with the bill we are debating today. As I said at the beginning, one of the primary examples of that dishonesty is contained in the Defense appropriations bill, as it has this year's version of the doc fix.

Let me move to a related subject because, as I say, this bill talks about the doc fix. The doc fix is connected to the way we try to deal with entitlements. Let me step a step beyond the specifics of this bill for just a moment and describe what we are dealing with, with the entitlements.

First, I need to explain what an entitlement is. I have had constituents come to me and say: I hear all this conversation about Federal entitlements, and I don't understand. What is an entitlement?

Simply put, an entitlement is a payment to which the individual is entitled, whether the government has the money or not. It is not the same thing as the government appropriating money and saying: Now we are going to give it to you or now we are going to buy this or now we are going to pay that bill.

An entitlement means you are entitled to this money ahead of everything else. You are entitled to this money whether we have it or not. If we do not have the tax revenue that would give us the cash to pay you this entitlement, we have the legal obligation to go out and borrow the money and pay you the entitlement.

Entitlements—or as they are known in the appropriations world: Mandatory spending—now comprise more than two-thirds of all Federal expenditures. Let me repeat that because I get gasps of disbelief when I say this to my constituents back home. Entitlement spending—money the government is required by law to pay whether it has it or not—now comprises more than two-thirds of the entire Federal expenditures. The largest portion of the entitlement spending we deal with is in—you guessed it—health care.

If we allow the health care costs to continue to go up, as they have been going up, this is what we are looking at. We will be unable, by virtue of our tax base, to pay this entitlement spending. It will all be borrowed. The consequences to the national debt will be as follows. This is from the Congressional Budget Office. This is not an outside analysis. This is from within the own group we turn to in the Congress to tell us what is going to happen financially.

At the end of 2008, the publicly held debt of the United States was \$5.8 trillion. There were many who were very critical of the Congress and President Bush for allowing the debt to get to \$5.8 trillion.

If there is no diminution of the rate of increase of entitlement spending, if it goes as it has been going, if we take no steps to turn the cost curve down, what will it be in 10 years—not a long period of time in the Nation's history. It was \$5.8 trillion at the end of 2008. What will it be in 2019? The Congressional Budget Office says it will have grown from \$5.8 trillion to \$17.1 trillion. It will triple in a 10-year period if we do not do something about entitlements.

So what are we talking about with respect to the health care proposal? We are talking about creating a new entitlement. We are talking about not turning the cost curve down in the entitlements we have already; we are talking about creating a new one and adding it on top.

The best way to dramatize this, is to look at the 2010 budget, where we are right now, the 2010 budget on which we are drawing up appropriations bills. We passed that budget. I did not vote for it, but it was passed. Here are the details of the budget that was passed for 2010. It projected Federal revenues in 2010 at \$2.2 trillion. It seems like a lot of money. It should be enough to cover all our bills. Then you go to the next line, and it says: Mandatory spending—those are the entitlements—\$2.2 trillion.

That meant that in 2010, every single dime that came into the Federal Treasury was already committed to go out to an entitlement and not subject to the appropriations process in the Congress.

That meant that everything we appropriated money for in the Congress—the Embassies overseas, the military, the war in Afghanistan, AID activities, transportation, the national parks, education—everything else you can think of that the government does was paid for by borrowed money. Mr. President, \$2.2 trillion in and \$2.2 trillion out for entitlements meant that the additional \$1.4 trillion, that actually grew to \$1.7 trillion, that we spent had to be borrowed, added to the national debt.

That is why the Congressional Budget Office says we are currently on track to go from a national debt, when President Bush stepped down, of \$5.8 trillion to—10 years from now—a national debt of \$17.1 trillion.

I see my colleague from Texas has come to the floor, and I will be happy to allow him to take the rest of the time. It is up to him as to whether he wishes to enter into this.

The PRESIDING OFFICER. The Senator from Texas.

Mr. CORNYN. Mr. President, I would like to pose, through the Chair, a question to my colleague from Utah.

Is the Senator aware that on October 6, eight of our colleagues on the other side of the aisle wrote a letter to the majority leader asking that when a bill is introduced, the so-called substitute—that presumably is going to be revealed tomorrow morning—that eight of our Democratic colleagues asked that that legislation be posted for a full 72 hours, along with a score or cost estimate of the Congressional Budget Office, before they would be required to vote on it?

Mr. BENNETT. I say to the Senator from Texas, I was aware of the letter. I was not aware there were that many Democratic signers to it.

Mr. CORNYN. I would say to my colleague from Utah, Senator LINCOLN, Senator LANDRIEU, Senator MCCASKILL, Senator PRYOR, Senator BAYH, Senator LIEBERMAN, Senator NELSON, and Senator WEBB were all signatories on that letter.

I know at different points of the debate we have had some discussion. I think Senator DORGAN from North Dakota, who sponsored the amendment that would deal with drug prices, had expressed some concerns—I know, certainly, the Senator from Arizona, Mr. MCCAIN, has expressed some concerns about drug price issues and what kind of deals had been basically cut on the side that Members of the Senate are not necessarily privy to.

I would ask my colleague, is he aware the Obama administration has now been sued for the visitor list at the White House—which they have claimed privilege to—has been sued because they have withheld the names of the individuals who have come to the White House, some of whom may have been involved in negotiating these side deals we are not privy to? Was the Senator aware of that?

Mr. BENNETT. I say to the Senator from Texas, I was not aware of the lawsuit, and I appreciate his calling it to my attention.

Mr. CORNYN. Well, I would, finally, ask the Senator from Utah, you have heard, along with me and others, Senators say they are for the bill. But it is amazing how few people have actually seen it. Presumably, it will be revealed to us and the rest of the world tomorrow morning. Presumably, amendments will not be allowed on that bill. The majority leader can take procedures to block any amendments to the bill but we will then be put on a fast track, presumably, for passage—at least that is the intention of the majority leader—by Christmas Eve. Is that the Senator's understanding of the process we are looking forward to starting tomorrow morning?

Mr. BENNETT. It is my understanding that is the process, but I am not looking forward to it. I had hoped

to spend Christmas Eve with my family. In my family, the tradition is, we have the extended family get together on Christmas Eve. My house in Utah is being decorated on the assumption there will be anywhere from 60 to 70 people there to celebrate Christmas Eve. Regrettably, I will not be one of them.

But I say to the Senator from Texas, I will be here doing whatever I can to see to it that this bill does, in fact, not pass on Christmas Eve, for all the reasons we have been talking about. I think the best Christmas present we can give to the people of America, and particularly to their children and grandchildren, would be to defeat this bill and see to it there is not another new entitlement created that will cause the national debt to go up even more extravagantly than it is currently projected to do.

Mr. CORNYN. Mr. President, I ask unanimous consent that the two documents I referred to earlier be printed in the RECORD at the end of this colloquy.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. CORNYN. I would finally ask my distinguished colleague from Utah—he was alluding to this earlier—is he aware of any reason why this bill—much of the benefits of which will not kick in until 2014—why there is such an urgency to pass this bill before Christmas?

Mr. BENNETT. That has been the greatest logical disconnect of this entire debate. Because, as I said, I have seen the protest signs that are raised: We want health care reform now. I have seen the people come to the offices and pound on the doors and say: We have to get reform now. I have heard our friends on the other side of the aisle give examples of people who do not have health care coverage and say: They must get this coverage now. By the way, we have crafted a bill that will not do anything for them for 4 years.

If the thing is 4 years away, we can certainly wait until January to allow people to read the bill and offer some amendments.

Mr. CORNYN. I thank the Senator. I said that was my last question; this one really will be: Is the Senator aware of late-breaking news to the effect that not only Howard Dean, the former chairman of the Democratic National Committee, but several liberal pundits, including Keith Olbermann, and that now even moveon.org and the AFL-CIO have all come out in opposition to this bill? Is the Senator aware of the opposition not only on the right but apparently now on the left? We know the mainstream opposition of the American people as a result of the polling we have seen. Was the Senator aware of those developments?

Mr. BENNETT. I have been aware of that opposition. My own sense is that

in the end, that opposition will melt in the face of those who are trying to rush this bill through in the hope that by next November, the American people will have forgotten the details. I do not believe the American people will have forgotten the details of the bill by next November because even though the bill will not be in force in terms of benefits, it will be in force in terms of increased premiums and increased taxes.

Mr. CORNYN. I thank my colleague.

Mr. BENNETT. Mr. President, I believe the time for the minority has expired.

The PRESIDING OFFICER. The Senator from Utah is correct.

EXHIBIT 1

U.S. SENATE,
Washington, DC, October 6, 2009.

Hon. HARRY REID,
Senate Majority Leader,
Washington, DC.

DEAR LEADER REID: As you know, Americans across our country have been actively engaged in the debate on health care reform. Whether or not our constituents agree with the direction of the debate, many are frustrated and lacking accurate information on the emerging proposals in Congress. Without a doubt, reforming health care in America is one of the most monumental and far-reaching undertakings considered by this body in decades. We believe the American public's participation in this process is critical to our overall success of creating a bill that lowers health care costs and offers access to quality and affordable health care for all Americans.

Every step of the process needs to be transparent, and information regarding the bill needs to be readily available to our constituents before the Senate starts to vote on legislation that will affect the lives of every American. The legislative text and complete budget scores from the Congressional Budget Office (CBO) of the health care legislation considered on the Senate floor should be made available on a website the public can access for at least 72 hours prior to the first vote to proceed to the legislation. Likewise, the legislative text and complete CBO scores of the health care legislation as amended should be made available to the public for 72 hours prior to the vote on final passage of the bill in the Senate. Further, the legislative text of all amendments filed and offered for debate on the Senate floor should be posted on a public website prior to beginning debate on the amendment on the Senate floor. Lastly, upon a final agreement between the House of Representatives and the Senate, a formal conference report detailing the agreement and complete CBO scores of the agreement should be made available to the public for 72 hours prior to the vote on final passage of the conference report in the Senate.

By publicly posting the legislation and its CBO scores 72 hours before it is brought to a vote in the Senate and by publishing the text of amendments before they are debated, our constituents will have the opportunity to evaluate these policies and communicate their concerns or their message of support to their Members of Congress. As their democratically-elected representatives in Washington, DC, it is our duty to listen to their concerns and to provide them with the chance to respond to proposals that will impact their lives. At a time when trust in Congress and the U.S. government is unprecedentedly low, we can begin to rebuild

the American people's faith in their federal government through transparency and by actively inviting Americans to participate in the legislative process.

We respectfully request that you agree to these principles before moving forward with floor debate of this legislation. We appreciate your serious consideration and look forward to working with you on health care reform legislation in the weeks ahead.

Sincerely,

BLANCHE L. LINCOLN.
MARY L. LANDRIEU.
CLAIRE MCCASKILL.
MARK L. PRYOR.
EVAN BAYH.
JOSEPH I. LIEBERMAN.
BEN NELSON.
JIM WEBB.

OBAMA IS SUED FOR WHITE HOUSE VISITOR LIST

(By Bill Dedman)

The nonprofit conservative group Judicial Watch has sued the U.S. Secret Service after the Obama administration again denied a request for copies of the list of visitors to the White House.

The records are being sought by journalists and public interest groups to help determine who is influencing White House policy on health care, the economy and a host of other issues.

Under the Obama policy, most of the names of visitors from Inauguration Day in January through the end of September will never be released. After the Secret Service and the White House denied a request for those records, Judicial Watch filed suit on Monday in federal court in Washington.

Like the Bush administration before it, the Obama White House argues that the visitor records belong to the White House, not the Secret Service. White House records are not subject to the Freedom of Information Act, as agency records would be. Federal Judge Royce C. Lamberth ruled twice during the Bush administration that White House visitor logs belong to the Secret Service, which creates and maintains them, and must be released.

To settle lawsuits against the Bush and Obama administrations, filed by the liberal group Citizens for Responsibility and Ethics in Washington, or CREW, the Obama administration has released the names of hundreds of visitors, out of the hundreds of thousands who have been to the White House for meetings, events or tours. The administration has promised to release more of the names of visitors for the period from October onward. The first wave of records is due near the end of this year.

Even for the names it has released, the White House has not provided a city or affiliation, such as a company name or organization represented, making it difficult or impossible to tell whether a person named on the list is a well-known person with that name. And some names are not being released at all, including potential Supreme Court nominees, personal guests of the first family and certain security officials.

The White House has set up a Web page where members of the public can request the release of names of visitors, but that system gives results only for the names of visitors that the public can guess. If the public can't guess who may have visited the White House between January and September, it can't find out the names.

In addition, although the White House system requires requesters to submit their e-mail address, requests are not acknowledged

by the White House, and no reply is sent to the requesters. The names sought, if they correspond to actual visitors, just show up in the next batch of names released by the White House. So far, each release of names by the White House has happened on the evening before a holiday, the classic Washington tactic for burying uncomfortable news.

NEGOTIATIONS WITH WHITE HOUSE

Judicial Watch, in a press release, described being invited to the White House to discuss its request. It met on Oct. 27 with Norman L. Eisen, special counsel to the president, who happens to be a founder of CREW, which had dropped its own lawsuits on this issue.

"During the meeting, the Obama White House officials asked Judicial Watch to scale back its request and expressed hope that Judicial Watch would publicly praise the Obama administration's commitment to transparency," Judicial Watch said. "However, the White House refused to abandon its legally indefensible line of reasoning that White House visitor logs are not subject to FOIA law."

"If the Obama administration is serious about transparency, they will agree to the release of these records under the Freedom of Information Act," said Judicial Watch President Tom Fitton.

White House officials did not reply Wednesday to a request for comment on the Judicial Watch lawsuit.

REQUEST BY MSNBC.COM ALSO DENIED

A similar request by msnbc.com was rejected by the Secret Service, which referred us to the White House, which also denied the request. The Secret Service denied an administrative appeal of msnbc.com's request on Monday.

The White House now says that national security is a reason not to release the records for January through September, an issue not raised by the Bush or Obama administrations in their previous legal filings on this issue.

"The inherited visitor entrance system was not structured to identify sensitive records," Eisen wrote to msnbc.com. "As a result, we cannot make a broad retroactive release of White House visitor records without raising profound national security concerns. For example, the release of certain sensitive national security records encompassed in your request could assist foreign intelligence agencies to identify and target U.S. government officials working on sensitive national security issues."

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. CASEY. Mr. President, I ask unanimous consent that we continue with alternating blocks of time until 6 p.m.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. CASEY. Mr. President, I rise at this late afternoon hour to talk about what has transpired over the last 24 hours. As the Presiding Officer knows, we had a vote at 1 a.m. this morning. To say that is unusual is an understatement; to have the Senate voting at that hour is most unusual. What that vote symbolized—what happened here pursuant to that vote was I think an exercise in Washington game playing.

We have now a health care bill that the American people have been debating for months—the bill in front of the Senate right now, a bill we have been debating intensively over the last couple of weeks, and we want to get to a vote on it. In order to prevent a vote on health care, the Republican side of the aisle decided they would use any tactic necessary to stop the bill, so they came out in full force at 1 a.m. and voted against the Department of Defense Appropriations Act for 2010.

It is hard to understand why. I can understand opposition to a health care bill, and we can debate that, but it is hard to understand why any political party—even one that is intent on killing a health care bill—would use the Department of Defense Appropriations Act to do that, but that is what they did. It is another example of what makes people angry about what happens or doesn't happen in Washington.

We have seen over the last couple of months a real debate about what our policy will be in Afghanistan. We have had a debate for years about what has been happening in Iraq, in those two conflicts, and what our fighting men and women are doing around the world serving their country. We know now that there are more than 34,000—almost 35,000—Americans deployed in Afghanistan.

When I consider my home State of Pennsylvania, when you look at the number of Pennsylvanians overseas—Afghanistan, Iraq, as well as other places around the world where they are serving, where they are deployed—10,430 Pennsylvanians are serving around the world. There are 6,431 active duty and 3,999 Guard and Reserve Pennsylvanians. Many other States could point to similar numbers. So we have tens of thousands of Americans serving around the world, especially those who are serving in Afghanistan and in Iraq right now, and yet we have the Senate, on the Republican side of the aisle, using a Defense appropriations bill to slow down the health care debate and to stop the bill. It is beyond insulting to the American people that they would use this tactic.

What is the bill all about? Well, I won't go through all of it, but here is what the Department of Defense Appropriations Act entails. First of all, military personnel: Funding for more than 2.2 million Americans who are serving our country. More than 1.4 million are active duty and over 844,000 for the Reserve component.

Military pay: The bill provides for a 3.4-percent military pay increase above the requested amount.

Operations and maintenance, readiness and training: The bill includes \$154 billion for Defense operations and maintenance.

Procurement, research, development, testing and evaluation, a whole series of expenditures that our fighting men

and women need to have in place to help them around the world, and a whole list of vehicles and other equipment that are paid for by this bill.

It goes on from there, a long, important list of what our fighting men and women need. What they don't need is a group of Washington, DC politicians using the Defense appropriations bill to play a game on health care. If the Republicans want to slow down health care or stop it, they have every right to do that, and they have every right to use lots and lots of tactics and procedures. What they should never do—there may not be a rule against this per se, but one would think as Americans who are supposed to be supporting our fighting men and women in Afghanistan and in Iraq and other places around the world, one would think they would draw the line and not cross the line of using the Defense Appropriations Act to enforce their will as it relates to health care.

What our fighting men and women expect of us is they expect us to give them the resources they need to fight those battles and not to play petty, insulting political games in the midst of that, but that is what we have had. We had Republican Senators come down to this floor at 1 o'clock in the morning last night and vote one after another after another against moving the Department of Defense Appropriations Act forward.

I will note that in the midst of all that, the Secretary of Defense, Secretary Gates, who we know served several Republican Presidents—he served now former President Bush and President Reagan and served under the first President Bush as well—recently wrote that delay of this bill, delay of the Department of Defense Appropriations Act, would result in a “serious disruption” in the military's ability to pay troops. The Secretary of Defense continued:

It is inconceivable to me that such a situation would be permitted to occur with U.S. forces actively deployed in combat.

I couldn't say it better myself. It is inconceivable. We know political parties fight and both parties have battled and they carry it too far once in a while, but I don't know of an example where a political party, in order to stop a domestic bill that deals with domestic issues—in this case health care—to stop that from moving forward would use the Department of Defense appropriations bill as its vehicle.

As it stands now, we know the vehicle that keeps our government moving and paying for government programs—the so-called CR, which is an acronym for continuing resolution—which, to get out of the Washington-speak for a moment, means the way we are paying for government to operate over a limited period of time, we know that resolution, the funding in that resolution as it relates to Pentagon operations

runs out at midnight. I recognize there is some flexibility that will allow operations to move forward, but it is outrageous and insulting when a political party feels the need to unreasonably delay funding for the troops because they want to put something in the way of having health care move forward. There are lots of ways to obstruct. There are lots of ways to slow things down.

Under the Senate rules, the minority party—in this case the Republicans in the Senate—have rights to do that. But one would think when we have people on the battlefield they would draw the line at this, but they haven't. They have crossed this line, and I think the American people know what is going on here. It is a game. It is a big Washington game. The only problem here, the fundamental problem here is that it is in direct conflict with our obligation to make sure that we move legislation as it relates to our military as fast as we can. This isn't something that people have been working on for a couple of days. There have been hearings that are the undergirding or the foundation of this appropriations act. There have been debates about what the spending increases should be. All of that took place over many months, and now we want to move a Defense Appropriations Act forward, and what are the Republicans doing? They are using that vehicle to stop the health care bill.

So, even as I said before, to say it is insulting or outrageous doesn't begin to capture it, but I think the American people know what we are talking about. They understand a game when they see it, and they are seeing it with this shell game that has been played over the last couple of hours.

We are going to continue to make sure that we do everything possible to move this legislation forward, and then, after we get this legislation moved forward, then we are going to get back to health care and pass a health care bill before Christmas.

With that, I yield the floor.

I note the absence of a quorum.

THE PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BENNETT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

THE PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENNETT. Mr. President, I understand there is a member of the Democratic Caucus who is headed to the floor. I will immediately cease speaking as soon as he or she arrives. I simply wish to make a few comments with respect to statements made with respect to the schedule. The question was asked by my colleague from Texas: Why would people want to rush this bill through when the effective date is not until 2014?

The other question was: Why would someone want to delay the vote? I think the answer to both questions is the same. The American people are looking at this bill. Admittedly, they are not looking at the specific bill, because no one knows what it is. It is still, for the umpteenth time, being rewritten. They are looking at the general outline of the bill, and the more they see, the more they don't like it.

Every poll that comes out shows increasingly decreasing support for the bill and increasingly opposition to the bill. The gap between these two positions is growing wider and wider. This is quite remarkable, because when we began the debate in the Spring, support for the idea of health care reform, and particularly for some of the specifics, was very high, and disapproval was very low. We have seen, over time, those two lines cross. Now opposition to the bill is, according to some polls, as high as 60 percent or more, and support for the bill has dropped.

I can understand that those who want the bill passed want to rush the process as fast as possible, because they don't want any more erosion in popular support. Those who want the bill stopped want to stretch the process out so that the polls can have their impact on Members of this body. It should not, therefore, come as a surprise to anybody that the procedures will be handled in the way they are—with the one group saying, let's get it done quickly before people find out more about it, and the other group saying let's slow it up as much as we can while people find out more about it.

I think that is the answer to the questions that have been raised here with respect to the procedure.

I see other Senators may well be coming. Until they arrive, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Ms. COLLINS. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The time currently is all located to the Democratic side. The Senator must ask unanimous consent to do so at this time.

Ms. COLLINS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Ms. COLLINS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. COLLINS. Mr. President, I ask unanimous consent that, notwithstanding the fact that there are few re-

maining moments on the other side of the aisle, I be permitted to proceed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. COLLINS. Mr. President, let me emphasize that it was cleared with my colleagues on the other side of the aisle.

I rise today in support of the fiscal year 2010 National Defense Appropriations Act. Let me begin by thanking the committee's distinguished chairman, Senator INOUE, and the ranking member, Senator COCHRAN, for their leadership in crafting this bill and for their strong commitment to our Nation's Armed Forces.

I am very proud of the work that the State of Maine does that contributes to our national defense. The appropriations bill provides vital resources that our troops need and recognizes the enormous contributions made by the State of Maine to our national security. From the Portsmouth Naval Shipyard in Kittery, to the Pratt & Whitney Plant in North Berwick, to the Bath Iron Works shipbuilders to the University of Maine's engineers, to the Maine Military Authority in Aroostook County, Mainers all over our great State are leading the way to a stronger national defense.

This legislation will provide funding for essential training, equipment, and support to our troops as they bravely and skillfully engage in national security efforts at home and abroad. This is a critical time in our nation's history and the Committee has, once again, demonstrated its strong support of our soldiers, airmen, sailors, and marines.

This legislation also will fund critical force protection and health care initiatives for our troops, while continuing development of important technologies and acquisition programs to counter existing and emerging threats.

The legislation before us includes a strong commitment to strengthening Navy shipbuilding. Our nation needs a strong and modern naval fleet allowing us to project power globally and to respond to threats. This bill authorizes \$1 billion in funding for construction of the third DDG-1000, a priority of mine. The Pentagon's decision to have Bath Iron Works, BIW, build all three of the DDG-1000s demonstrates well-deserved confidence in BIW and will help ensure a stable work load for the shipyard and more stable production costs for the Navy.

In addition, this legislation authorizes \$2.2 billion for continued DDG-51 procurement and nearly \$150 million for the DDG-51 modernization program. The lessons and technology developed in the design of the DDG-1000 can be incorporated into the DDG-51 program to reduce crew size and to improve capabilities.

The legislation fully funds the F-35 Joint Strike Fighter request for both

the Navy and the Air Force. This aircraft, powered by the superb engines made by Pratt & Whitney, will enable our servicemen and women to continue to maintain our air superiority.

At the request of Senator SNOWE and myself, the Committee provides an additional \$20 million for Humvee maintenance to be performed at Maine Military Authority's, MMA, Army National Guard Readiness Sustainment Site, RSMS, located in Limestone, ME. For nearly 13 years, the Army National Guard has relied on Maine Military Authority to provide a dependable service to our Nation's war fighters. The dedicated and talented professionals at MMA have demonstrated their value to the Army and to the Nation and consistently have performed Humvee refurbishment at a lower cost than the Army's own depots. This funding would help to ensure that MMA's valued workforce and high quality product remain a national asset supporting the defense of our country.

The bill also provides \$250 million for cancer research through the Defense Health Programs with \$150 for the Breast Cancer Research Program, \$80 million for Prostate Cancer Research program, and nearly \$20 million for the Ovarian Cancer Research Program. I believe that there is simply no investment that promises greater returns for America than its investment in biomedical research. These research programs at the Department of Defense are important to our nation's efforts to treat and prevent these devastating diseases that also affect our veterans and servicemembers.

The bill provides \$307 million to address the Tricare private sector shortfall in fiscal year 2010 as identified by the Department of Defense. I know Tricare funding is vital to so many Maine veterans. We must continue to support robust funding for this important program and limit increases in Tricare premiums and copayments.

I strongly support the additional \$15.6 million to strengthen the Office of the Inspector General in order to keep pace with the growth in the size of the defense budget and the number of defense contractors. More vigorous oversight of defense contracts to prevent waste, fraud, and abuse of taxpayer dollars will complement the procurement reforms we approved earlier this year.

This bill also includes funding for other defense-related projects that would benefit Maine and our national security.

Funding is provided, for example, to Saco Defense in Saco, Maine, to enable the company to continue manufacturing weapons that are vital to the Armed Forces.

In addition, at my urging, the legislation appropriates \$5.28 million for the University of Maine. This funding would support the development of LGX

High Temperature Acoustic Wave Sensors and allow the University of Maine to continue to investigate fundamental sensor materials and design concepts as well as demonstrate functional prototypes of acoustic wave sensors that will be tested under extreme temperature environments. The funding for the University will also provide for woody biomass conversion to JP-8 fuel, which will provide affordable alternative sources for military aviation fuel.

Mr. President, I want to comment further on the health care bill currently before the Senate. I have talked about my concerns previously regarding the impact on premiums, my belief that the bill will actually cause many middle-income Americans to pay more for health insurance. I have also talked about my concerns about the impact on our small businesses.

I want to talk about a couple of other issues that are particularly important to the State of Maine. The first is the impact of the nearly \$500 billion in Medicare cuts on Maine's home health, hospital, and other health care providers, including our nursing homes.

I am concerned that the bill before us is financed, in large measure, through these enormous cuts in the Medicare Program—a program that already has long-term financing problems. According to the CMS Actuary, these proposed deep cuts will threaten Medicare's fiscal stability and push one in five hospitals, nursing homes, and home health care providers into the red. Many of these providers, I fear, would simply stop taking Medicare patients, which would jeopardize care for millions of seniors.

I want to make clear that I do believe there are savings that can be found in the Medicare Program. For example, far too much is lost each year to fraudulent claims. That is an area where we need to crack down. As we put in place the health care reforms that have widespread support on both sides of the aisle, we could also achieve real breakthroughs that would improve the quality of care while lowering costs. But that is not what we are talking about in the underlying bill. Instead, we are talking about essentially across-the-board cuts, deep cuts, cuts that are going to hurt some of the most vulnerable people in our country—our seniors and our disabled citizens.

This became even more clear to me as a result of a conversation I had this past week with Peter Chalke, the CEO of Central Maine Health Care. He runs not only the tertiary hospital in Lewiston, ME, but also rural hospitals in western Maine, in Rumford and in Bridgton, as well as a smaller hospital in Brunswick, ME. So you can see from that description, if you are familiar with the State of Maine, that the hospital network he covers makes a huge difference in the lives of so many

Mainers. Here is what he told me. He first pointed out that Maine is one of the oldest States in the country. So we have a substantial Medicare population.

Despite being recognized nationally for providing high-quality care, Maine's hospitals currently receive the second lowest Medicare reimbursement in the country relative to their costs. There is no fat to cut in the reimbursements of hospitals in the State of Maine. They have very high quality, some of the highest quality in the Nation, according to health care experts, and according to Medicare itself. Yet they get the second lowest reimbursements.

The CEO of this hospital network put it bluntly to me. He said passage of this bill in its current form would be disastrous for the State of Maine. He said the bill would saddle Maine's hospitals with some \$800 million in Medicare cuts over the next decade, with very little upside benefit from expanded coverage since about 90 percent of Maine residents are covered by some type of insurance policy today.

We also have a large Medicaid population in our State, which led him to another concern. Mr. Chalke told me that a further expansion of the Medicaid Program is simply not sustainable, since Maine has repeatedly demonstrated its inability to pay for the current Medicaid Program.

In Maine, that program is known as MaineCare. It pays Central Maine Health Care just 60 percent of its allowable costs. Moreover, MaineCare will owe Central Maine Health Care more than \$50 million by the end of the year.

The failure on the part of Medicare and Medicaid to pay their full share, to pay the amount that it actually costs to provide the care, simply results in cost shifting to private payers. In Maine, this cost shifting means that individuals who have private insurance cover 130 percent or more of hospital costs. That should not be a surprise to us. If both Medicare and Medicaid are not paying at a sufficient level to truly cover the cost of care, what happens? The cost gets shifted to private insured patients. This big gap is one reason Maine's insurance rates are the fourth highest in the Nation.

This is an untenable situation. The CEO told me that if Congress passes this bill, Maine's hospitals and physicians will be forced to expand cost shifting, further increasing the pressures on private insurance markets, further making that cost an extraordinary burden on middle-income families.

Medicare, which is so critically important to our Nation's seniors, should not be used as a piggy bank for new spending programs when the revenues are needed to shore up the current program. I know my colleague from Tennessee has been talking about that

issue for a long time. I joined him in a letter that said if there are savings to be found in Medicare, let's use those savings to shore up Medicare. We all know that Medicare is not financially sustainable. So what are we doing? We are cutting nearly \$500 billion out of a program that does not have sufficient funds to deal with the influx of the baby boom generation, much less with the costs it is now incurring. It is fiscally irresponsible to raid Medicare to pay for a new entitlement program.

Mr. McCONNELL. Will the Senator from Maine yield for a question?

Ms. COLLINS. I will be happy to yield.

Mr. McCONNELL. I think I heard some of our colleagues say these Draconian Medicare cuts would actually lead to the closure of some rural hospitals. I am wondering if the Senator from Maine thinks that may even be possible given the magnitude of these Medicare cuts we are hearing complaints about all across America.

Ms. COLLINS. Mr. President, the minority leader brings up a very good point. I know the Republican leader is familiar with the analysis that was done by Medicare's own Actuary that says that one out of five hospitals—and these are likely to be the small rural hospitals that are so important in our States—would be so jeopardized by these cuts that they may not survive. Another thing that will happen is that physicians are going to start turning away Medicare patients.

Mr. McCONNELL. I ask my friend from Maine, isn't that beginning to happen in some States already before we even take this additional step?

Ms. COLLINS. It is. My friend from Kentucky is exactly right. In my State, there are already severe shortages of primary care physicians, particularly in the more rural areas of the State—the northern, eastern, and western parts of the State. Their practices are full to start with. What we are asking them to do is to keep accepting new Medicare patients whose reimbursements will not cover the cost of their care. That is why in many States you see physicians limiting how many Medicare patients they will take. I know how painful that is for our physicians. After all, they became physicians to care for people. They want to ensure people have the care they need. But there is a limit to what they can do.

I share the concerns of the Senator from Kentucky that the result of this bill will be to jeopardize the very existence of rural hospitals, small nursing homes, home health care providers, which, in my State, are absolutely critical. After all, I know my colleagues from Tennessee and Kentucky have had the same experience I have had of talking to seniors who are getting home health care. They are so happy to receive health care in the privacy and

the comfort and security of their own homes rather than being forced into a hospital setting or a nursing home. Yet the bill before us singles out the Medicare home health benefit for a disproportionate share of the cuts. It proposes that home health care and hospice care—hospice care, Mr. President—would be slashed by \$42 billion over the next 10 years. That makes no sense whatsoever. That's \$42 billion in cuts for home health care and \$8 billion on top of that for hospice care.

A home health care director in my State, a nurse whom I know well, really summed it up well. First, she described the impact on Visiting Nurses of Aroostook, the county I am from in northern Maine. It had total revenues of \$1.9 million last year. It estimates that it will lose \$313,000 in the first year of the House bill, if that were to pass, and \$237,000 under the Senate bill.

According to the director of this agency, cuts of this magnitude would cause this home health agency to consider shrinking the area served or discontinuing some services. They cannot afford to cover such a geographically huge area as Aroostook County with that kind of cut.

Here is another thing I want to share with my colleagues, because this is what this debate is really all about. What she told me is the following: It is going to be hard for our staff—and our staff is scared—but it is our patients who will pay the price if Congress makes these cuts in home care.

That is what concerns me. It is not just the impact on our rural hospitals, our dedicated physicians, our struggling nursing homes, and our valiant home health agencies. It is their patients. It is the vulnerable senior citizen who lives on a rural Maine road who may lose access to home health care. It is families who want to live in rural communities but cannot if there is not a hospital nearby. It is a nursing home that closes, forcing families to move a loved one far away from the home. Those are the real-life consequences of slashing Medicare.

I hope we will reconsider the cuts in this bill. It is so disappointing that the Senate has repeatedly rejected attempts to try to mitigate those cuts.

There are so many other problems with this bill.

I see the Republican time is about to expire. I hope as we proceed that we can also talk about the impact of the 4-year gap between when all the new taxes under this bill go into effect and when the subsidies are proposed to go into effect. \$73 billion in new taxes and fees will go into effect by 2014, and some of those new taxes start in 2 weeks—2 weeks—if, in fact, this bill is passed. And I hope it will not be. For example, the bill taxes pharmaceuticals and medical devices. The bill taxes health insurance. Next year, the bill imposes a penalty for health sav-

ings accounts, which makes no sense to me. We want people to be able to save money to help cover their deductibles.

Next year, the bill proposes to restrict flexible spending accounts—again, this makes no sense to me.

The \$73 billion in new taxes and fees imposed by the bill over the next four years are going to be passed on to consumers, without a doubt. CBO says that and the Joint Committee on Taxation says that. But when do the subsidies go into effect to mitigate this upward pressure on premiums? Not until 2014. I do not see how imposing these new taxes now—before the exchanges are set up that the chief benefits of the bill are supposed to become available—makes health care more affordable.

Mr. President, the health care legislation that the Senate is currently considering would have enormous consequences for our economy and our society. It would affect every single American and 17 percent of our economy. There are many reforms that have strong, bipartisan support, that could have been the basis of our efforts here in the Senate. It has therefore been disappointing that this process has been so divisive and partisan. While I continue to believe that our health care system is in need of fundamental reform, the bill before us takes us in the wrong direction and will do more harm than good. In keeping with the Hippocratic oath of “first of all, do no harm,” I plan to oppose this legislation.

Mr. President, I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Minnesota is recognized.

Ms. KLOBUCHAR. Mr. President, I ask unanimous consent to speak as in morning business for 5 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Ms. KLOBUCHAR. Mr. President, I come to the floor today to voice my support for the Department of Defense appropriations bill we are currently considering and my disappointment that some of my colleagues have chosen to hold up this important legislation for reasons completely unrelated to anything to do with this bill.

We have been debating health care in this Senate for months, and in the coming days we will continue to debate health care. There are many honest disagreements about the best ways to reform our Nation's health care system. They deserve discussion.

I will say, hearing my colleague from Maine speak, that I am concerned about Medicare as well. I am concerned because Medicare is going in the red in 2017 if we don't do anything about it. I look at my mom, who is 82 years old, who wants to make sure she stays on Medicare. I look at friends who are in their fifties and who want to make sure

they get Medicare when they are 65. We need to make sure we put in place those cost reforms that are going to give us the high-quality kind of care we have in Minnesota.

But what I want to talk about today is the Defense appropriations bill. Whatever disagreements we may have on health care, they have absolutely nothing to do with the Defense spending bill. Funding for our troops in Iraq, Afghanistan, and around the world, as well as for defense health and other critical programs should not be dragged into this debate. We should be able to separate the two issues and pass this Defense bill swiftly and overwhelmingly.

Senator INOUE and several of my other colleagues have already discussed the importance of this bill's funding provisions to our ongoing operations in Iraq, Afghanistan, and to our Nation's overall defense. I would like to spend a few minutes on the importance of this bill to my home State of Minnesota and where the Acting President pro tempore also resides.

There are currently over 1,300 members of the Minnesota National Guard deployed in Iraq. These deploying members are with the 34th Infantry Division, the famous Red Bulls—the longest serving unit in Iraq. They assumed command of all U.S. forces in Iraq's southern quadrant in May of this year, taking over from the New York-based 10th Mountain Division. This means these Minnesota National Guard soldiers have command responsibilities for 9 of Iraq's 18 provinces. For the last 7 months, they have overseen the continuing transfer of security responsibility to Iraqi forces, which will ultimately enable the responsible withdrawal of U.S. forces from Iraq. In order for these Minnesota National Guard soldiers to successfully complete their mission and return home to their families early next year, as scheduled, we need to provide them the funding included in this bill.

I know all of my colleagues share my belief that we have a responsibility to the brave men and women we send overseas to provide them with the resources they need to carry out their mission. And there is simply no reason for delay.

In addition to providing our troops with what they need when they are overseas, we also have the responsibility to take care of them when they return home.

As the Chair knows, in Minnesota, we are proud to have created the Beyond the Yellow Ribbon reintegration program. This groundbreaking initiative, pioneered by the Minnesota National Guard, helps soldiers make the transition from their life as a soldier to civilian life through counseling and other services.

Due to its overwhelming success in Minnesota, this program now serves as

a model for the national Yellow Ribbon program that I have worked with my colleagues to authorize and fund in recent Defense bills. The bill on the floor right now includes funding that will continue the Minnesota Yellow Ribbon program, as well as funding for similar reintegration programs in States across the Nation.

These are soldiers who don't have a base to come home to. They come home to small towns all over the country. The idea here is to bring them in to meet with their commanders again, to see if they have a job, to see if they have the right health care, to see if they have their education benefits set. That is the idea with Beyond the Yellow Ribbon.

When the 1,300 Minnesota National Guard soldiers return home early next year, they and their families need the funding in place in this bill in order to resume civilian life. Any delay makes it harder for commanders to have the necessary resources in place.

When our brave soldiers signed up to fight for us, there wasn't a waiting line. When they come home to the United States of America, there shouldn't be a waiting line. When they need health care, when they need their education or they need a job, there shouldn't be a waiting line. When they signed up to fight, there wasn't a delay, and there shouldn't be a delay in Washington, DC, when it comes to funding for our troops.

I urge my colleagues on the other side of the aisle to support this bill and get this voted on as soon as possible—in fact, immediately.

I yield the floor.

The ACTING PRESIDENT pro tempore, The Senator from Tennessee.

Mr. CORKER. Mr. President, I agree with my friend and colleague from Minnesota, there shouldn't be a delay in funding our troops. I do find odd the urgency of the bill that has come to us a week before Christmas, something we passed out of here months ago.

I know that history has shown and certainly the Members who are part of the Republican side of the aisle have shown constantly that we care deeply about our troops and want to make sure they are funded. But the fact that this bill has come up at this time just demonstrates the tremendous hypocrisy with regard to what is happening as this sausage is being made in the majority leader's office on this health care bill.

The reason I speak to that is this is must-pass legislation. The Senator from Minnesota—as we all do—wants to see this passed. And all of us know this will pass. But I want to point out that in this bill, there is \$1.2 billion in money to go to physicians so that their pay will not be cut.

What this bill does is just point out again the tremendous fallacies of the process taking place beyond the ulti-

mate passage of this bill, and that is the health care bill we have been discussing now for months and months. The fact is, we are taking \$464 billion out of Medicare if this bill passes and we are using that money to leverage a whole new entitlement program. The fact is, we are not dealing with the physician pay cuts, which we all know are looming. We all know there is \$250 billion worth of cuts that will take place in physician pay over the next 10 years. We know this bill does not deal with that. Yet, somehow or other, on this Defense appropriations bill, we are dealing with that for a few months because everybody in the world who can wake up and put one foot in front of the other knows that right after this health care bill passes, in the name of being budget neutral—again, using all the gimmicks the Senator from Maine just talked about a minute ago; using 6 years' worth of cost and 10 years' worth of revenue; taking money from an insolvent program to create another program that will become insolvent over time—what it doesn't deal with is the SGR and the doc fix.

So what will happen is the majority leader, the chairman of the Finance Committee will come forth with a bill—right after this passes, I am sure, ironically—and pass another \$250 billion or try to pass another \$250 billion piece of legislation, unpaid for, just so that we can say—so that you can say—so that they can say that, in fact, a piece of health care legislation passed that was budget neutral.

Mr. President, I have to tell you, I came from a world where we focused more on results, and the process really wasn't much a part of it. But in this body, with 100 Senators and 435 House Members on the other side of the building, process matters some. It matters because it really keeps each of us feeling, hopefully, if we have the right process, that there is integrity in what is happening.

I think between the way this body and my friends on the other side of the aisle have used the CBO office and 6 years' worth of cost and 10 years' worth of revenues and all this to make it look as if this bill is budget neutral, yet knowing we haven't dealt with this very important aspect, it points to one part of this process. The fact that in the morning the majority leader is going to lay down about a 300-page amendment—one I haven't seen yet—that a few people working in close quarters developed—and I don't know if the Acting President pro tempore has seen this piece of legislation—and then he will file cloture on an amendment with 300 pages worth of changes, which I understand are going to be fairly important changes, without our having the ability to amend this legislation, to me, is pretty incredible. This is an important piece of legislation. It is going to affect every American in this country.

I was talking with some of my colleagues earlier today—and I know the Senator from South Dakota has been very concerned about the provisions of this bill—and Senator THUNE pointed out the other day, as the Senator from Maine did, about the taxes that start in 2 weeks and the benefits starting in 4 years, mostly. I know there are some benefits that start on the front end. But what my friends on the other side of the aisle were saying is that once this bill passes, that is just the beginning. There will have to be multiple changes over the next 4 years to actually cause this bill to work. This points to the fact that this is about a political victory.

I guess I would ask my friend from South Dakota, if we were going to pass a landmark piece of legislation and do so in a way that would stand the test of time, wouldn't you think we would vote on more than seven amendments? Wouldn't you think we would actually debate the bill in a real way and try to work out these difficulties in advance?

Again, just a few hours ago, my friends were telling me we are just going to try to pass this thing, then we are going to try to fix it over the next 4 years before all these problems hit Americans throughout our country, because what we are really doing on the front end is just collecting a lot of money. That is what we are doing to make this budget neutral. And then the real changes to the health care system take effect over time. We know we have problems, but we will fix those down the road. That is not exactly a process that I think passes muster with most people back home.

Mr. THUNE. Mr. President, would the Senator yield?

Mr. CORKER. I would love to hear from the Senator from South Dakota as to what he thinks about this type of process.

Mr. THUNE. If I might, through the Chair, Mr. President, ask a question of the Senator from Tennessee, if he will yield, because he is absolutely right. This is being rushed. This is a massive reordering and restructuring of one-sixth of our economy, which we are going to be expected to vote upon in just a few days, on a managers' amendment which will be the so-called latest deal struck behind closed doors, as the Senator mentioned. We are going to be expected to vote upon that without having seen it today. In fact, I don't think any of our colleagues on the other side, or very few of them, have seen it, nor have the American people.

I have listened as the other side has gotten up here today with all these statements of outrage and that it is insulting, it is unconscionable that this side would be holding up funding for the troops, and what strikes me about that is the deadline for passing the appropriations bills is September 30. I think that feigned outrage is all about

a bigger, grand sort of cynical plan at work here to try to push this health care bill through.

But would the Senator from Tennessee be able to answer a question regarding this. The Defense appropriations bill passed the House last summer. It passed the Senate in October, I think October 6. So we are talking 8, 9, 10 weeks ago now. Clearly, the Democratic majority's clock management is either very bad or this was part of some big, grand plan to push this thing to the very end and to jam this thing through, to try to set it up so that the health care bill could be passed right before the Christmas holiday without the American people having had an opportunity to see it, and the Defense appropriations bill, which carries a bunch of other unrelated items, would pass as well.

Does it seem a little odd and coincidental to the Senator from Tennessee that you would be debating the Defense appropriations bill right now when it could have been done weeks ago, if not months ago? In fact, these bills are supposed to be done by September 30, which is the end of the fiscal year.

Mr. CORKER. I do think it is odd. As my colleague knows, I think the two of us—all three of us on the Senate floor on our side of the aisle signed a letter to the Appropriations Committee and to the leader of the Senate asking that these be taken up one at a time so we would be finished with this work by the time the fiscal year ended. So it is ironic.

Let me tell you the purpose, in my opinion. I certainly do not know all the inner workings of what is happening on this floor in the Senate. But this is sort of a filibuster. In other words, there is a segment where we discuss this must-pass piece of legislation, where some things can be added in that have not been dealt with that are unrelated—unrelated to defense but also 1,720 earmarks, many of which are mighty suspect. But this is a filibuster, in my opinion, where during this period of time we can be drafting, or the majority leader can be drafting what I would call the “bad actors amendment.”

What I mean by that is, if you have had opposition to the health care bill, which is the real issue we are going to be dealing with over the next few days, if you have had some trouble with the bill, then you can go in and get some niceties.

For instance, I am sure if I decided I was going to support this bill, the health care bill—which I am not—I am sure there are all kinds of things that might spring up in Tennessee as a part of this health care legislation to make it so that the bill was more suitable, if you will, to the people of Tennessee and to me myself. My guess is this managers' amendment is going to be quite interesting to read. I look for-

ward to seeing the details because my guess is it not only will fix technical issues, but my guess is it will also fix some wants and needs of some people who might otherwise have difficulty supporting this legislation. So, yes, I think this Defense appropriations bill—give it a little time for this to germinate. We will have a chance to see that tomorrow for the first time when cloture is filed on it—as I understand, no debate, no amendments. I think it is a shame the Senate has gotten to the point where this is the type of process that is in place.

I understand my time may be up. If not, I would love to yield to the Senator from South Dakota.

The PRESIDING OFFICER. The time for the Republicans has expired.

The Senator from Pennsylvania is recognized.

Mr. SPECTER. Mr. President, I have sought recognition to comment briefly on the proceedings in the Senate in the last few days. I call upon my fellow Senators to reconsider the tactics which are being used to defeat the pending legislation. This body prides itself on being the world's greatest deliberative body. But that designation has been destroyed with what has occurred in the last several days.

We have seen a filibuster on the Defense appropriations bill. We are at war, and we have 68,000 young men and women in Afghanistan today who are giving life and limb for this country. We are debating whether they ought to be funded. I have heard the question raised by those in the military: Doesn't the Congress support the troops?

The impact on morale is potentially devastating when the Senate is not moving ahead to provide the funding, the money to support their efforts. I have no hesitancy in extolling their virtues at the highest level of patriotism. I wouldn't want to make any comment about a corollary negative, as to what is going on in this body. But it is hardly in the spirit of patriotism that we are asking these young men and women to be in harm's way and to give life and limb.

We have seen procedures involved on the reading of the amendments.

Rule 15 does provide for reading: Amendments shall be reduced to writing, read, copies deposited on the desks of the majority leader and the minority leader before being debated.

Those are the purposes involved. But there is no intent in the rules of the Senate to have hours spent reading an amendment for dilatory purposes. The intent of the rule and the spirit of the rule is to inform people but not to have this body paralyzed by this kind of conduct.

We have passed the point of civility. We have passed the point of decency in the way this body is being conducted. I call upon my colleagues to reconsider these tactics and to try to move ahead

and do the people's business. The American people are perplexed, mystified—it is hard to find words strong enough on what the public reaction is. The public opinion polls show that approval ratings are plummeting—plummeting. People have no confidence on what is happening in this body, no understanding as to what is going on, and they see partisan political gridlock of the worst sort in the time since my election in 1980, and from my conversations with those who have been in this body a good bit longer and from my own study of the history of the Senate.

I urge my fellow Senators to reconsider these kinds of tactics and to try to get on with the people's business because that is why we are here.

I yield the floor.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KERRY. Mr. President, I thank the Senator from Pennsylvania for his comments. I associate myself with them and appreciate what he just said.

We find ourselves in a remarkable situation, where, frankly, there is an extraordinary amount of distortion and fakery taking place on the floor of the Senate. There is a great strategy of deception which the Republicans have engaged in and in which they continue to engage, claiming they are being left out of the process; claiming we ought to go back and start over; claiming they haven't been included; claiming they do not know what is going on. We are where we are today after a year and a half of effort in this initiative specifically—years and years beyond that if you want to go back to Teddy Roosevelt and Harry Truman and every President since then.

But right now we have a specific effort going. We began in the Finance Committee a year and a half ago, the summer of a year ago, where we assembled over at the Library of Congress, and we had an entire day during which time we had Republicans and Democrats. We listened as a committee to experts from across the country about how to do health care.

Subsequent to that we began hearings, constant hearings. And then at the beginning of this year, 11 months ago, we began what we hoped would be a bipartisan process. No chairman in the 25 years I have been here and working here has ever reached out as much as I watched Chairman MAX BAUCUS reach out in an effort to try to get a bipartisan effort. How many Senators from the other side came to the table? For the entire summer, 3 months were taken up with the so-called Gang of 6, 6 Senators—3 Republicans and 3 Democrats.

Unfortunately, several of the Republicans have already walked away because they didn't like something that 60 Members of the Senate might want to do. So they walked away. The Senator from Utah is one. He was part of

those early negotiations. Then he said: I am not going to do this.

In the end, the Senator from Colorado, Senator ENZI, and Senator GRASSLEY, the Senator from Iowa, walked away. And Senator SNOWE, to her credit, has stayed at the table, worked hard with people, and continues to try to have a dialog about what it might need or not need. But somehow they come here with the notion that they have a right to dictate what is in the bill that 60 Senators might think otherwise about, and because they just cannot get their way on the big picture, they are even willing to try to block the funding for the troops in Afghanistan and Iraq. That is just stunning to me.

I learned full well firsthand what it is like to be fighting in a war when people back home are not supporting it. I vowed when I came back that would never be a mistake we might make again. We might disagree with the war, but we would never confuse the war with the warriors, the people fighting it.

In fact, these folks don't care, the folks on the other side. They are willing to just hold it hostage, do anything they can—not just to defeat health care because they don't like it because it is different philosophically from how they would approach it.

Incidentally, they opposed Medicare. I hope America hears this. This is the party over here that opposed Medicare when it was put in. They opposed Medicaid. They do not believe in that. They run around talking about the ills and dangers of a government program for health care. Which of them has brought an amendment to the floor ever or a bill to the floor to say: Stop Medicare, end it? They never do that.

It is a government program. How many of them want to take away veterans health care, a government program? They never do that. But they come to the floor and they jumbo mumbo the words around on the floor and confuse America and make everybody believe this bill is somehow what it is not. These are tried and true tactics. In a lot of places you call it demagoguery.

They have come here relying on crude but effective emotionally laden buzz words, tried and tested in focus groups, funded with millions of dollars. Where do the millions of dollars come from? They come from the people who want the status quo. Fourteen thousand people a day in America lose their health insurance. Where is their plan to put those 14,000 people back on the rolls? They don't have one. But we do; we do. That is what we are here to do.

There is so much good in this bill. Is it perfect? Of course it is not perfect. I will talk about that in a minute. But it is extraordinary to me that the folks who oppose it philosophically—they are never going to change. They keep

talking about let's go back and start over. Going back and starting over to them means let's write the bill the way we want it even though there are only 40 of us and literally to hell with the rest of you 60 who represent the majority of the country. That is their idea of going back to the beginning.

It is not going back to the beginning and coming up with a constructive way to approach it because they had that chance. All year long they had that chance. All they want to do is beat President Barack Obama. That is their theory.

I was here in 1994. Unfortunately it has some potency out there. You make the institution look bad, make the entire Congress look bad, and then the voters will say: O, my God, who is running it? Oh, it is those guys. We better go to the other guys now. Just make it look bad because people will not discern who is really responsible.

Let me be very clear. We are trying to move this forward. We have tried and tried, again and again, to reach out in a bipartisan way which requires compromise. Some people have come to the Senate in modern times with a new definition of compromise. Their definition is "do it my way," not meet you halfway, not give in to what a majority might believe they have a right to say is a fundamental bedrock principle of the way they want to approach a particular piece of legislation.

Here we are with some of our folks now on our side of the fence actually being emboldened by the comments they hear that distort the bill on the other side, to say: Oh, you guys better throw it in. Don't vote for it.

Yesterday we heard a person I admire and like and have become a good friend of, Howard Dean, who worked his heart out in 2004 to try to win, and then worked his heart out in 2008 to help elect this President.

Yesterday he wrote something which, incidentally, had some errors in fact about what was included and not included in the bill. But he said yesterday:

Let's kill the bill and start over.

As another person whose work I greatly admire because I think he holds things accountable, Keith Olbermann said Wednesday night:

This is not health, this is not care, this is certainly not reform.

I respectfully—and I mean that—respectfully disagree with both of them. I don't think they fully evaluated what is in this bill and what it accomplishes for America, nor fully evaluated the realities of what it would mean if you said kill it and start over. There is no President who is going to step up in the next few years if we don't make progress. There is no Senator who is going to invest in a process after this, if we don't make this reform work now.

If you follow that kind of advice and give up now because this bill isn't ev-

erything you want it to be individually, then the very reforms people have spent their life working for, reforms that the Democratic Party has been proposing for decades that are in this bill, many of us ran on them and said: This is why we want to come to Washington to accomplish this—they would be destroyed. That would be it. It would be gone. What a mistake that would be.

The fact is, there are things I wanted that are not in this bill. I am a passionate supporter of a public option. Do you know what our public option was in this bill? Our public option, ultimately, in this bill required the people who take part in it to carry the option with their premiums, not very different from a regular plan, except that it wasn't for profit. It had no public money to support it, and it wouldn't allow public money to come in and bail it out. It had to abide by the actuarial values and rules of the marketplace, the way private insurance companies do. But it just wouldn't have shareholders and a for-profit structure. It could drive competition in order to have those companies that we all know have not stepped up when it comes to making sure that they are there for the patients. Why? Because if you are for profit and you are one of these insurance companies answerable to Wall Street and your shareholders, your principal concern is to drive that profit. So what do they do? They hold onto the money until the last minute because they get the float in the market. As long as the money is in your coffers, then you are working the interest on it or you have it to use for your company. If you pay out at the last moment, you make more money. If you pay less than you have to pay, you make more money. If you cut people off, which they would do all the time, you make more money. If you tell people who bought their insurance, who thought they had the insurance: Sorry, we don't have that insurance for you because of a little clause down here that you didn't read, too bad for you, but you don't have the insurance, even though you have stage 4 cancer and you have two kids and you are a divorced parent, too bad for you, you don't have insurance. They do that because then they make more money. These are real stories. You can find thousands of them across America. How else do you lose 14,000 people a day who lose the insurance they thought they had or wanted?

This wasn't easy for Franklin Roosevelt when he tried to do it. It wasn't easy for Harry Truman when he tried to do it. It wasn't easy for Bill Clinton when he tried to do it. Some of us were here and tried with him. We understand how difficult it is. But you don't sound retreat. You don't ignore history and say: We are going to be better off by giving in to 40 people who are trying to destroy a Presidency and simply

can't stand the fact that there are 60 votes here and there is a President who has an agenda to fix things. So the best thing they can do is try and stand and stop it.

Some of our progressive friends have said because it doesn't have the public option, we ought to do that. Even though it doesn't have a public option, the bill encourages the creation of more not-for-profit insurers, which I will say a little more about in a minute, that have the ability to drive costs and increase competition. We don't have that today. Is that not worth fighting for on the Senate floor and putting into this bill?

Again, my friend, Howard Dean, wrote in the Washington Post that real health care reform needed this public option to "give all Americans a meaningful choice of coverage."

I happen to know this because he and I spent some time combating each other for the Presidency. In 1993, Howard Dean said of Medicare:

One of the worst Federal programs ever and a living advertisement for why the Federal Government should never administer a national health care program.

That shift of opinion on something as important as this leaves me asking whether they have analyzed, all these folks, the level of reform in this bill.

We need to step back and see the forest for the trees of what this legislation does. I believe this legislation, even though it doesn't have the public option I want—and there are a lot of other things it doesn't do that could make the bill more effective—I believe when you take the totality of this bill and measure it against the problems we have in America today in delivery of health care and you look at the ways in which this bill increases coverage for seniors, provides lower cost drugs for seniors, expands the number of people who will be able to afford health care, helps to promote any number of individual reforms, almost every single idea that is worth considering that has been put forward by any think tank or any group in America is in this legislation in an effort to do what we call bending the cost curve—a terrible phrase, a Washington phrase.

It just means lower the cost increase in health care. Bring it down so it is reasonable with respect to what people can afford in relation to the rate of increase of inflation and other costs in our lives.

The Senate bill that is attracting all this trumped up, completely inapplicable but effective politics of destruction, this Senate bill, in fact, provides a provision that will allow the States to establish health care coverage for people between 133 percent and 200 percent of poverty. It allows States, not the Federal Government telling them what to do, no government from Washington, as everybody is trying to pretend this does, it doesn't tell the

States what to do, but it allows the States to contract directly with plans that provide insurance. It allows those States to have the authority. This is States rights. This is the party that always talked about States rights. We are empowering Governors, we are empowering States individually to have the right to negotiate the premiums, the cost sharing, and the benefits for their citizens.

Something else the Senate bill does. It provides \$6 billion in startup funding under the Consumer Operated and Oriented Plan, CO-OP program. This money fosters the creation of a new nonprofit member-run health insurance that offers coverage in the individual and small group markets. Those are the markets where the costs have gone up most rapidly and where Americans have the hardest time surviving.

I just came back from Boston. A fellow came up to me, an unemployed pilot, at the airport and talked to me about the \$1,100 a month he pays for his family premium and how it was killing them. It goes up 20 percent a year. It is the market that is squeezing most Americans out. We lower those costs. We dampen down that increase, and we make it more affordable for people who are at the lowest end of the income scale, who deserve to buy insurance, deserve to have insurance. We make it more accessible to them and affordable for them.

The press has reported that one of the options being considered in the managers' amendment is the creation of the Office of Personnel Management-administered plan. That is a plan administered by the Federal Government that would offer individuals an option to get a national nonprofit plan. I would say to Keith Olbermann and Howard Dean, take a look at this. Look at the OPM-managed and co-op-managed plans that actually provide a not-for-profit option at the Federal level.

When I ran for President, I proposed allowing everyone to have access to the same health care coverage offered to Federal employees and to Members of Congress. Ask any American, do you think you should have access to the same health insurance that the Members of Congress give themselves? They will say yes. That is exactly what we do. We give Americans the option of participating in a plan administered by the same entity that administers the health insurance for Members of Congress. I think leveraging the role of OPM to encourage creation of a national nonprofit plan is a key way to lower health care costs and to roll more Americans into plans that devote a higher premium portion of dollars to medical dollars.

Some of our progressive friends have also said we ought to kill this bill because it has an age-rated premium. They want us to kill this bill because it has an age-rated premium. I don't like

age-rated premiums. It would be wonderful to get rid of them altogether. An age-rated premium is a premium, let's say for a lot of young people, because young people are healthier. When an insurance company looks at the young person, they say the odds of that young person having high blood pressure, any number of other diseases that seniors tend to have more because they are older, is less, therefore, we ought to charge those people less and we are going to charge the seniors a whole bunch more because they are much more likely to be a lot sicker, and it costs the system more. That does make sense to some degree. But the whole theory of insurance is to spread the risk of being sick among everybody.

Those young people are going to be old people one day—not a bad idea that they are going to be able to pay an affordable premium for good health care when they are older too. So maybe there is a sharing across the board. That is how you do your home insurance. That is how you do car insurance. It is spread across the entire population of users and risks that are within those user fields. Although there is some allocation, even in automobile insurance, we all understand, for age ratings and the likelihood that if you are young and a new driver, you may have an accident, more prone, and we have some deferential there, as we do in this bill.

People who are criticizing this bill ought to stop and take a look at what it does. Insurance companies are going to be prohibited from denying coverage or charging more because of a pre-existing condition. How many people in America complain: I can't get insurance. They turned me down because, once upon a time, I had this or I had cancer 4 years ago, but now I am cured but they won't give me insurance because they think it may come back and I am going to be sick later on. That is what insurance is for. But companies have been allowed to say no. This bill will prohibit companies from denying insurance to people because they have a preexisting condition.

I introduced the Women's Health Insurance Fairness Act, which prevents insurers in the individual market from charging women higher premiums than men. That is what has been happening all this time. I am happy to say that in this legislation, in our bill, we prohibit discrimination in those premium increases for women. Insurance companies will also be prohibited from dropping coverage once someone becomes seriously ill, and they are going to be required to renew your coverage each year. Why would Americans across the board not say: Wow, you guys are going to protect me so I can't be kicked off. You are going to guarantee that I can buy it, even though I had a preexisting condition. That sounds pretty reasonable to me.

Our colleagues don't come to the floor and talk about that. They just use a lot of scare tactics, pretending they don't know what is in the bill. They know what is in this bill because we did it in the HELP Committee, and we did it in the Finance Committee, and we have been doing it for 11 months. So insurance companies are going to be prohibited from providing a lifetime cap or an unreasonable annual limit on coverage. That sounds pretty reasonable to me.

Now, I also wish the bill would include an age rating so that insurance could not charge older Americans more. I hope older Americans are listening to this carefully because the fact is, the Senate bill imposes a 3-to-1 limit on age rating, i.e. the rating charged seniors is restricted to three times the level of premium that is charged to a young person.

A lot of people are going to react: Oh my God, you mean I am going to pay three times more than a young person? That doesn't sound fair to me. Guess what. When it began in the bill, it was 5 to 1. Under current state, premiums can be 25 to 1. There are States that charge 25 to 1, 20 to 1, 15 to 1. That is the way it is today. That is what seniors face today without this bill.

Guess what. In this bill, in the Finance Committee, we knocked it down from 5 to 1 to 4 to 1, and then, in the merged bill, we knocked it down to 3 to 1. In the House bill, it is 2 to 1. I ask a simple question: Is 3 to 1 or 2 to 1 better than 25 to 1 or 20 to 1? That is what is in this bill. This limits the age rating disparity in America. I offered an amendment to try to limit it to 2 to 1, but we were not able to carry that in the committee. Republicans spoke out against imposing a cap age rated premiums.

Charging older Americans nearly three times as much for health insurance is by no means ideal. I know that. But, boy, when you look around the country, the majority of States have no rating structure in the individual market at all, and there is a huge rate disparity, as I described, in the small group market. So you have no rating restraints. So we get down, at least, to 3 to 1. The House is at 2 to 1. Today, in most places in America, there are no restraints, nothing—zero—for the individual market, and there are high rating bands, as I said, of 20, 25 percent for the small group market.

Let me give you an example for Kentucky. We have a couple Senators from Kentucky on the Republican side. The rate bands in the small group market in Kentucky are as high as 25 to 1. I guess that is OK with them because they do not want this bill.

In Utah, the rate bands in the small group market can be as high as 34 to 1. I guess that is OK with them.

As I said, the 3 to 1 is too high, but, boy, is it a vast improvement over current law.
